Double White Killarney.—A sport of White Killarney originating with the J. A. Budlong & Son Co., Auburn, R. I., in January, 1910. It is stronger in growth than the parent, with the same general characteristics of foliage and growth. The flower is pure white in color, with an average of from forty to forty-five petals. It is a wonderful improvement over the parent, having size and substance in summer, when White Killarney is comparatively single. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

Killarney Queen.—A deep pink sport of Killarney originating with the J. A. Budlong & Son Co., Auburn, R. I., in 1909 that has the high color of Dark Pink Killarney with an increased vigor in growth. It compares among Killarneys as American Beauty does with other varieties, the stem and foliage being much heavier, and the petals nearly twice the size of the petals of Killarney. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

### ADDITIONAL APPOINTMENTS.

The following have been appointed as state vice presidents:

Massachusetts East—W. A. Hastings, Boston.

Massachusetts West—G. H. Sinclair, Holyoke.

Pennsylvania West—W. J. Smith, Pittsburg.

H. B. DORNER, Sec'y.

## The Boskoop Exhibition.

The buildings for the exhibition of forced shrubs and perennials, which will be held at Boskoop, Holland, in April of this year, are almost finished. They will be heated, free of charge, by the Dutch Central Heating Co., of Amsterdam, and illuminated by electric light, installed by the firm of Strous, of Dordrecht, so that the flowers can also be admired in the evening. In the exhibition grounds there will be a post and telegraph and hourly boats between Boskoop and Gonda, the nearest railway station. The honorary committee consists of forty members. The number of promised exhibits amounts to 500, the number of novelties to more than 100, and that of little known plants to 60.

C. PH. MOERLAND, Sec'y.

## Horticultural Society of New York.

The fall exhibition of this society will be held at the American Museum of Natural History November 3-7, inclusive. This early notice is given that local societies, the members of which may desire to participate in this large exhibition, may select for their own exhibitions dates that will not conflict with the above. A schedule for this exhibition is now being prepared, and as soon as ready it will be published.

## National Flower Show.

### ADDITIONAL PREMIUMS.

The show committee announces the following additional prizes to the schedule:

King Construction Co., special prize for vase of 30 blooms of any rose introduced since January 1, 1900, silver cup.

Display of cut lilac blooms, first \$15; second \$10.

Display of cut blooms of lily of the valley, first \$15; second \$10.

Display of cut blooms of amaryllis, first \$15; second \$10.

Display of cut blooms of marguerites, first \$10; second \$5.

All to be staged Saturday, March 25, judging at 3 p. m.

Ladies' Auxiliary Society of the S. A. F. prize—For the best table decoration, silver cup. To be staged Friday, March 31, judging at 3 p. m.

Boston Flower Exchange—special prize—For the best floral design, originality to count twenty-five points, first \$50; second \$30; third \$20.

The National Society of Gardeners will also offer thirty silver cups and numerous medals for prizes to be competed for at the National Flower Show, schedule to be issued in a few days.

J. K. M. L. FARQUHAR, Sec'y.

## Chicago to Boston.

The Chicago Florists' Club has decided to use the Lake Shore & Michigan Southern Railway on the National Flower Show trip to Boston and arrangements have been made with that company for a special section of the Lake Shore Limited to leave Chicago 5:50 p. m. Thursday, March 23, due in Boston the following evening at 3:30, provided a sufficient number of requests for reservations are received to warrant a special section; otherwise the party will be accommodated in special sleepers attached to the regular Lake Shore Limited, leaving and arriving at the same hours as above quoted.

The rate for the trip is one and three-fifths fare on the certificate plan, which means \$22 going and \$13.20 returning, or a total of \$35.20 for the round trip. Don't fail to ask for certificate at time of purchase. The selling dates are March 22 to 27 inclusive, final return selling date April 5. Passengers from western points should purchase to Chicago only and repurchase here, as no special rates are authorized west of Chicago. Pullman rates: Lower berth, \$5.50; upper berth, \$4.40; compartment, \$15.50; drawing room, \$20.00.

Sleeping car reservations should be made at the earliest possible moment by communicating with G. K. Thompson, General Agent Passenger Department, Lake Shore & Michigan Southern Railway, 180 South Clark street, Chicago. Telephone, Harrison 7000.

## Cleveland to Boston.

The Cleveland Florists' Club will have a special car, Cleveland to Boston, and everyone is invited to join the members on this Lake Shore & Michigan Southern train, leaving the Union Station, Cleveland, Friday, March 24, at 7:40 p. m., and arriving in Boston at 3:40 p. m. March 25. The fare is \$13.25 one way, lower berth \$3.50, upper berth \$2.80. Reservations should be sent in early to Frank A. Friedley, Rocky River, O.

## Meetings Next Week.

Baltimore, Md., March 13, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.  
 Cincinnati, O., March 13, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott Flower Market.  
 Cleveland, O., March 13, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit avenue.

Will commence their Spring Sales **MARCH 14,**  
Consisting of

**Roses, Rhododendrons, Conifers, Box,  
Bulbs, Roots, Etc.**

**W. J. ELLIOTT,**

**Auctioneer.**

### Washington.

#### PLENTY OF STOCK.

Business is fair considering the fact that Lent has begun. All the dealers report a slight falling off in business during the first days of Lent. In fact, the first week and the last week of the Lenten season are generally the worst for florists. There is an abundance of good flowers for all purposes. This is particularly true of carnations, violets and the tulips and narcissus. In plants, rhododendrons, azaleas, lilacs, primroses and ferns are plentiful. The weather is moderate with a fair amount of sunshine.

#### NOTES.

Brush and grass fires have caused considerable alarm and some damage during the past week to the growers in the outlying sections. It required the united efforts of the fire department and the neighbors February 26 to save the range of M. J. McCabe, Good Hope. A grass fire ignited the greenhouse of Samuel Lucas, Anacostia, March 2, and it was almost totally destroyed. Mr. Lucas is one of the few colored men who have thus far engaged in growing flowers under glass and he deserves the sympathy of the trade.

George H. Cooke, a local retail florist, but who has a national reputation on account of the fine work that he has executed, is now suffering severely from blood poisoning which started in the forefinger of his left

hand from the prick of a rose thorn. He is under the care of the most skillful specialists and it is now believed that the poison has been checked.

F. W. Miller, a capable and popular designer and decorator who for a number of years has been employed by A. Gude & Bro., was married on February 13 to Miss Grace Williams, an attractive and popular young lady of this city. The good wishes of many friends will be with this young couple in their new sphere of life.

The Southern Evergreen Co., 508 Florida avenue, of which Howard Jefferson is manager, is handling not only a good stock of green but likewise good cut flowers and flowering plants.

The Washington Florists' Exchange, which is exclusively a wholesale house, reports an increasing business.

R. G. Kidwell, a well known grower, is now general foreman at the range of Alex. B. Garden, Anacostia.

There is a probability of a number of local florists going on the excursion to Dreer's, early in March.

Visitors: C. J. Van Bourgondieu, Hillegom, Holland; S. De Wreede, representing Van Zonneveld Bros. & Philippi, Sassenheim, Holland; Percy E. Rigby of S. S. Pennock-Meehan Co., N. Y.; — Perkins of Jackson & Perkins, Newark, N. J. A. F. F.

SAN FRANCISCO, CALIF.—An exhibition of spring flowers will be held by the Pacific Coast Horticultural Society and the California Floral Society March 30-31, at the Fairmount hotel.

### Baltimore.

#### LENTEN SEASON.

The coming in of Lent cuts short the season's social festivities, and the stores felt the shock. One or two deaths of prominent persons during the week made a pretty fair demand for good flowers, but a great bulk of mediocre and inferior stock passed into the hands of the fakirs. Of violets, freesias, bulbous stuff, etc., there seemed no end.

#### NOTES.

The Gardeners and Florists' Club is making good progress with its preparations for the meeting of the Society of American Florists. The Committee on Souvenirs will have a publication equal to the standard heretofore maintained in other cities. In the meantime dodgers have been prepared and circulated narrating some of the advantages of Baltimore and giving readable information as to the historical and other events which give distinction to the city. This will be supplemented with similar printed matter likely to arouse attention.

At the great automobile show there was exhibited a new machine for the use of James Hamilton, of Mt. Washington, which is so constructed that it may be used with two bodies, one for transporting greenhouse products, and the other for passengers. This enterprising grower has begun the construction this spring of two more houses, each about 100 feet long. Mr.

Hamilton forced about 110,000 lily of the valley this year, and Charles M. Wagner, his superintendent, states that recently an order for some fifty cases of cold storage pipes was placed, with the hope of supplying local requirements, every day in the year.

Miss M. Erdman, daughter of Peter C. Erdman, whose products always stand high in the market, will open a store on Greenmount avenue, practically adjacent to the cemetery of the same name, which ought to be a fine location. S. B.

#### Cleveland.

#### GOOD SUPPLY.

From a famine to a feast has been the changed conditions here in the last few weeks. Carnations are very plentiful, and have dropped in price. Roses are coming in more plentiful from day to day and the quality improves with more sunshine, but white roses are still short in supply. Lily of the valley moves slowly. Easter lilies are arriving in large quantities and find a fairly good market. Boxwood is selling well and greens of all kinds clean up daily. Altogether business is on the increase, there being a good supply of the various kinds of bulbous stock, roses, carnations, sweet peas, etc., from which to make selection.

#### NOTES.

The Taylor Flower Shop holds regular clean-up sales every Saturday afternoon after 3 p. m., at which time all stock left over is sold at bargain prices.

The new club which was organized March 2 is known as the "Flower Club." The next meeting will be held April 7 at the Hofbrau.

Jos. Strojcek and Mrs. Jos. Nosek on Broadway have been busy with funeral work the past week.

Miss Ehrbar of the Ohio Floral Co. has been ill and in the hospital but is improving.

C. F. B.

WILLIAMSBURG, PA.—A. J. Hill will open a florist shop and greenhouse on Arch street. Building operations are now going on.

### Chicago.

STOCK ARRIVING IN LARGER QUANTITIES.

A week of exceedingly pleasant weather for the month of March has made a material change in the flower market both in quantity and quality. March made its entry like a little lamb and according to the old saying boisterous weather may be looked for later in the month. But the market is very variable and one prominent wholesaler remarked that it sometimes changes three times in the course of the day in certain lines. Stock as a whole is much more plentiful and in but few cases is there any scarcity, and in almost all kinds of flowers the buyer is able to make a selection, yet there is no great surplus except in a few articles and the verdict generally is, that nearly everything cleans up well, but once in a while in the less called for flowers at low prices. American Beauties are in short supply, not nearly enough to meet the demand, and there is no opportunity for the buyer to pick over the stock but must take what is offered to him and at the seller's price, and these are still maintained at good figures. The other roses are now in good supply and the quality is superb, and there is plenty of all grades so that the purchaser can make a choice. Killarney, White Killarney, My Maryland, Mrs. Jardine, Bride, Bridesmaid, and Richmond are of splendid grade, good color, fine stem and luxuriant foliage. Some fine blooms of Uncle John, Rhea Reid, Perle des Jardin, Sunrise and other varieties are also seen. Carnations are now being received in large quantities and the prices are considerably lower, some sales of the inferior grades going very cheap, so much so that some of the smaller stores are placarding them at bargain prices. White carnations have, however, taken a rise in anti-

## "The Busiest House in Chicago"

Central 3155.

51 Wabash Ave., CHICAGO

pation of St. Patrick's day and the great demand for these for funeral work for which all the retail stores seem to have good call. Violets are a drug on the market. Whether this is owing to the increased supply or the decreased demand on account of the Lenten season and the cessation of society functions, or perhaps both, is not fully explained, but there is very little call for the double and not much for the singles, and they all move very slowly. Lilies and callas are quite plentiful but the demand is good and they clean up well and at steady prices. Orchids are in good supply and about even with the demand, the quotations not changing to any great extent. Sweet peas are being received in great quantities and some of the blooms are fine, of good color and with nice long stems, and there is a great variety. Of bulbous flowers there is a great sufficiency both in quantity and variety. Lily of the valley is of excellent quality and quite plentiful. Narcissus of all kinds, tu-

lips of all colors, and the quality is much better than it has been. Hyacinths, both cut and in pots, are bright additions to retail window displays. The other spring flowers are also arriving in increased supply and stocks, pansies, antirrhinums, wallflowers, marguerites, calendulas are seen in the early morning receipts. Greens are in good supply and the quality first class.

### NOTES.

Pochmann Bros. Co.'s stock is arriving in much larger quantities than for some time past, and they are now enabled to take care of all orders. The Killarney and White Killarney roses that this firm is offering are of the best quality, of fine color, and fine foliage and stem. Lilies and callas are also arriving in splendid condition, and the lily of the valley that they are cutting is of its usual high quality.

J. C. Bruehner, West Sixty-ninth street, is to open another store at Thirty-first street and Cottage Grove Avenue.

**POEHLMANN'S FANCY VALLEY  
EXTRA FINE HARRISII LILIES**

We make these a specialty.  
Can supply them all the year.  
Once tried you will have no other

The Riedlein Basket Co., 713 Milwaukee avenue, has leased the store building 683 located a few doors east of their present location and will use it as a shipping room. This firm has received from their factories at Ebersdorf, Germany, a large shipment of baskets for the Easter trade.

August Lange and wife have the sympathy of many friends in the trade in their recent losses by death, Mr. Lange's mother, Mrs. Matilda Lange, dying in this city March 4 and Mrs. August Lange's father, Chas. Huxhold, Omaha, Neb., died February 7.

Weiland & Risch are cutting quite heavily in Killarney and other roses and a large supply can be seen at the store this week. They will be on with a large crop of carnations and will have plenty to supply their customers for St. Patrick's Day.

Harry Mannheim was confined to his home for several days this week suf-

fering from a severe case of blood poisoning. He was greatly missed at the Hoerber Bros. store, where he fills the position of general manager.

Chicago University is planning for a botanical garden and new range of greenhouses. The garden will be located between Fifty-eighth and Fifty-ninth streets on Cottage Grove avenue, covering about 6½ acres.

The J. E. Deamud Co. is pleasing their customers with a fancy grade of sweet peas and carnations. The ferns that this house is offering are also of exceptionally good quality.

Ernest Wienhoeber and Emil Buettner will start soon on an extended eastern trip, closing at the National Flower Show at Boston March 25 to April 1.

Frank Oechslin, 4911 Quincy street, is offering some fine shamrock plants in two-inch pots for the St. Patrick's day sales.

**U S Budlong's  
E Blue Ribbon Valley.**

Chas. W. McKellar is now receiving regular shipments of southern bulb stock, consisting of jonquils, narcissus, etc.

E. B. Washburn and wife will return March 11 from a most delightful visit at Pasadena, Calif.

H. Roth, the well known florist of Lafayette, Ind., paid the city a visit on March 3.

A. N. Kinsman, Austin, Minn., returning from Cuba, was a visitor this week.

# CARNATIONS ROSES BEAUTIES

We are cutting a splendid grade of **Carnations** in all the leading varieties,  
and are now prepared to fill all orders.

**PETER REINBERG,** 35 Randolph St., **Chicago**

## GREEN CARNATION FLUID

**Yellow.** It is the latest thing out and is causing a commotion around the Chicago Flower Market. Try a sample quart. Price, same as the green. This advertisement will not appear again, so place your order now with the person who first placed this fluid on the market.

**MRS. F. BEU, 27-29-31 Randolph Street, CHICAGO.**

J. A. Budlong and Sinner Bros. have leased the entire second floor of the building at 7-9 East Randolph street, a few doors east of the E. C. Amling Co., and opposite the Newberry library. Phil Schupp, with J. A. Budlong's, says that they will move from their present location to the new one sometime in April. The building is well lighted and has both a passenger and freight elevator and a front and rear entrance. This is most desirable location and will be great improvement over their old store they now occupy.

Peter Reinberg is on with a large crop of roses and a splendid grade of Killarney, Richmond and other roses can be seen at the store this week. Carnations in all leading varieties are also arriving in fine condition and in quantities large enough to meet the demand.

Vaughan & Sperry are receiving a large supply of Killarney roses, sweet peas and carnations of good quality. Wm. Johnson will succeed Will Timme as packer and the latter will devote his time to looking after his father's greenhouses on North Forty-second court.

The Chicago Carnation Co. find a ready sale for their carnations and clean up their stock at an early hour. The demand for orange blossoms has been very good the past week, and a large number of clusters of this fragrant flower were sold.

A. C. Rott, the enterprising florist of Joliet, paid the city a visit on March 6, returning home the same evening. His window displays are attracting a great deal of attention, especially on Saturdays when he makes a special feature of violets.

Dwight L. Harris, vice president and general manager of the Pulverized Manure Co., 32 Union Stock Yards, is preparing to put their fertilizer on the market in five-pound packages in a very attractive box printed in three colors.

Miss Nettie Parker is suffering from blood poisoning of the left thumb as a result of a scratch from a rose thorn some little time ago. She is, however, attending to her duties as stenographer at the Chicago Carnation Co.'s store.

J. A. Budlong is supplying the customers with an exceptionally fine grade of My Maryland and Killarney roses. The carnations that this firm is cutting are of A1 quality and are greatly appreciated by the trade.

The E. C. Amling Co. is offering an exceptionally fine grade of sweet peas of which they have a large supply. Mr. Amling is having an enjoyable time at Orange, Calif., and is not expected home until next month.

C. L. Keun is enjoying a brisk trade at his store, at 6847 Wentworth avenue, funeral work occupying his attention.

## U S Budlong's E Blue Ribbon Valley.

Bassett & Washburn are cutting a splendid grade of Rhea Fields and American Beauty roses. Carnations are in good supply and enough to meet all demands.

Eli Cross, the well-known grower of Grand Rapids, Mich., is shipping a splendid grade of lilies to this market.

F. G. Hunt of Park Ridge has several houses of sweet peas and carnations that are now in full crop.

John Kruchten's chief offering this week is a splendid grade of sweet peas of exceptionally good quality.

E. F. Winterson Co. is receiving a large supply of carnations, lilies and callas of good quality.

Mons Olson of the Pochlmann Bros. Co.'s force is on the sick list this week.

E. H. Hunt is featuring a splendid grade of lilies and carnations this week.

L. H. Winkelman, who has been in the employ of Bassett & Washburn for the past sixteen years, will leave this firm after the Easter rush and go into the coal business with his father-in-law. He has been a valued employee and the firm regrets to hear of his leaving, but his many friends wish leave, but with many friends who wish him success in his new undertaking.

Frank Williams of the Alpha Floral Co. is enjoying a six months' tour of the European continent which will terminate at his old home in Greece. Mrs. Williams says his health has been poor for some time, and it is hoped that the trip will prove beneficial.

Wietor Bros. are now receiving a good supply of both roses and carnations which enables them to meet all demands. They will be in good shape to take care of orders for white carnations for St. Patrick's day, as they are cutting these very heavily.

Geo. F. Weiland, the well-known grower at Evanston, will rebuild a portion of his old range and erect 11 new houses. He has already commenced operations and is making concrete foundations. The lumber for the houses is expected to arrive this week.

John Zech and Matt. Mann, members of the well-known firm of Zech & Mann, returned March 5 from a two-week's visit at New Orleans, where they were in attendance at the Mardi Gras. They report having had a most enjoyable time.

**St. Patrick's Green Dye....**

I handle only the original true IRISH DYE. Put up in powder form, which is easily diluted. Don't buy liquid dye when you can get this powder so cheap and dilute it yourself. Full directions with each package. One package will dye from 100 to 150 carnations.

Per package, 25c; 5 packages, \$1.00; per dozen, \$2.00

**Chas. W. McKellar, 51 Wabash Ave., Chicago.**

Mrs. F. Beu sold the first wallflowers of the season at her stand in the Flower Growers' market on March 3.

C. L. Washburn escorted W. S. Fragar, an enthusiastic orchid amateur of Japan, around the market last week.

Chicago Bowling.

Two teams representing the league will visit Milwaukee on March 19, when they will play the two crack florist bowling teams of that city. A large body of rooters will accompany the locals and efforts are being made to secure a special rate from the railroad companies. It is requested of all who intend to accompany the team to leave word with Allie Zech, chairman of the committee of sports, so arrangements for all can be made. On March 1, the Violets won two and lost one game to the Roses and the Orchids won two and lost one to the Carnations. The following table shows the number of games won and lost by each team to date:

|            | Won | Lost |         | Won | Lost |
|------------|-----|------|---------|-----|------|
| Orchids    | 45  | 15   | Roses   | 24  | 36   |
| Carnations | 30  | 30   | Violets | 21  | 39   |

Individual and team scores for games played March 1:

### Chicago Florists' Club.

The regular meeting of the Chicago Florists' Club was held at the Union Restaurant March 2 with a good attendance, Vice President Kohlbrand in the chair. The transportation committee reported in favor of the Lake Shore railroad for the Boston flower show trip, leaving Thursday, March 23, at 5:30 p. m. The following were elected members: Harry F. Gray, Des Plaines, Ill.; Wm. Wolf, 5708 Emerald avenue; Robt. E. Newcomb, 84 Randolph street; Edw. Goldstein, 84 Randolph street, and C. A. Beatty, 355 Dearborn street. Four new names were presented for membership: F. J. Kral, Jr., 1907 Halsted street; Wm. Harbitz, 3435 West Chicago avenue; Gustave L. Klimmek, St. Clair, and Illinois streets, and Edw. A. Ollinger, 324 Dearborn street.

F. Dörner & Sons Co., Lafayette, Ind., exhibited two new carnations, White Wonder and Gloriosa. The latter scored

86 points, but White Wonder was not in condition for scoring.

The feature of the next meeting will be a discussion on fertilizers.

MINNEAPOLIS, MINN.—A comprehensive plan to make Minneapolis a city of flowers the week of the civic celebration July 2-8, was outlined before the garden committee February 28. Seeds have been secured and before these are planted there is to be a general cleaning up of the highways and byways of the city. Sixty people have agreed to serve on the committee which will undertake this preliminary work. The garden committee includes the mayor, Theodore Wirth, superintendent of parks, A. S. Woods of the department of agriculture at the state university, and others.

### Philadelphia. CHEAPER PRICES.

The first week of the Lenten season was fairly active, there being a good demand for stock when it was offered at moving prices. Reduced rates are in evidence all along the line, occasioned principally by the increased output, the volume of stock having increased at least 100 per cent over that of a couple of weeks ago. Roses are much more plentiful and are of better color and substance. Growers say that another couple of weeks will see a decidedly larger increase in the quantity. American Beauties, which have been holding at such high figures since the holidays, are beginning to come in larger quantities and will soon be within the reach of the average buyer. Bulbous stock is plentiful and in good demand. Sweet peas are also offered at lower prices. Some really good stock is seen and can be had in quantity. Violets, double and single, are moving very well, considering the quantity coming in. Cattleyas appear to be in good demand as nothing worth having is seen under \$5 per doz. The next event is Paddy's Day and a visit to W. K. Harris' shows them to be prepared for this Irish anniversary. Something over 70,000 2-inch pots are seen filled with this Irish clover, all grown from seed imported from the Emerald Isle. Some years ago the idea of handling such a large lot of this plant by one firm would have been thought impossible, but Mr. Harris, who has always done things on a large scale, grew it in large quantities from the first, and his very boldness has kept competitors out of the field. The cut is all grown and run off between January 1 and March 16, fitting in between the Christmas and Easter holidays nicely. Much of this large stock is used by the department stores, who give it away to their customers. There are also hundreds of clover-shaped pans and small round pans filled with shamrock, which are handled by the store men, who find it a good seller and all right for a window display.

### CLUB MEETING.

The meeting of the Florists' club on account of a better space to illustrate the lecture, was held in the lecture room. The views were of the new Riverton greenhouses of H. A. Dreer, recently erected by the King Construction Co. Mr. King gave a very entertaining account of the methods of their construction, and also explained at some length the heating system. At the conclusion the speaker received the unanimous thanks of the club. It was determined to have a banquet in the near future, the committee being instructed to go ahead and make the necessary preparations. The club membership is growing, as was evidenced by the election of four new members and the nomination of five others for next meeting.

### NOTES.

Robert Craig is home from the Isle of Pines and appears much benefited by his sojourn in that warm clime. He is much pleased at the growth made in the dracenas and other plants he is giving a trial here, and thinks there is a great future for the growing of such stock there in a prepara-

tory way, and finishing it here. Much American capital is going to the Islands for investment in land and plantations of oranges and grape fruit.

The coming show at Boston is attracting considerable interest amongst the craft here and many large exhibits will be sent by the florists' supply men. The plantsmen will also be well represented and keep up the reputation of the city as the supply center of the country for all kinds of foliage plants.

Charles Henry Fox has moved from his cozy store to a few doors below, the new number being 223 South Broad street.

K.

### •Pittsburg.

### BUSINESS QUIET.

Lent is giving the flower business quite a jolt. Social events of any consequence are few and far between. The old saying a poor beginning may have a good ending, perhaps, may be applied here, we hope so at any rate. The bottom has certainly fallen out of this market, carnations are bringing summer prices, roses are holding better, particularly the fancy ones, other grades are plentiful; sack cloth and ashes are putting the quietus on the violet trade, the demand being very light. Asparagus plumosus, adiantum and smilax are very plentiful.

### NOTES.

Prof. Vincent's lecture before the club February 28 on "Bulbs and blooming plants" proved very interesting. About two hundred members

The stock which we are offering is of a well known high standard, produced by successful growers around Philadelphia. If you carry the truth in mind, when you read what we

ing about their banquet and dance. The popular phrase is, "It's the best ever."

A. Christiansen of Stoneham, at the Park St. market, never has any trouble disposing of his carnations, quality is and has been his motto always—it pays.

Robert Montgomery, Natick, is recovering from a threatened attack of pneumonia, like most busy men, bed is a hard place for him.

Nelson & Johnson of Framingham consign to their agent in Park St. Market some of the best carnations coming into Boston.

N. F. McCarthy & Co are going to erect an iron frame house 300 feet long for their new Pink Killarney rose.

J. S. Manter is receiving some nice Killarney and antirrhinum.

Henry M. Robinson has gone west on a business trip.

P. Welch has just returned from a western trip.

Visitors: S. S. Pennock, Philadelphia.

Weather, springlike. MAC.

LOUISVILLE, KY.—The American Floral Co. has been incorporated with a capital stock of \$10,000. The incorporators are John S. Skrobaneck, H. Oswalk, Geo. and Rudolph S. Keobanks.

A GLUT OF MATERIAL.

With the advent of Lent, a few days' sunshine, a falling market and an increased supply of material the past week has been glutty. It is only a repetition of the yearly event that the grower expects, there are some salesmen hopeful that another week will see improved business. There is good material of every description. Roses, with the exception of American Beauty, are quite plentiful. Carrying coals to New Castle is an oft-repeated phrase, but American Beauty is being shipped from another state here, whether the local growers have lost the art of getting them or there is not enough glass devoted to that particular rose I do not know, but it seems as if more Beauties could be handled from the local growers than there is at present. Carnations are abundant and good, sweet peas are also, violets are overdone at present and prices have dropped to a very low point. Lily of the valley is plentiful and of good quality, but goes slow. Some very nice freesias in the market are of good quality, but buyers are slow on them. Daffodils are very good and sold in lots. Snapdragon. I am told, have no one to look at it, but let us cheer up, the worst is probably over or is yet to come. There are some nice displays in the retailers' windows. Galvin had a beautiful window filled with orchids while another was filled with nice heaths in 4-inch pots, a nice bunch of Mrs. Aaron Ward rose and a few pots of shamrocks to remind us of St. Patrick's Day; Zinn and Comley had each beautiful window decorations. Ramblers, cyclamens, azaleas and other flowers made a nice display. Penn & Brothers, roses and violets; Silverman, Killarney roses and the Rosary; McMulken, Doyle and Hoffman, all past-masters in the art of decorating, each had a distinct and beautiful setting. The wholesalers report shipping trade good, considering the state of the market. Robinson & Co. report good on American Beauty; Welch Bros. good trade on American Beauty and an increased trade on acacia pubescens; there is a future for this variety and growers should take it up. Mr. Welch states they receive consignments from seven different growers, and the demand sometimes is in excess of the supply. McCarthy & Co. report good volume of business.

NOTES.

The members of the Gardeners' and Florists' Club have not got done talk-

Dagger and fancy ferns \$1.00 per 1000. Green and bronze Galax, 90c per 1000; by the case, \$7.50. Boxwood, 50-b case \$7.00 by the lb., 25c. Laurel Wreaths, 10 inch, \$1.75 per doz.; 12 inch, \$2.25 per doz.; 14 inch, \$3.00 per doz.; 16 inch, \$4.50 per doz. Laurel Trimming, 4 and 5c per yard.

Birmingham, Ala.

The trade conditions have been very good throughout the entire season, and all the florists have enjoyed a good business. The stock has been of high quality all the year, and all are cutting splendid bloom at the present time.

Hugh Seales has had an exceptionally busy season with a great deal of funeral work. Herbert Clausen, formerly of Utica, N. Y., is now at the retail store, and during his brief stay here had made many friends. S.

## SPECIAL NOTICE

The Mac Niff Horticultural Co., 62 Vesey St., New York, wish to announce the opening of their Auction Department on Tuesday, March 14, at eleven o'clock, a. m. Sales every Tuesday and Friday. Stock will consist of Rhododendrons, Rose bushes, Magnolias, Azalea Mollis, etc., also Tuberous Rooted Begonias. Caladiums, Valley Clumps and other bulbous stock.

R. W. MacNiff, President and Auctioneer.

Louis Schmutz, Jr., Secretary.

### New York.

#### TREMENDOUS INCREASE OF STOCK.

The tide has turned. The day of scarcity of stock and correspondingly high prices has vanished, temporarily perhaps, but gone nevertheless. And we do not believe that the coming of the Lenten season is in any way responsible for lower prices on flowers, the reason is manifest in the tremendous increase in the crops for, with one exception, every kind of flower grown has about doubled up in quantity during the last week or ten days, so why put the blame for lower prices upon the observance of religious rites when it is so apparent that the cause is simply an increase in the supply? American Beauty roses are sure enough scarce, but not any more so than they were at this time last year. Other varieties of roses are getting very plentiful. There is a fair demand for the short stemmed grades, but the special grade stock does not move at all well, and further cuts in prices are to be expected, and there has been quite a drop in values already. Carnation prices have almost been cut in half and the way stock is coming in every day it would not be surprising to see them go lower still, they are getting very, very plentiful. Sweet peas are almost in the same condition, thousands coming in where there were but hundreds a short time ago. Violets also are heavy and accumulated stock goes in job lots at times to the street workers at almost \$2.00 per thousand, this is the condition in a nutshell. Lilies, lily of the valley, callas, tulips, narcissus and all the miscellaneous stock is affected, prices for all have a very marked tendency downward, still, few complaints are heard as it is freely admitted that since January first the wholesale prices of cut flowers have been at high water mark almost continuously.

#### NOTES.

Fred Sanders, noted horticulturist of England and Belgium, sailed for home March 8 after a fortnight's visit with Julius Roehrs. During an interview with Mr. Sanders, he expressed the opinion that America is fully abreast of Europe in all pertaining to plant cultivation, and way ahead of them in greenhouse construction. He sees many changes since his last visit, twenty years ago, and refers to the statement made by him at that time that orchids would become popular and be used in quantities here. How well has his prophecy been fulfilled. He noticed particularly the interest we are taking in stove plants and how well they did here. He was sorry that his stay was limited to a fortnight. It prevented him from visiting Chicago, for his friend, Carl Cropp, told him that coming here without seeing Chicago was like going to Rome without seeing the pope. Mr. Sanders was much impressed with changes in New York, the increased size of florists' establishments, the size of city build-

ings and the modes of transportation. Those fortunate enough to meet Mr. Sanders while here have been much impressed with his genial good nature and are only sorry he could not stay longer among us.

The March meeting of the New York Florists' Club will be held on Monday, the 13th, in the Grand Opera House building, corner Eighth avenue and Twenty-third street. Pres. Nugent is noted for being punctual and the gavel will hit the marble promptly at eight o'clock, so out of town members can see the close of the meeting and still have time to get their trains.

The outing committee, Jos. Fenrich, chairman, held a meeting on March 4 in the office of Henshaw & Fenrich, and did quite some preliminary work in connection with the summer outing, which will take place in June, they will have an interesting report to make at the club meeting on Monday night.

John Donaldson is confined to his home, Elmhurst, L. I., with an attack of rheumatism. A directors' meeting of the Cut Flower Exchange was scheduled for March 4, but was postponed for one week on account of Mr. Donaldson's inability to attend.

Alex. McConnell, the Fifth avenue retailer, will in the near future move a little further up the avenue, his present number is 571 and he goes to 611.

The dinner at Shanley's, March 18, is going to be one of the best ever, the committee, of which C. B. Weathered is chairman, are working strenuously and are meeting with many applications for tickets, so a large attendance is already assured.

Carl Stumm, retail florist, Fourth avenue and Nineteenth street, has been suffering from a broken ankle which he got from slipping down on an icy sidewalk, he is now able to get about with the aid of crutches only.

The Greater New York Florists' Ass. held their annual dinner and reception at "Raub's restaurant, Brooklyn, March 9. Tickets were \$3.00 each, there was a good attendance and the affair was most enjoyable.

Richard Merritt, who has charge of the plant and flower departments at the Siegel-Cooper stores, says that the business in gold fish and canaries is increasing very greatly.

The MacNiff Horticultural Co. will hold their first auction on March 14, rhododendrons and other coniferous stock and other hardy plants will be offered.

Wm. Elliott & Sons will open their spring auction season March 14, with a sale of bulbs, roots, roses and a general line of hardy stock.

James McManus, the orchid specialist, will move from 42 to 55 West Twenty-eighth street, May 1.

Frank H. Traendly and Walter F. Sheridan made a hurried trip to Philadelphia, Pa., recently.

John N. May and wife, Summit, N. J., have sailed for Bermuda.

#### SUPPLY INCREASES.

The volume of business transacted is large, while the supply of stock as a whole received and on hand is still larger. While at the beginning of Lent there was some let up in the demand, still the daily clearings are satisfactory to all. The quantity and quality of the flowers are both improving with the brighter weather. This is true of pink flowers principally and especially of Killarney roses. While the supply of these is very light the quality is A. 1. Bridesmaid, too, has improved. The Taft Rose is again taking rapid strides to the front, and as soon as the continued bright hot weather sets in, will come into its own and be a leader. The call for American Beauty is good while the offering in good ones is short. The supply of carnations still increases, and while the sales are good, still the quantity on hand is so large that they do not clean up entirely day by day. Single violets seem to be crowding doubles out of the market. The supply of the former is letting up somewhat and as a result prices stiffened slightly the early part of the week. Lilies and callas are more than sufficient for requests. Bulbous stock is arriving strong and sells at fair price. Lily of the valley still drags and there is a slight over-supply of sweet peas. The supply of greens is ample for all demands.

#### NOTES.

Wm. Murphy is now in his new location, 309 Main street, where he occupies the whole of a four story building. Tuesday all the men that could be spared from the various Murphy greenhouses at Delhi came to the city and moved most everything that was not there already into the new building.

The marriage of Geo. Durban, Jr., of the North Side Flower Store, and Miss Amelia Stible took place recently. After a large church wedding a dinner was served at the bride's home.

The Anglo Importation Co. will open a store in the Sinton Hotel block on March 17. This establishment will be managed by Mrs. Thaden and will handle flowers, fruits and wines.

The following intend to make the trip to the flower show at Boston: C. E. Critchell and wife, J. A. Peterson and wife and R. Witterstaetter, who will also serve as judge.

The regular meeting of the Florists' Society will be held at P. J. Olinger's, 128 East Third street. The host will provide refreshments.

Geo. Tröme, of the Tromey Flower Shop, and Miss Margaret Unstead, of E. G. Gillette's, have returned from the Mardi Gras.

C. J. Ohmer of West Palm Beach, Fla., has been sending very fine Asparagus plumosus to E. G. Gillette.

Satisfaction guaranteed.

**E. A. BEAVEN, Evergreen, Ala.**

Robert Buck & Co. of Washington C. H. have been consigning some very fine carnations to C. E. Critchell.

The flower show committee has the advance schedules of premiums ready for mailing this week.

Thos. Windram left for his asparagus farm at Leesburg, Fla., the early part of the week.

L. H. Kyrk has been receiving very large quantities of fine sweet peas. Eddie Bossmeyer at C. E. Critchell's is reported as on the sick list.

Following are the bowling scores and the standing to date:

|                      | 1st | 2nd | Ave. |
|----------------------|-----|-----|------|
| Albert Sunderbruch   | 168 | 211 | 169  |
| Wm. Schumann         | 123 | 158 | 167  |
| C. E. Critchell      | 137 | 158 | 163  |
| Wm. Sunderbruch      | 158 | 164 | 161  |
| Ray Murphy           | 181 | 182 | 160  |
| Al. Hornung          | 151 | 122 | 158  |
| Ed. Schumann         | 176 | 166 | 156  |
| R. C. Witterstaetter | 129 | 180 | 152  |
| F. Fricke            | 149 | 145 | 147  |
| A. Heckman           | 131 | 159 | 151  |

**J. H. SPRAGUE, BarNEGAT, N. J.**

# The Grandest Fern of the Age

## Nephrolepis Roosevelt

**Nephrolepis Roosevelt** is a sport from *Nephrolepis Bostoniensis*, but a wonderful improvement over the parent variety and others of stiff upright growing habit known as *Harrisii* or the *Harrii* type. It is a stronger maker of fronds and young plants than any other variety and will produce a larger finished plant in a 6-inch pot than Boston or *Harrisii* will produce in a larger size.

The finished fronds of **Nephrolepis Roosevelt** are at least a third wider than Boston and have more graceful drooping habit. The pinnae are distinctly undulated giving them a beautiful wavy effect which attracts the eye instantly. Cut flower dealers will find fronds of Roosevelt invaluable for design work. A single plant of Roosevelt grown in a 6-inch pot will when finished almost double the number of fronds produced by Boston or *Harrisii* type varieties and while Boston and *Harrisii* show stiff upright growth in a 6 inch, the wide wavy fronds of **Roosevelt** droop gracefully over the pot, hiding it completely from view. Finished 3-inch plants of **Roosevelt** are equally as large and more attractive than the average well grown 4-inch Boston and growers of *Harrisii* and the *Harrisii* type admit they cannot produce attractive plants of these varieties in pots smaller than 10-inch. Without an exception **Nephrolepis Roosevelt** is the most valuable fern ever offered for florists' use. It has the vitality to withstand more rough treatment than other varieties and does not revert to the parent type. In our long experience we have never offered the trade any plant with greater assurance of entire satisfaction and predict **Nephrolepis Roosevelt** will very soon lead in popular demand, sweeping from the list, Boston, *Harrisii* and *Harrisii* type.

We are booking orders for delivery, June 1, 1911, and will fill them in strict rotation as to the date received. Get yours in early, you will not be disappointed in this fern. 2 1/4-inch pots, 40c each; \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000; 25 plants at 100 rate; 250 plants at 1000 rate.

**Good & Reese Co.** LARGEST ROSE GROWERS IN THE WORLD.  
SPRINGFIELD, OHIO.

# James Vick's Sons, Largest Growers of High

We have grown Asters longer, introduced more varieties, grow larger quantities and sell to more Seedsmen and Florists than any other Aster grower in America.

## Vick's Imperial Rose

This illustrates one of the newest of half a dozen varieties from the same family as Daybreak and Purity. A deep rich rose color. One of the best recent introductions.

### Prices:

|           |        |
|-----------|--------|
| 1-16 oz., | \$0.20 |
| 1-8 oz.,  | .35    |
| 1-4 oz.,  | .65    |
| 1-2 oz.,  | 1.20   |
| 1 oz.,    | 2.00   |

## Vick's Early Upright

Numerous readers of THE AMERICAN FLORIST will recognize this as a popular novelty of last year. Many Florists claim they got more flowers, larger blooms and longer stems than they could grow of other early kinds, because it grows as vigorously and yields as abundantly as many of the late Asters. The flowers are solid, ball shaped and considerably above the average in size. A medium early variety which has been a money maker wherever tried. Two colors, white and lavender pink.

### Prices:

|           |        |
|-----------|--------|
| 1-32 oz., | \$0.25 |
| 1-16 oz., | .40    |
| 1-8 oz.,  | .60    |
| 1-4 oz.,  | 1.00   |
| 1-2 oz.,  | 1.75   |
| 1 oz.,    | 3.00   |

James Vick's Sons,

# Grade Aster Seed in the World, Rochester, N. Y.

**Rochester, New York.**

**Vick's  
Mikado Pink**

## The Rochester

One of the most beautiful Asters ever introduced. Selected by the Chamber of Commerce as the official flower of Rochester, and renamed by us at their request. A mid-season, freely blooming large flowering variety.

### Prices:

|           |        |
|-----------|--------|
| 1-64 oz., | \$0.20 |
| 1-32 oz., | .30    |
| 1-16 oz., | .45    |
| 1-8 oz.,  | .75    |
| 1-4 oz.,  | 1.25   |
| 1-2 oz.,  | 2.25   |
| 1 oz.,    | 4.00   |

**Vick's  
Violet King**

Introduced by us several years ago. Catalogued now by all leading seedsmen. Habit is similar to Vick's Late Branching, vigorous growth with long, stiff stems. Flowers resemble the quilled varieties, but much larger and broader, the inner petals being fantastically twisted, curled and incurved, completely covering the crown.

### Prices:

|           |        |
|-----------|--------|
| 1-16 oz., | \$0.20 |
| 1-8 oz.,  | .30    |
| 1-4 oz.,  | .50    |
| 1-2 oz.,  | .80    |
| 1-oz.,    | 1.50   |

Our "Aster Book for Florists" containing full descriptions of these and all the other leading varieties, will be mailed free to Florists and commercial growers only.

Our booklet "How to grow Asters," price 10c, free with every order of Aster Seed.

## Nashville, Tenn.

Geny Bros. LEADING  
FLORISTS  
212 Fifth Ave. No. NASHVILLE, TENN.

St. Louis.

The Lenten season opened up with  
an increased supply of flowers and  
trade has fallen off considerably. The  
retailers in the downtown districts are  
advertising cheap sales of violets,  
sweet peas and carnations. Bulbous  
stock moves slowly. American Beauty  
roses come in slowly and other roses  
are not over plentiful.

## NOTES.

Andrew Meyer, Jr., city forester,  
will retire in April. The applicants  
for the position are many. The retiring  
officer very strongly endorses Ju-  
lius Koenig, who has been a faithful  
assistant for two years and is capable  
of filling the position.

Will Smith, of the W. C. Smith  
Wholesale Floral Co., will be married  
March 9 to Miss Helen G. West, of  
Edwardsville, Ill. The boys will give  
him a rousing reception on his return  
from his honeymoon.

Geo. Schriever, salesman at C. A.  
Kuehn's, who was recently married,  
was presented with a beautiful cut  
glass water set as a wedding present  
by his friends.

Hugo Gross will have 16,000 feet  
next season devoted to violet culture,  
growing the following varieties: Cy-  
clops, Kaiser Wilhelm, Admiral Avel-  
lan and Boston.

Geo. Waldbart has a fine display of  
azaleas, lilacs, primroses and cut flow-  
ers.

The Mullanphy Flower Co. reports a  
large business in funeral work, the  
boys working day and night.

W. F.

PORTLAND, ORE.—At the 25th annual  
meeting of the Oregon State Horticul-  
tural Society there was one of the  
largest and most successful apple and  
fruit shows ever held in the state,  
there being several carloads on ex-  
hibit. There were three prizes of \$250  
each, one, a sweepstake won by Hood  
River and two offered by the presi-  
dents of the Great Northern and  
Northern Pacific railways, won by The  
Dalles and by Hillsboro respectively.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, June, 1911.

WHITE CLOVER, choice, is another of the very scarce items.

WINTER YETCH has come to stay and is in steady increasing demand from the best farmers.

VISITED CHICAGO: C. W. Scott, of the Yokohama Nursery Co., New York; H. G. Windheim, Omaha, Neb.

CHICAGO.—Prices on the board of trade March 8 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

MANY growers have supposed that the term "Formosum" referred to a district type of Japanese lily but this season's experience causes one grower to call it the "Heinz" lily.

SOME Nebraskans seem very anxious to put over a drastic seed law in that state regardless of the rights of the seedsmen and placing little or no responsibility on the farmer seed grower.

BON VOYAGE.—A. W. Annandale, of the Steele, Briggs Seed Co., Toronto, Ont., and C. W. Scott, of the Yokohama Nursery Co., New York, are planning a European trip, sailing from Montreal about June 1.

ONION SET sprouting has entailed picking to such an extent, with consequent shrinkage, that prices of choice stock are advancing, quotations at Chicago this week being as follows: Reds and Yellows about 80 cents and Whites \$1.25.

THE American Seed Trade Association has decided not to hold its annual convention in Milwaukee. On account of another large convention being held there, accommodations could not be obtained. The selection of the place of meeting will be announced as soon as the decision is made.

WASHINGTON, D. C.—F. W. Bolignano & Co. report that trade is better than in previous years. Bad weather has prevented a great rush but everybody seems to have all the business they can handle. Onion sets are moving and peas are almost entirely sold out. Sales of clover seed are slow.—F. Mann & Co., who have an extensive

trade in Maryland and Virginia, report largely increased sales of vegetables and flower seeds. Their implement trade is also improving.—A. F. F.

NEW YORK.—Business continues to increase steadily and all hands are busy. Within the last few days counter trade has received quite an impetus through the coming of milder weather.—J. B. McArdle and Miss May Concanon, both of Vaughan's Seed Store staff, are to be married on Sunday, March 12, the ceremony to be in St. John's Church, Brooklyn. Mr. McArdle has made a wide circle of friends during his six years service for the firm and all wish good luck to him and his bride.—C. W. Scott, of the Yokohama Nursery Co., returned from the west March 7 and A. Kakuda, representing the same house, is in Boston.

Adolph Goldenburg, of the R. M. Ward & Co.'s force, has just returned from an extended trip through Texas, Louisiana and other southern states.—Visitor: J. C. Vaughan, Chicago.

### Canadian Seed Growers' Association.

At the annual convention of the Canadian Seed Growers' Association, held at Ottawa, February 16 and 17, the following officers were re-elected:

Dr. Jas. W. Robertson, Ottawa, Ont., president.

L. H. Newman, Canadian building, Ottawa, Ont., secretary-treasurer.

Vice-presidents: Prof. C. A. Zavitz, Guelph; G. A. Gigeault, Quebec; John Mooney, Regina, Sask.

Executive Council: Prof. M. Cummings, Truro, N. S.; Prof. John Bracken, Saskatoon; Dr. J. W. Robertson, Ottawa; Prof. C. A. Zavitz, Guelph; G. A. Gigeault, Prof. L. S. Klineck, MacDonald College, Que.

Directors: C. C. James, Deputy Minister of Agriculture, British Columbia; W. W. H. Hubbard, Deputy Minister of Agriculture, New Brunswick; W. Thompson, London, Ont.; the Hon. W. R. Motherwell, Minister of Agriculture, Regina; J. O. Duke, Olinda, Ont.; Prof. M. Cummings, Truro, N. S.; Prof. W. J. Black, Winnipeg; Theo. Ross, Charlottetown, P. E. I.; George Bathe, Winnipeg; Prof. C. A. Zavitz, Prof. F. P. Archibald, Truro, N. S.; J. W. Wheaton, Toronto; Prof. L. S. Klineck, D. Innes, Tobique River, N. S.; George Harcourt, Deputy Minister of Agriculture, Edmonton, Alta.; T. S. Waugh, North Bedouque, P. E. I.; G. A. Gigeault, John Mooney, Jno. Bracken, Saskatoon, Sask.

### Imports.

During the week ending February 4, imports were received at New York as follows:

Peter Henderson Co., 214 bags seed. H. Frank Darrow, 166 packages seed, 59 cases plants, 26 cases apple seedlings.

A. T. Boddington, 59 bags and one case seed, five cases plant wash.

McHutchison & Co., 58 cases plants. Weeber & Don, 32 bags seed.

J. M. Thorburn & Co., nine bags seed, seven packages mushroom spawn. Vaughan's Seed Store, six cases mushroom spawn.

Wm. Elliott & Sons, five cases plants. Stump & Walter Co., one barrel seed.

F. R. Pierson Co., one case seed.

To others: 1,831 bags, 965 double bags, 612 packages, 103 barrels, one case and one box seed, 173 cases and 61 boxes plants, 56 cases lily of the valley pips, 24 cases and 11 packages trees.

### Catalogues Received.

W. Atlee Burpee & Co., Philadelphia, Pa., seeds; Aggeler & Musser Seed Co., Los Angeles, Calif., seeds; Germain Seed & Plant Co., Los Angeles, Calif., seeds and plants; Elmer D. ## NEW RED DAHLIA MRS. MINNA BURGLE.

A cross between Joe Thomson and Clown, originated by Mr. J. Burgle of Fruitvale, Calif., and named after his wife Mrs. Minna Burgle, is the best Red Decorative Dahlia ever produced and will precede every other red variety now grown for cut flowers here or abroad and will draw your attention instantly when planted in a collection of dahlias; one of the most showy flowers ever created.

True decorative, bright scarlet showing a darker shading in center, bold, erect flowers 6 to 8 inches in diameter with excellent stem; foliage remarkable substance; height 5 to 6 feet; good keeper and will not burn in hot weather and more freely blooming than either parent. This variety has been tested by me for three years, and has shown no weak points. A vase of 50 blooms shown by me and a basket of Mrs. Minna Burgle Dahlias exhibited by Sievers Floral Co., of San Francisco, both received first prize in the Fall Flower Show in San Francisco and caused more comment among gardeners and visitors than any other exhibit. Cut flowers sold for the first time last year brought 50 per cent more than any other variety of dahlias, including Joe Thomson.

Strong tubers, \$1.00 each; \$9.00 per dozen.

**PAUL H. ECKELMANN,** San Rafael, Calif.

Detroit.

AVERTING A GLUT.

The pre-Lenten season was marked by many special events calling for great quantities of flowers. This demand, together with the call for flowers for funerals, kept the question of supply and demand of little importance. This condition prevailed until the last of the week when the reaction began to be apparent. Heavy consignments of bulbous stock with increased supplies of carnations and roses were the sign posts of the fast approaching spring days with the anticipated dullness of the Lenten season. The threatened glut, however, was happily arrested by the timely action of two retailers who extensively advertised bargains in flowers for Saturday. This move required the use of thousands of blooms that were sold at low prices, which, however, yielded surprising results to the growers who looked for a total loss on much of the product thus disposed of. If more of the retailers would adopt this scheme of popularizing flowers there would never be a glut and the total product of the growers would pass through the hands of legitimate florists to the final consumers and the street fakirs would not, as they do now, alone enjoy the benefits of the unavoidable heavy crops periodically.

CLUB MEETING.

The club meeting, March 6, was well attended, the chief attraction being an address by Philip Breitmeyer, the club's first president, on his observations in Cuba, where he visited during the whole of last month. Ferd Kolbe's address on "Carnations," scheduled for this meeting, was deferred till the next meeting, March 20. Mr. Breitmeyer said that he found only one florist on the whole island and he dealt only in plants, cut flowers being an unknown feature of his trade. He observed many fine specimens of trees indigenous to that country but found floriculture, strictly speaking, woefully deficient, with no prospects for its development as we have it. Some laurel trees were found sixty feet high. In the cemeteries great numbers of metal and porcelain emblems were seen, embracing the usual designs common to our use for funerals. Bougainvillea grows luxuriantly and is used for the adornment of many of the parks, and other public buildings, almost completely covering them. Hibiscus, too, were numerous and attain great size in that country, where the climate seems so congenial to them. In nearly every home of any preten-

sions whatever could be seen plants, not native grown but evidently obtained from the States. The climate is very warm though the nights are comfortably cool. Havana is fast becoming Americanized and many roads of Cuba are better constructed and maintained than ours. The ex-mayor's address was most interesting and occupied the greatest part of the time given to the meeting. A vote of thanks was given him. A. Colwyn, Voorhout, Holland, was a visitor and entertained the members with a talk on the bulb industry of his country and its novel topographical features. Robt. Jean,

who succeeds to the business of E. A. Scribner, retired, was admitted into membership. The closing time of the club was given over to the entertainment committee, which provided refreshments generously. J. F. S.

# CARNATIONS

## White House

The Quality White. Won the Silver Cup at Morris-town for best undisseeded variety; Bronze Medal at Pittsburg, and five other certificates. ## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice-President;  
R. S. W. Severance, 503 Union St.,  
Building, Louisville, Ky., Secretary; M. L.  
Rutenik, Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, March 4.—Mushrooms, 50 cents per pound; cucumbers, 20 cents each; lettuce, \$1 per dozen heads; tomatoes, 25 cents per pound; radishes, 60 cents per dozen bunches; asparagus, \$6 per dozen bunches; rhubarb, \$1 per dozen bunches; grapes, \$1 per pound; beans, 25 cents per quart; peas, 25 cents per quart.

Chicago, March 6.—Mushrooms, 20 cents per pound; cucumbers, \$1.50 to \$1.75 per box, small; lettuce, 25 cents per pound; radishes, 10 cents to 45 cents per dozen bunches; rhubarb, 25 cents to 50 cents per dozen bunches.

### Notes on Cucumbers.

The system of training should be decided upon before starting the plants for the spring crop. It takes a good many more plants to set a house for the single stem system than if trained on trellises and allowed to grow at will. There is considerable difference of opinion in regard to the merits of each method. However, if one is a little acquainted with the business, the matter is often one of labor. It takes a good deal of attention to keep the single stem plants in shape; so much so that good growers hold the opinion that in the long run the results are about the same. In other words, while the single stem method does produce an increased crop, the cost of labor often offsets such increase. We do not like to plant cucumbers among lettuce for various reasons, hence we adopt the single stem system because we can catch a little time, as by planting closer our crop comes in sooner than the other way. The last crop of lettuce is often our most profitable, but our cukes get a late start. They make up for any apparent loss of time, as plants started in brisk heat and kept going will outstrip those started early and crowded in among a heavy crop of lettuce, excessive moisture and in a low temperature. One thing at a time is often a good motto.

MARKETMAN.

### Montreal.

#### BULBIOUS STOCK SELLING WELL.

Trade is good, although there is a scarcity of roses and carnations, but a tremendous business is being done in bulbous stock, both in pots and out. The old cry "There is no money in bulbs" is forgotten and money is actually reaped from the despised bulbs, especially during the time when the Dutchman calls around for his orders. Roses are still very scarce and of poor quality, but carnations are better but still short in quantity. Sweet peas and violets are quite plentiful and help to give variety. Easter plants are in preparation everywhere. Lilies are a very unreliable lot and it will take a lot of shifting around to get them in all together at Easter time. Hydrangeas are well budded and should be easily managed by the middle of April. Pot roses are making nice breaks and apparently will be well budded. Spireas, with some growers, are a failure, refusing to break, and again with others

are first class, coming from the same source, the fault seems to be with the grower.

### NOTES.

The Gardeners' and Florists' Club held a Ladies' night February 20, which was pronounced so successful that it will be repeated before long. A party of members visited the Forest and Stream Club at Dorval, Tom McHugh, the head gardener, was found right on the spot. The greenhouses were a beautiful sight to behold, every plant a perfect specimen, and in the grouping of colors rare taste was shown. Jos. Bennett's was also visited. Joe is selling his stock as fast as it grows. Here were seen the finest violets in the country. A large variety of Easter plants are in preparation. Roses were off crop.

If anybody wants to see perfect carnations, go and see Hall and Robinson's and be convinced. Their Easter plants are coming along finely. Roses are off crop at present.

P. McKenna & Son will build a house of something like 40x200 feet for general plants.

LUCK.

### Syracuse, N. Y.

A monster floral feature was a part of a general movement, March 4, to lift the \$160,000 indebtedness of the Hospital of the Good Shepherd. Twenty-five thousand carnations were provided and by night the man without a flower on his coat lapel, was scarce. From morning until evening attractive girls were ready with a smile and a carnation to exchange for any sum tendered and the effort added several thousand dollars to the hospital fund.

The Syracuse Rose Society has decided to petition the Park Commission to set aside one of the city parks for rose culture, similar to the Boston rose garden. The first exhibition of roses under the auspices of the society was held in the Hiawatha room of The Onondaga. More than 300 roses were displayed and at the close were sold at auction, netting \$30 for the Hospital Fund. The exhibitors included P. R. Quinlan, W. E. Day & Co., Syracuse, and A. N. Pierson Co., Croton, Conn. During the evening W. C. Barry, of the firm of Ellwanger & Barry, Rochester, delivered an address on "How to Grow Hardy Roses." He said that the cultivation of roses by a business man for pleasure, afforded useful and healthful exercise. School teachers should encourage rose culture and by doing so would produce a race of nature lovers. He advised the purchase of 2-year-old bushes, rich

fertilizers and that the bushes be set far apart. Varieties could be so planted that one could have roses in his yard all summer. Bushes should be cut back severely in the spring, and in the fall bent down and fully covered with dirt. New roses produced within the last five years are hardier, superior in color and texture and easier for the amateur to cultivate. Eighteen new members were elected. A carnation meeting will be held March 14, and a floral show at the State Armory in June.

A. V. B.

### Cleveland Notes.

Frank A. Friedley, manager of the Gasser Co., entertained a party at his home, February 26, and proved that he not only was a good grower of flowers, but also raised fine poultry which the women folks cooked admirably, and everybody enjoyed the feast. A trip through the greenhouses found the roses, carnations and pot plants in a fine healthy condition. Anyone looking for system should visit the Gasser Greenhouses, for here there is a place for everything and everything in its place. The party consisted of C. Gerdum, C. Russell, H. James, G. Bates, H. Bates, Geo. Bates, F. W. Gartman, Bert Parks, J. Kirchner, C. Kirchner, F. Knobel, G. Schaub, A. Barber, C. Schmitt, W. Kruzen, T. Smith and A. Miller.

The Florists' Club held a meeting February 29, there being about 35 members present. Advertising so that it will benefit the florist business was discussed, and many suggestions offered. A special meeting will be called to take up the matter. A. Miller, of Skidmore and Irwin, Philadelphia, addressed the meeting, advising a literary programme at each meeting on some subject connected with the trade.

### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size 3 1/2 inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per 5000, \$400.00. 25 at \$10.25 at 1000 rates. Place your order now to be in on early deliveries.

## The Nursery Trade

American Association of Nurserymen

W. P. Stark, Louisiana, Mo., President;

E. S. Welch, Shegadah, Ia., Vice Presi-

dent; John Hall Rochester, N. Y., Sec'y.

Thirty-sixth annual convention to be held at St. Louis, Mo., June 14-16, 1911.

NORWICH, CONN.—Edward P. Clark will on March 1, assume the management of the nurseries of O. E. Ryther on West Main street.

NEW HAVEN, CONN.—The Kopf Nursery and Realty Co. have been incorporated with a capital stock of \$70,000, and the following officers: Henry B. Kopf, president; Matthew H. Laity, secretary, and William Dickerman, treasurer.

GREENVILLE, S. C.—The Greenville Nursery Co. has been organized and chartered with a capital stock of \$10,000. The following officers were elected: J. H. O'Neal, president; W. S. Bradley, vice-president; J. B. Bruce, treasurer; J. J. McSwain, secretary; W. P. Wilson, general manager.

### American Peony Society.

A meeting of the committee to arrange for the next exhibition of the American Peony Society, to be held under the auspices of the Pennsylvania Horticultural Society in Horticultural Hall, Philadelphia, Pa., June, 1911, was held at the rooms of the latter society March 1. There was a full attendance of the committee as follows: Bertrand H. Farr, president and chairman; J. H. Humphreys of the Andorra Nurseries; H. C. Simm of Henry A. Dreer; S. Mendelson Meehan of Thomas Meehan & Sons, and J. H. Styer of Concordville, Pa. There were also present David Rust, secretary of the Pennsylvania Horticultural Society, and R. T. Brown of the Cottage Gardens Co., Queens, Long Island, N. Y.

The meeting was very enthusiastic and gave encouraging promise of a most successful exhibition next June. The committee was gratified to receive the offer of a number of special premiums from different firms and were assured by Mr. Rust of the hearty co-operation of the Pennsylvania Horticultural Society and other local exhibitors.

It is intended, if possible, to arrange the date so that the local mid-season varieties will be in their prime, which will allow exhibitors from the north to send their earlier varieties and those from the south will be enabled to exhibit their later kinds.

### Ellwanger & Barry's Novelties.

In a booklet titled *Novelties in Trees, Shrubs, Roses and Hardy Plants* issued by Ellwanger & Barry, Rochester, N. Y., this firm are offering some new and very valuable additions to the varieties now in cultivation. Among them may be mentioned the new Japanese cherry, James H. Veitch, which produces in early spring large beautiful rose-pink double flowers in the greatest profusion. In new trees are Aesculus Brioti, Briot's Red Horse Chestnut, Aesculus Plantierensis, a horse chestnut bearing yellowish white flowers with golden yellow spots, and Aesculus turbinata, the Japanese Horse

Chestnut. Four valuable American thorns, Crategus, Arnoldiana, C. Barryana, C. Ellwangeriana and C. Mac-anthra. Two beautiful Negundo maples, the N. Californicum aurea, Golden Negundo and N. Folii variegata, Silver Negundo; Pterostyrax hispidium, a rare and beautiful Japanese tree and Bechtel's double pink flowering crab. In ornamental shrubs are distinct varieties of Japan quince, Lemoine's new deutzias, valuable new weigelas, altheas and mock oranges, prunus and sambucus, the beautiful new Spirea Alchisonii, new lilacs, viburnums and the new Ampelopsis Lowii. The list of new varieties of roses is characteristic of this house containing all the best novelties, among which may be mentioned: Viochenblau, the blue Rambler, Orleans, Vaughan's White Baby Rambler, President Taft, Jonkheer, J. L. Monk, American Pillar, Climbing American Beauty and Rayon 'd Or. Also an extensive list of new phloxes and herbaceous plants.

### Indianapolis.

Flowers are more plentiful with variable demand. The auto show caused a heavy call for carnations.

### NOTES.

A. Wiegand & Sons have issued a nice pamphlet giving florists in other cities an idea of their facilities for filling orders. Homer Wiegand is in the heights of Brown County. He plans to build a \$5,000 residence this summer.

Members of the State Florist Association of Indianapolis who are going to the national flower show at Boston, will try to get the Rose Society to hold its meeting in 1912 at Indianapolis.

It looks as if Easter plants would be short, as the demand for plants has been heavy, and most of the stock sold.

Berterman Bros. Co. received honorable mention for their float in the auto parade.

Carl Graner, formerly with A. Wiegand & Sons, will leave soon for Portland, Ore.

Baur & Smith purchased a large quantity of glass while the price was low.

CLARENCE R. GREENE.

### Tuxedo Horticultural Society.

The regular meeting was held March 1. President Miller in the chair and with a good attendance. August Kammann and Thomas Lyon were elected members. The exhibits were of good quality and the judges, McIntosh, Thomson and Hilmers, made the following awards: Pink and white roses,

D. S. Miller, first and second; J. Tansey, third. Red roses, Joseph Tansey, first; Bridesmaid, A. Fischer, first. Carnations, rose pink, D. S. Miller, first; Alma Ward and red, Joseph Tansey, first; D. S. Miller, second. Class B, red, Patrick Cassidy, first; Albert Fischer, first for Enchantress and White Enchantress. Sweet peas, Albert Fischer, first for pink and white. Violets, Patrick Cassidy, first. Honorable mention to A. Fischer for antirrhinums and Cattleya Percivalliana and W. Hastings for display.

James Scott of Elmsford read a paper entitled "Botany as an aid to horticulture" and explained how botany helps the gardener, combining the scientific and practical work. Showing the different organs of the flower and manner of fertilization. Explaining the leaf construction and constituents and manner in which nature conducts the work. The importance of knowledge of the order of plants was explained, and how the forms of leaves and stems was used in the nomenclature. A discussion followed the lecture and a vote of thanks was passed to Mr. Scott. ALBERT FISCHER, Sec'y.

KENTIA NURSERIES, Santa Barbara, Calif.

Albany, N. Y.

An enthusiastic turnout characterized the March meeting of the Albany Florists' Club which was held at a hall secured for the occasion at 250 Western avenue. It had been announced that an exhibition of new varieties, a banquet, and an entertainment would be features of the meeting and as a result about 60 members of the club and others interested in the trade were present. A. N. Fierston, Cromwell, Conn., sent over samples of four new varieties of roses, Lady Cromwell, a light pink of some promise; Radiance, a dark pink variety; Prince de Bulgarie, light pink, and Dark Pink Killarney. All had long stems, good foliage, and buds of excellent shape and size. Fred Dornier & Sons Co., Lafayette, Ind., sent specimens of two new carnations, White Wonder and Gloriosa, a light pink variety. The Wan-ko-greenhouses, Barneveld, N. Y., were represented by a variegated carnation, Rainbow. Joseph Traudt, Canajoharie, sent specimens of his new alyssum Variegated Little Gem for which the S. A. F. gave him honorable mention at the Rochester convention last year. Fred A. Danker and Frederick Goldring of this city contributed some choice new varieties from their greenhouses as did also William Hannell of Watervliet. Henry Schrade of Saratoga showed specimens of his carnation Canary Bird, which attracted attention from the peculiar convolutions of the petals.

After the banquet President Danker introduced the toastmaster, John C. McAllister, who called for recitations upon Prof. John A. Howe, Jr., a well known electionist, and Dennis McCarthy, a clever amateur vaudevillian. Short addresses on subjects pertinent to the evening were made by nearly all of the members and visitors present. Among the latter were James J. Cairns, representing H. A. Dreer Co., Philadelphia. Cairns was on the return to Philadelphia after a trip of two and a half months extending to the Pacific coast. His reports of visits to florists' organizations were instructive

## Vaughan's Rose Novelties

Lager & Hurrell, Summit, N. J.

San Francisco.

Trade for the last week has shown a marked improvement, and there is every indication that it will continue from now on. Previous to this time, however, the weather conditions have been unfavorable to shoppers and for this cause the florist business was interfered with to a certain extent. The stock brought into the market now is limited on account of the extremely cold weather that we are experiencing. Under these conditions the wholesalers find a ready sale for their stock. Carnations are now selling from 37½ to 50 cents per dozen and roses are exceptionally limited and high priced.

### NOTES.

J. A. Carbone and wife of Berkeley entertained with their well known hospitality a party of their friends at a dinner last week. The guest of honor at this affair was Geo. E. Baldwin, a well known orchid importer of New York. Prominent among those who attended were: V. Podesta and wife, Mr. De Guerra and Miss De Guerra, F. Pelicano, R. Schmidt, E. W. McLellan, P. Ferrari, and E. James. After a most enjoyable day the guests left for this city.

G. E. Baldwin's visit to this city was purely for business purposes and he left for the east some few days ago with a good share of orders.

Thomas Wright, Los Angeles, has been spending a few days in this city on business. ARTUS.

### Lenox Horticultural Society.

The monthly meeting of the society was held March 4 and was one of the best meetings to attend for the past eighteen months. It is only a short time ago the society attained the century mark on point of membership and yet the boom continues. Three honorary members and six on the active list were enrolled. The chairman of the schedule committee, F. Heeremans, reported progress; a few alterations had been made; in each case it was a step in the right direction; the dates of the summer and fall shows were settled. J. Clifford, chairman of the entertainment committee, reported that the annual ball had shown a good balance on the right side of the book. W. Jack read a paper on mushroom culture which was handled in masterly style. At first sight, the subject has a very dry and musty flavor with it; very bad material for an interesting paper. But Mr. Jack is a hard-headed Scotty, and practical to boot; he has methods of his own in growing mushrooms, and is credited with growing them success-

# EASTER PLANTS

## Prepare for Easter

And purchase your Easter supply direct from your old reliable friend, Godfrey Aschmann, of Philadelphia. Two more houses devoted this year to Easter plants, and we have an immense stock for immediate shipment.

### Lilium Multiflorum.

Our own importation from our general grower in Japan, raised from 9-10 in bulbs, started in 6-in. pots last October; have kept cold. 25c to 30c each, by the dozen or hundred. Plants, medium size, from 5 to 10 buds per plant. 10c per bud; plants under 5 buds. 12c per bud. Just right for Easter. We have the finest lilies this year in Philadelphia and all over the country. It is the town talk from florists and agents daily visiting our place. "We never have seen anything like it," said two well-known growers from Cincinnati and Short Hills, N. J. We have three houses all in 6-in. pots nicely stacked up, and can supply all applications.

Two houses in *Cineraria Hyb. Grandiflora*, just right for Easter; in bloom now if desired. Our strain in size of plants and flowers are twice as large as the old varieties; flowers when open will last much longer than usual; perfect green foliage in fine brilliant colors. 5½ to 6-in., 25c. 5c to 75c, and as high as \$1.00 each; 4-in., ready for a shift into 5½ to 6-in., 10c each; \$1.00 per 1-0.

Our *Hydrangea Olaksa* can be beat! full of buds; right for Easter trade; every branch nicely stacked up. 6-in. pots. 25c. 35c to 50c; 7-in. 75c. \$1.00 \$1.25 to \$1.50.

*Hyacinths* of our own importation, four best colors, Gertrude best pink; King of the Blues, best blue; Grand Maitre, light blue; La Grandesse, best white; 4-in. pots, now outside in cold frame, covered with leaves; two weeks will force them out into bloom; now \$1.00 (per 10); when in bloom, \$1.00 per 10.

*Von sion Daffodils* (double nosed), best double Narcissus in cultivation, three bulbs planted in a 5½ to 6-in. pot. \$2.50 per doz. pots.

*Tulips*, Tournecole double, red and yellow variegated and Murillo, beautifully shaded rose pink, three bulbs in one pot (4 in.), \$1.50 per 100 pots; \$1.80 per doz.

*Ipomoea Noctiflora*, our so well-known pure white, waxy MOONVINE, bearing flowers very fragrant and as big as saucer, 2½-in. pot, will make good stock for you to propagate from, \$5.00 per 100.

fully. It was a splendid paper; well read, and interesting from start to finish, and fully deserved the hearty

### Azalea Indica.

Remember we are headquarters for *Azalea Indica*, grown for us under contract in Ghent, Belgium under my personal inspection, by going abroad every year and looking them over. *Azalea Indica*, Easter forcing. Vervaeckens, Professor Wolters, Empress of India, Schryveriana, double variegated 60c, 75c, \$1.00 to \$1.50; Mme Van der Cruysen Simon Mardner, pink, Niobe, white, Apollo, red, 60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we have Niobe, Helena Thielman, Bernard Andreas Alba, white, Mme. Van der Cruysen, and others. \$1.50, \$2.00 to \$2.50.

*Azalea Indica*, with buds advanced showing color and partly in bloom. Deutsche Perle, Vervaeckens and Simon Mardner, 60c, 75c, \$1.00 to \$1.25.

### Araucarias Our Specialty.

We are the largest importers of these lovely decorative plants the *Araucaria Excelsa*, *Robusta Compacta* and *Glaucia*, 6,000 of the choicest last spring importation, now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the *Araucarias* in the future.

*Araucaria Excelsa*, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots. 15-18-20 seedlings, high. 4-5-6-7-8-9-10 years old 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant, 6-in. pot, 4 year old, 4-5-6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5-year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00, and what do you think a holy terror, 30 to 40 in. and over, 5-6 tiers, worth \$2.00, for only \$1.25 to \$1.50.

*Robusta Compacta*, *Excelsa Glaucia*, 6-in. pots. \$1.00, \$1.25, \$1.50 to \$2.00 each. We also have the nicest *Araucaria Robusta Compacta* and *Excelsa Glaucia*, a house full, for only \$1.25 to \$1.50, worth double.

*Adiantum Hybridum*, 6-in. pan 25c to 30c.

*Asparagus Sprengeri*, 2½-in. 3c, 4-in. 10c. *Sprengi cladstone*, two houses of our own importation, direct from Holland full of buds. 5½-6 and 7-in. pots, at 25c, 55c, 50c to 75c.

*Dracena Bruni*, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store or home decoration: stands heat cold and dust.

*Latania Borbonica* (Chinese Fan Palms), 30 to 35 in. high 6 to 7 in. pots. 50c, 75c to \$1.00 each.

*Kentia Forsteriana*, in fine shape, 6-in. pots. 30-35 40-45 in. high. 5-6 tiers, 20-25 in. high. \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

*Kentia Belmoreana*, 30-35-40 in. high 5-5½-6-7 in. pots. 5-6-7 years old \$1.25 \$1.50 to \$2.00 each.

*Kentia Belmoreana*, combination plants 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots. \$1.00, \$1.25 to \$1.50. 4-in. 20 in. high 20 to 25c.

Our Ferns this year are exceptionally very fine. *Boston*, *Scottii*, *Whitmanii* and *Scholzii*, 5½ and 6-in. pots, 25c to 30c.

*Ferns for Dishes*, big assortment 2½-in. pots, at \$1.00 to \$1.25. Remember all our Ferns are pot-grown, not lifted from benches.

*Neph. Gladiolus*, a new beautiful form, an improvement on *Scottii*, much shorter and bushier than *Scottii* 5½ in. pots. 50c 3-in. pots, 25c.

*Crimson Rambler Roses*, 6-in. pots, 3 feet high, nicely stacked up and best down, 50c to 75c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD CO., Youngstown, Ohio.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department 'N'

Detroit, Mich.

## WHAT THE USERS SAY

## KROESCHELL BOILER BETTER THAN TUBULAR BOILERS OR CAST IRON BOILERS

WASHINGTON, COURT HOUSE, OHIO. Have used upright boiler, tubular boiler, and cast iron boiler. The Kroeschell Boiler heats up better and easier than any other boiler we have ever had anything to do with. If we ever buy another it will certainly be a Kroeschell. Very truly yours, POOL & PARLIANT.

## TRY THE KROESCHELL FIRST—ITS AHEAD OF THEM ALL.

I have had eight or ten other types of boilers. The Kroeschell is the best I have ever used. Your boiler heats the water very quick; almost as fast as steam. Yours very truly, H. K. LEWIS, Dorothy, N. J.

Send for Catalogue

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

# Ready Reference Section.

10 CENTS PER LINE, NET.

## AGERATUMS.

Ageratums, 3-in., \$4 per 100; \$35 per 1,000; rooted cuttings, \$5 per 1,000. GEO. WITTBOLD CO., Edgebrook, Chicago, Ill.

# The Toledo Jardinier and Stand

Is a Work of Art.

They are made from quartered white oak, golden finish and polished. Hoops, handles, etc., are made of polished brass. They stand 31 1/2 inches high, 9 1/2 inches diameter.

**Toledo Tree Tubs**

are made of the everlasting red cedar. They have the extension stave foot, that holds the tub up from the floor or carpet. This feature permits circulation between the tub and the floor, also prevents rot or decaying. They have electric welded galvanized basic steel wire hoops, that will not rust or break. They are made in all sizes, from two quarts to two barrels.

# "ILLINOIS" Self-Watering

Window and Porch Boxes, Hanging Baskets, Pots, Etc., Etc.

Mr. Florist:—You can easily double your sales of plants by offering them in Self-Watering devices, for the very simple reason that the plants will live and thrive in spite of careless watering.

The better your plants grow in the homes of your customers, the better your reputation will be for selling good plants and the more people will buy from you.

We are selling thousands of these boxes to florists and consumers all over the United States.

We much prefer to sell through the florist only, and offer a handsome margin of profit.

If You Doubt their efficiency send us a trial order and return the goods after a trial if they prove different from our claims.

Illinois Self-Watering Flower Boxes were awarded Certificate of Honorable Mention by Society of American Florists in 1910.

Write for Catalog. Use your letterhead or no discount will be quoted.

## Here is a Straw from Des Plaines it Tells Which Way the Western Wind is Blowing.

DES PLAINES, Ill., is where that new factory of ours is located. The real estate men say that "until we started building, things were absolutely dead there, and had been for years." Now what has happened? New houses are going up—fine ones too; and land has greatly increased in value. Not a boom mind you, but a good healthy waking up. And why? They tell us that when a big, strong firm like ours comes into a town and securing a number of acres of land, immediately starts building a plant, that it inspires confidence. And confidence is the thing sound business is based on. Many of these people never heard of us before, but when we came into their town and began doing business, they evidently liked

the way we went about it—they saw we meant business.

Just this same kind of confidence is the basis upon which we want to do business with you. We certainly do mean business—and business with us means a square deal, prompt shipments, prompt payments and everybody satisfied or we want to know the reason why. If things are not right, we want to make them right,

Just to try us out, order even as small a thing as a keg of putty. You will get a genuine greenhouse putty. The kind that stays put. Address your letter to The Rookery, Chicago.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,**

and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.**

## Nikoteen

The most effective  
and economical  
material there is  
for spraying plants and blooms.

## Nikoteen

Is skillfully extracted  
from leaf to  
bacco and carefully  
refined; it is clean and easy to apply.

## Nikoteen

Does the work when  
vaporized either in  
pans or pipes or  
over a flame. Full Pint Bottles, \$1.50.

## Nikoteen Aphis Punk

Specially prepared for fumigating closed  
houses. It vaporizes the Nicotine evenly  
and without waste. Nothing keeps a house  
free from Aphis so cheaply.

Price \$6.50 per case of 12 paraffined boxes.  
All Seedsmen.

## Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable!  
The best of all manures for the  
greenhouse. Florists all over the  
country are using it instead of  
rough manure.

## Pulverized Sheep Manure

Absolutely the best Sheep Manure on  
the market. Pure manure and nothing  
else. The best fertilizer for carnations and for  
liquid top-dressing. Unequalled for all field use.  
Write for circulars and prices.

## SUGGESTIONS FOR PLANT GROWERS.

### Violets,

As the days grow longer and the sun stronger, the violet plants will begin to make active growth. Many growers wait until the time comes to throw out the plants before the propagation is done, and the plants divided, but the days are warm at that time of the year and the other kinds of stock are demanding attention and many of the young plants are lost. Besides, there is less chance of carrying over any fungous disease, if the plants are propagated from cuttings taken during February and March. The plants are now producing quantities of runners and these can be made into cuttings and placed in the propagating bench, where they will root in from three to four weeks and can be placed in flats about two inches apart each way. These cuttings will make fine stock for planting out in the early spring, and time will be gained by having good stock in fine condition when the plants are discarded during the busy days of April. The stock plants will require but little attention now but the blooms must be picked daily and as the sun grows brighter the flowers are apt to come light colored. A watering of liquid manure with soot added will help preserve the color and the flowers should be picked early in the morning. Give the plants plenty of air and watch the dry places for red spider and keep these spots sprinkled down.

### Marguerites.

The plants of marguerites that have been blooming all winter will now need some new nourishment, or they will grow hard and woody, and will produce nothing but short stemmed flowers. They should be given frequent applications of liquid manure. Cow manure is the best to use in liquid form for it never burns and is sure to give the desired result. Cuttings should now be taken for the spring stock, and also for the plants to be grown next season for flowers. Some growers who make marguerites a specialty always have a batch of cuttings in the bench, keeping a continuous crop of young plants growing all the

time, for they claim that they get the largest and best blooms off of the plants when in six-inch pots, and then when the flowers begin to grow small and the plant hard and woody they are discarded and the younger stock grown in their place.

### Plants for Window Boxes.

The window box is quite a factor with the grower of bedding plants, and they are placed in all locations, some with the sun beating down upon them all day, and others where the sun barely reaches them, or with a few hours' sunlight in the early morning or late in the afternoon. The boxes that are in the bright sunlight are an easy proposition, for the geranium or any of the blooming plants are nice subjects in these locations, but with the boxes planted in shady spots other varieties of plants must be chosen. Fuchsias and plants with variegated foliage are fine for these boxes. Vines of different kinds are a necessity. The first, of course, are vincas, and there is nothing that will so ornament a window box as large handsome plants of the variegated variety. These plants should now be beginning to make their growth and should be potted in good rich soil and placed along the edges of the benches where they can become fine plants. It is too late to make cuttings for this year's use, but any poor lengths can be cut up and placed in the propagating bench, and these planted in the ground next summer will make fine stock for next year. This propagating of the old wood is better done before firing has ceased. German ivy is another nice vine for window boxes, which should be now propagated. Thunbergias and nierenbergias are both good plants as well as the lobelia gracilis. Seed should be sown at once of all these, to have good sized plants in time to fill the boxes. Nasturtiums planted in pots the last of March or first of April are also very useful. Marguerites are very satisfactory plants in window boxes and cuttings rooted now will make fine plants by June for this purpose. Another good plant is Gaura Lindheimeri, sometimes called the butterfly plant. Seeds sown early and

potted off and pinched back when four inches high will be very useful in filling in and add to the effect of the arrangement. While this is not a showy plant yet its spikes of white flowers are quite an addition, and being a rapid grower is a cheap plant with which to fill in.

#### Chrysanthemums.

The grower of large chrysanthemum blooms, especially if for exhibition purposes, is now preparing to propagate the stock, and for the very early varieties preparations should now be also made. The advent of Golden Glow made a new proposition for the chrysanthemum grower. There have been some very handsome blooms of the variety grown ever since it was introduced, but there has also been large quantities of inferior flowers. To have blooms by September 1 the bud must be taken early in July and the cutting must therefore be rooted early, surely by April 1, in order to obtain the properly grown plant. Another variety that does better with early propagation is Miss Virginia Poehlmann. This variety will break a very good lot of cuttings when the stock plants first start to make their growth, but after this crop is taken off, is very slow to make a second lot, and if a quantity is desired the early propagation must be depended upon. To procure large, deep, well finished blooms the March struck cuttings give the best results, but there must be plenty of head room in the houses to grow plants propagated so early. In the growing of the medium sized or commercial blooms of nearly all the varieties April and May struck cuttings are early enough. The stock plants should now be looked over and if growing rapidly the tops taken off and they will branch out and give a bountiful supply of cuttings when wanted.

#### Centaurea Moschata and Cyanus.

The sweet sultans, *Centaurea moschata* and bachelor's buttons, *C. cyanus*, are being grown extensively now and are greatly appreciated by flower lovers. There are many beautiful varieties of the sweet sultan and great improvement in this flower has been noted in the newer strains placed upon the market and are a great addition to the spring flowers. Seed may be sown at any time, but if sown now the plants will be in bloom in late spring and will fill in a place when many of the winter flowers have passed. The bachelor's button or cornflower has been used a great deal of late for boutonnieres and is extremely popular in some sections. The dark blue is the only variety worth growing and is very useful after the violet is through blooming in late spring, coming at a time when blue flowers are very scarce. The seed should be sown at once and planted out in a bench and as long as the cool nights last some very handsome flowers can be cut which will find favor at that season of the year. It is yet a little early for seeds of these flowers for the outdoor planting to be sown, but still better blooms are obtained before the hot days of summer come on and the sowing for plants for this purpose should not be delayed too long.

NORFOLK, VA.—Mrs. M. S. Williams and W. P. Cotton have formed a co-partnership to carry on a floral business under the firm name of the W. P. Cotton Floral Co., at 327 High street.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

#### Basket of Orchids and White Lilac.

The beautiful basket composed of *Cattleya triana*, *Dendrobium* noble, *Vanda cœrulea* and white lilac which we illustrate was arranged by Canger & Gormley, of Chicago, and is a splendid example of the artistic work which can be arranged with these exotics which lend themselves to such attractive work, and also of the designing of this firm which enjoys the patronage of much of the select trade of their city. Baskets of this character can be arranged for many purposes, this one being the centerpiece placed upon one of the tables at a large banquet, where it was greatly admired.

#### March Flowers in the New York Stores.

The month of March always brings joy to the heart of the retail florist, flowers get more plentiful and the spring flowering plants are available in quantity. Store windows of florists all over town have taken on a very spring-like appearance and they never looked more bright and dazzling with color than at the present time. Azaleas are numerous and they are the principle features in many large windows, with sometimes a few rhododendrons

baby rambler roses are also in, the white, pink and red are all being used, though in somewhat limited numbers. Hyacinths and tulips in pans are seen in great profusion, and what is there more spring-like than the always fragrant hyacinth? Crocuses also have been a feature in one Fifth avenue store and, though they may not be so showy as the hyacinths or tulips, they find many admirers always. Cinerarias in many dark shades are being used and those old favorites the primulas, in their several types, are always to be seen where show window space is limited and small plants have necessarily to be used. In orchids beautiful plants of *Cattleya triana* and *dendrobiums* are being used. These with background of *Cibotium Schiedii* and bordered with *Primula obconica* made a striking picture in a Fifth avenue store this week. Marguerites, spiræas, deutzia, prunus, besides the many choice ferns that are available, all tend to give the retailer a wide range of plant material for his display windows.

In cut flowers, March has not added much to the list over the previous month, that is, in variety, but when it comes to quantity, each day seems to just show an increase over yesterday and such, of course, is only natural for it is spring time and sunny days are the rule, not the exception. Probably the flower in most abundance

BASKET OF CATTLEYS, DENDROBIUMS, VANDAS AND WHITE LILAC.

Arranged by Canger & Gormley, Chicago.

intermingled. Some acacias are even being used for large effects in yellow, and wherever so utilized they stand out preeminently, their feathery foliage and yellow globular blossoms being always attractive. Some of the

is the narcissus. We have the Poeticus, Bauli, Von Sion, Golden Spur, Trumpet, Paper White and maybe others, and they are used in tremendous quantities. Next come the hyacinths, both Dutch and Roman, and

it is a fact, we believe, that although the former mentioned type may give heavier and more massive spikes and afford a range in color, they are not as preferable for cut flower purposes as are the Romans. Tulips also are very much in evidence. White, pink, red and yellow, all have their uses and immense quantities are available every day. Freesias are being used very extensively, and it is the pure white ones that have the preference at all times. It does not seem that those of a creamy white or pale yellow color are ever going to become very popular.

Sweet peas are coming in more variety as the month advances. There are some of a rather deep blue shade that are always appreciated when they can be had in quantity. Light lavender colors also are used extensively and of these there is an ample supply. It must not be forgotten, however, that the white sorts are in the greatest abundance. Of violets and myosotis there is plenty. The violet has come to be a great factor in funeral work, and that fact somewhat compensates for its decline as a flower for wearing purposes. The forget-me-not is only used for table work as a rule, consequently is rarely needed in very large quantities.

Among the cut orchids available are *Dendrobium Wardianum*, *Cattleyas Trianae* and *Schroederii*, a few *Odontofolium crispum*, a few *laelias*, a little *oncidium* and *zygopetalum*. The *cattleyas*, of course, constitute the bulk of the orchid supply. *Gardenias* are still the classy flower for average wear and they are not so plentiful as the retailers would wish. They are quite a luxury and come high. *Snapdragon* can now be had in quantity and what a grand thing it is for some kinds of work. M. A. Bowe used bunches of it at the end of each pew at a church decoration recently, and it made a hit with everybody and brought him very favorable notices from the daily press, a very rare thing, indeed, in this town. Cut sprays of *acacia* are a feature also this month. The supply, of course, is rather limited, as few growers care to devote the space necessary for this crop. *Lilac* we have in plenty, also *lily of the valley*, *lilies*, white and pink, and *callas*. *Daisies*, too, we have, both white and yellow, and among the odds and ends are *wallflowers*, sprays of *cerasus*, *clivias*, *amaryllis*, *strelitzia*, and maybe lots of things we have not seen.

Of carnations and roses, they, of course, are always with us. Just now, however, the *American Beauty* is quite shy. There are few to be had and much complaining thereof. The other roses, though, are all in crop and this spring sunshine is giving them added beauty every day. The carnation supply has probably doubled within the last ten days and everybody is glad, for not only carnations, but every other flower is now, or soon will be, coming in quantity, so that it will be possible to handle cut flowers at a fair profit, something, many of the retailers say, that has not been possible to do since January first owing to the continued scarcity of stock and the consequent prevailing high prices.

DANBURY, CONN.—Mrs. Nellie Hubbard-Mathewson, proprietor of the North street conservatories, opened an office and salesroom at 284 Main street March 4. The establishment will be called the Mathewson Flower Shop.

#### THE WORLD IN FLOWERS.

Designed by the Fleischman Floral Co. for the Funeral of the Late John J. Bohn, of the Hotel World Chicago. White Carnations Were Used to Show the Water of the Globe and the Land was Represented by Violets. Photo by J. W. Taylor, the Well Known Floral Photographer

#### American Carnation Society.

The reading of papers and all other unnecessary business has been eliminated from the program this year. It was deemed desirable to make the meetings short on account of the great amount of interesting and instructive displays in the show. Members will find enough in the show to occupy their full time. All the meetings have been set for the evenings to give the members opportunity to visit among the growers in the vicinity of Boston, without having to miss the meetings.

Notice:—The secretary will leave for Boston on Sunday, March 26. All mail which will not reach him by Saturday, March 25, should be addressed to him at Boston, in care of the Lenox Hotel, which will be A. C. S. headquarters. Entries can still be made for the show, but there will have to be added \$2.00 for each entry made, after March 18.

#### REGISTRATION OF NEW CARNATIONS.

By J. H. Leach & Son, North Easton, Mass.—Pink Supreme—Seedling X Boston Market; color flesh pink; size  $3\frac{1}{2}$  inches; habit similar to Fair Maid. Flower larger and fuller. Strong stiff stem. Does not split the calyx.

By Chas. Weber, Lynbrook, L. I., N. Y.—Brooklyn—Prosperity X Mrs. Thos. W. Lawson; color bright deep pink; size  $3\frac{1}{2}$  inches; habit same as Lawson, with foliage not quite so heavy. Free growing, very healthy, prolific, every shoot running to flower. Form of flower somewhat irregular, slightly fringed.

A. F. J. BAUR, Sec'y.

#### John F. Beyer.

John F. Beyer, 26 years old, junior member and secretary of the Beyer Floral Co., of South Bend, Ind., died Tuesday, March 14, at five o'clock. The funeral will be held at two p. m. Thursday, March 16, at the home in South Bend.

## Gladiolus Notes.

In trying out the new varieties of gladioli there are various things that have to be considered before passing final judgment. The change of climate and soil; the manner of fertilizing and cultivation, all have their influence in developing or retarding the blooming qualities, then there are varieties that do not bloom at their best ~~only~~ every other year. This is characteristic of many varieties after they have been grown from divisions for a few years. So it is much better, when possible, to get bulbs that are grown to blooming size from the bulbets. These young bulbs are much stronger, and nearly always produce good flowers under changed conditions of planting. Two years ago, I obtained in a collection from Vilmorin & Co., Paris, their variety *G. Parure*. It produced that year a rather weak plant with a short spike of insignificant pink flowers poorly set on the spike, but a very pretty shade of pink, and for this reason I saved the bulb and planted it last season, and when it came into bloom again I had the surprise of my life, for I can truly say that I beheld the most beautiful pink gladiolus I have ever seen. The flowers set perfectly on a splendid spike, very large soft pink, daintily penciled on the edge with carmine with a large pure white throat. *Le Triomphe*, a lilac pink variety, and *M. A. Brougniat* a large orange pink sort, are two other very fine *gandavensis* varieties offered by this house.

I received from Wilhelm Pfitzer, Stuttgart, Germany, about 60 varieties, a very excellent collection. Of these the following were particularly fine: *Jungfrau*, a very delicate pink with a most distinctive lavender tint, *Margot von Quaita*, a variety resembling *May*, but nearly double the size, *Helios*, a very large dark Canary yellow, almost solid color and *Frau Senger Bettaque*, a large pure white with a slight stain in the throat.

E. Y. Teas & Son, Centerville, Ind., sent me a splendid white variety, *Alice Carey*, that I would describe, very similar to *Frau Senger Bettaque*. Another variety from this firm that I liked very much is *Big Medicine*: rose color flaked yellow, very large and fine; C. L. Goodrich, the Luther, Iowa, specialist, is producing some remarkable Childs seedlings. The colors are clear and bright and the blendings exquisitely delicate. No. 183 is a large flower, measuring five to six inches across; a beautiful blending of lilac and lavender, with penciling on the edges of some of the petals. No. 1248 is a very large flower of a tint similar to *G. America* with a larger flower, although not quite so well arranged spike. No. 1528: white ground penciled crimson; dark red blotch in throat; flower about five inches in diameter.

I tested all of the novelties from John Lewis Childs and a fine quartette they were; especially good were *Pink Pearl*, a very beautiful pearly pink, as the name suggests, and *Rosy Spray*, a large white sort beautifully stained with rose. From their general list were *Melrose*, a large white flower, flaked pink with a bright crimson center. 1. S. Hendrickson, a beautiful mottling of white and bright pink and *Wild Rose*; delicate pink or rose shade, very fine. P. O. Coblentz, New Madison, O.,

GLADIOLUS EUROPA.

is doing good work as a breeder and his seedlings show great vigor with petals of good substance. He is producing some fine stuff. His No. 400 is a splendid light yellow with a bright red blotch and extra large flower. No. 531 is a beautiful ruffled pink. No. 42 a deep bright pink, almost solid color. *Nancy Ray* is a fine large white with a red throat marking. In a collection from E. E. Stewart, Rives Junction, Mich., there was a most beautiful variety No. 102. It was a delicate pink sort with ruffled petals. *Golden Queen*, the variety that won the prize at Rochester for the best yellow, did well with me. It is a clear light yellow with a red blotch, good straight spikes that do not get soft, or wilt in water, and the flowers open out to the last bud.

*Margaret*, offered by Vaughan's Seed Store, Chicago and New York, is one of the best reds of recent introduction. It is a bright carmine with a large pure white throat. *Mastodon*, a novelty of Vaughan's offered for the first time this year, is a seedling of *Principene* and a very striking and valuable variety of the giant flowering type. Another seedling of *Principene* is a variety named

*Principene*, raised by the W. E. Kirchoff Co., Pembroke, N. Y. This is one of the most brilliant scarlets I have seen. Very vigorous, large, well-open flowers with large pure white throat; of fine substance and has been shipped to Porto Rico in fine condition, proving its quality as a good shipper.

Montague Chamberlain, who is soon to establish as a commercial grower, has recently bought out a large collection of Kunder's hybrids. I am well acquainted with a large number of varieties in this collection and they are a splendid lot of gladioli. Improved 1900, one of the best, is, as the name implies, a real advance on the old 1900 and is a robust and healthy variety, a quality that was lacking in the old sort. Mr. Chamberlain has purchased a nice farm in Groton, Mass., where he will grow gladioli extensively. The farm is nicely located and the soil is well adapted to growing bulbs. Mr. Chamberlain is a well known ornithologist and is the author of several volumes on this subject. A man of strictest integrity and fine business ability, the floral trade will gain another good man.

L. MERTON GAGE.

GLADIOLUS AMERICA.

#### National Sweet Pea Society.

The programme of the meeting of the National Sweet Pea Society of America is as follows: Wednesday, March 29, at 2 p. m., meeting of the executive committee. At 3 p. m. the general meeting. President Asmus of the Society of American Florists will welcome the society, and President Burpee will reply. Prof. Beal will read an address on "Trials of Sweet Peas Under Glass as Tested at the Experiment Station at Cornell University." Prof. Craig will talk upon "Sweet Peas and the Results of Our Experiments at the Trial Grounds;" William Sim will make a short address upon "The Growing of Sweet Peas Under Glass;" C. W. Kerr will read a paper on "The Latest Novelties in Sweet Peas." Invitations by cities and societies to hold the next exhibition and convention to be held next summer.

Are you a member of the National Sweet Pea Society of America? If not, you should send for an application blank; the annual dues are \$2; life membership, \$25. By becoming a member you are entitled to the report of

the sweet pea trials of Cornell University, Ithaca, N. Y., where over 600 varieties were grown during the summer of 1910. These trials, which have been under the supervision of Profs. Craig and Beal, will be published in 1911, and will be a most comprehensive and exhaustive work, covering experiments with fall and spring sowing, and other valuable tests. For further information, write to the secretary, Harry A. Bunyard, 342 West 14th Street, New York.

MILWAUKEE, WIS.—City Treasurer C. B. Whitnall, the well known florist and park man, has been granted a divorce from Annie G. Whitnall.

DAYTON, O.—At a meeting of the Florists' Club, held March 6 at Mrs. J. F. Young's store on East Fifth street, the following officers for the ensuing year were elected: F. R. Mittman, president; A. E. Schmidt, vice-president; Horace M. Frank, secretary; George Bartholomew, treasurer. A social will be held at the residence of J. F. Young and wife April 3.

#### American Rose Society.

Entries for exhibits have been received from Murray Hill and Princeton, N. J., in addition to those already mentioned, and inquiries are coming in from various quarters. The following gentlemen have accepted the positions of judges for one division: William F. Kasting, Buffalo, N. Y.; Frederick Burki, Gibsonia, Pa.; Otto G. Koenig, St. Louis, Mo., and Emil Buettner, Park Ridge, Chicago. The American Rose Society is a national society, enrolling its members from Germany, England, and the United States and Canada from the Atlantic to the Pacific, so we have representative men for the positions.

The program provides for three meetings, the "Commercial grower's meeting," the "Business meeting," and the "Amateur rose grower's meeting." President Elliott is very much in earnest about making these meetings interesting. Eber Holmes is the manager of the show, and will look after all the details. Any one having any special prizes to offer, dues to pay, or other matters of interest, write to the secretary, Benjamin Hammond, Fish-kill-on-Hudson, N. Y.

To the special prize list for exhibits at the coming show to be held in the Mechanics hall, Boston, Mass., March 25-April 1, are to be added the following: By Alexander Montgomery, Natick, Mass., a silver cup, valued at \$25, for the best new rose of American origin of 1909-1910; by the Toronto Horticultural Society of Toronto, Can., two prizes, a silver medal, first, and bronze medal, second, for the best specimen of hardy climbing roses, and in judging fragrance is to count 33 points. The idea of the society is that, for out-door roses, fragrance adds very greatly to the value and is a desirable object. Eber Holmes, of Montrose, Mass., manager of the show, writes that everything is going on finely and that vases for the cut flowers will be furnished. Thomas Roland, of Nahant, Mass., will make an exhibit of a rose garden and M. H. Walsh of Woods Hole, Mass., a display of pot roses.

Tickets will be issued to the members of the American Rose Society, who do not belong to the Society of American Florists. These tickets will not be transferable.

BENJAMIN HAMMOND, Sec'y.

HOLLYWOOD, CALIF.—The Cocos & Kentia Co. are erecting a greenhouse, 36x60 feet.

HOUSTON, TEXAS.—W. W. Coles, who has been prospecting on his orange ranch for some weeks, leaves for San Antonio this week and expects to be at home in Kokomo, Ind., about March 24.

RICHMOND, VA.—In the test case which was brought against J. D. Hooper in the effort to prevent the florists from disposing of their product on the street at the market, the court decided that the market committee had no case and dismissed the charge.

GOVANSTOWN, MD.—Stevenson Bros., the noted rose growers of this place, have purchased a piece of property at Towson and are preparing to erect a range of rose houses thereon. An iron frame Lord & Burnham house 43½x206 and a connecting house 12x42½ will be built this spring. They will continue the plant here, where they make a specialty of Killarney, White Killarney and Richmond roses, for the next two years.

### The Jos. Heacock Co., Roelofs, Pa.

For several years past it was seen that the Heacock greenhouses were being taxed to the limit, alterations were made, the space between the houses was taken in and every foot of ground covered, but the cry was for more room, the business was growing, the stock was going out faster than it could be produced and something had to be done to meet the demand. Mr. Heacock, the president of the company, is an energetic and progressive business man, next year with him must always be better than the last. Palms are a specialty here, kentias particularly being grown in quantity, so much room had been given to them of late that roses, which were also leaders,

center of the house in two large mains, and distributed to the smaller pipes which run along the sides of the house and along the sides of the beds, being attached to the curbs. To the upper end or half of the house the steam is first carried in the main, and there distributed to the radiating pipes so as to get the slight fall to carry back the condensation. The steam is worked on the vacuum system, there being no air valves, a provision being made in the condenser for the escape of any air that accumulates. The steam is generated by two return tubular boilers five feet six inches by sixteen feet, pressure is kept at seventy pounds. The fuel is buckwheat coal, which is the cheapest good coal to be obtained, costing something less than seventy cents

modious boiler house, in which provision is made for another battery which may be needed for future expansions of the place. A house similar to the present structure is, we believe, contemplated in the near future. With such an efficient plant one expects good stock, and with one accord it is acknowledged by the buyers that the white and pink Killarney roses that are produced here are better than anything else coming to this market.

Other improvements have been made to the farm in the shape of a large barn in which are housed twelve cows and about fifty hogs, it being the intention to produce all the manure necessary for use in the houses. A commodious house has also been erected for the foreman. The location of the farm is admirable, and the construction of the greenhouse and heating under the supervision of the Lord & Burnham Co. is a great credit to that noted firm. Mr. Heacock should also come in for his meed of praise, for such an establishment so extensive as this is not brought to such perfection without careful planning and arranging for every detail. K.

were being crowded out and it was finally determined to devote the entire space at Wyncote to palms and orchids, which latter flower have of late been given considerable attention, and new houses should be built for rose forcing. For this purpose a farm of fifty-seven acres at Roelofs, on the New York division of the Reading Road, was purchased, and the Lord & Burnham Co. was given the order for one of their most modern iron frame structures, 600 feet long and 55 feet six inches in width. This is a model house in every respect, the shadeless ridge is twenty-three feet high, a three-foot cement wall is surmounted with three feet six inches of glass which contains a row of side ventilation. There is also a continuous row of sash ventilators on either side of the ridge. The house runs 14 points north of east and has a fall of only thirty inches in its entire length. There is very little drainage, being but two three-inch drains three feet below the surface the full length of the house.

A walk or division of eight feet across the center of the house gives a working space from which nine four-foot beds extend to each end of the house, these are separated by twenty-inch walks, each bed is bordered with a two by 12-inch curb is set about four inches in the ground. In the ends of the curb iron pipes are imbedded, level with the top, into which are placed smaller iron pipe that carry the wires which run the length of the house and to which the rose stakes are attached with Court's patent fasteners. There are 8,000 pink Killarney, 5,000 White Killarney and 300 Richmond roses growing in these beds and all are the picture of vigor and health. The heating is by steam and is brought into the

at the mines. A blower, working automatically, keeps a forced draft under the furnaces on any reduction of the pressure. The water is supplied from an artesian well which was sunk 200 feet in depth, and in which the water rises to within ten feet of the surface. A pump attached to the well is connected with the steam pressure so that whenever a spigot is turned on, the pump is immediately in action, there is no tank or reservoir, none being necessary. There is a smaller auxiliary boiler for use of the pumps during the summer. The whole heating plant is on the surface of the ground and covered with a finely constructed and com-

CENTRE WALK IN JOS. HEACOCK CO.'S NEW GREENHOUSE, ROELOFS, PA.

Showing Arrangement of Beds and Piping.

### Inspection of Dreer's Plant at Riverview.

Responding to the kind invitation of the Henry A. Dreer management about 100 representatives of the trade, mostly from Philadelphia and suburbs, but with quite a few from Washington, Baltimore, New York and even as far as Boston, visited the latest addition to the establishment of this enterprising firm. The trip was made by special train from Market street wharf direct to the greenhouses, at which a new station is soon to be established and will be called Riverview.

The houses are built on an almost level piece of ground, are 20 in number, 203 feet in length. They are divided in the center by a shed or working house. A great feature of this establishment was the very short time which was taken in its construction. The ground was purchased in June, the contract awarded and the construction commenced September 6 and the buildings completed in the early part of January. The King Construction Co. were the contractors and this example of their work is a great credit to them, and when one considers the very short time in which was completed the houses and the installation of the heating apparatus, all of which was included in the contract, it can safely be said that it is one of the quickest and best examples of its kind to date.

The entire establishment is now filled to the doors with stock under cultivation; there were houses of dahlias, houses of ferns, others of palms, splendid stock, kentias galore, and a grand lot of Phoenix Robellinii, surely a coming favorite. A center table in one house, planted its entire length with variegated pineapple, was possibly the largest lot of this beautiful plant ever seen together in this country. Several of the houses are filled with dormant roses in 6-inch pots. This stock is a specialty with this concern and large quantities, reaching into the hundred thousands, are sent out annually. The large shed, with its wealth of bay trees, reminded one of a Belgian nursery, there being hundreds of these popular plants, from large, beautiful specimens down to the smallest commercial sizes. In one end of the shed

had been placed tables upon which were spread appetizing things for the inner man, and after the inspection of the houses the company was invited to "eat, drink and be merry," which they did in right royal fashion. After the cigars had been passed around, Robert Craig was called upon and in behalf of the visitors thanked the officers of the corporation for their hospitality and the opportunity granted its guests of seeing this new addition to their already large establishment. He compared the present methods of heating and greenhouse construction with those of but thirty years ago, when houses were built and heated separately, the furnace being six feet below the surface and the stoke hole so small that one could scarcely turn around in it, and was always in danger of barking his knuckles on the walls of the narrow space. Brick flues had given way to 4-inch hot water pipes, which was considered a great innovation; these had in turn given way to steam and a central heating plant, and now the use of power to insure a perfect circulation of both hot water and steam, as was seen here, was almost perfection. In the old days houses were built by the local carpenter or the help of the place. Now one could go to the telephone and order from the greenhouse specialist a range of glass such as this, and work is started immediately. The erection of this addition of such magnitude he considered a great achievement and a great credit, both to the Dreer corporation and the King Construction Co., who had finished both the heating and completed the construction in the short period of three months in the middle of winter when the weather is most unfavorable for outside work. Otto Thilow, who had introduced Mr. Craig, read a telegram from William F. Dreer, the president of the company, who is in California, in which he sent his congratulations on the completion of the work in such a short space of time and his greetings to the visitors. Mr. Thilow, in extending the glad hand to the visitors, said that the working organization of the place might well be likened to the heating apparatus, the boilers, the pipes, the pumps and the engines,

which all did their share of the work admirably, but to Mr. Eisele must be given the great credit, for he was as the fire under the boiler, the living and untiring force of the entire system. Just before departure a group photograph of the party was taken with the greenhouses as a background. As the train was boarded for the return, three rousing cheers for the corporation and its officers were given with a will. K.

[Extended descriptive particulars of this new plant, with illustrations, will be found in last week's issue, that of March 11, pages 298 and 299.—Ed.]

### New York Florists' Club.

Promptly at eight p. m., March 13, President J. B. Nugent, Jr., called the members to order, almost 80 being present. After the reading and adoption of the minutes of the previous meeting P. O'Mara, for the legislative committee, reported that he, together with F. R. Pierson and other members of the trade from Buffalo and Rochester, had been before the ways and means committee at Albany, who have charge of the bill calling for the appropriation of \$50,000 for building greenhouses. They also conferred with Gov. Dix and, unless the legislative body at Albany develops an economical streak, there is a fair chance of the bill going through favorably. Chas. H. Totty mentioned that in New Jersey the bill for appropriating \$30,000 to be used for building greenhouses at New Brunswick, N. J., had been passed by the legislative body of that state. Chas. E. Weathered, for the dinner committee, announced that the seating capacity of the dining room at Shanley's had been sold, every seat being taken. Robert L. Young, for the outing committee, reported that the day for the excursion would be June 28. The steamer Isabel had been chartered and that Witzels Point, L. I., would be the place. There will be no programme of the outing published, so members will not be importuned to take advertising space, but prizes for children's and ladies' events will be desired. Tickets will only be sold to club members, though each member may purchase as many as he wishes. The recommendations of the outing committee were fully approved and endorsed by the

INSPECTION PARTY AT DREER'S NEW RANGE, RIVERVIEW, N. J. MARCH 8.

BANQUET OF THE GREATER NEW YORK FLORISTS' ASSOCIATION, MARCH 9, 1911.

club on motion, after some discussion participated in by Messrs. O'Mara, Birnie, Schultze, Marshall, Bunyard and Weathered. W. F. Sheridan presented resolutions on the death of Mrs. E. C. Horan, which were adopted, and the secretary instructed to send a copy to the family of the deceased.

Frank McMahan said a few words relative to the injurious effects to trees and shrubs by gas escaping from wrought iron pipes, which are being used instead of cast iron pipes for mains in some districts and, after some discussion, the matter was placed in the hands of the legislative committee, with request to report at the next meeting. H. A. Bunyard announced that the Fall River line of boats had been selected as the official route to Boston to attend the national show. A rate of one fare and three-fifths would rule for the round trip on the certificate plan. It was expected that the largest delegation would leave March 24 at 5:30 p. m. from the pier, foot of Murray street.

W. H. Siebrecht, Jr., who has been active in seeking a permanent market location, announced that the board of aldermen had passed the necessary measures for using the space under the Fifty-ninth street bridge, and that by September next the place will be ready for occupancy. In the meantime a temporary market for plant growers will open April 1, under the same bridge, but a few blocks from the river. Resignations were accepted from Fred. Weir, U. G. Scollay, Alex. Don and M. A. Bowe. J. J. Brozat, W. E. Tricker, C. Knight and S. Whitefield were elected to membership.

P. O'Mara, F. H. Traendly and J. A. Shaw were appointed a committee to meet the group of English growers that are expected March 17 and bring them to the club dinner as guests of the club on the evening following.

A. L. Miller, for the award committee, reported that the carnation Woden-

eth had been examined at Chas. H. Totty's establishment, Madison, N. J. The flower scored 93 points and was awarded the club certificate. Also the carnation, Miss Dimple Widener, had been examined at Ogontz, Pa., grown by Wm. Kleinheinz, which scored 88 points and was awarded the club certificate also.

An exhibition of 21 vases of sweet peas from A. Zvolanek, Bound Brook, N. J., contained many very pretty unnamed varieties, seedlings of the Spencer type. A certificate of merit was awarded for Spencer seedlings. A similar award to variety Helen Lewis, and the thanks of the club for Unwin seedlings. A strain of seedlings classed as the Wallace type, were also awarded a certificate of merit. The Cottage Gardens Co. showed two carnations, No. 513, a deep pink, and Howard Gould, cerise pink; both large flowers and each received preliminary certificates. Wm. Eccles received cultural certificate for vases of well-grown Alma Ward and Beacon carnations. Chas. Weber, Lynbrook, L. I., showed two new carnations, Brooklyn, scarlet, and No. 2, a pink, which were highly commended by the committee. Lewis P. Lord, Minneapolis, Minn., received a certificate of merit for Lord's frost-proof plant box, which he exhibited and demonstrated. The box is so made that single plants are enclosed, the box folded simply, yet so secure that the plant cannot move about, however roughly the box is handled.

Five minute talks were given by several members. A. L. Miller told why florists should attend the National Flower Show; John Birnie told of the advantages to be derived from a plant market; H. A. Bunyard made a plea for the National Sweet Pea Society; I. S. Hendrickson explained how the gladiolus can become more popular as a florist's flower; James T. Scott told why florists should not take more in-

terest in the nursery trade, and H. Turner, who has just returned from a visit to England, told of the open climate experienced there during the winter months. The canteen was enjoyed during a short recess and at 11 p. m. the meeting adjourned.

### Greater New York Florists.

#### DINNER AND DANCE.

The first annual dinner of the Greater New York Florists' Association, which took place at "Raubs" restaurant, 14 Nevins street, on the evening of March 9, was one of the pleasantest and most successful social events in the trade that ever was held in this borough. Upwards of eighty persons sat at the tables and there was quite a sprinkling of beautiful and fashionably gowned women among them and many of the men were in full dress. Brooklyn is certainly all there when it comes to class. The dinner tables were charmingly adorned with cut flowers and palms and southern smilax had been freely used in transforming the dining room into a tropical garden.

About 11 p. m., when the good things as set forth on the menu card had been enjoyed, the president, D. Y. Mellis, made an address of welcome and followed by inviting everybody to the ball room, where an orchestra played for dancing until the morning hours. Between the dances short talks were indulged in. Mr. Mellis, acting as master of ceremonies and introducing the different speakers. Mrs. J. V. Phillips, president of the Ladies' Auxiliary of the S. A. F., made a strong plea for the ladies to become members of that society and no doubt gained many recruits. Among others who were called upon were J. B. Nugent, Jr., A. L. Miller, J. V. Phillips and S. S. Butterfield, the AMERICAN FLORIST representative.

GERANIUMS are exceedingly scarce in some sections.

RENEW subscriptions promptly so that no copies of the papers may be missed.

A HEAVY fall of snow and freezing weather in Texas is reported as having damaged fruit trees.

DOUBLEDAY, PAGE & Co., publishers of Country Life in America and the Garden Magazine, have issued invitations to their horticultural friends for a reception and dinner at Garden City, Long Island, March 23.

## Correction.

The prices quoted in the advertisement from P. O. Box 453, Palo Alto, Calif., in our last issue for echeverias, fleur de lis and violets were by the thousand and for Shasta daisies, gail-lardias and tuberoses by the hundred.

## Society of American Florists.

By order of the president, notice is hereby given that the mid-lent meeting of the executive board of the Society of American Florists will be held at Boston, Mass., from March 25 until April 3 with an adjourned meeting to be held at Baltimore on April 4. Meetings are called at Boston for 9 A. M. each morning from March 25 to April 3 inclusive. The meeting at Baltimore is called for 10 A. M. on April 4 and will remain in session until all business is disposed of.

## SPECIAL RATES TO BOSTON.

A special rate of 1-3/5 on the certificate plan has been granted by the New England Passenger Association excepting Eastern Steamship Co., the Trunk Line Association, and the Central Passenger Association. Tickets may be secured not earlier than March 22 and not later than March 27 and will be good returning to April 5, inclusive. In securing your tickets purchase a regular full one-way first-class fare and be sure to ask for a certificate. No reduction in fare will be made unless a certificate be secured at the time of the purchase of the ticket.

Immediately upon your arrival at Mechanics Hall present your ticket and 25 cents to the secretary S. A. F. A fee of 25 cents is charged for each ticket validated. Certificates will be signed by the agent on March 26, 27 and 28 and at no other time.

When returning, certificates should be presented at the railway ticket office and a ticket at three-fifths (3/5) of the regular fare will be furnished you.

For those living west of Chicago and St. Louis, tickets should be bought to those cities from which points tickets may be secured at the reduced rates. It will be well to confer with your agent concerning rates and routes.

There will be no hotel headquarters for the S. A. F. at this convention.

## HEADQUARTERS.

The offices of the secretaries are in Mechanics building.

New Members.—Those desiring to become members of any of the societies should apply at the offices of the respective secretaries.

Paying Dues.—Dues may be paid and orders for members' tickets obtained at the office of the respective secretaries.

Railway Certificates.—Railway certificates should be deposited with the secretary of the S. A. F. immediately upon arrival at Mechanics building. The fee of 25 cents must be paid when certificate is deposited. Certificates will be signed by the agent from 9 a. m. to 6 p. m. on March 27, 28 and 29. No certificate will be signed before or after these dates. Certificates must be called for before 11 a. m. March 31.

The office of the National Flower Show committee is in Mechanics building. Chester I. Campbell, manager of the show, is in charge. All business connected with the Flower Show should be presented there.

Members' Tickets.—Orders for members' tickets must be presented to the committee in charge of admission and exchanged for regular tickets. All orders and tickets in hands other than the owners will be taken up and cancelled.

Register.—All members of the S. A. F. and affiliated societies should register with the secretary of the S. A. F. so that a record may be kept of the attendance and so that members may be located when asked for.

H. B. DORNER, Sec'y.

## National Council of Horticulture.

We are in receipt of the season's first installment of articles issued by the press agent for the National Council of Horticulture as follows: "Preparing for Flower Garden," "Hotbed Hints," and "Spring Work Among Shrubs." The articles are timely and practical and are entirely free to nurserymen, seedsmen, florists and local editors applying for them to James H. Burdett, 1620 West 104th Place, Chicago.

## Chicago to Boston.

The Chicago Florists' Club has decided to use the Lake Shore & Michigan Southern Railway on the National Flower Show trip to Boston and arrangements have been made with that company for a special section of the Lake Shore Limited to leave Chicago 5:30 p. m. Thursday, March 23, due in Boston the following evening at 8:30, provided a sufficient number of requests for reservations are received to warrant a special section; otherwise the party will be accommodated in special sleepers attached to the regular Lake Shore Limited, leaving and arriving at the same hours as above quoted.

The rate for the trip is one and three-fifths fare on the certificate plan, which means \$22 going and \$13.20 returning, or a total of \$35.20 for the round trip. Don't fail to ask for certificate at time of purchase. The selling dates are March 22 to 27 inclusive, final return selling date April 5. Passengers from western points should purchase to Chicago only and repurchase here, as no special rates are authorized west of Chicago. Pullman rates: Lower berth, \$5.50; upper berth, \$4.40; compartment, \$15.50; drawing room, \$20.00.

Sleeping car reservations should be made at the earliest possible moment by communicating with G. K. Thompson, General Agent Passenger Department, Lake Shore & Michigan Southern Railway, 180 South Clark street, Chicago. Telephone, Harrison 7600.

## Cleveland to Boston.

The Cleveland Florists' Club will have a special car, Cleveland to Boston, and everyone is invited to join the members on this Lake Shore & Michigan Southern train, leaving the Union Station, Cleveland, Friday, March 24, at 7:40 p. m., and arriving in Boston at 3:40 p. m. March 25. The rate secured is 1 3/5 fare for the round trip on the certificate plan, that is \$14.20 going and \$8.52 returning, or a total of \$22.72 for the round trip. Be sure and ask for certificate when purchasing ticket, lower berth \$3.50, upper berth \$2.80. Reservations should be sent in early to Frank A. Friedley, Rocky River, O.

## New National Flower Candidate.

Mary Garden and Lawrence Durand have won the fight to have catnip adopted as the national flower—congress willing. A little catnip, please. —Chicago Journal.

Buy Direct of the Grower and Get Fresh Stock

## BASSETT & WASHBURN,

Office and Store: 76 Wabash Ave., Chicago

Greenhouses: Hinsdale, Illinois

#### Chicago.

##### PLENTY OF EVERYTHING.

Every day sees the stock increase in quantity and the quality holds up to a high standard. The weather for the month of March is exceedingly fine and of a kind that greatly aids the grower in producing high grade stock, for the days are pleasant with plenty of sunshine and the nights cold but not severe, and it is easy to keep the temperature even and at just the right point. The only shortage noted upon the market is American Beauty roses, which have not yet got into full crop and are not producing heavily. The larger number of those received are short-stemmed, and the quality is not of the highest. Other roses are being received in bountiful supply, and of all grades, some very fine stock being seen with all the growers. Killarney and White Killarney are in excellent shape, long stems bearing fine large flowers. Richmond is fine as are both Bride and Bridesmaid. Mrs. Jardine of beautiful color and My Maryland with fine long stems. Rhea Reid is also seen in excellent shape and is being used instead of American Beauty. The other popular varieties are to be found in smaller quantities but in fine condition. Carnations are being shipped to the stores in large quantities, and it is a wonder where they all go. Although the price on whites advanced for St. Patrick's Day and there was a large demand, it looks as if the supply was large enough to fill all the requests. The prices on the high grade stock, however, hold up well. Orchids are plentiful enough to fill all the orders and some very beautiful flowers are obtainable, the demand about equals the supply, however, and the prices do not fluctuate. Lilies and callas are in good supply and some extra fine blooms are noticeable

and the prices are a little lower. Violets are too plentiful and move slowly. Lily of the valley is coming in plentifully and some extra fine pots are seen in the store windows. The cut flowers are of splendid quality and are held at normal figures. Bulbous stock is at times over-plentiful, for not only are all the growers here in good supply but large shipments are being received from southern points which tends to lower the prices and cause a glut at times. Of the other spring flowers the cut increases mignonette, marguerites, snapdragon, freesias, calandulas, wall-flowers, stocks and forget-me-not are daily offerings. Sweet peas are more abundant and large numbers are being received, but the quality is uniformly good. There is plenty of greenhouse greens, both kinds of asparagus and smilax, but the price of hardy ferns holds high. The plantmen are all making ready for Easter and the stock at present looks very promising. Trade in general is a little light but, as one of the wholesalers says, all lines are feeling a slight depression and the florist business reflects the general conditions.

##### NOTES.

Phil Schupp, the hustling manager at J. A. Budlong's, is preparing to move and expects to occupy the new store at S2-S6 East Randolph street on April 3. His object in moving so soon is to take advantage of the new numbering system which goes into effect the first of next month. The new store is well lighted and has four entrances, a passenger and freight elevator and two side entrances. The interior will be re-painted and a few necessary alterations made. A new ice-box, in addition to the one now in use, is being built and will be installed on the north end of the building; a row of tables will

extend the length of the store. Both gas and electric lights are installed and, taken altogether, the accommodations could not be improved. Sinner Bros., Martin Gunterberg and others will occupy the east side of the building but do not expect to move until May 1. Budlong's will be greatly benefited by the change, as they have, for several years, been crowded for room which was a great handicap to them in handling the splendid business which they enjoy.

Poehlmann Bros. Co.'s large stock of lilies, consisting of 80,000 to 100,000 plants, are in splendid condition and will be in full bloom for the Easter trade. They are now booking orders for both the cut lily blooms and lilies in pots and will ship them, packed in paper pots, carefully crated and wrapped to keep clean and protected, with no extra charge for packing. The stock never looked better than now and they have reason to feel proud of the excellent condition of the plants at the present time.

E. B. Washburn and wife returned March 11 from a most enjoyable visit spent at Pasadena, Calif. He is in the best of health and is back at his desk at the store where he will look after the business while his father is attending the National Flower Show at Boston. He informs us that O. P. Bassett is building a new house, of bungalow style, and expects to occupy it some time in June. Mr. Bassett's many friends will be agreeably surprised when they read that he will pay the city a visit this summer on a combined business and pleasure trip. He has been suffering for some time with rheumatism but is improving and feeling much better.

N. Bezdek, of the Northwestern Floral Co. of Wilmette, will build a new residence this spring.

# EASTER LILIES

**As They Look Now.**

**They Will Be in Full Bloom for Easter.**

# VAUGHAN & SPERRY

LONG DISTANCE PHONE  
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

Geo. Keller & Son, 2614 Herndon street, manufacturers of red pots, will make extensive improvements at their factory this spring. The press which they recently purchased from the Baird Machine & Manufacturing Co., of Detroit, is giving satisfaction and increases their capacity, the daily output from this one machine being 10,000 pots.

The Des Plaines Floral Co. has received the material for their new greenhouses and will commence building operations soon. John Prickett, the junior member of the firm, will superintend the construction of the houses and Harry Blewitt, the senior member, will continue to devote his time to looking after the stock.

A. Anderson, of Moline, Ill., forwarded this week to the Chicago Carnation Co., a shipment of sample blooms of a seedling carnation he is growing. It is a very striking novelty, the background is of yellow and heavily variegated with red.

Mathias Engels, 2673 Herndon street, has four houses of bedding stock and ferns that are in splendid condition. Geraniums are his specialty and he expects to realize good profits from their sale this season.

John W. Pink, the hustling grower of Herndon street, expects to have a large crop of lilies for the Easter trade, plants are in splendid condition and should be in bloom at the proper time.

Manager Pyfer and Superintendent Olsen, of the Chicago Carnation Co., will attend the National Flower Show at Boston, where they will make a large exhibit of their choice products.

Kyle & Foerster are receiving a large supply of stock of all kinds, they are offering a novelty in Gem callas which is meeting with favor in the trade.

Howard A. Muir, formerly with the J. B. Deamud Co., is now with his

brother John, looking after the trade at the Forty-seventh street store.

E. F. Keebler & Co., real estate dealers, have leased to George A. Peters a flower stand in the new Hotel Sherman for ten years at a rental of \$12,000 for the term of the lease.

Sol. Garland is cutting heavily in carnations and is shipping some splendid blooms to this market, his Enchantress are of exceptionally good quality.

E. E. Pieser, of Kennicott Bros. Co., accompanied by his wife, left March

## ORCHIDS

..A Specialty..

A fine stock of Cattleyas, Gardenias, Dendrobiums, Assorted Orchids, Valley, Violets, Beauties, and all fancy flowers always on hand. Decorative stock and supplies of all kinds.

Send for Price List.

## CHAS. W. McKELLAR

51 Wabash Avenue,  
CHICAGO.

14 for West Baden, Ind., where they will receive treatment at this famous resort.

John Welsh, the well known florist of Ravenswood, is again attending to his business, fully recovered from a severe attack of rheumatism.

Geo. Reinberg is filling a number of orders for rooted rose cuttings and plants, mostly Richmond and White Killarney.

Mrs. J. M. Smely, of Aurora, was in the city on March 10, buying supplies for the Easter trade.

**POEHLMANN'S FANCY VALLEY EXTRA FINE HARRISII LILIES** } We make these a special.  
Can supply them all the year.  
Once tried you will have no other.

The Raedlein Basket Co., 713 Milwaukee avenue, is receiving some very complimentary letters from the florists to whom they have shipped baskets in which the writers state that they are well pleased with the shipments received. They are filling a large number of orders for their \$5.00 and \$10.00 assortments consisting of pot covers and cut flower baskets for the Easter trade. They are well prepared to handle the large trade which they enjoy, as they have recently received a shipment of 100 cases from their factories at Ebersdorf, Germany.

The Geo. M. Garland Co. of Des Plaines will furnish the material for the two new houses 34x37 feet that R. Yonkers, the well known vegetable grower of Grand Rapids, Mich., will erect this season.

Bassett & Washburn are filling a large number of orders for lilies, of which they have a supply. Stock

in general is arriving in quantity large enough to meet all demands. The bulbous stock that they are offering is of good quality with tulips and jonquils exceptionally fine.

Hoerber Bros. are offering a splendid grade of Killarney, White Killarney, Richmond, Bride and Bridesmaid roses. A large quantity of bulbous stock of all kinds is included in their daily shipments, as is also a splendid grade of sweet peas and carnations of good quality.

Henry Van Gelder, with Percy Jones, is showing an exceptionally fine grade of carnations and bulbous stock that are bringing good prices.

Harry Manheim is again attending to his duties at the Hoerber Bros. store, having recovered from his recent illness.

The James H. Rice Co. will deliver a car load of glass to Boelter & Quehike of Appleton, Wis., on April 1.

**U S Budlong's  
E Blue Ribbon Valley.**

John Nellist of Grand Rapids, Mich., is shipping a good grade of sweet peas to Kennicott Bros. Co.

The A. L. Randall Co. is showing a choice grade of gardenias, orchids, roses and carnations.

Weiland & Risch are well supplied with stock, their cut being exceedingly heavy.

The Star Floral Co. of Wilmette will build two new greenhouses this spring.

# CARNATIONS ROSES BEAUTIES

We are cutting a splendid grade of **Carnations** in all the leading varieties, and are now prepared to fill all orders.

Subject to change without notice.

**PETER REINBERG,** <sup>35</sup> Randolph St., **Chicago**

The John C. Moninger Co., 906 Blackhawk street, is receiving their share of the many orders that are being placed for greenhouse material this spring and their factory, which employs 150 men, is a scene of activity nowadays. This enterprising firm is meeting with great success and they have found it necessary not only to erect a new building but to purchase another, five stories in height. They have already spent \$50,000 this year for improvements and alterations are still under way. Philip L. McKee, the industrious representative, escorted us through the various departments of their factories and one thing in particular that attracted our attention was the painting of their iron frames, which are covered with a coat of the liquid on both the inside and outside before they are shipped. Another object of interest is the Otis electric elevator, which was installed some time ago at an expense of \$1,800; it is giving satisfaction and another of the same style will be added. After a walk through the factories we passed through the lumber yards, five in number, where are stored a total of 1,400,000 feet. We hope at some future date when the alterations are completed, to give a more thorough description of the factories of this enterprising concern.

E. H. Hunt is receiving a large supply of stock of all kinds; carnations are arriving in splendid condition and move readily at good prices. Clifford Pruner of the supply department is looking for a brisk Easter trade, and the many advance orders that have been received are now being shipped.

Vaughan & Sperry are receiving a number of advance orders for lilies for the Easter trade and have had inquiries from different sections of the country which leads them to believe that trade will be brisk from now on.

The Geo. Wittbold Co., 737 Bucking-  
ham place, is now booking orders for  
Easter blooming plants. A visit to the  
greenhouses on March 12 found the  
lilies, azaleas, Rambler roses and  
spireas in splendid condition, the latter  
being particularly noticeable. Henry  
Wittbold and his force of assistants  
have been very busy with store decorations  
and it was long after midnight on  
March 11 when they completed their  
week's work.

Chas. W. McKellar has made ar-  
rangements with the Huebert Bulb Co.,  
of Portsmouth, Va., to handle exclus-  
ively all their stock that is shipped to  
this market. The Huebert Bulb Co. is  
one of the largest growers of high class  
bulb stock in this country and Mr. Mc-  
Kellar is indeed fortunate in having  
them as one of his shippers.

The alterations in the store of H. C.  
Rowe at the Palmer House have been  
completed and the proprietor has one  
of the prettiest stores in town. The  
available space has been more than  
doubled, and the fountain in the rear

### Chicago Bowling.

On March 3, the Carnations won three games from the Violets and the Orchids won two and lost one to the Roses. Frank Ayers bowled two exceptionally good games and had a total of 218 pins in the opening and 209 in the final game. John Zech and Al. Fisher reached the 214 mark, followed closely by Wm. Lorman, who had a total of 201 pins to his credit.

Number of games won and lost by each team to date:

| Won        |    | Lost |  |
|------------|----|------|--|
| Orchids    | 47 | 16   |  |
| Carnations | 33 | 30   |  |

Two teams representing the league will visit Milwaukee next Sunday, March 19, when they will play two florist bowling teams of that city. A special rate has been secured for the round trip and anyone wishing to accompany the team should leave word with Allie Zech at Zech & Mann's store so arrangements for all can be made. The bowlers will leave on March 19 at 9:15 a. m. on the Chicago, Milwaukee & St. Paul railroad, returning home the same evening. A large crowd of rooters will accompany the bowlers to the Cream City.

### Davenport, Ia.

Business the past week has not been as brisk as previously. Roses have been very scarce and hard to obtain, carnations were plentiful, and never better. Plenty of bulb stuff of A No. 1 quality.

The regular monthly meeting of the Tri-City Florists' Club was held March 2 at the greenhouse of John Deers, Moline, Ill. Every member but one being present. It was the annual meeting and the election of officers took place which resulted as follows:

Theodore Ewoldt, president.  
Henry Paul, first vice president.  
John Staack, second vice president.  
H. Gaethje, third vice president.  
Wm. Knees, treasurer.  
John Temple, secretary.  
Harry Ellis, financial secretary.  
A. Eckstrom, Ed. Pattern, H. Hensley, directors.

The banquet committee reported the annual banquet will be held at Watch

Long Distance Phone, Randolph 3619.

## U S Budlong's E Blue Ribbon Valley.

Tower Inn, Rock Island, March 23. All florists and their wives are invited. Greenhouse construction was the topic for the evening's discussion, which was ably handled by John Staack and Henry Paul. A fine hot supper was served by the hosts and a social hour enjoyed. George Bunyard of Chicago was present and gave a very interesting talk. A vote of sympathy was extended to George Forbes, whose father recently passed away.

### NOTES.

Wm. Goos of Bettendorf will build an addition to his greenhouse this summer.

Ludwig Stapp is adding another 300 foot house to his range.

Theo. Ewoldt of Budlong Bros. has purchased a tract of land north of the city containing about 4½ acres.

R. M. C. Rohlfis of the Alta Vista Nurseries reports sales far ahead of the same time last year. T. E.

## New York.

## HEAVIER SUPPLIES.

A recital of market conditions just at this time is not very comforting, supplies are becoming heavier every day and the tendency in prices along all lines is downward. Fortunately we have been favored with some very fine spring like weather lately, and it has been possible to unload quantities of stock to speculators, all of which has been a relief that was appreciated by those who had accumulations of violets and carnations. The tea roses in grades from extras down are not near so difficult to dispose of as are the special and fancy grade stock. It does not seem to be a question of price either, for they are offered at all kinds of figures, there does not seem to be the kind of trade going that calls for them in quantity. The pinching out of buds method, adopted by growers, and which is giving a larger proportion of long stemmed roses with periods of scarcity between crops, is perhaps going to prove in the long run the most profitable way. When we consider that during January and February, number one and number two grades fetched good prices with not enough to go around, while now every grower almost seems to be in crop and the long-stemmed flowers predominate, and are bringing little, if any, more than the number two's did a month ago, it would seem that this pinching out of buds may need some further consideration. Carnations continue very plentiful and the quality was never better, it seems a shame almost that they have to be cleared out at such low prices as have prevailed lately. Cattleyas are going very slowly. C. Mossiae is beginning to come in limited quantities. Violets come in heavily every day and are going very cheap, one buyer alone took 175,000 out of the market one evening recently, quite a few for one man, but he no doubt got them at his own price. Gardenias get a little more numerous every day, though they are perhaps maintaining their value better than any other flower coming in. Lilies show many grades and are quite plentiful. Tulips, narcissus, freesias, sweet peas and all the incidental flowers are very plentiful yet, even though prices are not high, they go at some figure or other and no real glut has occurred. A little falling off is noted in the demand for geraniums.

## NOTES.

The Essay Committee of the New York Florists' Club has requested a number of members to present five-minute papers, or make addresses, on various subjects as follows: "Why Should Florists Attend the National Flower Show," by L. Miller. "The Benefit to New York Floriculture in the Establishment of the New Plant Market," by John Birnie. "The Retailer's Mission and Duty as a Member of the N. Y. Florists' Club," by Robert E. Berry. "The Best Method of Increasing Interest in the Club's Annual Outings," by C. B. Weathered. "The National Sweet Pea Society at Boston," by H. A. Bunday. "The History of Floriculture on Long Island," by Jas. Dean. "The Schoolteacher's Mission in Horticulture," by W. B. DuRie. "How Can the Gladiolus be Made a Popular Florist Flower," by I. S. Hendrickson. "Handling Lily Bulbs from the Field in Japan," by A. Kakuda. "The Status of Orchids in the Florist Trade," by John A. Manda. "Why Do not Florists Take More Interest in the Nursery Branch of the Business," by Jas. T. Scott. "Valley Growing 365 Days in the Year," by W. H. Siebrecht. "Fruited Plants and Blossomed Fruit Trees for Easter," by Anton Schulthies.

John Nicholas, the Forty-second street retail florist, who secured control of the two buildings in Twenty-

eight street, and who is remodeling them to be adaptable for the wholesale business for Kessler Bros. and the Growers' Cut Flower Co., has also obtained either by purchase or very long lease, three more buildings adjoining those at present undergoing renovation. These new acquisitions he will also remodel and make fit for the wholesale trade when he gets possession, which will not be until next year, however. It begins to look like an assured fact that the Twenty-eighth street flower district will eventually be mostly confined in the block between Sixth and Seventh avenues.

For the Havenmeyer-Dick wedding, which took place in the Church of the Incarnation, Feb. 28, M. A. Bowe arranged one of the smartest church decorations ever seen. White and pink were the colors and large plum trees in full bloom were among the many things utilized. Probably the most conspicuous and the most admired feature of the arrangement were the floral embellishments on the ends of each of the pews. A Porto Rican mat crushed and tied around each pew-head and filled with antirrhinum was the method employed, a new idea and which certainly made a hit.

It seems evident that more trouble is in store through express drivers strikes, the men of the Adams Co. went out March 11, and no deliveries were made on that day. Dealers who had consignments coming in over that company's routes were notified to send for the boxes, as it was impossible to deliver, causing much inconvenience. Present indications point to the drivers of other express companies going out also through sympathy. The trouble seems to be through the unwillingness of the Adam's Co. to recognize the union.

August Millang, 41 West Twenty-eighth street, has purchased the retail business of Muller, an old established place at 57 Stuyvesant avenue, Brooklyn. The store fixtures, two greenhouses well stocked, horses and wagons are all included in the purchase. Possession has already been taken and Mr. Millang is operating the place in conjunction with his Twenty-eighth street store. A new lease has just been signed for the latter store so that an immediate move from there is not at present contemplated.

J. D. Cockcroft, Northport, L. I., is erecting three more houses; one for carnations is 100x55 feet, two for chrysanthemums and sweet peas are each 150x25 feet, all are of the Payne iron construction and will be ready for occupancy July 1. When completed Mr. Cockcroft will have an establishment covering 100,000 square feet of area.

A large space in the first floor of the Cooper Buildings, directly underneath the New York Cut Flower Co., is being prepared for the accommodation of wholesale flower business. It is rumored that among those who will occupy the space are A. Hanig, Brooklyn, and A. N. Pierson, Cromwell, Conn., for the sale of plants.

It is said that 250 tickets are sold for the club dinner, which will be at Shanley's March 18. A delegation from England, en route for the Boston Show, are expected to reach here in time to attend the dinner.

J. P. Cleary, of the Fruit Auction Co., has returned from Europe where he has been making arrangements for consignments of plants. It is expected to open the auction season for plants, etc., March 21.

The Tarrytown Horticultural Society will hold their next exhibition in Tarrytown. For two years past, the music hall there was not available and the society had to hold their show in White Plains.

A birthday party in honor of Julius Roehrs, Jr., was held at his home,

Carlton Hill, N. J., March 4. Among those present were the parents of Mrs. Roehrs, Mr. and Mrs. Chas. Koch, Brooklyn.

For St. Patrick's Day there were a few green roses and carnations, clay pipes with bowls containing shamrocks and miniature pots of shamrock, all in limited quantities, however.

Miss Minnie Kreiger, a former employee of Weiss, for seven or eight years, has opened a retail store at 318 Fulton street, Brooklyn.

The Doubleday Page Co. have issued invitations for a dinner and reception to the trade at their place in Garden City, L. I., March 23.

E. S. Miller, Wading River, L. I., is very heavily in the hardy lily growing; he plants 200,000 L. tenuifolium.

G. B. Hall, retail florist, 518 Fifth avenue, Brooklyn, has put a new team and covered wagon into service.

Bowlers are gaining in enthusiasm. There were fourteen present at the New York alleys on March 10, quite a gathering for this club.

John Heeremans returned from an European trip on the Adriatic, March 10.

John Birnie attended the Deer reception at Riverview, N. J., March 8.

John T. Raynor left San Francisco for home March 14.

Visitors: Wm. Kleinheinz, Ogontz, Pa.; J. D. Cockcroft, Northport, L. I.; E. S. Miller, Wading River, L. I.

#### INAUGURATION WEATHER.

After a week of real "inauguration weather," in which was included a temperature of 20 degrees and a snow-fall of seven inches, business comes up smiling. The latter part of the week was clear with a moderate temperature, but there was a very strong wind on March 10. Flowers of all kinds are plentiful, and to the extent that roses, carnations and sweet peas, in addition to violets and arbutus, are now being sold on the street corners. Of course it is understood that most of this is inferior stock, but it shows the drift of trade. As many and possibly more flowers are being sold than before the beginning of Lent, but at reduced prices. An extra session of congress looms up in the near future and this will keep business alive. Partly on this account there will be but a limited number from this city in attendance at the National Flower Show.

#### CLUB MEETING.

The regular monthly meeting of the club was held March 7. The principal business was the election of officers. The ticket nominated at the February meeting was elected without a hitch, as follows:

Elmer Mayberry, president.  
 David Grillbortzer, vice-president.  
 O. A. C. Oehmler, secretary.  
 Wm. F. Gude, treasurer.

#### NOTES.

George H. Cooke, who was reported in our notes of last week as suffering severely from blood poisoning in his left hand, is now believed to be out of danger. He was for some time in Georgetown University hospital, where both skillful and heroic measures were taken, fortunately with success, to save his hand. He has been a great sufferer and his misfortune has evoked much sympathy from his many friends.

Wm. F. and Adolphus Gude will attend the National Flower Show at Boston, the former being one of the judges. This firm is at present showing particularly fine stock in gardenias, roses and Beacon carnations. During the past week their store has been a very busy mart of trade.

The Florists' Exchange has bought the property outright at 1214 H Street N. W., the price paid being \$12,000.00. They are now finely located and well fitted up with a convenient store and abundant cold storage facilities for doing a first-class wholesale business. Manager Schnell is always on the job and we predict continued success for this initial venture in the exclusive wholesale trade of this city.

Wm. F. and Adolphus Gude, Mayberry and Hoover, Otto Bauer and J.

L. Bickings, of Loy & Bickings, went to Philadelphia March 7 for the gathering at Dreer's. They were all surprised when they got over there, to find no snow, as they left plenty at home. A. F. F.

Tarrytown, N. Y.

The regular monthly meeting of the Tarrytown Horticultural society was held on February 21. President Brunger in the chair. F. W. Stobo, R. Franke and W. MacBean were elected active members and one application for membership was received. A communication was read from the New York Florists' Club, asking the co-operation of the society in securing the passage of a bill through the legislature, appropriating \$50,000 to erect greenhouses at Cornell for experimental purposes. It was announced that the fall show will be held October 31, to November 2, in the Music Hall, Tarrytown. The subject and exhibits for the next meeting will be roses and bulbous flowers.

GEO. MCINTOSH, Cor. Sec'y.

# EASTER PLANTS

Wishing You a Joyful, Happy and Prosperous Easter.

## Prepare for Easter

All florists should this Easter-time, come see my stock quite superlative:  
My glistening *Araucaria*, my *Lilies* strong and wondrous fair;  
Ferns, big and green no rival know. Bulbs of all sorts, the best I grow.  
There's not a flower you now can need, but I can sell you cheap indeed;  
Azaleas like a pinet on fire, with blooms that fill the heart's desire;  
Choice Primroses with colors chaste, Palms grown to suit the highest taste.  
The spring-time jewels are my flowers, pictures of life that bring them out;  
None fairer, better, you can find—I have the best of every kind.

### Spirea Gladstone.

What is a home, what is a store, what is a church,  
what is an Easter present, without having a few  
plants of the so much admired and so greatly in  
demand *Spirea Gladstone*, the pride of Holland?  
O, those charming sprays of beautiful  
pure white flowers! And the foliage, of such a  
beautiful waxy deep green is a jewel in itself!  
Mixed with beautiful lilies and other blooming  
plants they will complete the flower decoration  
for your happy, joyful Easter home of 1911.  
Knowing the great demand for these plants  
during past Easters, when not half the cus-  
tomers could be supplied, we are well prepared  
this year for the rush, and were fortunate in  
spite of the scarcity last fall in Holland. When  
other florists' supplies were cut short by Hol-  
land growers, we obtained enough of the bulbs  
to fill two houses with the choicest, and we are  
able to supply all incoming orders promptly.  
Price: 5½, 6 and 7 in. pots, full of buds and  
flowers, 25c, 35c, 50c, 75c to \$1.00 each; dozen or  
more, the same price. Some are as big as a  
washtub.

### Cineraria Hyb. Grandiflora.

Readers, please just a minute. I wish to call  
your attention to one of our biggest house-  
filled with a big selection of that so much ad-  
mired Easter novelty, the *Cineraria Hyb. Grandiflora*, which will have no equal in the  
flower market for Easter, 1911. If you are not  
fortunate enough to see them growing at our  
establishment, then just imagine you were  
promoted to a paradise, to a garden in Eden  
standing before a mass of flowers in various  
beautiful colors. This is the condition one of  
our *Cineraria* houses represents at Easter-time.  
Our new improved strain, planted in 6 in. pots,  
of medium tall sizes, are unsurpassed in the size  
and color of the flowers. The flowers are about  
twice the size of the old ordinary varieties, has  
big heads of flowers, good foliage, some of the  
plants are as big as a small apple basket.  
Price: 6 in. pots, 25c, 35c, 50c, 75c to \$1.00 per  
plant; dozen or more, same price.

### Azalea Indica.

Remember we are headquarters for *Azalea  
Indica*, grown for us under contract in Ghent,  
Belgium under my personal inspection, by  
going abroad every year and looking them over.

*Azalea Indica*, Easter forcing: *Vervaeana*,  
*Deutsche Perle*, President O. v. d. Kerkove,  
Emperor of Brazil, Professor Wolters, Empress  
of India, Schryveriana double variegated 60c,  
75c, \$1.00 to \$1.50; also *Minie Van der Cruysen*,  
*Simon Mardner*, pink, *Niobe*, white, *Apollon*, red,  
60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we  
have *Niobe*, *Helena Thielman*, *Bernard Andreas*,  
*Alba*, white, *Empress of India*, *Minie Van der  
Cruysen* and others \$1.50, \$2.00 to \$2.50.

*Azalea Indica*, with buds advanced, showing  
color and partly in bloom, *Deutsche Perle*, *Vervaeana*  
and *Simon Mardner*, 60c, 75c, \$1.00 to  
\$1.25. Can supply *Deutsche Perle* in bloom,  
all you want, for 60c on up to \$1.50.

### Lilium Multiflorum.

We have *Lilies* this Easter (1911) to burn to  
burn; they are crackjacks to beat the band,  
the best in the land, the best in the land.

Three houses in *Lilium Multiflorum* the genuine  
Japan Easter Lily, better than ever before.  
Our own importation from our general grower in  
Japan, raised from 9-10 in. bulbs, started in 6 in.  
pots last October; have kept cold. Plants  
medium size, from 5 to 10 buds to the plant,  
10c per bud; plants under 5 buds, 12c per bud.  
Just right for Easter. We have the finest lilies  
this year in Philadelphia and all over the  
country, is the town talk from florists and agents  
daily visiting our place. "We never have seen  
anything like it," said two well-known growers  
from Cincinnati and Short Hills, N. J., the other  
day, when visiting our place together. We have  
three houses full in 6 in. pots, nicely staked up,  
medium height, and can supply all importations.

Our *Hydrangea Otakasa* can't be beat; full of  
buds; right for Easter trade; every branch  
nicely staked up, 6 in. pots, 25c, 35c to 50c;  
7 in., 75c, \$1.00, \$1.25 to \$1.50.

*Hyacinths* of our own importation, four best  
colors, Gertrude, best pink; King of the Blues,  
best blue; Grand Maitre, light blue; La Grand-  
esse, best white; 4 in. pots, now outside in cold  
frame, covered with leaves; two weeks will force  
them out into bloom; now \$10.00 per 100; when  
in bloom, \$12.00 per 100.

*Adiantum Hybridum*, 6 in. pan, 25c to 30c.  
*Asparagus Sprengeri*, 2½ in., 3c; 4 in., 10c.

### Araucarias Our Specialty.

We are the largest importers of these lovely decora-  
tive plants the *Araucaria Excelsa*, *Robusta*  
*Compacta* and *Glaucia*, 6,000 of the choicest last  
spring (1910) importation, ready for immediate  
shipment. It is of no use to look elsewhere for  
cheaper prices. We now control and will con-  
trol the market of the *Araucarias* in the future.

Look! Bargains in *Araucaria Excelsa*.  
Such low prices as are quoted below were never  
known in the history of *Araucaria Excelsa*. Just  
think! 6 to 7-inch pots, 4-5 years old, 4-5-6-7  
tiers, 25-35-40 in. in height, for only 75c, \$1.00,  
\$1.25, \$1.50 to \$2.00 each. These prices are  
record breakers—money makers for you.

*Araucaria Excelsa*, raised from top cuttings, no  
seedlings, Plants, 5-5½-6-7 in. pots, 15-18-20-  
25-30 in. high, 4-5-6 tiers, 2-8-4-5 years old, 75c,  
\$1.00, \$1.25, \$1.50 to \$2.00 each. We give big  
value for your money. Just think! *Araucaria*  
6 in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high,  
for only \$1.00; a jumbo, 6 in. pot, 5-year  
old, 25 in. and over, as wide as a bushel basket,  
5-6 tiers for only \$1.00; and what do you think!  
a holy terror, 30 to 41 in. and over, 5-6 tiers,  
worth \$7.00, for only \$1.25 to \$1.50.

*Robusta Compacta*, *Excelsa Glaucia*, 6 in. pots,  
\$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest *Araucaria Robusta Com-  
pacta* and *Excelsa Glaucia*, a house full, for  
only \$1.25 to \$1.50, worth double.

*Dracena Brantii*, 25 to 30 in. high, 6 in. pots, 40c  
to 50c. Highly recommended for store and house  
decoration; stands heat, cold and dust.

*Von Sion Daffodils* (double nosed) best double  
*Narcissus* in cultivation, three bulbs planted in  
a 5c to 6 in. pot, \$2.50 per doz. pots.  
*Tulips*, Tourne-sole double, red and yellow varie-  
gated and *Murillo*, beautifully shaded rose  
pink, three bulbs in one pot (4 in.), \$15.00 per  
100 pots; \$1.80 per doz.

*Ipomoea Noctiflora*, our so well-known  
pure white, waxy *Moovine*, bearing flowers  
very fragrant and as big as saucer 2½ in. pots,  
will make good stock for you to propagate from,  
\$5.00 per 100.

*Lantana Borbonica* (Chinese Fan Palms), 30 to 35  
in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

*Kentia Forsteriana*, in fine shape, 6 in. pots,  
30-35-40-45 in. high, 4-5-6 years old, \$1.00, \$1.25,  
\$1.50, \$2.00 to \$2.50 each.

*Kentia Belmoreana*, 30-35-40 in. high, 5-5½-6-7 in.  
pots, 5-6-7 years old, \$1.25, \$1.50 to \$2.00 each.

*Kentia Belmoreana*, 30-35-40 in. high, 5-6-7 years  
old, in high made up of 3 plants, 6 to 7 in. pots,  
\$1.00, \$1.25 to \$1.50; 4 in., 20 in. high, 20c to 25c.  
Our Ferns this year are exceptionally very fine.

*Boston*, *Scotti*, *Whitman* and *Scholz*, 5½  
and 6 in., 35c, 40 and 50c; 7 in., large bushy  
plants, \$1.00 to \$1.00. As big as a bushel basket,  
\$1.00 to \$1.25. Remember, all our Ferns are  
not grown, not lifted from benches.

*Neph. Glatraii*, a new beautiful fern, an improve-  
ment on *Scotti*, much shorter and bushier than  
*Scotti* 5½ in. pots, 50c; 3 in., pots, 25c.

*Ferns for Dishes*, big assortment, 2½ in. pots, at  
40c per 100.

*Crispa Rambler Roses*, 6 in. pots, 3 feet high,  
nicely staked up and heat down, 50c to 75c  
\$1.00, \$1.25 to \$1.50 each.

*Begonia Rex*, 5 to 5½ in. pots, 20c to 25c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

#### Pochlmann's Latest Greenhouse Range.

The illustration herewith shows part of this year's addition to plant A of the Pochlmann Brothers Co., at Morton Grove, Ill., consisting of 13 houses 250 feet long by 27 feet wide, which have been added to similar houses recently built, and this range of 13 houses now being built, will be followed immediately by 13 more, for which material is now on the ground. These houses, running east and west, are built on 2-inch pipe posts set in concrete, supporting Garland cast iron gutters, which in turn support Louisiana red cypress woodwork, furnished by the Foley Manufacturing Co. The roofs are composed of 16-foot bars to the north and 14-foot bars to the south.

August Pochlmann.

which is the typical Pochlmann construction. The vent sash are made in the most approved manner, being blind-mortised, to prevent rotting of the stiles, which has happened in the old style construction of vent sash. The vent sash are operated by the Evans Challenge ventilating machine.

William Mellander, the well known greenhouse builder, who is doing the work for the Pochlmann Brothers Co., says he has broken the record in the speed with which he placed the roof bars on these houses, having put on and secured in place the roof of one house in four and one-half hours, owing to the excellent manner in which the woodwork was turned out, saving him a great deal of money in the cost

Adolph Pochlmann.

of construction. The roofs are supported by the Pochlmann truss, which is built by the Pochlmann Bros. Co. on the ground. These are a high type of greenhouses, the gutters being between 11 and 12 feet high. The benches are made of concrete, according to the Pochlmann ideas of construction, and while expensive, are expected to pay for the expense in durability. These buildings are heated by steam, coming from the new boiler house, automatic stokers being used to feed the coal. The large stack shown in the center of the picture is the stack of the new heating plant and power house, which plant when complete is expected will be the largest of its kind extant. The condensed steam is brought back to the boilers by the vacuum system.

The 13 new houses will be added to the east of those now in process of construction, and it is expected that when this range is complete, the houses in the same will be about 1,500 feet long. This range is expected to be used for American Beauty roses and this addition large as it is, and which would make a very respectable sized plant in itself, looks comparatively small, compared to the extent of the greenhouses in plants A and B.

The foregoing is typical of western hustle and energy and it looks as though their building operations, which have been largely to the east of the Chicago, Milwaukee and St. Paul railroad, will soon begin on the west, as the space on the east is limited to a few miles by Lake Michigan, while on the west the nearest large body of water to stop operations is the Mississippi river.

HUNTINGTON, W. VA.—The Peters Flower Store temporarily moved to their greenhouse until their new store on Eighth street, between Third and Fourth avenues, is completed.

POEHLMANN'S LATEST ADDITION.

#### European Horticulture.

FROM THE FRENCH TRADE PAPERS.

Gardens of the Luxembourg.—Lovers of statistics will be interested to learn that the gardens of the Luxembourg in Paris, with an area of sixty acres, require the services of 55 gardeners, chiefs and workmen; 160,600 plants are used for summer decoration, 35,000 in the spring planting. A single Sunday will sometimes record the visits of 10,000 persons. Plants for the decoration of the Palace are grown in the greenhouses, ferns, palms, azaleas, crotons, etc., while a specialty is made of orchids and chrysanthemums. The remarkable fruit garden (one could hardly say orchard) contains 300 varieties of pears and 250 of apples, each of the 900 trees a perfect specimen. Needless to say, these gardens have been a pleasure spot of Paris for centuries, \$25,000 per year being allowed for their maintenance.

Color descriptions.—Continued effort is being exercised among French horticulturists to reduce this matter to an exactitude. At the last meeting of the French Chrysanthemum Congress, Mr. Blot, chief of cultures, in a careful paper, proposed a manner of arriving at the "medium" color of a flower; a copy of the "Repertoire des Couleurs," remade by folding the color plates accordion-wise and attaching those of one fundamental color in an ascending scale of color, was shown, and as a test a flower of Chrysanthemum Tokio was immediately referred to its proper shade. The question of matching a petal or the entire flower was discussed and a committee formed to recommend a process. The recently published and scientific "Repertoire des Couleurs" must serve as the foundation for any such universal rule for descriptions, although its cost and bulk will preclude its general use. It is said that over 700 copies were purchased.

John Pochlmann.

chased in the Royal Horticultural Society of London.

Experiments with fertilizers.—The result of experiments in the fertilization of chrysanthemums by the French Society of Chrysanthemum Growers showed definitely that the addition of liquid manure to the soil during the period of vegetation was attended with poor results, a surface dressing of fertilizer, by August 15, at the latest, being much preferable. Analysis of the soil with an intelligent addition of fertilizers is considered indispensable.

Spirea Japonica Peachblossom.—This popular plant, which is in such demand for forcing, is most effective when contrasted with the milk-white Lord Salisbury, an equally fine sort for pot culture.

Carnation Carola.—Deep red, made a sensation among French growers in the spring and fall exhibitions of 1910, for size and brilliant color; also Mme. Leveque's Roi des Jaunes, an enormous pale yellow carnation, of dwarf habit and strong stem, as well as great freedom of bloom.

The Bouvardia.—This is to have a revival of popularity, and justly, for it may be grown into as handsome plants as the fuchsia, as well as forced for winter cutting; among the free-blooming and beautiful varieties shown this fall in Paris were: Rosalinda, President Cleveland, a fine scarlet; Rosa Multiflora, Bride of Brooklyn, pure white; Davison, pale pink; Priory Beauty, a handsome rose color.

Virginia Pochlmann.

# Your Carnation Trade Wants "Dorothy Gordon"

SOME new carnations look good when they first come out, but fail to measure up to their promise and the claims of the disseminator. In this connection, you can profitably remember that Carnation "Dorothy Gordon" has been tried and proved, and is still making good. Its merits were well known to us before we advertised a single cutting for sale, and the trade has had ample time since to get fully acquainted with this variety. As a result, "Dorothy Gordon" is making money for more florists this winter than ever. With its large flowers of uniform flesh pink; its long, stiff stems and unusually fine lasting qualities, "Dorothy Gordon" has won the favor of florists whose customers demand the best and are ready to pay for it. The flowers bring a higher price—we grew it for years beside Enchantress, and got practically 50% more for "Dorothy Gordon." Rooted cuttings—you ought to have some of them. Send us your order now or write for further particulars.

**Its Color, Substance and Durability Bring You Customers Who STAY.**

#### SATISFACTORY CONDITIONS.

Trade conditions last week, in deep contrast with the week previous, brought a happier solution to the question of supply and demand, satisfying both growers and dealers. A generous supply of nearly every seasonable flower was met with a spirited and surprising demand for the second week of Lent. Even the slower moving bulbous stock shared the favor of other items, and Saturday evening early the wholesale house could not fill even a small order for anything in the list of flowers. Roses are still comparatively scarce and even a day of slow demand does not allow them to accumulate. Carnations are becoming far more plentiful as the season advances and are improving in quality, and most of them selling at \$1.50 and as low as one dollar per hundred. The very best grades bring \$2.50 and a few \$3.00 per hundred. The white varieties are now being held back for the anticipated heavy demand for St. Patrick's Day. For this event, many shamrocks and unique arrangements are already being shown, and a good trade in them is expected. Interest is fast developing in the proposed trip of more than a dozen florists to Boston to attend the National Flower Show.

#### NOTES.

The Detroit Floral Co. has leased the store 747 Woodward avenue, corner of Alexandrine, and will occupy it about March 20. This move is made necessary because of the sale recently of the property where they are now located, but which they can still occupy until next fall.

A. B. Lewis, Pontiac, is suffering from a nervous breakdown, but hopes are entertained for improvement in his condition before long.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N. Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, June, 1911.

VISITED CHICAGO: C. F. Wood, of Wood, Stubbs & Co., Louisville, Ky.

BURPEE's page advertisement in color on the cover of Country Life for March 1 is a striking one.

THOSE in the seed and plant trades are hoping against a repetition of last season's disastrous and unreasonable March weather.

SOME interesting comments on the newer gladioli, by Secretary Gage of the American Gladiolus Society, will be found elsewhere in this issue.

VAUGHAN'S SEED STORE, Chicago, will publish a book on the gladioli, by M. Crawford and Dr. W. Van Fleet, April 1, at \$1.25 per copy. There is need of such a work.

CHICAGO.—Prices on the board of trade March 15 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

THESE are the big days with the mail order seed houses, Big Monday usually falling not far from March 20 in the absence of unusual cold snaps. The orders have been coming strong for the past two weeks.

DES MOINES, IA.—The Iowa Seed Co. made a deal in red clover last week which is claimed to be a record for size west of the Mississippi, securing five cars of Iowa stock, the amount involved in the transaction being over \$20,000.

NEW YORK.—Seed stores are all very busy, night work being a regular necessity to keep up with the orders. In fact, there is some work going on Sundays. Counter trade is increasing.—J. C. Vaughan returned to Chicago March 9.

SAN JOSE, CALIF.—Under date of March 5, we are advised by the Braslan Seed Growers Co., that California is having the worst storm in many years and it is feared that the seed crops, especially onion, will suffer much damage from rain and flood.

### Illinois After Canada Thistle.

There has been presented in the Illinois state legislature a bill amending section 40 of the act of 1874, and provides that whoever shall bring into this state, whether in packing or in grain or grass seed, or otherwise, or permit the dissemination on any land, any seed of Canada thistle, or permit the same to grow to a height of six inches or over on land owned or occupied by him, shall be fined not less than \$10.00 nor more than \$100.00, the fine to be paid to the commissioner of Canada thistles, if any is appointed in the town or precinct, city or village, or otherwise, as directed by law.

### Pure Seed.

A bulletin of the United States Department of Agriculture declares that the solution of the difficulty lies with the consumers; if they will demand a statement of quality and purchase only from firms that are willing to give a reliable statement, and if they will pay what good seed is worth, they will get good seed; if they will continue to buy haphazard they must take their chances.

Prof. W. F. Massey, a veteran farmer and writer on agricultural subjects, has a valuable article on this subject in the February number of the Southern Planter, of Richmond, Va., in which he points out that when seed turns out badly it is quite as often the fault of the planter as that of the seedsmen. He also says: "The difference in the crop to a market gardener between well-bred and poorly bred ones will often, and in fact generally, make the higher priced seed ten times cheaper than the low priced article."—Jacksonville (Fla.) Times-Union.

### Canadian Reciprocity Excludes Catalogues.

The proposed reciprocity treaty with Canada, according to Charles N. Page, permits the free passage of American seeds across the Canadian border, while the Canadian postal laws exclude American seed catalogues. In order to get their catalogues into Canada at the present time, the American seed growers are compelled to pay a duty of 15 cents a pound. That sum amounts to double the postage on the books.

"Every once in a while I get a letter from the Canadian postal department," says Mr. Page, "in which I am informed that a quantity of my catalogues are being held there and that they will be destroyed unless I send the money

to pay for their admission into the country. The duty amounts to about eight cents on each catalogue, which is too much for us to pay. There are 1,000 American farmers in Canada who want to use American seeds and these are denied them because of the stringent postal and revenue laws governing the admission of catalogues into Canada."

### Imports.

During the week ending February 11, imports were received at New York as follows:

P. Ouwerkerk, 118 cases trees.  
H. Frank Darrow, 99 packages seed, 14 cases plants, 7 cases trees and shrubs.

Henry Nungesser & Co., 62 barrels seed.

McFutchison & Co., 32 cases trees and shrubs, 31 cases plants, 30 casks seed.

Aug. Rolker & Son, 31 packages and 29 cases plants, seven packages seed.

W. E. Marshall & Co., 19 barrels seed.

Department of Agriculture, four bags seed.

To others: 1,020 bags, 424 packages, 421 barrels, 400 sacks and eight cases seed, 169 cases trees and shrubs, 32 cases and one box plants, 14 cases trees.

### Catalogues Received.

Ellwanger & Barry, Rochester, N. Y., trees, shrubs, roses and hardy plants; Fottler, Fiske, Rawson Co., Boston, Mass., seeds; James Vick's Sons, Rochester, N. Y., garden and floral guide; Peacock Dahlia Farms, Williamstown Junction, N. J., dahlias; William Tricker, Arlington, N. J., water lilies; Wild Bros. Nursery Co., Sarcoxie, Mo., trees and shrubs; Pomoona nurseries, Palmyra, N. J., trees and shrubs; Palisades Nurseries, Sparkhill, N. Y., perennials; F. W. Kelsey Nursery Co., New York, nursery stock; American Forestry Co., South Framingham, Mass., trees; Geo. L. Stillman, Westerly, R. I., dahlias; Glen Bros, Rochester, N. Y., nursery stock, chestnut trees; M. Crawford Co., Cuyahoga Falls, O., small fruits; W. H. Thomas, Anna, Ill., strawberry plants; The Horticultural Co., Worcester, Mass., bulbs; I. N. Kramer & Son, Cedar Rapids, Ia., seeds; J. M. Phillips' Sons, Pittsburg, Pa., seeds; M. Herb, Naples, Italy, seeds; Dammann & Co., San Giovanni a Teduccio, Italy, seeds of novelties; V. Lemoine & Sons, Nancy, France, shrubs, plants and bulbs; novelties and begonias; Vilmoren, Andreux & Co., Paris, France, chrysanthemums, dahlias and cannas; Perry's Hardy Plant Farm, Enfield, England, florists' flowers; Wilhelm Pfitzer, Stuttgart, Germany, seeds and plants; Van Heiningen Bros. & Co., Boskoop, Holland, trees, shrubs, and rhododendrons.

### HEAVY RECEIPTS OF STOCK.

Stock has begun to pile up the last few days, every kind of flower that is seasonable being received in large quantities. In roses Killarney is the most plentiful and the flowers are of exceptionally good quality. White Killarney seems a little shy, American Beauties are still scarce, and Richmond is taking on better form. Carnations of all colors and varieties are very plentiful, and enough white carnations for St. Patrick's Day will be assured if present indications are fulfilled. In bulbous stock there is a good variety of hyacinths, tulips, daffodils, jonquils, callas and lilies, the latter two being very good at low prices. Forget-me-not is coming in and finds a good market. Sweet peas are in excellent shape and sell well. Calandula is picking up as are the few daisies and mononette, asparagus plumosus and A. Sprenger are more plentiful, as is adiantum with good demand. Violets and lily of the valley are moving rather slowly, but the quality is good.

### NOTES.

The following florists from Cleveland will attend the Boston Flower Show: A. Graham and wife, Fred Witthuhn, H. P. Knoble and wife, Mrs. A. L. Brown, Guy Bates, Frank Williams, Frank Friedly, Sam Pentecost, Mr. and Mrs. V. A. Cogill of Salem, Carl Hagenberger, Mentor; L. L. Lamborn, Alliance; Frank Brownwell, Robt. Livingston, Columbus; John A. Evans, Richmond, Ind. The Lake Shore train leaves Union Station Friday, March 24, at 7:40 p. m., arriving at Boston at 2:40 p. m. March 25.

The Central Passenger Association has granted the Cleveland florists a rate of \$14.20 going to Boston and \$8.52 returning, making a full round trip ticket for \$22.72. This is 1-3-5 regular fare, on the certificate plan. Remember it is not yet too late to go, so reserve accommodations for yourself and wife.

The Cleveland Florists' Club now boasts a membership of 85 active and paid-up members, new ones coming in at every meeting. Get in line and push it along.

E. S. MILLER, Wading River, N.Y.

The Florists' Club has appointed a committee of five to make arrangements to hold a dance shortly after Easter.

Knoble Bros. made a very beautiful blanket of violets the past week for the Wallace funeral. C. F. B.

BOSTON, MASS.—Henry R. Comley, at No. 6 Park street, has installed a new auto delivery truck, which is a much needed acquisition in discharging his many orders and the requirements of his increased trade.

NEW HAVEN, CONN.—The Frank S. Platt Co. have increased their authorized capital stock from \$25,000 to \$75,000. The increase was necessitated by the continuous rapid increase in the company's business.

# The Two New Carnations for 1911

## WHITE WONDER.

The largest and most productive white carnation.  
Has all the white varieties outclassed.

## GLORIOSA.

Pure glistening bright pink. A decided improvement over all the pink varieties in color and every other respect.

The two carnations that will prove to please all growers and the most critical buyers. Commercially they will head the list of varieties grown in the future. Do not fail to grow these varieties that have been inspected and have met the approval of many of our best carnation growers. If you have not already ordered, **Do So Now.** We have only a few thousand of each left for March 15 delivery. Our next delivery after that will be March 27.

Prices: \$12.00 per 100; \$100.00 per 1000; 2,500 for \$237.50; 5,000 for \$450.00.

## F. DORNER & SONS CO., La Fayette, Ind.

# CARNATIONS

## White House

The Quality White. Won the Silver Cup at Morristown for best undissemated variety; Bronze Medal at Pittsburg, and five other certificates. Absolutely non-bursting, clean and kind in growth, and a variety that will make good. We have 10,000 for March delivery, and that is all we will be able to supply.

## Princess Charming

The finest thing in sight in the Enchantress shade of pink. Every bud a perfect flower, and your net returns per square foot will surprise you.

Our stock is limited, but we are still in a position to supply first-class rooted cuttings of this variety at \$12.00 per 100; \$100.00 per 1000.

## CHRYSANTHEMUMS

We catalogue over 500 varieties, and surely we have the kind you want.

CHAS. H. TOTTY,

MADISON, N. J.

Katalog for the asking.

**Skidelsky & Irwin Co.**  
1215 Betz Bldg., Philadelphia, Pa

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice-President;  
S. W. Severance, 503 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

DAVENPORT, IA.—The Bettendorf Booster Club accepted the proposition of J. W. Davis to dispose of the stock and build greenhouses costing \$60,000, for the purpose of raising tomatoes, cucumbers and ferns. The houses when completed will employ 50 men.

### Prices of Indoor Fruits and Vegetables.

New York, March 11.—Mushrooms, 50 cents per pound; cucumbers, 20 cents each; lettuce, \$1 per dozen heads; tomatoes, 25 cents per pound; radishes, 60 cents per dozen bunches; asparagus, \$6 per dozen bunches; rhubarb, \$1 per dozen bunches; grapes, \$1 per pound; beans, 25 cents per quart; peas, 40 cents per quart.

Chicago, March 11.—Mushrooms, 20 cents per pound; cucumbers, \$1.25 to \$1.50 per box, small; lettuce, 20 cents to 22½ cents per pound; radishes, 15 cents to 50 cents per dozen bunches; rhubarb, 25 cents to 50 cents per dozen bunches.

### Market Gardening Scheme in Canada.

It is reported by a Canadian agency that English and Scotch capital in Toronto is buying between \$2,000,000 and \$3,000,000 worth of farming lands close to Toronto with a view to bringing immigrants from Great Britain for the purpose of developing market gardening. The property will be divided into farms of 10 to 50 acres, and the farms will be sold or rented to the immigrants as they may prefer. A good electric car service will be put through the district and a first-class storage system will also be inaugurated.—Consular and Trade Reports.

### Buffalo.

#### PROFUSION OF STOCK.

Weather conditions have had very much of a tendency toward spring which has made trade fairly good. Everything in spring flowers is coming in and all the stores are resplendent with spring decorations. Roses, tulips, daffodils, myosotis, sweet peas and hyacinths are fine. White carnations and other stock is in profusion. Magna Charta roses, azaleas, genestas and heather are the newer plants. Tulip, daffodil and hyacinth plants are more common. Active preparations are being made for St. Patrick's Day. Green carnations and shamrocks will be very much in evidence.

#### CLUB MEETING.

Last week was an eventful one for the florists; it was one continual round of pleasure. First was the annual election and banquet of the Buffalo Florists' Club, which was the best in the history of the club in point of attendance and entertainment. The election was tantamount to only one contest, that for vice-president between J. Sangster and R. A. Scott, which resulted as follows:

George McClure, Jr., president.  
Jos. Sangster, vice-president.  
Chas. Sandiford, treasurer.  
Wm. Legg, secretary.  
Jerome Deutscher, financial secretary.  
Trustees: W. J. Palmer, C. T. Guenther, W. A. Adams.

After the election all sat down to a banquet at the Hofbrau, which was fine. After the inner man had been satisfied and the cigars lighted Wm. F. Kasting, in his usual affable manner, called on the new president, Geo. McClure, the past president, Jos. Streit, Supt. of Parks Seymour, W. J. Palmer.

L. H. Neubeck, Wm. Legg, Fred Brown and W. A. Adams. Each spoke briefly, as that is the soul of wit at a banquet. The entertainment was very interesting and instructive. Otto Gillis had about 70 lantern slides of scenes, flowers in their natural form, such as clusters of daisies, deutzia and other fine specimens, also some fine arrangements in bouquets. Flashed between these interesting pictures were several features of Kasting's circus daily at 383 Ellicott street. Music was furnished by Parish Lodge quartet and George Troup was the leader. Chas. Hass was the mystery as a Hebrew impersonator. It was very gratifying to see so many new faces, Brookens of Orchard Park, McCarthy of Lockport, Stroth of Attica, Meyers of Lancaster, Ehmam of Corfu and Forbach of Pine Ridge. The younger shoots are very much in evidence and were welcome additions. Henry Kraus, Harry Aust, George Paschke and several others made some of the has-beens sit up and think that ere long they must pass along. There was a very fine, though not large, exhibit of carnations, roses and sweet peas. A. N. Pierson, Cromwell, Conn., had fine vases of his roses, Dark Pink Killarney, Radiance, Lady Cromwell and Prince of Bulgaria. They are certainly fine and were very much admired. Palmer had a fine lot of carnations, also C. T. Guenther, Hamburg. Stroth of Attica had a grand lot of his new pink carnation ideal. Eichholz of Waynesboro, Pa., had a fine vase of Prince Charming. The Wanoka Greenhouses of Barneveld, N. Y., had a fine vase of Rainbow. There were about 75 present and all pronounced it a grand success and voted thanks to the efforts of the committee.

#### NOTES.

Seventeen of the faithful journeyed to Rochester to bowl and root for the return match. They were met by the Rochester boys and taken to the Rochester Hofbrau and entertained at a fine dinner. Cigars were passed and John Dunbar, as toastmaster, called upon Kasting, McClure, Neubeck and Adams for a few remarks, which were responded to with a vim to a good bunch of boys and then all adjourned to the alleys where the event of the evening took place. Buffalo was again

victorious in the five-men team and the three-men match, but what was the difference? Chas. Vick, Mike Keller, George Hart, Fred Vick and all the boys made it more than pleasant for the Buffalo boys and had the result been on the other side we would have been just as happy. When the Buffalo boys returned there was but one thing to say and all agreed that the Rochester boys were there in every way.

BISON.

### Horticultural Society of New York.

The fall exhibition of this society will be held at the American Museum of Natural History from November 3-7. The second monthly exhibition was held, in conjunction with the meeting, at the American Museum of Natural History, West Assembly Hall, March 8. The exhibition in February was encouraging, but the present one was much larger and better attended. Cyclamens and carnations held the center of the stage, but there were many other exhibits, among which were orchids, bulbous and cut flowers. The display of cyclamens was superb, and the competition in the carnations was very keen. The silver medals were awarded to W. Sargent for carnations, F. W. Burton, group of orchids; J. A. Manda, Cypripedium Iris, and Lager & Hurrill, Cattleya Schroediana.

The next exhibition will take place April 12, and will be devoted primarily to the plants and flowers which are associated with Easter. So all who are getting plants and flowers ready for that time would do well to set aside some for this exhibition. The schedules will soon be ready for distribution, and will be sent upon application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y.

### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November 1909. It is a pure bright dark pink of even shade, size 3 1/4 inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000 \$100.00; per 5000 \$400.00. 25 at 100 250 at 1000 rates. Place your order now to be in on early deliveries.

Nic. Zweifel, North Milwaukee, Wisconsin

## The Nursery Trade

**American Association of Nurserymen**  
W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Sandusky, Ia., Vice Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16 1911.

ERNEST F. COE, president of the Elm City nurseries, New Haven, Conn., with his wife, is in Japan studying the gardens and plants, especially the marakin pine, agallachum and yew tree, and has reached the conclusion that the Podocarpus chinensis and yew tree are the fittest as garden trees.

THE protest of August Rolker & Son, New York, which claimed that Rosa rugosa plants were dutiable as brier rose plants, and that of George J. Johnston, Kansas City, that merchandise classified as nursery stock was free of duty as evergreen seedlings, have been both sustained by the general appraiser.

### St. Louis.

#### SPRING WEATHER.

The weather is more springlike and flowers are more plentiful with the exception of roses. There will be a number of decorations by the department stores this week, making business for the plantsmen. Fancy ferns are becoming scarce.

#### NOTES.

The Florist Club met March 9, President Connon in the chair, with 25 members present. W. E. Ogle was admitted to membership and two applications received. Action was taken upon the practice of wholesale houses in other cities soliciting business from the department stores. A new violet was shown by H. Jenneman, being grown by Joseph Hauser, Webster Grove. A congratulatory telegram was sent to W. C. Smith.

W. C. Smith, of the Smith Wholesale Floral Co., and Miss Helen G. West, were married at the bride's home in Edwardsville, Ill., March 9, leaving for Chicago after the ceremony. Upon their arrival at the Union Station they found the car had been decorated by friends who awaited their arrival, ready to shower them with rice and slippers.

At the meeting of the Retail Association, a communication was received from a wholesale house in another city, stating that in response to a request received they would stop shipping to the department stores.

Ostertag Bros. decorated the Coliseum for the golden wedding of August Busch and wife, using thousands of yellow narcissus.

A large quantity of flowers was sent to the Boatmen's Hall at the reopening March 8th.

A Siegel and F. Bruenig were busy with store decorations this week.

Fred Aves at Angermueller's has been ill the past week. W. F.

### Glen Cove, N. Y.

The regular monthly meeting of the Nassau County Horticultural Society was held in Pembroke Hall March 8. President Trepass occupied the chair and there was a good attendance. Chairman Holloway, of the executive committee, gave a report of the eucras and dance, which was held in February and the affair was found to be a great success financially. A very hearty vote of thanks was accorded Mr. Holloway and his colleagues for the very able manner in which they

performed their many and arduous duties. Duncan Beaton was elected to active membership and there were three applications for membership. Henry Cliffe, James Emslie and Geo. Gilder were appointed judges of the monthly exhibits and their decisions were as follows: The society's prize for one cineraria; A. MacKenzie, first; cyclamen, A. MacKenzie, first; stock, A. MacKenzie, first. Honorable mention was awarded E. Marshall for cyclamen; J. Everett, Bride roses; P. Andevart, violets; and P. Peleocchia, chiorcy; certificate of merit to J. Everett, mushrooms; thanks of society to H. Gant for sweet peas and V. Cleres for gardenias. Henry Matz won the cup presented by "Buds" of New York for the best collection of bulbs in bloom.

J. Everett gave a few interesting remarks on the growing of mushrooms, which were listened to by all with interest. It was decided to accept the offer of 500 vases by Mrs. Bucknall and not to hold any flower show the

coming summer. The society's prize in April will be for calceolarias, 25 mixed carnations and sprays of flowering shrubs.

ERNEST WESTLAKE, Sec'y.

Wagner Park Conservatories, Sidney, O.

Cincinnati.

INCREASED DEMAND.

The most gratifying part of last week was the increase in the call for stock. Very many Liliun Harrissii were sold, but the supply greatly exceeded the demand. Roses, especially pink, where in small supply last week. This week began with a good demand for all kinds, and a sufficient supply only of white. Very many more American Beauties could have been used had they been obtainable. Both kinds of Killarneys are still short. Carnations as a whole never have been in quantity to better advantage than now. The cuts are large and quality first rate. An amount of white that is sure to meet requirements is anticipated for coloring for March 17. The general call tends toward light shades. Heavy orders for March 14 were expected to remove the accumulation of red and deep pink. Practically all the bulbous stock offered is good with the possible exception of belated narcissus. Many of these are short-stemmed, but still answer nicely in work. The jonquils, tulips, hyacinths and daffodils seem to sell well this week, where at a corresponding time last week, they were not moving as easily. Callas from the middle of last week to the early part of this week were taken up daily. The sweet peas are in large supply, lily of the valley were conspicuous for absence from Thursday until this week and there is only a limited supply offered. Plenty of violets can be had and the line of green goods is ample.

NOTES.

The regular meeting of the Florists' Society was held at P. J. Olingers, 128 East Third street. The work of the committee on the preliminary schedule to date was ratified. After the meeting the society adjourned to a convivial social session. Everyone pronounced P. J. Olinger a royal host.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD CO., Youngstown Ohio.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

## Morehead Steam Traps

! The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

! It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

! The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

! By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

Send for Catalogue.

What the Users say  
Better and Cheaper than any Other System.

Gentlemen:—

In regard to the Kroeschell Threaded Tube Piping System, I think it is better than standard piping system, not only in being cheaper, but thinner and giving more heat. I found the Generator was a paying proposition and would recommend its use to all using a hot water system. My No. 11 Boiler does the work satisfactory on over 25,000 sq. ft. of glass.

Very truly yours,

C. L. HUMPHREY.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

ZANESVILLE, OHIO, Feb. 11, 1911.

# The Toledo Jardinier and Stand

Is a Work of Art.

They are made from quartered white oak, golden finish and polished. Hoops, handles, etc., are made of polished brass. They stand 31½ inches high, 9½ inches diameter.

## Toledo Tree Tubs

are made of the everlasting red cedar. They have the extension stove foot, that holds the tub up from the floor or carpet. This feature permits circulation between the tub and the floor, also prevents rot or decaying. They have electric welded galvanized basic steel wire hoops, that will not rust or break. They are made in all sizes, from two quarts to two barrels.

Write us for catalogue and prices.

Manufactured by  
**The American Wooden-Ware Manufacturing Co.,**  
TOLEDO, OHIO.

## Equip Your Garden Right

Get the new sash that has two layers of glass and needs no mason or other covers. Grow your flowers and vegetables way ahead of the season. Have a garden under glass always growing.

Send For These Two Books  
One is our valuable free catalog. In the other Prof. Massey tells what and when to plant in hot-beds and cold-frames. Send 4c in stamps for this booklet in addition to free catalog.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,**

and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.**

## Nikoteen

for spraying plants and blooms.

## Nikoteen

Is skillfully extracted from leaf to

bacco and carefully

refined: it is clean and easy to apply.

## Nikoteen

does the work when

vaporized either in

pans on pipes or

over a flame. Full Pint Bottles, \$1.50.

The most effective

and economical

material there is

## Nikoteen Aphis Punk

Specially prepared for fumigating closed  
houses. It vaporizes the Nicotine evenly  
and without waste. Nothing keeps a house  
free from Aphis so cheaply.

Price \$6.50 per case of 12 paraffined boxes.

All Seedsmen.

## Cattle Manure in Bags Shredded or Pulverized

Pure - dry - uniform and reliable.  
The best of all manures for the  
greenhouse. Florists all over the  
country are using it instead of  
rough manure.

## Pulverized Sheep Manure

Absolutely the best Sheep Manure on  
the market. Pure manure and noth-  
ing else. The best fertilizer for carnations and for  
liquid top-dressing. Unequaled for all field use.

# KING

Stands for all that is best in

## Greenhouse Building

Results count and those who have King houses get results because they have lots of time to grow things and the conditions are right.

Let us figure with you. Send for question blanks.

## King Construction Co.

Home Office and Factory: N. TONAWANDA, N. Y.

Eastern Sales Office: No. 1 Madison Ave., NEW YORK.

### Reasons

When a boiler salesman comes sauntering into your workroom, slakes hands vigorously and slaps you on the back with one hand, while he jingles the keys in his pocket with the other, and tells you his boiler can save 25, 30 or even 50% of your coal bill—do you believe him?

Suppose Mac, our trouble man, should sit down quietly with you and explain just how our boilers are made and give you the reasons why they are made that way; and then answered every question flatly and frankly—would you believe him? Of course you would. Then send for him when you want a boiler.

### SUGGESTIONS FOR PLANT GROWERS.

#### Callas.

The callas that have been blooming all winter will need considerable stimulant to carry them along to Easter, in order to have good large flowers at that time, at which there is always a good demand. They will require plenty of water from now on, and if in pots, as the sun grows higher and warmer will frequently have to be watered twice a day, for the pots are now full of roots and most of the plant food exhausted. The stimulant can be applied either in liquid form or as a mulch. If in liquid, fresh cow manure is the best, and if there is no tank for this purpose, the manure can be thrown into a barrel of water and stirred and used with a watering can. For a mulch the manure should be quite a little older and partially rotted, and spread upon the top of pot or bench and watered in. Cow manure is preferable for this purpose, but any partially rotted manure will answer, but with the manures containing great heat care should be taken in the quantity used.

#### Caladiums.

One of the most decorative summer plants that can be grown is the fancy leaved caladiums, and if anyone has a window in which they desire to make a display, there is nothing better or more attractive than a group of these highly colored plants. The tubers should be started in March, arranging each size by itself. The largest sized tubers will start the quickest and it is desirable to begin with these for pot plants. They should be started in chopped moss, and the tubers arranged pretty close together, being covered with the moss to the depth of an inch and watered sparingly until new roots begin to develop. The new roots are made from the top of the tuber, so it is important that this part should be covered to encourage root action. For starting, a heat varying between 70° and 85° will suffice. As soon as a healthy lot of roots make their appearance the plants should be potted, using as small sized pots as

possible, and the soil should be principally leaf-mold with a little sand added. In a little while they will need another shift and the soil can be made a little stronger by the addition of a little well rotted manure, but no fresh manure at all should be used. A warm humid atmosphere is necessary for their best development and they require an abundance of water. They must also be shaded from bright sunlight. A nice collection of these highly colored plants are a great addition during the summer months to either a greenhouse or conservatory and are very decorative in window displays.

#### Bedding Stock.

With all the stock for Easter coming on there is no spare room at this time, and in the rush many things that can be deferred are put off, but the bedding stock will require considerable attention now, for it should be growing rapidly. The geraniums will need spacing, for under no circumstances should they be allowed to become tall and drawn. It is too late to attempt to root cuttings now and expect good stock by planting out time, but if any plants are too tall the cuttings may be taken and rooted, and they will do to hold over to grow for stock, especially where there is liability of any variety being short of stock plants. The old stock plants can be cut back and the roots cut off and placed in a four-inch pot, and they will make splendid plants for window boxes or vases. Coleus can be rooted now and the plants after potting should be given a nice, sunny location that the high colors may be intensified. These plants grown in shady locations make very poor specimens, the yellows becoming green and the reds having pale and sickly looking leaves with nothing like the bright coloring which will be produced in the clear sunlight. Heliotropes should have the blooms picked off, that they may branch more freely, and kept in a light location and then allowed to bloom just before planting out time, from when they will continue throughout the summer. Asters, French marigolds, Phlox Drummondii, zinnias and

other rapid growing annuals should be sown and will make fine stock for June planting. The plants that were sown and propagated earlier will need attention, that they neither get pot-bound nor unshapely.

#### Freelias.

As soon as the freelias are through blooming the pots or flats should be placed on a shelf or bench near the glass and gradually dried off, giving the bulbs time to ripen off. Some growers throw their bulbs away, evidently thinking that they are similar to Dutch bulbs, but the freesia is a native of Cape of Good Hope and is really being bloomed at its natural season and a little care and attention on the part of the grower will produce as good a bulb as can be purchased. But they should not be thrown under a bench and no further attention paid to them nor should they be allowed to dry off too rapidly. The new bulbs are being formed and they should be attended to for some little time and then they can be dried off and laid aside until early next summer, when they can be shaken out of the old soil.

#### Sowing Small Seeds.

The sowing and germinating of small seeds is carried on with varying success by many growers, and the seedsman comes in for a great deal of complaint that does not properly belong to him, but is entirely the fault of the man having charge of the seed pans. The soil should be thoroughly sterilized either with steam or boiling water, after having been sifted through a fine sieve. The pans or flats should be filled to within about an inch of the top and the seed sown very thin. The seed will not need to be covered at all, but a thin board pressed on the top of the soil will level and press the seed in. The pans

should then be placed in a warm location and covered with glass which is painted, or a paper spread upon it to keep off the rays of the sun. When the seeds begin to germinate and show growth the shade should be removed, and it is at this period that so many of the young plants are lost. Great care must be taken in watering for the little seedlings damp off very easily and they should be watched continually. A pane of clear glass with one side lifted to allow a small circulation of air will prevent the seed pan from becoming dry and will allow air enough to prevent damping. As soon as the seedlings have developed well-formed leaves they should be potted in small pots and carefully watered until they have obtained a good hold upon the new soil.

#### Water for Plants and Boiler.

ED. AMERICAN FLORIST:

Following is the analysis of water taken from a spring I have just opened on my place. I would like to know if it is all right for plants in a greenhouse, also for boiler?

#### PARTS PER MILLION.

|                     |       |
|---------------------|-------|
| Hardness .....      | 130.  |
| Carbonic Acid ..... | 70.   |
| Alkalinity .....    | 148.  |
| Chlorine .....      | 8.    |

| Total Solids .....  | 335.  |

Let me know what you think of this through your paper.

Pennsylvania.

J. H. O.

There is no objection to the use of this water for the watering of greenhouse plants. It is not, however, the most desirable for use in a boiler.

L. C. CORBETT.

I would not recommend the use of this water in a boiler, as it contains too much calcium and alkali.

W. R. BEATTIE.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

#### Park Floral Co., Denver, Colo.

The removal of the Park Floral Co. of Denver from the store they have occupied at 1706 Broadway into the new building, 1643 Broadway, one-half a square south, has given them a store handsomely fitted with many new and novel features. The lease having been secured before the building was erected gave J. A. Valentine, the president of the company, an opportunity to arrange the office and fittings, so that provisions could be made for every possible convenience for conducting the florist business.

The store proper is ninety feet in depth and has a frontage on Broadway of forty feet. Upon entering, the beautiful finish of the walls attracts the attention, as they are covered with gray friars' cloth divided into panels. The wood work is Oregon fir finished to show the natural grain, and in order to secure beautifully grained wood many thousand feet of lumber were overhauled and the pieces selected. A mantle of tile in dull finish at one end opposite which is a large mirror extending nearly to the ceiling, are attractive features. There are no stationary counters, hard wood tables finished to match the wood work being used instead. The carpet is of solid rubber, dark green with white border, harmonizing beautifully with the wood work and furnishings. It was made to order by the Peerless Rubber Co. and cost nearly \$1,000. An artistic touch is given by the beautiful copper lanterns extending from the walls and ceiling, making the store very light and in the show windows are powerful Tungsten lamps of 1,200 candle power provided with holoplane shades.

EXTERIOR OF THE PARK FLORAL CO.'S NEW STORE, DENVER, COLO.

From the center of the store leading to a spacious conservatory is a wide stairway, underneath which is a glass enclosed room in which are located the cashier's desk and the private telephone exchange. Beneath the conservatory are the workrooms, the height of which is low, but 10 feet, in order

and at initiation some gentle hazing is generally indulged in. This organization has always, whenever they desired, had the use of the kitchen and dining room, which the Park Floral Co. has maintained for years, and some fine banquets have here been held with the usual accompaniment of

#### Dyed Flowers in Paris.

The fashion of dyed flowers is very popular at the present moment in Paris, says The Daily Telegraph, and the expensive flower shops display in their windows roses, tulips and chrysanthemums of such unnatural colors that even the green carnation appears natural in comparison with them. This victory of art over nature, if the transformation of a beautiful white rose into a rose of a vivid and unhealthy green or blue color can be called a victory, is regarded by the National Federation of French Horticulturists with an unfavorable eye, as it attempts itself to accomplish similar miracles by dint of grafting and selection, and it considers the use of artificial color as a fraud. Consequently it has sent its president to discuss the question with the Minister of Agriculture, and to suggest to him that in future the sale of dyed flowers, unless it be expressly stated that their colors are artificial, should be regarded as a fraud, and that the use of any poisonous coloring matter be absolutely prohibited and severely punished. The Minister of Agriculture gave a favorable reply, and pointed out that the law of 1905 concerning adulteration and fraud appeared to be applicable. He promised that an enquiry should be made into the matter.—*Journal of Horticulture.*

**SPOKANE, WASH.**—The finest flower show ever held in the city is planned by the local florists to be held March 28-30. The following florists have signified their intention of making displays: M. Armstrong, A. J. Burt, Hoyt Bros., Inland Nursery & Floral Co., R. A. Jones, Spokane Florists, Spokane Nursery and F. W. Winters & Co.

**DANVILLE, PA.**—Jas. J. Curran, formerly of Chicago and more recently of Salem, W. Va., has entered into partnership with Capt. F. G. Skipwith of the Castle Grove Greenhouses, which embrace some 50,000 square feet of glass devoted mostly to roses. The partners contemplate adding a new house 20x300 feet. King construction, this season. Mrs. Curran is at Germantown visiting her daughter.

OFFICES OF THE PARK FLORAL CO.'S NEW STORE, DENVER, COLO.

that the stairs to the conservatory might be made shorter. Adjoining the salesroom is the wrapping room and next to this a stock room in which are kept the baskets, ribbons and supplies. In the rear of these is a wagon room with cemented floor, with doors opening into the alley and a freight elevator, which runs to the conservatory and basement. An artificial ice plant, with two cooling rooms, is installed in the basement, and an electric fan which carries away all odors and insures plenty of fresh air. A kitchen and dining room are provided in the basement, which are well lighted from the front. These are not in service except during rush times, when good meals are furnished the employees, including one at midnight, without charge, effecting a great saving of time. The settees in the dining room are built on similar plans to Pullman car seats and are quickly converted into couches, provided with mattresses, where a few hours' sleep may be obtained by the tired clerks on the nights before Christmas and Easter.

On the second floor over the salesroom and adjacent store are the offices, which are wonderfully light and cheerful, having 10 windows on Broadway, and four on the side. The office equipment is modern and up-to-date, including vertical files, billing and adding machines, secretary neostyle, desk telephones, dictaphones and addressograph. Settees similar to those in the dining room are also provided. The office view shows the general office with Mr. Valentine's office beyond.

An organization called the Coterie has been formed by the office and selling force, one year's service being the necessary qualification to membership,

toasts, responded to in as eloquent and charming a manner as at more auspicious occasions. The company, as they say, "Pays the freight and gets as good returns as on any other investment."

**BOSTON, MASS.**—Sidney Hoffman has given up his store on the corner of Devonshire and State streets having transferred the lease to Page & Shaw, confectioners.

INTERIOR OF THE PARK FLORAL CO.'S NEW STORE, DENVER, COLO.

## THE PERENNIALS.

### Propagating Phlox.

The increase by seed or otherwise to get up stock to make good depletion by sales, may be carried on the year through if advantage is taken of each season in its turn, and the suitable condition of the plants be noted. One would think that in this day and generation there are no secrets hidden in the art of propagation, but if any reader knows how to get up stock of the double form of *Gypsophila paniculata*, he will confer a favor on many of us. In a general way it may be said that all double flowered plants of herbaceous perennial habit must be increased by division or cuttings, the reproductive organs are replaced by petals, sometimes a few at the commencement which is an accident on the part of nature, and all good hybridists will tell how difficult it is to add to the number of extra parts until occasionally, all at once, we have the perfectly double flower, also an accident.

There is no wizardry or creative power possessed by man yet, in the development of new kinds, fortunate is he that can keep up the standard of existing strains, for the tendency of all nature is to degenerate and in cultivated plants they often seem terribly anxious to get back home to the type. They who see and recognize the least variation from the straight and narrow path of a type, have all the advantages that can be given as a start to a raiser of improved garden plants.

Speaking of reversion, who has not observed an old neglected garden, or a place where a garden once was, perhaps only the cellar-hole remains of what was once a home, there are a lot of tawny day lily roots escaped to the roadside and usually some phlox, these are always of the old purplish variety or species, from which our garden phlox sprung, it does not take long only a generation or two for this to occur. The choice ones cannot make the fight being born of care and cultivation, they seed, however, freely and

result is soon seen in poor varieties. This happens too in gardens, for many people think that our garden phlox does revert, sport they do, but most of the blame must be put on seedlings that appear with freedom among the good ones. It is good practice to cut off all the flower heads as soon as the display is past, in the earlier flowering kinds this often gives a second crop of bloom, the one known as *Le Soleil*, will always flower again in fall.

If roots of phlox were lifted and protected through the winter under glass they will now be growing freely and are in fine condition to make cuttings at this time, a second crop will be produced and often a third, and the taking of these does not injure the roots to a great extent, they may be planted out in spring and do good service. The young stock thus obtained will grow and bloom well the coming summer, making exhibition blooms of first quality, and the white varieties are well worth growing in pots through the summer so they can be protected from rains, and used with profit in their season of bloom in many ways. Old plants should never remain longer than two years in one place unless lifted, divided and enriched liberally. It is much better to plant in another location to avoid stray roots, seedlings and undesirable kinds becoming mixed with the better ones, this is the only way to keep the standard up and varieties true to name. If no clumps are available now for propagation, take the first shoots that appear above ground in spring for cuttings, root and treat them cool as possible, taking only one crop of cuttings, and these will also flower well, but a little later in the year than those of earlier propagation. There is no better way to increase phlox, though it can be done by taking roots proper of fine or scarce sorts, placing these in sand as *bouvardias* and all will grow, but not strong enough to bloom the same year to any extent.

The earliest of garden phlox, *Miss Lingard*, is becoming more appreciated every year, and many are using it now in pots or pans to bloom under glass

for Decoration Day needs, as it forces readily and the color is white with a very pale pink eye when grown inside. It should not be planted with other sorts outdoors as it blooms so early and has a spotty effect among others that bloom later. In grouping phlox for garden effect, considerable forethought is necessary to get proper color combination. It seems best either to thoroughly mix them so that no one color predominates, or to separate the pink ones from the red and white, the last two going well together, the mauve being in a class by themselves, condemned by many and always difficult to provide for. There is no other group of hardy plants that call for as careful planting owing to the mass of color with so little green to relieve it, and now that the ladies are becoming trained and critical as to colors in the garden, it is well to take thought what to buy and propagate. We seem long ago to have reached the limit of perfection in phlox, the older ones are still good and few new ones are being sent out.

Old clumps split up for increase should always be grown a year previous to being sold, most folks object to a part split off another and often think they are being robbed, and they are in a sense, so these should be re-established by the dealer. This is true of all such plants as are called hardy, many are the complaints we hear from buyers that scraps were sent in place of plants, many of them perfectly justifiable but good trade killers.

E. O. ORRET.

NEW LONDON CONN.—S. J. Reuter & Son will soon move into a new store, having leased the entire building on State street at the foot of Main street.

FISHKILL, N. Y.—Upon the invitation of Benjamin Hammond, proprietor of Hammond's Paint Works, hundreds of children of this place and adjoining towns visited and inspected the new buildings. Every child was presented with an orange and souvenir. One boy, in his eagerness to procure these, fell into a barrel of green paint.

HORTICULTURAL HALL, BOSTON, MASS.

Too Small for the Great Show Which Will Be Held in the Mechanics' Building

P. Welch.

E. Allan Peirce.

Thos. Roland.

## MEN OF THE HOUR.

National Flower Show Board of Control.

## National Flower Show at Boston.

Mechanics Building will be turned into a bower of beauty on Saturday, March 25, when the great National Flower Show, in connection with the convention of the Society of American Florists assisted by the American Rose, the American Carnation and American Gladiolus Societies, the Sweet Pea Society, the Gardeners' and Florists' Club of Boston, the National Association of Gardeners of America, and the co-operation of our own Massachusetts Horticultural society, will be in session for one week. It has been the custom in Boston to have an annual flower show in Horticultural Hall, and while these have been very interesting and instructive, and also well attended by the public, nothing like the forthcoming tremendous exhibition has ever been attempted in this or any other country. This show will not only be of great national importance, but it will also be of international significance from the fact that exhibits are being received from all parts of the world, showing the in-

tense interest manifested in this vast undertaking. Absolute reproductions of famous Japanese, English and European gardens will be on exhibition full size. Many private estates will exhibit rare flowers and plants, and from the interest and enthusiasm which has been shown all over the country and abroad, it would seem to indicate that this forthcoming National Flower Show will be an event of immense importance. Not only will all floral and plant creation be displayed, but all the innumerable garden accessories will also be on exhibition, as already a great amount of space has been taken up by prominent manufacturers and dealers in these materials. As the entire building has been engaged for this show, there will be plenty of scope for the florists and plant growers to make most elaborate displays, and this they will undoubtedly do on a very large scale. There will be \$10,000 in cash prizes, and many cups offered in competition, and the various florists and growers will vie keenly with each other in the endeavor to capture one or more of the prizes.

## Men of the Hour.

The National Flower Show is almost at hand and a little resume of the men who are responsible for the undertaking, and who form the Board of Control, may not be amiss.

F. R. Pierson, chairman, New York's much thought of son, a graduate of Peter Henderson, one of the most successful florists, also carrying on a large importing trade. As an American Beauty grower he has few equals, and if he did nothing but put up the exhibit at Buffalo of the White Killarney, he has won the title of one of America's foremost rose growers. Mr. Pierson would have made a national reputation as a lawyer had he entered that field. His knowledge and fluency of the English language are what very few attain, and the way he handles any subject or debate shows him to be a pastmaster of the art.

John K. M. L. Farquhar, Scotchman, noted traveler and member of the old established firm of R. & J. Farquhar & Co., seedsmen, Boston. His stock of humor and clear sight

of things make him a leader among men. It has been our pleasure to listen to his lectures on foreign travel and his description was equal to any one we ever heard. Trained amongst the gardeners of the old school he has risen through all the various steps in horticulture, with a knowledge of that art that few attain, a man who can be reached by every one. Member of nearly all societies allied to the trade, his advice is eagerly sought on things pertaining to the craft.

E. Allan Peirce, son of Elisha N. and member of the firm of Peirce Bros. His father started market growing many years ago, and was the leading expert in that line in New England, but saw the possibilities of flower growing and when he died left his two sons a well appointed florist's establishment. The two sons have extended it so that it ranks high in the production of Boston's flower supply, with up to date business methods they have brought it to a high plane. Allan served in the Spanish war. A member of the various clubs and state vice president of the S. A. F., he is regarded as a man who does things and does them quickly and well.

Thos. Roland, Nahant's famous producer of plants. This gentleman has a national reputation for producing a grade of pot plants that cannot be equalled even by the private gardener, everything about his place shows the skill and training that has brought the product to what it is. At Christmas and Easter his plants are sold before they leave the greenhouse. He has one of the choicest and best kept places we ever had the pleasure of seeing.

Patrick Welch, last but not least amongst the giants of the trade, senior member of the firm of Welch Bros. Boston, a man who has come through all the vicissitudes of the trade, seen it rise from a speck to what it is to-

day, the first commission florist in America, whose finger is always on the pulse of the market, a judge of horse flesh as well as a high authority on flowers, a man of rare foresight and keen business acumen, a member of one of the strongest financial wholesale houses in the country. I do not know whether or not he ever kissed the blarney stone, but at any meeting if there is a nice point of law to be settled whether parliamentary or otherwise his advice is usually heeded. At a banquet given some years ago on the firm's attainment of 25 years in business on the menu, under his photo, was printed, "He wears the rose of youth upon him," certainly he is one of the youngest of our old-time florists and a credit to American floriculture.

MAC.

#### Pioneer Florists of Boston.

It hardly seems possible in looking into the many magnificent flower stores of Boston, that it is within the memory of many when there was not a store in the city devoted exclusively to the sale of flowers and plants. What a revelation it would be to some of those who were pioneers in the florist business, could they but see the rapid strides which have taken place not only in the quality of the product, but as well in the magnitude of the business. While we do not pose as a patriarch, yet it was our privilege in our younger days to become more or less intimately acquainted with those who were among the early growers and dealers in and about the city. In the later sixties, as we remember, there were but three stores where flowers were sold, at Tompkins & Hill's drug store, corner of Washington and Winter street, Copeland's restaurant and Curtis & Cobb's fruit store on Tremont street. The flowers were brought into the city from the small greenhouses outside and what a sight a box of one

of the old timers would be today; a few carnations, all short-stemmed, a few roses of different colors, also short-stemmed, a bunch of heliotrope and a general assortment of common flowers like nasturtiums in their season. No designs were made at the stores, there being practically no flower work, as it is termed today, the only thing in arrangement attempted being bouquets and baskets and that if we remember correctly at Curtis & Cobb's, where Edwin Fewkes, for a short time, did flower work. The early florists sold most of their products at their houses, but we remember a few who were always at the weekly shows of the Massachusetts Horticultural Society, and how we gazed at what we then thought was the beautiful workmanship of James O'Brien, James Nugent and James McTear. The two latter died early, but the first named lived until the 90's and worked at his houses at Jamaica Plain, was one of the workers among the florists to uplift the trade, being one of the organizers of the Gardeners' and Florists' Club and its first treasurer. At Floral place, just off of Washington street, near Hollis, now covered with brick buildings, was the greenhouse of William Dooque, one who later became famous for the manner in which he planted out the Public Garden and other parks of the city during his long term as city forester of Boston.

The first store given over to florists' use entirely was started, if we remember rightly, by John Galvin, but he was immediately followed by John Gormley, both stores being located on Tremont, below School street. John Galvin conducted his store and as the sons grew into manhood were taken into the business which was the foundation of the present enterprising house of T. F. Galvin, Inc. Mr. Gormley was located a little farther down the street and having a small green-

SOUTH STREET GATE, ARNOLD ARBORETUM, BOSTON, MASS.

house in Cambridge marketed his own output. When the stores were started there became a call for the growers outside the city to bring their products in, and we recall a few of the growers of those early days. James Cartwright of Wellesley was among the pioneers to bring his flowers to market and for a number of years he came daily to Boston with his box, once saying "that there never was a day in winter or summer when he couldn't make a good day's pay." He was an early grower of General Jacqueminot roses in winter and his sons followed in the florist line and are today among the honored ones of the craft. The earliest grower in our recollection who seemed to have any idea of the magnitude the business would attain, was George Wilson, of Malden. We remember visiting him in early days when he first started growing carnations and were surprised at his manner of conducting the work. All the plants were in pots, and every one in so far would be found a large tag upon which would be written "Mrs. Haley's soil," or some other name indicating the endeavor to find out what would be the best material for culture. When asked what was to be done with the crop, for it looked large to us, he answered, "It is all sold in New York," showing he was one of the first to ship flowers out of the city. He was very optimistic in regard to the business, and he once told us that we would probably live to see greenhouses built by the acre, a thing which in that day seemed hardly possible. He afterward became a rose grower of note and his forced hybrid perpetuals were a feature on both the Boston and New York markets.

It was but a few years after this that the late E. M. Wood began the construction of the large plant at Natick, now known as the Waban Rose Conservatories. The place early took up the culture of roses, and became celebrated for the quantity and quality of the stock which was produced. Not finding a market in Boston for the whole product it was shipped to New York, where it was advertised in the windows as "Boston roses" and a branch house was opened in Philadelphia. Mr. Wood early saw the possibilities of the florist trade and was always abreast of the times, and from these greenhouses have graduated many of Boston successful florists. Another of the early florists was Joseph Talbot, who has lived to see the many great changes. In his houses could always be found something new, for he was progressive and a great lover of novelties and he introduced in this section many new meritorious plants. An early lover of the carnation he was the producer and dispenser of Grace Wilder, a variety that was the standard light pink until superseded by William Scott. Another pioneer that should not be passed over was Denys Zingibiel, who after being gardener at the Harvard Botanical Garden, built greenhouses at Needham and was a daily visitor to the Boston market until a few years ago when he passed away. He was an ardent admirer of the pansy and greatly improved it. Dorchester became early the greenhouse district and here were located the Norton Bros. who were early rose growers and shippers. Among the pioneers might be also mentioned Frank Becker, who took up the line

of decorative stock and for years was the only grower making a specialty of this line.

It was but a few years later when the pioneers in the wholesale business made themselves known. As has been stated, the late E. M. Wood shipped to New York and Philadelphia, and he opened a store in Boston for wholesale purposes. If we remember rightly, W. J. Stewart took charge of the store and among his employees was Nicholas F. McCarthy. Patrick Welch was employed by Mr. Wood to take the roses from the houses and dispose of them to the retail stores. These three were to be the founders of the wholesale business in Boston. W. J. Stewart, we think, was the first, but was very soon followed by P. Welch, whom with his brothers formed the house of Welch Bros. and this business has grown and increased beyond their most sanguine hopes. N. F. McCarthy was sent by Mr. Wood to superintend the Philadelphia branch and after a few years' stay in the City of Brotherly love, returned to Boston, establishing the house of N. F. McCarthy & Co.

It hardly seems proper to speak of the pioneers of Boston without mentioning some others who though perhaps not growers for the market yet exerted a great influence upon the trade. The Hovey nurseries at Cambridge were growers of flowers, especially the camellia, and from these greenhouses graduated many who became growers of ability. W. C. Strong erected a large range of glass at Brighton, now owned and operated by W. H. Elliott. The seed house of Breck and the labors of Joseph and his son, C. H. B. Breck, and the house of Parker &

AVENUE TO SOUTH STREET GATE, ARNOLD ARBORETUM, BOSTON, MASS.

Wood, all did encouraging work for floriculture. The nearness of the Harvard Botanical Garden at Cambridge and the enthusiastic characteristics of the gardener, Louis Guérineau, as well as his predecessor, Denys Zirngel, did much to enthuse and assist the florists of this section.

ists in this section. Interested in Harvard College and its botanical and horticultural branches, and in floriculture in general, Francis Parkman, the celebrated historian, was an ardent worker with herbaceous and other plants, and greatly interested in the business of the florist.

#### In and Around Boston.

The visitor to Boston will find much that will be of interest for him to see and many places that have become celebrated in history and literature, and we here make note of some such locations that have become renowned.

#### HISTORICAL PLACES OF INTEREST.

Boston and vicinity is especially famous for its historical associations, and while Concord and Lexington and Plymouth are within easy access, yet in the city proper are many places that are widely known and a short journey will cover nearly all of these. A very interesting trip may be taken in the business district, starting from the renowned Boston Common upon which the boys in colonial times demanded of Gen. Gage the right to coast in winter. All subway cars stop or center at the Park Street station, which is located upon the northeast corner of the common, and upon ascending the stairs to the exit, directly in front, will be seen the Park Street Church, one of the old-

est church edifices in the city, with its spire of renowned architectural beauty, and to this building within whose walls doctrines were so preached that it has been given the name of "Brimstone Corner." In the basement of this church and adjoining property are now located the two Boston flower markets. Looking to the left up Park street may be seen the State House with its immense gilded dome, on the crown of Beacon Hill. Adjoining the church on Tremont street is the Granary Burying Ground, wherein are entombed and buried the revolutionary heroes and those whose names made Boston celebrated in colonial and early days. Passing down Tremont street in a northerly direction on the corner of the third street to the right School street, (there are no blocks in Boston) is King's Chapel, the first Church of England in the city and adjoining it is another historical burying ground. Turning down School street in the rear of this church is the City Hall, and directly opposite this building will be seen a very narrow street, Province street, and upon this in colonial days was located the governor's residence. Continuing down School street to the end at Washington street, upon looking to the right will be seen the Old South Church, the first church in Boston, which is always open to visitors. Continuing down Washington street in a northerly direction upon the corner of the second street, State street, will be found the Old State House, wherein the colonial congress met and from whose eastern balcony, surmounted by the lion and the unicorn, the King's proclamations were read. About 100 feet down State street on the left,

near the corner of Exchange street, the close observer will notice that the pavement is in circular form and a tablet upon the building informs him that this marks the site of the Boston Massacre. State street is the Boston "Wall Street," the centre of the financial district. Merchants' Row is the first street to the left and from this a small passage way leads to the site of the hotel from which the Boston Tea Party emerged disguised as Indians. But a step beyond is Faneuil Hall, the "Cradle of Liberty." This building is open to the public and is well worth a visit. Here is located the seed and market district. Directly opposite is the Quincy market, an immense building owned by the city and occupied exclusively for market purposes. A walk through this building will take one within a short distance to the wharves, where the immense shipping interests are carried on and but a short ways from T wharf, the greatest fish shipping point in this country. Another point of interest is the North Church, from whose spire was hung the lanterns that served as signals for Paul Revere. This is located just off of Hanover street and surface cars pass very near.

#### HARVARD COLLEGE AND CAMBRIDGE.

Surface cars in the subway or in the Back Bay district marked Harvard Square, take the passenger to the starting point in visiting the interesting places at Harvard College and in Cambridge. Alighting from the cars at Harvard Square upon the right will be seen the grounds and buildings of Harvard College. Walking through the extensive property of this noted university, with its many buildings

and dormitories, on the northeasterly side, will be found a large building, the Agassiz Museum, in which are to be seen the wonderful collection of the animal and vegetable kingdoms and particularly interesting to flower lovers is the wonderful exhibit of the Blaschka glass flower models. Returning toward Harvard Square, Cambridge common will be seen and upon one side of this stands the Washington Elm, under whose spreading branches General Washington took command of the American troops in revolutionary times. The old church near this tree is very interesting to visit. But a short distance from the Elm is Appian Way, upon which is the home of Oliver Wendell Holmes. A little distance up Garden street will be found the Harvard Botanical Gardens and the home of the late Asa Gray. Other nearby interesting places are the Longfellow's home, the James Russell Lowell house, and Mount Auburn cemetery.

#### BUNKER HILL AND NAVY YARD.

Surface cars marked Bunker Hill, which can be taken by transfer at the North Station, or at City Square, Charlestown from the elevated, carry the visitors to Bunker Hill and by the Charlestown Navy Yard, points of interest to the visitors, and these are but a half hour's ride from the center of the city. The monument stands upon the summit of the hill and from the observatory at the top an extended view of the city and suburbs may be obtained.

#### FAMOUS GARDENS.

A most interesting place for horticulturists is the Arnold Arboretum, in which has been gathered the largest collection of trees in the United States, and this may be reached by taking either the surface or the elevated cars to Forest Hills, and it is but five-minutes walk from the station to the grounds of the arboretum. The Larz Anderson place is but a short distance from the arboretum, and this is one of the show places of the suburbs. The car that goes to Forest Hills by the way of Jamaica Plain, when it passes the soldier's monument, is but 15 minutes walk from this noted place. The Hunnewell gardens at Wellesley have been for years a great attraction for horticulturists and can be reached by taking the train on the Boston and Albany railroad to Wellesley or Natick. At Wellesley barges can be procured at the depot that pass the grounds. At Natick the electric can be taken to South Natick, which is but a short distance from this celebrated place.

#### TWO NOTED BUILDINGS.

The Public Library in Copley square, near the Mechanic's building, is always a point of interest and visitors will greatly admire the paintings by Sargent and others upon the walls. The Art Museum on Huntington avenue is also a beautiful building and worth a visit. These buildings are, we believe, open on Sundays and can be inspected upon that day.

**NORTH YAKIMA, WASH.**—The State Floral Co. has enlarged their greenhouse plant, and they now have six houses, each 150 feet long.

**ROCHESTER, N. Y.**—Plans have been made and work will soon be begun for the public plant houses at the South avenue entrance to Highland Park. William C. Barry, Superintendent of Parks Lane and Assistant Superintendent Dunbar constitute the committee in charge.

#### Famous Boston Gardeners.

A body of men who exerted a large influence upon the florists of Boston were the excellent private gardeners in the adjacent towns, for they were growers of the highest ability and thoroughly versed in horticulture and greenhouse knowledge. They were placed in positions where they were able to procure all the novelties of the day and being, in many cases, generous perhaps to a fault, freely gave to those who were growing commercially. First and foremost among these was Fred L. Harris, who laid out and superintended the renowned Hunnewell place at Wellesley. A thorough gardener in every sense of the word, with a fine knowledge of the growth of trees, shrubs and hardy plants but equally as well posted on greenhouse culture of both plants and fruit. A man with as large a heart as ever beat

C. M. Atkinson.

Another Boston Pioneer Gardener.

in any man's bosom, always glad to meet one interested in horticulture, and free with the best advice to anyone who might ask it, and not only advice but if a wish was expressed for any plant under his cultivation of which stock could be spared, it was immediately given gratuitously, and many a young grower was encouraged and put upon the right track by this grand old man.

A close second was C. M. Atkinson, "Monty" to everybody, who for thirty years was the head gardener on the John L. Gardner place at Brookline, and many are the gardeners and florists who received their early instruction from this splendid man. He was always a prominent exhibitor, an excellent grower, and everything he showed was of the highest merit, and as free with the best of advice as was Mr. Harris. A gardener who never missed an exhibition of the Massachusetts Horticultural Society at either the weekly shows or the large exhibitions, was James Comley of Lexington, who was for a long time the superintendent of the F. B. Hayes estate. A good grower and well posted and a seeker of novelties, he always had something new to place upon the tables, and we

remember with great pleasure the great exhibits of camellias which he staged.

As orchid growers two gardeners of Boston stand preeminent. David Allan, who for a long period was in charge of the Pratt place in Belmont renowned for its beautiful plants and flowers. When these houses were under his charge no florist thought of leaving Boston without making Dave a call, and he was sure of a royal welcome. Besides being a good orchid grower he was a thorough plantsman, and a good grower of fruit under glass, and he also had the faculty of being able to teach others what he knew, for in his greenhouses many good growers received their early instruction. The other noted orchid grower was William Robinson, who made the great collection of orchids on the estate of F. L. Ames at North Easton so celebrated. Enthusiastic and impetuous, he was a master of the then difficult culture of orchids, and the plants and blooms which he produced were a wonder in those days, and would stand well today with the best that are now grown. He was a man strong in his friendship and liberal to a fault, and though taken away early in life, had made a mark in his chosen profession. It was certainly a great pleasure to know and associate with these men and one could not be in their company long without receiving encouragement and excellent ideas.

#### Pennsylvania Horticultural Society

The spring show of the Pennsylvania Horticultural Society opened March 21 with a good entry of exhibits which for quality and careful preparation it would be hard to equal. Bulbous plants in flower were the feature and there was a grand lot of hyacinths, tulips and daffodils, there being keen competition in nearly all the entries for the various prizes so generously offered by H. F. Michell, H. A. Dreer Corporation and H. Waterer which totals up to nearly \$600. When such careful growers as Wm. Kleinhinz, Jos. Hurley, Wm. Robertson, Sam'l Batcheler, John McCleary, John H. Dodds, Thos. Logan and others go after the prizes they each put forth their best efforts and strive to win with the result of everything being about perfection. Next in point of interest to the bulbs were the spiraeas, white and pink, of which there were numerous entries. Splendid *Primula obconica gigantea* were seen. Across the center of the hall were some specimen azaleas. There were also several well flowered pots of the rhododendron *The Pearl* which attracted attention. H. A. Dreer staged choice well grown small sized specimens of choice ferns, palms, caladiums and other plants. *The Cocus Wedelliana* were beautiful. *Cyrtomium Rochfordi* was also a feature. This fern is bound to make its mark. Mrs. F. Sanders, the new white marguerite, was another star of their exhibit. The new *Nephrolepis Giatrasii* was seen and it was a fine specimen. Easter lilies and callas as well as the yellow calla were seen in groups all well flowered. A few well flowered specimens of *Cineraria Stellata* filled up one corner of the hall. Wall flowers were attractive exhibits and a group of antirrhinum at the main staircase landing from John Wanamaker, was the first glimpse of color upon entering the hall. In the midst of this was a large vase of the new scarlet carnation *Miss Dimple Widener*; a great flower this, of which Wm. Kleinhinz should be proud. Thomas Meehan and Sons staged an assortment of Japanese maples and H. F. Michell, H. A. Dreer Corporation and H. Waterer made

NEW YORK FLORISTS' CLUB DINNER AT SHANLEY'S, MARCH 18.

trade exhibits of grass seeds and garden requisites. The attendance the first night was very poor, and some plan to interest the public should be made, even if they were invited to visit the show free of cost. A list of the prizes will be found in the next issue. K.

#### New York Florists' Club Dinner.

The twenty-fourth annual dinner of the New York Florists' Club took place at Shanley's on the evening of March 18. The dinner committee, under the supervision of Chairman C. B. Weathered, with Messrs. Schenck, Shaw, Miller and Koehne as associates, filled their office with credit and here is what they provided:

|                                    |                   |        |
|------------------------------------|-------------------|--------|
| Martini                            | Cape Cod Cocktail | Olives |
| Celery                             | Salted Almonds    |        |
| Furze of Tomato au Crouton         |                   |        |
| Clysmic Spring Water               |                   |        |
| Shad Row a la Shanley              |                   |        |
| Paraleys Potatoes                  | Cucumbers         |        |
| Rack of Spring Lamb                |                   |        |
| New Peas                           | Mint Sauce        |        |
| Chablis                            |                   |        |
| Punch a la Forget-me-not           |                   |        |
| Roast Philadelphia Saub au Cresson |                   |        |
| Salad in Season                    |                   |        |
| Ice Cream                          | Fruit             |        |
| Bordeaux                           |                   |        |
| Assorted Cakes                     |                   |        |
| Cheese                             | Demi Tasse        |        |
| Cigars                             |                   |        |
| Cordial                            |                   |        |
| Rulmart Brut a la Carte            |                   |        |
| Haik & Haik a la Carte             |                   |        |

The tables, some thirty in number, were tastefully decorated with cut flowers. About 250 ladies and gentlemen sat down to the repast, among them being the English visitors, whose names will be found in another column, and who were present as guests of the New York Florists' Club.

President John B. Nugent, Jr., acted as toastmaster and when cigars and coffee were reached several speakers were introduced successively and a vocal and instrumental program was rendered. To the toast, "Our Night," P. O'Mara responded, telling several

amusing stories and finally becoming reminiscent, referred to the growing popularity of our dinners since the custom of inviting the ladies had been inaugurated. F. R. Pierson spoke for the S. A. F. and the coming great show in Boston was his theme. He regretted the fact that he had not been born in the country of the Blarney stone; nevertheless, he had plenty to say regarding the show and made an earnest plea for a large attendance there from this city.

To the toast, "Our English Guests," J. S. Brunton responded. He told how he and his fellow travelers had come over here to pick up things horticulturally and to pick up the English language, and they were making remarkable progress in both efforts. J. Brown, another of the English guests, spoke briefly, remarking that "they had come over here on business bent, and certainly they had been busy enough so far." He paid a high compliment to the ladies present, saying that not in all London could a more beautiful assemblage of ladies be gathered together. C. I. Campbell, when called upon to say something for the Boston show, delivered a message from the Boston Chamber of Commerce, inviting the club members to meet in Boston and help make this the greatest show the world has ever seen. W. E. Wallace, the English carnationist who has been spending a few weeks here and who is the guest of Chas. H. Totty, gave an interesting short talk of his experience here. A silent toast was drunk to our departed members. J. A. Shaw read an original poem.

On behalf of the club members C. B. Weathered presented ex-President A. L. Miller with a diamond pin. Mr. Miller gracefully accepted the gift with a brief speech. It was well after midnight when the program was finished; then all adjourned to another floor where dancing was enjoyed. So passes into history the twenty-fourth annual dinner, conceded by all to be the best ever held.

## OBITUARY.

### Benjamin Washington.

Benjamin Washington of Stoughton, Mass., died at his home March 15 after a short illness, aged 71 years. He bore the distinction of being the only grower of Boston and vicinity who was of African descent, and was a well known figure in the Boston Flower Markets, where he sold his product. He was greatly interested in anything to uplift the colored race. He was a member of Gen. Nelson A. Miles' command U. V. U. of Brockton and had served as quartermaster and sergeant of Post 62, G. A. R. of Stoughton. A son and daughter survive him. The funeral was held Saturday, March 18.

### George Lorentz.

We regret to announce the death of Geo. Lorentz, aged 70 years, a well-known grower of Astoria, L. I., which occurred March 18. Mr. Lorentz has not been among the trade much of late years though he had a wide acquaintance among the older members of the craft. He was an associate member of the New York Florists' Club. He leaves besides his widow, four sons and two daughters. The interment was on Wednesday, March 22.

SAN DIEGO.—Walter Scott, formerly connected with the Coronado Nursery, has opened a flower store at 1335 Fifth street, and will carry besides plants and flowers a stock of seeds and bulbs.

HOUSTON, TEX.—The Texas Orchard Development Co. is preparing a nursery at Chocolate Bayou covering approximately 200 acres. Beside fruit trees a large assortment of roses, shrubbery and shade, and ornamental trees will be planted. A demonstration farm of 100 acres will be maintained.

DON'T miss the National Flower Show, Boston, March 25 to April 1.

RENEW subscriptions promptly so that no copies of the papers may be missed.

BOSTON is always starting things, and now it is a great national spring flower show.

## Personal.

Ernest Francis Coe, the well known landscape gardener of New Haven, landscape gardener of New Haven, Conn., and Mrs. Coe were welcome visitors March 22, returning from Japan. Mr. Coe says that while they greatly enjoyed their two months' stay in the Mikado's Empire, they are glad to be home again. Considerable material was secured for landscape work now in hand.

Elmer D. Smith and wife returning from the coast, were last heard from at Colorado Springs and are due at Chicago March 25.

The British Horticultural Traders delegation is due in Chicago Friday morning, March 24.

## Ladies' Society of American Florists.

F. R. Pierson, chairman, National Flower Show, has requested the secretary of this society to issue orders for members' season tickets to all those who have paid their 1911 dues. Members will find the secretary at exhibition hall ready to receive dues and issue orders. Be sure and bring your order as no duplicates will be issued. Please wear your badge pin.

MRS. CHAS. H. MAYNARD, Sec'y.

## American Rose Society.

### NEW ROSES ON EXHIBITION.

The exhibitors for the Rose Show are announcing their exhibits much earlier than usual. Brant, Hentz Flower Co. will exhibit a new rose, Madison, of which they say: "This new rose is a cross of Bride, Perle des Jardin and Meteor, the foliage resembling holly, and on account of its hardness rarely mildews. Flowers white, resembling Bride, with large buds, blooming continuously throughout the year, there being very little blind wood. The plants will produce five flowers to the Bride's three." E. G. Hill Co. will show the new rose, Sunburst. Stockton & Howe will exhibit a new one called Princeton. S. J. Reuter & Son will show two new roses, Double Improved White Killarney. A pure white sport from the Waban strain of White Killarney, with much larger bud, double the size of the ordinary White Killarney, of stronger and more vigorous growth, making a larger plant, with heavy deep colored foliage. An excellent summer white, having the necessary body with good keeping qualities and of pure white color. Being an improvement over the ordinary White Killarney in growth, vigor and size, it is also the ideal white for winter, Cerise Pink Killarney. A deep pink sport from Killarney having a velvety sheen and beautiful shading. Deeper than ordinary Killarney at its best and having a heavier bud.

The rose represents 60 per cent of the value of commercial flowers raised in the United States and stands out with unquestioned prominence wherever flowers are grown. The development of out door roses is apparent to every one who travels over this country today, and the nurserymen and plant growers will have a chance to show what can be done at the second division of this exhibition, which is given up entirely to pot roses. Three meetings are provided for, the first to be a general report meeting, when it is expected there will be two able papers presented which will be of great interest to all growers of roses; the second session will be the general business meeting, the election of officers and choice for place of next meeting; and the third meeting will be devoted to the report of Dr. S. S. Sulliger concerning the National Rose Show of England. Richard Vincent, who went to Brussels, will make a report on his trip and W. G. MacKendrick of Toronto, Can., will prepare a paper. These three meetings are hoped to be of popular interest. The State Florists' Association of Indiana a year ago invited the Rose Society to hold its meeting with them in 1912, and an official in-

itation has now been extended to the American Rose Society to meet in the city of Indianapolis in 1912.

BENJAMIN HAMMOND, Sec'y.

## Chicago to Boston.

The Chicago Florists' Club has decided to use the Lake Shore & Michigan Southern Railway on the National Flower Show trip to Boston and arrangements have been made with that company for a special section of the Lake Shore Limited to leave Chicago 5:30 p. m. Thursday, March 23, due in Boston the following evening at 8:30, provided a sufficient number of requests for reservations are received to warrant a special section; otherwise the party will be accommodated in special sleepers attached to the regular Lake Shore Limited, leaving and arriving at the same hours as above quoted.

The rate for the trip is one and three-fifths fare on the certificate plan, which means \$22 going and \$13.20 returning, or a total of \$35.20 for the round trip. Don't fail to ask for certificate at time of purchase. The selling dates are March 22 to 27 inclusive, final return selling date April 5. Passengers from western points should purchase to Chicago only and repurchase here, as no special rates are authorized west of Chicago. Pullman rates: Lower berth, \$5.50; upper berth, \$4.10; compartment, \$15.50; drawing room, \$20.00.

Sleeping car reservations should be made at the earliest possible moment by communicating with G. K. Thompson, General Agent Passenger Department, Lake Shore & Michigan Southern Railway, 180 South Clark street, Chicago. Telephone, Harrison 7600.

## Cleveland to Boston.

The Cleveland Florists' Club will have a special car, Cleveland to Boston, and everyone is invited to join the members on this Lake Shore & Michigan Southern train, leaving the Union Station, Cleveland, Friday, March 24, at 7:40 p. m., and arriving in Boston at 3:40 p. m. March 25. The rate secured is 1-3/5 fare for the round trip on the certificate plan, that is \$14.20 going and \$8.52 returning, or a total of \$22.72 for the round trip. Be sure and ask for certificate when purchasing ticket, lower berth \$3.50, upper berth \$2.80. Reservations should be sent in early to Frank A. Friedley, Rocky River, O.

## Carnation Year Book.

The second Carnation Year Book, issued by the Perpetual Flowering Carnation Society of England, is a very complete volume from the society which is doing so much for the culture and popularity of the "Divine flower" in the British Isles. It is beautifully published and edited by J. S. Bruton, the chairman of the office bearers. It contains a list of the members and reports of its officers and exhibition, and a complete list of carnations registered by the society, and also a list of varieties registered by the American Carnation Society in 1910. It is interesting to note that in the voting contest for the 12 most profitable, 12 best exhibition, 12 best varieties for amateurs and six best fancy varieties the high position American grown varieties obtained. Enchantress is first in the first and third and second by one

vote, to White Perfection in the second, and in the 42 varieties selected all but 11 are of American origin. The book is replete with illustrations of carnations and artistic arrangements of this flower and portraits of its officers and prominent members. The articles furnished by the several writers on the culture of carnations in greenhouses and as bedding out and pot plants are very interesting and instructive, and show the amount of research and cultural interest taken by the writers as well as by the membership of the society, which numbers 270 at the publishing of the year book. The society's show dates for 1911 are May 2-3 and December 5-6 at the Royal Botanic Gardens, Regent's Park.

## Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

**Situation Wanted**—By gardener on private place; Chicago preferred; 18 years experience; references in Germany, Switzerland and United States. Address Key 417, care American Florist.

**Situation Wanted**—Practical gardener on private place; experienced in flowers, vegetables, fruit, greenhouse and fowls. First-class references. Ready April 1; single; age 35. Address Key 392, care American Florist.

#### BRIGHT SPRING WEATHER.

Old Sol is now back on the job and working regularly. In fact we had bright spring weather on Sunday, a thing that has not happened on the preceding five Sabbath days. The others started prettily but ended in rain. Still the rain coming on this first day of the week had one consolation: it did not interfere with work or keep shoppers at home. The quality of all stock is holding up nicely and some, such as roses, are getting better. They are now in stronger supply than for some time. The number of white roses available being greater than that of pink. A good quantity of red and yellow roses, too, were offered. The supply of carnations is still unabated and very large numbers are moved daily. White still commands top prices and clean up regularly though the supply is large. Lillium Harrisii and callas are more abundant than at last writing, and taking all into consideration, the number cleaned up is very satisfactory, although such are not always true of the prices obtained. The supply of bulbous stock seems adequate. A quantity of lily of the valley of excellent quality is offered. Sweet peas clean up. They have not as yet shown the effects of the sunshine, but will probably come in stronger during the next fortnight. Violets find buyers somehow at rock bottom prices. The singles are of excellent quality.

Ed Dennier's home was completely destroyed by fire the past week. The flames fanned by the high winds consumed the structure in a short time. A number of fire engines went from the city but arrived too late; the flames had done their work.

Charles McCrea of Hardesty & Co., has been tendered the democratic nomination for the legislature from the

## Alliance, O.

The bowling team of the Lamborn Floral Co. of Alliance, Ohio, went to Cleveland Saturday, March 18, to bowl the team of the Cleveland Florists' Club a series of three games, total pins. After hard luck and the strangeness of the alley had worn off during the first game, in which the Cleveland bowlers secured a lead of 96 pins, the Alliance flower growers came back good and strong and won the series by 18 pins. The Cleveland posse pickers will try their skill in Alliance after Easter,

Greenhouses: Hinsdale, Illinois

### Chicago.

#### STOCK INCREASING.

The pleasant weather which is being enjoyed by all the residents of this great city is very conducive to the production of good flowers and the stock increases from day to day, and in some of the varieties of flowers sent to market is more bountiful than is necessary. Trade is generally reported as being quiet but not more so than is usual at this time of the year. Lent is still with us, and society functions are not as active as early in the winter, consequently the call for floral work is not as strong and trade is always a little lighter for the two or three weeks before Easter. While the stock is very plentiful, yet it mostly moves though somewhat slowly, and there is by no means what can be called a glut, but prices in some cases are very low. American Beauty roses are still a little shy of the call, and there is a good demand for all that are being received. The quantity of the several tea and hybrid tea roses received is very heavy, all the growers cutting excellent crops of the Killarneys and other roses, and the quality in most cases is fine. Elegant long stemmed flowers with fine foliage, and plenty of good shorter stock being seen on all the growers' counters and in the stores. Carnations are being received in great quantities, and are very cheap, some first class blooms being sold very low, and some of poorer grades beginning for a purchaser. Bulbous stock is still plentiful, but the greenhouse stock is nearing its end, some growers think that most of the stock will be gone by Easter. Lilies and callas are quite plentiful, and the price is lower than a few weeks ago, and there is enough lily of the valley. Orchids continue to arrive in quantities sufficient for all demands. Plenty of sweet peas and

Alexander Newitt, St. Joseph, Mo.

After a Missouri Duck Hunt

some of the stock seen is of fine quality, but there is also a large quantity of the short stem goods. Pansies and mignonette, marguerites, snap dragon and other spring flowers are daily forthcoming and looking for purchasers. Greens are plentiful, especially asparagus, which is being shipped in quantities. Hardy ferns are still held at good figures, but southern stock is expected soon.

#### NOTES.

Two teams, representing the Florists' Club bowling league, accompanied by a small crowd of rooters, visited

Milwaukee on March 19, when they played two teams representing the league of that city. Both contests were close and exciting, the locals winning two out of the three games played. The second team lost to the Milwaukee bowlers by a total of 12 pins. The Milwaukee Florists' Club left nothing undone to give the locals a good time and as soon as they arrived an automobile ride around the city was enjoyed, which ended at the Hotel Charlotte, where a bountiful spread awaited them. After all had satisfied their appetite they went to Steink's alleys where the bowling match took place. After the bowling was over the visitors were treated to another surprise when they were invited to partake of a luncheon which was prepared for them. Lubliner & Trinz, the local florists, who have two theaters in the Cream City, invited the entire party to the evening performance, but owing to the late hour they were unable to attend. Words cannot express appreciation of the courtesies shown the visitors.

Fred Hoerber says that the crops are in splendid condition in their greenhouses at Des Plaines, especially the Killarney and White Killarney roses, which are producing heavily now. The sweet peas and mignonette that they are cutting are of good quality.

The Easter stock at Frank Ochelin's greenhouses on Quincy street is in fine condition, and the early orders indicate a good demand for blooming plants for the Easter trade.

Miss Hertha Tonner sold the first Spanish Iris of the season last week, at her stand in the Flower Grower's Market.

D. Peres of the Flower Grower's Market is fixing up the room in the Atlas building which he will occupy May 1.

Geo. Reinberg is cutting very heavily now of Richmond roses of good quality.

# VAUGHAN & SPERRY

LONG DISTANCE PHONE  
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

Wm. Lynch, of E. H. Hunt's cut flower department, states that the call for small shamrock pot plants for the St. Patrick's day trade was very large, and Clifford Pruner of the supply department says that the demand for baskets for the Easter trade is better than in former years, particularly for pot covers, of which a large number have been already ordered.

Poehlmann Bros. Co. is cutting some exceptionally fine Richmond roses with extra long stems that are sold readily at good prices. A large demand for cut lily blooms and lilies in pots for the Easter trade is already reported.

J. A. Budlong's Blue Ribbon lily of the valley is very popular with the trade and a large quantity is sold every day. This firm is also producing a very fancy grade of My Maryland roses at present.

Chas. W. McKellar is showing his customers a good supply of single and double stocks and a fancy grade of Cattleya Schroederiana. He says the triana crop is nearly finished.

Samuel Murray, the well known florist of Kansas City, and Frank Stuppy, with the Stuppy Floral Co. of St. Joseph, Mo., left March 18 for Detroit after a brief stop in the city.

At the Peter Reinberg store the stock is arriving in large quantities, enough to meet the demands. The Killarney and White Killarney roses are of excellent quality.

Wietor Bros. are filling a large number of orders for a choice grade of carnations and roses, the Mrs. Jardine that they are cutting are extra fine quality.

J. A. Schmidt is enjoying a busy season at his store on Wentworth avenue, trade in general being very satisfactory.

Vaughan & Sperry are supplying their customers with a fancy grade of

## ORCHIDS

**PETER REINBERG,** 35 Randolph St., **Chicago**

J. A. Sikuta is enjoying good business at his new store at 34 State street, which was opened last week. It is a very neat and attractive store and a credit to the proprietor. Mrs. Sikuta will have charge of the store at Twelfth street and Fortieth avenue, which they have conducted for a long time.

Manager Pyfer of the Chicago Carnation Co. says that they shipped 50,000 rooted carnations last week and expect to deliver as many more this week. Superintendent Olsem will leave March 26 for Boston with the carnations which they will exhibit at the National Flower Show.

Bassett & Washburn will make an exhibit of Rhea Reid and Bridesmaid roses and O. P. Bassett carnations at the National Flower Show at Boston. C. L. Washburn will attend the show and will leave with the Chicago party.

The time is now here for all early planting of seeds as well as nursery stock and perishable plants may almost go in ordinary cars, although there were some lots frozen in this vicinity March 17.

Stollery Bros., the Wilson avenue florists, will have a fine crop of lilies for their Easter trade, the crop in the greenhouses on Southport avenue being in splendid condition.

During the absence of E. E. Pieser, Michael Fink is looking after the trade at Kennicott Bros. Co.'s store. Mr. Pieser is expected home next week.

Among the high grade stock at the store of J. B. Deamud Co., the long stemmed sweet peas of excellent quality were especially noticeable this week.

Mrs. Ed. Misiewicz's mother is seriously ill at her home at 1166 Milwaukee avenue and fears are entertained for her recovery.

Henry Van Gelder of Percy Jones is satisfying his trade with a fancy

#### Cleveland.

##### STOCK IMPROVING.

Business continues good and stock of all kinds is improving in quality and quantity. St. Patrick's day's business was good with most retailers and many pretty windows were decorated in green in honor of the day. The next holiday is Easter and inquiries come in daily as to stock, etc., for this day. The latter part of the week saw a good clean-up in nearly everything. After nearly a week of cold weather Saturday and Sunday were ideal spring days, and this helped considerable to stimulate business.

#### NOTES.

The boys from Alliance, O., defeated the Cleveland florists' bowling team Saturday evening at the Erie Alleys. Geo. Bowditch and friends stayed over Sunday and visited F. A. Friedly at the Gasser Co. greenhouses. C. F. B.

ROCHESTER, N. Y.—The largest single order for carnations ever sent out of this city was forwarded March 4 to Syracuse, when George B. Hart shipped twenty thousand to Syracuse to be sold on the streets for the hospital fund.

Philadelphia.  
GOOD SUPPLY.

The Lenten season is passing away, and while at times there has been an accumulation of flowers, there has not been so far such distress or difficulty to move stock as men who are comparatively young in the business could tell about. When one considers the production, or output of flowers for this market, which is at least 100 per cent greater than ten years ago, and which is now handled and sold with less loss than at that time, and while the local retail business or consumption has not kept up with this increased supply, the wholesale commission men have come to the rescue, and by working up an outside business have handled and found an opening for the surplus in a business like way that is most gratifying. Truly selling flowers is a science just as much as growing them, both requiring qualifications of a different nature. The man who can grow flowers successfully had better devote his whole time to this end, and let the salesman who has mastered this science handle his product. The market the past week has been fair, a trifle too many long-stemmed pink roses which, however, shortened up perceptibly with the cold spell of Friday and Saturday. The beginning of the week showed considerable activity in all lines. About the only new stock was the southern daffodils, which are now arriving in considerable quantities and Kaiserin roses, which are seen in fair lots and of very good quality. In all other lines there is a good supply which it is now thought can be handled without much trouble.

## NOTES.

The event of the week was the visit of the British Horticultural Traders, who called and spent a portion of Saturday and Sunday visiting Allee Burpee's seed warehouse and trial farm and taking luncheon with Mr. Burpee and a few of his friends in the business. They were much pleased at the perfection and system as well as the magnitude of the Burpee business, which was a revelation to them. Returning to New York for the Florist's Club dinner, they again visited the city to inspect the plant of the H. A. Dreer Corp., where, under the guidance of Messrs. Eisele, Thilow and Stroheim they were shown this wonderful establishment and the recent addition at Riverview. They all appeared immensely pleased with their visit and were warmly interested in the forced circulation of hot water, which is the feature of the heating system at the Riverview plant. Perhaps the most pleasant remembrance of the visit was the address, or talk, by Mr. Eisele at the luncheon, which was given in the office at Riverton. It is not often that Mr. Eisele can be prevailed upon to face an audience, for while he is the best plantsman and greenhouse manager in the country, he is certainly the most modest of them all. His remarks were listened to with great interest and gave the visitors an idea of how the business had grown and something of what Mr. Eisele saw in the future. The party consisted of the following gentlemen: J. S. Brunton, J. Brown, E. Barker, W. A. Cull, C. Engelman, J. S. Gunn, L. M. Graves, G. Prickett, G. Pratley, S. South and J. Simpton. K.

### BUSINESS DRAGS.

Business is still dragging along. What comes in often goes out with very little margin in favor of the grower. It is the novelties that are selling. Violets are like they were last week, sweet peas are good, but a drug, lily of the valley is splendid but buyers are few, roses are not quite as plentiful as last week. There is plenty of all kinds of material awaiting the buyer who can make his selection and get good stock. The only scarce flowers are white carnations and white roses. Brides just now bring good prices and are picked up as readily as the White Killarney, with no grumbling. There is a glut on all kinds of bulbous stock. The old prediction of a shortage of Easter lilies is again being put forth. This is somewhat of a stale joke. I am informed by one who professes to know, that the lily crop will be plentiful. Years ago it was only at Easter we had lilies, but now they are on the market all the time. Cold storage has made this possible.

## NOTES.

The night of March 15 and all the next day New England received her annual visitation of a cold snap. With a drop of 30 degrees and a howling wind with snow, it gave greenhouse men some anxious hours. The only damage coming to our attention are two instances. Wm. Patterson, Wollaston, who had a greenhouse door blow open and had everything in the house frozen. Fortunately he has enough bedding stock to fill up the house, but the loss comes heavy. F. W. Fletcher,

ment and is out hustling to make it a success.

Benjamin Washington, North Stoughton, an old time florist, passed away March 15 after three days' sickness. He was a member of the C. A. R., having served through the civil war on one of the naval vessels. He received an honorable discharge. He was colored and had a host of friends among the craft. The management of the Co-operative Market in which he was a stockholder sent him a handsome piece of flowers. The burial was Saturday, and was attended by a number of florists.

Bernard McGinty has been on the sick list with a severe grip cold, but is at present writing able to be at his post again in the market.

Henry M. Robinson & Co. have issued a nice catalogue for the trade. They report business good.

Welch Bros. report business good, with out-of-town trade somewhat ahead of the usual run.

J. Jansky is a busy man these days with orders in his wire and florists' supply department.

The Montgomery Co., Hadley, are sending in some nice Killarney roses. St. Patrick's day is over; Shamrocks were good, some left over.

Show weather next week. MAC.

#### TRADE DEPENDENT ON WEATHER.

The volume of cut flowers coming in continues quite heavy and with a falling off in demand, chiefly through inclement weather, stock accumulated to quite an extent. On March 18 a little livelier tone was noticed among the buyers and although no attempts were made to advance prices, opportunities to clear out were taken advantage of. The weather seems to be about the greatest factor in the business just now. Fine weather, good trade; bad weather, no trade. American Beauty, as well as all other commercial roses, are in plenty, and prices if anything are a trifle weaker than last week. Carnations, owing to their great numbers are cheaper and averages are a good deal lower than formerly. Violets are a drug in the market and such a thing as a fixed price does not obtain. Gardenias get more plentiful every day. There is a preponderance of short stemmed flowers, consequently there has not been much reduction in the price of special grade blooms. Sweet peas of first class grade enjoy a fair demand and bring good figures. There is a mass of inferior blooms coming in, however, that are sold at prices that seem out of all proportion to those obtained for the best. Lilies are plentiful and lower prices are ruling. Lily of the valley is in plenty and the demand is very changeable, so that fixed values seem out of the question. Conditions in the general run of bulb stock are unchanged. Immense quantities are moved every day, but the supply seems inexhaustible. Cattleyas are not quite so plentiful, still there are plenty for the trade going. Callas have taken quite a drop in price and such flowers as marguerites, mignonette, wallflowers can hardly be said to have a fixed value, prices are so variable. Asparagus sells fairly well, smilax and adiantum demands are more spasmodic, consequently values are less firm.

#### NOTES.

Just how many will attend the Boston show from here cannot be determined at this writing. Some are going by boat, leaving foot of Murray street 5 p. m., March 24. Others will go by train March 25, either 10 a. m. or 12 p. m. Both these trains are express, the former mentioned one is an extra fare train. By boat, the fare is \$3.75, berths \$2.00. The railroad fare is \$4.75. All going will get certificates and thus get return fare at third-fifths rate. Among those who expect to go are W. F. Sheridan and wife, F. H. Treandly and wife, P. Kessler, J. Nash, F. L. Moore, H. Hente, M. C. Ford, A. H. Langjahr, W. G. Badgely and wife, C. H. Totty, P. J. Smith, J. D. Cockcroft, H. A. Bunyard and no doubt many others who have not decided at this writing.

The New York Florists' Bowling Club are in trouble. Their alleys, which, by the way, were paid for a month in advance, are closed, owing to change of management or some-

thing; exact particulars are not forthcoming. Anyhow, the club is out just much rent money. They are not discouraged, however, and new alleys have been secured at the corner of Thirty-second street and Fourth avenue, where practice will be resumed on March 25.

Anton Schultheis, College Point, has his greenhouses teeming full of nice Easter stock. Particularly is he well supplied with roses, baby ramblers as standards, ramblers trained to various shapes, and bush plants of Frau Karl Druschki. The lilies are in good form with a nice average of buds per plant. Among other plants are azaleas, rhododendrons, lilac, gardenias, genistas, acacias and almost all varieties of bulbous stock in pans.

Edwin Persson had the misfortune to lose \$35 in bills out of his pocket while attending the club dinner on March 18. It is presumed he pulled the money out of his pocket accidentally and it fell to the floor unperceived. After discovering the loss Mr. Persson made diligent inquiries but no trace of the missing bills could be found.

Express deliveries are being made under police protection only. The drivers do not seem to get their differences cleared up and are out, that is, of all the company's excepting the American. All the efforts of the strikers to persuade the drivers of this company to go out in sympathy have thus far proved unavailing.

August Millang has sold his lease, store fixtures, etc., at 41 West Twenty-eighth street, to Woodrow & Markelos, who will use the premises for a wholesale plant business, taking possession April 1. Mr. Millang will devote his time to the Brooklyn store he acquired last week.

The opening of the plant auction season, March 14, was marked with a good attendance of bidders and good prices ruled on all stock offered. The Elliott Auction Co. had to declare their sale off on March 17 owing to delay of the custom house authorities.

Percy B. Rigby, manager of the New York store of the Pennock-Meehan Co., returned March 19 from a two weeks' sojourn in Florida, and reports having had a most enjoyable time amid the sunshine there.

The itineraries of the English Horticulturists who arrived March 17, includes Philadelphia, Washington, Richmond, Ind., Chicago, Niagara Falls, Boston and New York.

Julius Roehrs sailed for Europe over the Hamburg-American line, March 16. He goes to Boskoop, Holland, where he is to act as judge at the spring exhibition.

Hugh Nelson has leased the vacant space on the first floor of the Coogan building and will submit to tenants for wholesale dealing in cut flowers and plants.

Visitors. On the S. S. Lusitania, March 17, came the following gentlemen from England: J. S. Brunton, Horticultural publisher, Burnley; J. Brown, of W. & J. Brown, nurserymen, Stamford; E. Barker, florist supplies, Man-

## MICHIGAN CUT FLOWER EXCHANGE, Inc.

Wholesale Commission Florists and Florists' Supplies,

38-40 Broadway,

All Phone Connections.

DETROIT, MICH.

Los Angeles, Calif.

The rush of eastern visitors is now on and trade is brisk. In addition to the call for social events there has been a very heavy demand for funeral work of a higher class. Flowers of all kinds are plentiful and good with the exception of orchids which have been on the scarce side, neither northern shipments or local supplies having been heavy. The recent rains are all in favor of the outdoor flowers, especially bulb stock. In roses, American Beauty, Killarney, White Killarney and Richmond are leaders. Carnations are plentiful and improving in quality. Easter lilies are coming in, mostly L. formosum and, as usual, this variety runs in all lengths from 20 inches to six feet. Violets, sweet peas and other outdoor flowers are good since the rains and over plentiful.

### NOTES.

Geo. E. Baldwin, of Carillo & Baldwin, Mamaroneck, N. Y., made a visit to the growers of Southern California, putting in several days visiting growers in this and nearby cities. Several good orders for orchids were taken and Mr. Baldwin was delighted with the prospects for these plants in this section, also with the good time shown him and the sights generally. Like all visitors, he was enthusiastic in his praise of California vegetation and California weather, and altogether found his trip so pleasant that he proposes making it an annual event. He spent a day in Pasadena with Ed. Rust as pilot while at Hollywood, he arrived just in time to see a white Cattleya Triana which flowered with Wm. Haerle at the El Reah greenhouses. The cattleyas sent out by this firm are giving great satisfaction, being splendid stock of excellent types. The albino in question is a June plant with 16 pseudo bulbs, two fine leads and three flowers and was from one of Carillo & Baldwin's 1910 importations.

The Florists' Club, under the old name, has ceased to exist, the name of this organization having been changed to the Los Angeles Horticultural Society. Every one interested in horticulture is now eligible for membership, whether belonging to the trade or not and monthly meetings will be held on the first Tuesday of each month. The new officers are: Theodore Payzison, president.

Herbert J. Goudge, vice president.

F. Horner, secretary.

C. Winsel, treasurer.

Elmer D. Smith and wife, Adrian, Mich., included this city and Pasadena in their tour and Mr. Smith visited the growers' places in this section. Piloted by Chas. Brazee, of Wilmington, he visited Wm. Haerle, of Hollywood, and expressed himself as greatly pleased with what he saw at the El Reah Greenhouses and California gen-

Satisfaction guaranteed.

E. A. BEAVEN,

Evergreen, Ala.

erally. In common with all eastern visitors, Mr. Smith was much surprised at the vegetation hereabouts and greatly impressed by the number of plants that are tender in the east yet perfectly hardy and attaining huge dimensions here.

The steam boiler at Wright's new plant at Gardenia blew out on one of the coldest nights which we had this season. Not much damage was done, though the stock was checked of course, there being no auxiliary boiler. A new 200 h. p. boiler is being rushed along to take the place of the damaged one. Frank Spiekman, the rose grower here, left his position in February, and will start in business with his brother as rose growers at Lynwood.

Howard & Smith are extremely busy with landscape work, having several large contracts, including the grounds for a fine mansion on the foothills at Hollywood.

E. C. Amling, of Chicago, was an interested visitor of this section.

Get YOUR order in early. We can take better care of it now than we can in the rush just before Easter.

**N**OTE the substantial construction of the two houses to right—they are built to last a half a century with proper care and are as near perfect as ever houses were built and are the pride of Mr. Barber and his gardener, Mr. Scott, recently from England.

**N**OTE below, the very neat and entirely substantial steel frame without belly rod or strut, for houses up to 20-ft. wide, these are amply strong—cast little or no shade and are inexpensive.

**N**OTE in center picture below construction of single house 30-ft. wide, with Galvanized Steel Gutter both sides—side sash also—same general construction in single as in double houses.

Will send blue prints and costs of these or any other kind of houses, private or commercial also **Heating Plants** on application.

Write us for information about our new Ventilating Machine, now ready for delivery. Try it.

**Foley Triumph Machine** has no equal today for ease, speed and safety.

Western agents for the famous **Giblin Sectional Cast Iron Boilers**. Also headquarters for **Pipe and Fittings** of all kinds.

**THE FOLEY MANUFACTURING CO.**  
2541 South Artesian Avenue, Chicago.

**M**R. O. C. BARBER, of Barberton, Ohio, desirous of engaging in Grape and Peach Culture and wanting up-to-date greenhouses has installed two double houses as shown in cut at top of page—each house 30x157; two single houses 30x157, as shown on bottom of page, and one smaller single house, 18x157. These houses are all substantially built on concrete foundation with hollow cement block walls—all houses supported on 2-in. Galvanized Pipe Posts with the Foley Galvanized Steel Channel Gutters with Concentric Wood Sills and rafters of Louisiana Red Gulf Cypress. All houses have two rows of Ventilation and Side Sash throughout operated by Foley Ventilating Machines.

The 30-ft. houses are built with extra strong steel frames and heavy trusses—trusses attached to pipe posts, independent of gutters. The smaller house is a substantial steel frame without any trusses—all the steel work and iron work being galvanized—and all being built stronger than required for flower culture as the roofs are designed to carry tons of weight in

vines and fruit in years to come, as well as to withstand the wind pressure, snow loads, etc. There are no interior supports other than stated above. Should Mr. Barber at any time desire to he can turn these houses into good commercial houses for cut flowers or plants.

**B**ELOW please take notice of the very powerful yet neat and light truss work. special connecting arms were made for connecting trusses to 2-in. pipe posts—these trusses **are trusses** and not imitations or flimsy make-shifts—all who use our trusses will tell you this.

**W**e are now at work on the material for a range of vegetable houses to be built on Mr. Barber's Anna Dean farm at Barbertown—there being in this range six houses 800 feet long made of Foley's Unequalled Louisiana Red Cypress—**Air Dried**.

Write us for prices on **Glass**.

Mr. Barber is a great lover of nature in all her phases, and when his plans are fully matured Anna Dean farm will be as near to Eden as human hands can work.

**All the material for these houses was furnished and erection superintended by**

**THE FOLEY MANUFACTURING CO.**

— THE GRANDEST FERN OF THE AGE —

# Nephrolepis Roosevelt

**N**EPHROLEPIS ROOSEVELT is a sport from Nephrolepis Bostoniensis, but a wonderful improvement over the parent variety and others of stiff, upright growing habit, known as Harrisii or the Harrisii type. It is a stronger maker of fronds and young plants than any other variety, and will produce a larger finished plant in a six-inch pot than Boston or Harrisii will produce in a larger size.

The finished fronds of Nephrolepis Roosevelt are at least a third wider than Boston and have more graceful drooping habit. The pinnæ are distinctly undulated, giving them a beautiful wavy effect which attracts the eye instantly. Cut flower dealers will find fronds of Roosevelt invaluable for display work. A single plant of Roosevelt grown in a six-inch pot will when finished almost double the number of fronds produced by Boston or Harrisii type varieties, and while Boston and Harrisii show stiff, upright growth in a six-inch, the wide, wavy fronds of Roosevelt droop gracefully over the pot, hiding it completely from view. Finished three-inch plants of Roosevelt are equally large and more attractive than the average well-grown four-inch Boston, and growers of Harrisii and the Harrisii type admit they cannot produce attractive plants of these varieties in pots smaller than ten-inch. Without an exception, Nephrolepis Roosevelt is the most valuable fern ever offered for florists' use.

It has the vitality to withstand more rough treatment than other varieties and does not revert to the parent type. In our long experience we have never offered the trade any plant with greater assurance of entire satisfaction, and predict Nephrolepis Roosevelt will very soon lead in popular demand, sweeping from the list Boston, Harrisii and the Harrisii types. We are booking orders for delivery June 1st, 1911, and will fill them in strict rotation as to the date received. Get yours in early; you will not be disappointed in this fern. 2 1/2-inch pots, 40c each; \$3.50 per dozen; \$25.00 per 100; \$260.00 per 1000; 25 plants at 100 rate; 250 plants at 1000 rate.

**GOOD & EREES CO.,**

LARGEST ROSE GROWERS  
IN THE WORLD

**Springfield, Ohio**

## St. Louis.

### LOW PRICES.

Stock has been coming in very freely and prices are low. Violets are about over, and Southern jonquills are very plentiful. In bulbous stock lilies and Dutch hyacinths have the call.

### NOTES.

A party of Kirkwood growers gave William Smith a surprise March 17 and presented him with a beautiful engraved silver loving cup. A letter of congratulations and best wishes for himself and wife, accompanied the gift.

The following will attend the National Flower Show at Boston: F. C. Weber, Theo. Miller and Fred Meinhardt, and will go on the Big Four, Otto G. Koenig will go via Chicago.

C. Young & Sons Co. are very busy at their greenhouses preparing for Easter. This firm does an immense mail order business.

A. Jablonsky will have a splendid crop of lilies. His plants always have the call and are all sold before Easter. The Mullanphy Floral Co. did a big business St. Patrick's Day and are now showing fine Easter plants.

Fred Alves, of Geo. Angermueller's, is in harness again, having recovered from his sickness.

The Red Bud Floral Co. did a large business at their new store this past week.

Some fancy carnations are being received from A. C. Brown, Springfield, Ill.

Visitors: E. J. Fancourt, representing Pennock-Meehan Co., Philadelphia, Pa.; David Kalisch, representing Lion & Co., New York.

W. F.

**MILWAUKEE, WIS.**—An exhibition of tulips, orchids, hyacinths and other winter flowers at Mitchell Park has been greatly admired by the visitors.

## ALL LEADING VARIETIES FLOWER SEEDS.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duray, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, June, 1911.

HOLLAND bulb fields are at their best from March 25 to the end of May.

JOHN LEWIS CHILDS, Floral Park, N. Y., has returned from California.

BENARY's new plate shows a fine vase of antirrhinum well done in colors.

LILUM CANDIDUM bulbs are expected to be cheaper the coming harvest in southern France.

SHERBROOKE, QUE.—The Sherbrooke County Agricultural Association will hold a seed show April 5.

G. C. ELDERING, of W. J. Eldering & Son, Overveen, Holland, expects to call on his American customers early in May.

GLADIOLUS bulblets like rich alluvial soil not recently manured and should be sowed early and from four to six inches deep.

GENERAL reports from mail order houses to date indicate less business than in 1910. It must be remembered that last season was phenomenally early.

CHICAGO.—Prices on the board of trade March 22 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

FRENCH BULB crops in southern France are looking well up to March 10, and there has been a gradually increasing acreage the last few years, but there is no evidence of course at this time as to the yield.

OVERVEEN, HOLLAND, March 6.—All bulbs are about four weeks earlier than last season. Crocus are in full bloom already and such hyacinths as La Tour d'Auvergne and Alberta will be in bloom at the end of the week.

NEW YORK.—The severe cold weather experienced March 16 and 17 caused a great diminution in counter trade. Mail order trade continues quite brisk, however.—Visitors: C. B. Coe, representing D. M. Ferry & Co., Detroit, Mich.

SAN JOSE, CALIF., March 20.—Owing to existing conditions caused by the early drought, followed by excessive rains and floods, the onion crop will be fully 40 per cent under the normal yield. Small seeds such as lettuce, radish, etc., suffered heavily from rains and floods and large acreages are now being replanted. This means short crops.

### Lawyer Congressmen.

Three-fourths of our congressmen are lawyers. The laws they make are for lawyers. They view everything from a sort of shyster standpoint. Their efforts are largely in the line of "practice"—that is, of holding each other up. Also, they hold the people up. A lawyer's way of making money is to get yours.

Some one has said that a committee is a thing which takes a month to do what any good man can do in an hour. We are moving fast toward the age of the business man. Even the lawyers—some of them—are beginning to realize that to conserve business and not to dissolve, disrupt and disintegrate it, is the wise policy.

We need business men at the head of this government, not attorneys for political parties.

Business men!—The Philistine.

### Sunflower Seed Bread

With the approach of old age the preservation of health becomes increasingly difficult, largely because the decrease in vitality of circulation permits deposits to form, which stiffen joints and harden arteries. For a year I used olive oil with beneficial results, but recent experiments convince me that much better results are obtained by the use of a flour ground from sunflower seeds, combined with wheat, oats, or other grains, in proportions necessary to meet the requirements of the Atwater dietary standard. Bread, crackers, breakfast food, pancakes, etc., from such combination, are palatable, nutritious, easily digested, and most healthful and economical of all food products.

Since using this flour my health has improved, stiffness in joints has disappeared, and the heart action is stronger. Dr. Wiley's bulletin No. 60, department of chemistry (out of print, but on file in Crerar library) presents interesting facts concerning the possibilities of the sunflower seed. Luther Burbank is already experimenting to improve the quality of the sunflower

seed, believing that the time is near at hand when it will be universally used as human food.—William J. Moore, in the Chicago Tribune.

### Imports.

During the week ending February 18, imports were received at New York as follows:

H. Frank Darrow, 235 packages seed, 72 cases trees and shrubs, 21 cases plants.

McHutchison & Co., 65 packages plants, six cases trees.

Vaughan's Seed Store, 57 packages seed, six cases bulbs.

S. D. Woodruff & Sons, 51 packages seed.

J. M. Thorburn & Co., 30 packages seed, two cases plant wash.

Peter Henderson & Co., 30 packages seed.

Wm. Elliott & Sons, 20 cases plants. Stump & Walter, five cases bulbs.

To others: 687 bags and 568 packages seed, 382 cases and 84 packages trees, 180 cases and 56 packages plants, 71 cases trees and shrubs, three cases bulbs.

### Catalogues Received.

Leedle Floral Co., Springfield, O., roses; Rich Land Nurseries, Rochester, N. Y., nursery stock; Ellwanger & Barry, Rosary stock; Ellwanger & Barry, Rosary stock; N. Y. novelties in trees, shrubs, roses and hardy plants; I. N. Glick, Lancaster, Pa., chickens; Wm. Toole & Sons, Baraboo, Wis., pansies; Paul Dove, Wellesley, Mass., seeds, etc.; W. W. Wilmore, Denver, Colo., trade list of dahlias, etc., general list of dahlias, hardy herbaceous plants, etc.; Clarke Bros., Portland, Ore., roses, etc.; Frank E. Rue, Peoria, Ill., seeds, etc.; Peter Henderson & Co., implements and farmers' manual; Archias' Seed Store, Sedalia, Mo., seed, etc.; J. F. Noll & Co., Newark, N. J., seeds, plants, bulbs, etc.; H. W. Koerner, Milwaukee, Wis., wholesale list of dahlias and gladioli; J. K. Alexander, East Bridgewater, Mass., dahlias; Henry F. Michell Co., Philadelphia, Pa., new and rare perennial plants and dahlias; M. Crawford Co., Cuyahoga Falls, O., small fruits and gladiolus bulbs; Elm City Nursery Co., New Haven, Conn., nursery stock; A. E. McKenzie Co., Brandon, Man., Can., seeds; Steele Briggs Seed Co., Toronto, Ont., Can., seeds; W. B. Longstreth, Gratiot, O., seeds.

Vilmorin-Andrieux & Co., Paris, France, general catalogue of seeds; Arthur De Meyer, Ghent, Belgium, wholesale trade list of plants, etc.; Perry's Hardy Plant Farm, Enfield, England, special list of lilies; J. E. Lamesch, Dommeldange, Luxembourg, roses; Henry Eckford, Wem, England, seed novelties; V. Lemoine & Co., Nancy, France, plant novelties; Nonne & Hoepker, Ahrensburg, Germany, seeds, etc.

SAY SO IN YOUR NEXT ORDER.

# The Two New Carnations for 1911

## WHITE WONDER.

The largest and most productive white carnation. Has all the white varieties outclassed.

## GLORIOSA.

Pure glistening bright pink. A decided improvement over all the pink varieties in color and every other respect.

The two carnations that will prove to please all growers and the most critical buyers. Commercially they will head the list of varieties grown in the future. Do not fail to grow these varieties that have been inspected and have met the approval of many of our best carnation growers. If you have not already ordered, **Do So Now.** Next delivery—**White Wonder March 27, and Gloriosa April 4.** Our March 15 delivery of White Wonder and March 15 and 27 delivery of Gloriosa were all sold in 5 days after our advt. appeared.

Prices: \$12.00 per 100; \$100.00 per 1000; 2,500 for \$237.50; 5,000 for \$450.00.

## F. DORNER & SONS CO., La Fayette, Ind.

# CARNATIONS

## White House

**The Quality White.** Won the Silver Cup at Morristown for best undisseeded variety; Bronze Medal at Pittsburg, and five other certificates. Absolutely non-bursting, clean and kind in growth, and a variety that will make good. We have 10,000 for March delivery, and that is all we will be able to supply.

## Princess Charming

The finest thing in sight in the Enchantress shade of pink. Every bud a perfect flower, and your net returns per square foot will surprise you.

Our stock is limited, but we are still in a position to supply first-class rooted cuttings of this variety at \$12.00 per 100; \$100.00 per 1000.

## CHRYSANTHEMUMS

We catalogue over 500 varieties, and surely we have the kind you want.

CHAS. H. TOTTY,

MADISON, N. J.

### Buffalo.

#### TRADE FAIR.

March weather has been with us as with many other towns no doubt. Trade conditions have been fair, store openings the past week gave several of the florists very fine orders. The most elaborate were the Hengeler and J. N. Adam Co., which were carried out on lines entirely new to the trade and far more elaborate than ever before attempted by any stores. Prospects for Easter work as to decorations for stores and churches are brighter than in other years. One of the county officials died last week and called forth a large amount of funeral work which has helped what would otherwise have been a very quiet week.

#### NOTES.

Buffalo will be well represented at the National Flower Show. S. A. Anderson will have several things to show. Palmer, Scott, Kasting, Guenther and several others are making arrangements to attend.

Easter business in the greenhouses are very promising.

Visitors: C. B. Knickman of McHutchison & Co., Max Beatters of the Dayton Paper Co., Dayton, Ohio.

BISON.

HARRISBURG, PA.—F. E. Ridenour has opened a new store at 317 Walnut street in addition to the stores on North Third street and at Steelton.

## Geraniums

**FRANK BANNING, Kinsman, Ohio.**  
GLADIOLUS SPECIALIST. ORIGINATOR OF "AMERICA."

## 'MUMS FOR FLORISTS.

We are very strong on many of the Commercial and extra strong on the Exhibition varieties from 2 1/2 in. pots: place your orders early so as to secure early delivery. We would also be pleased to fill your order for **Aster Seed** as we have one of the finest strains known as well as a good list of the standard kinds.

**ELMER D. SMITH & CO., Adrian, Mich.**

Come Direct to  
Headquarters for

Wishing You a Joyful, Happy and Prosperous Easter.

## Prepare for Easter

Unexpected business has prevented us from making an exhibit at the National Flower Show, Boston, March 25th. But I herewith invite all my customers and others who can find time to come to our establishment, to the great mill of plant production, and form your judgment of our great Easter stock in person. The Germantown and Chestnut Hill and Willow Grove routes, at 18th and Eighth and Market streets, will take you direct to Ontario street. From there walk two squares east to 1012 W. Ontario street.

All florists should this Easter-time, come see my stock quite superfine:  
My glistering Araucarias, my Lilies strong and woodsy fair.  
Ferns, big and green nor rival know. Bulbs of all sorts, the best I grow.  
There's not a flower you now can need, but I can sell you cheap indeed:  
Azaleas like a plant on fire with blooms that fill the heart's desire.  
Chrysanthemums with colors chaste. Palms to suit the highest taste.  
The spring time jewelry my flowers, pictures of life that brighten ours:  
None fairer, better, you can find—I have the best of every kind.

### Spirea Gladstone.

What is a home, what is a store, what is a church, what is an Easter present, without having a few plants of the so much admired and so greatly in demand **Spirea Gladstone**, the pride of Holland? O those charming sprays of beautiful pure white flowers! And the foliage, of such a beautiful waxy deep green is a jewel in itself! Mixed with beautiful lilies and other blooming plants they will complete the flower decoration for your happy, joyful Easter home of 1911. Knowing the great demand for these plants during past Easters, when not half the customers could be supplied, we are well prepared this year for the rush, and were fortunate in spite of the scarcity laid in Holland. When other florists supplies were cut short by Holland growers, we obtained enough of the bulbs to fill two houses with the choicest, and are able to supply all incoming orders promptly.  
Price: 5¢, 6 and 7 in. pots, full of buds and flowers, 25c, 35c, 50c, 75c to \$1.00 each; dozen or more, the same price. Some are as big as a small washtub.

### Cineraria Hyb. Grandiflora.

Readers, please just a minute. I wish to call your attention to one of our biggest houses filled with a big selection of that so much admired Easter novelty, the **Cineraria Hyb. Grandiflora**, which will have no equal in the flower market for Easter, 1911. If you are not fortunate enough to see them growing at our establishment, then just imagine you were promoted to a paradise, to a garden in Eden, standing before a mass of flowers in various beautiful colors. The conditions of our Cineraria houses represents at Easter-time. Our new improved strain, planted in 6-in. pots, of medium tall sizes, are unsurpassed in the size and color of the flowers. The flowers are about twice the size of the old ordinary varieties, has big heads of flowers good foliage; some of the plants are as big as a small apple basket. Price: 6-in. pots, 25c, 35c, 50c, 75c to \$1.00 per plant; dozen or more, same price.

### Azalea Indica.

Remember we are headquarters for **Azalea Indica**, grown for us under contract in Ghent, Belgium, under my personal inspection, by going abroad every year and looking them over. **Azalea Indica**, Easter forcing: *Verzwaane*, *Deutsche Perle*, President *Oswald de Kerkove*, Emperor of Brazil, Professor *Volters*, Empress of India, *Schryveriana*, double variegated 60c, 75c, \$1.00 to \$1.25; *Van der Cruysen*, *Simon Martner*, pink, Noble, white, *Appolo*, red, and Emperor of Brazil 60c, 75c, \$1.00, \$1.25 to \$1.50; full of buds and flowers; right for Easter. In large plants, we have *Noble*, *Helena*, *Thelma*, *Bernard*, *Adress*, *Alba*, white, *Empress of India*, *Mme. Van der Cruysen*, and others, \$1.50, \$2.00 to \$2.50.

**Adiantum Hybridum**, 6-in. pan, 25c to 30c.

**Asparagus Sprengeri**, 2½-in.-3c; 4-in., 10c.

### Lilium Multiflorum.

We have Lilies this Easter (1911) to burn, to burn; they are crackjacks, to beat the band, the best in the land, the best in the land, the best in the land.  
Three houses in **Lilium Multiflorum**, the genuine Japan Easter Lily, better than ever before. Our own importation from our general grower in Japan, raised from 9 to 10 in. bulbs started in 6-in. pots last October, have kept cold. Good, perfect foliage from bottom up. Plants medium size, and in all heights from 5 to 10 buds to the plant, 10c per bud; plants under 5 buds, 12c per bud. Just right for Easter. We have the finest lilies this year in Philadelphia and all over the country. Is the town talk from florists and agents daily visiting our place. "We never have seen anything like it," said two well-known growers from Cincinnati and Short Hills, N. J., the other day, when visiting our place together. We have three houses full in 6-in. pots, nicely staked up, medium height, and can supply all applications.  
Our **Hydrangea Ottaka** can't be beat; full of buds, right for Easter, trade every branch nicely staked up, 2.3 4 5 6 7 heads to the plant, 6-in. pots, 25c, 35c to 50c; 7-in., 75c, \$1.00, \$1.25 to \$1.50.

**Hyacinths** of our own importation, four best colors, Gertrude, best pink; King of the Blues, best blue; Grand Maitre, light blue; La Grandesse, best white; 4 in. pots, now outside in cold frame, covered with leaves; two weeks will force them into bloom; in bud or bloom, \$12.00 per 100.

**Begonia Rex**, 5 to 5½-in. pots, 20c to 25c.

### Araucarias Our Specialty.

We are the largest importers of these lovely decorative plants the **Araucaria Excelsa**, **Robusta Compacta**, and **Glaucia**, the choicest last spring (1910) importation, ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Look! Barcains in **Araucaria Excelsa**. Such low prices are quoted below we never known in the history of Araucaria Excelsa. Just think! 6 to 7-inch pots, 4-5-6 years old, 4-5-6 tiers, 25 to 35 40 in. height, for only 75c, \$1.00, \$1.25, \$1.50 to \$2.00 each. These prices are record-breakers—money makers for you.

**Araucaria Excelsa**, raised from top cuttings, no seedlings. Plants, 5½-6-7 in. pots, 15 18 20 25-30 in. high, 4-5-6 tiers, 25-45 years old, 75c, \$1.00, \$1.25, \$1.50 to \$2.00 each. We give big value for your money. Just think! An elephant, 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only \$1.00; a jumbo, 6-in. pot, 5-year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think! a holy tree, 30 to 41 in. and over, 5-6-7 tiers, worth \$2.00, for only \$1.25 to \$1.50.

**Robusta Compacta**, **Excelsa Glaucia**, 6-in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.  
We also have the nicest **Araucaria Robusta Compacta** and **Excelsa Glaucia**, a house full, for only \$1.25 to \$1.50, worth double.

**Dracena Bruni**, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store and house decoration; stands best cold and dust.

**Von Sion Daffodils** (double nosed) best double Narcissus in cultivation, three bulbs planted in a 5½ to 6 in. pot, \$2.50 per doz. pots.

**Tulips**, *Tourne-sole*, double, red and yellow variegated and *Murillo*, beautifully shaded rose pink, three bulbs in one pot (4 in.), \$1.50 per 100 pots; \$1.80 per doz.

**Ipomea Noctiflora**, our so well-known pure white, waxy *Moonvine*, bearing flowers very fragrant and as big as a saucer 2½-in. pots, will make good stock for you to propagate from, \$5.00 per 100.

**Latania Borbonica** (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

**Kentia Forsteriana**, in fine shape, 6-in. pots, 30 35 40-45 in. high, 4-5-6 years old, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

**Kentia Belmoreana**, 30-35 40 in. high, 5-5½-6-7 in. pots, 5-6 years old, \$1.25, \$1.50 to \$2.00 each.

**Kentia Belmoreana**, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25 to \$1.50; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine, **Boston**, **Scottii**, **Whitmanii** and **Scholezi**, 5½, 6-in., 35c, 40c and 50c; 7-in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

**Neph. Glatraai**, a new beautiful fern, an improvement on **Scottii**, much shorter and bushier than **Scottii**, 5½ in. pots, 50c; 3-in. pots, 25c.

**Ferns for Palm**, big assortment, 2½-in. pots, at \$4.00 per 100.

**Crimson Rambler Roses**, 6-in. pots, 3 feet high, nicely staked up and bent down, 75c \$1.00, \$1.25 to \$1.50 each.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

1215 Betz Bldg., Philadelphia, Pa.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice-President;  
S. W. Severance, 503 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, March 18.—Mushrooms, 60 cents per pound; cucumbers, 20 cents each; lettuce, \$1 per dozen heads; tomatoes, 25 cents per pound; radishes, 50 cents per dozen bunches; asparagus, \$6 per dozen bunches; rhubarb, \$1 per dozen bunches; grapes, 1¢ per pound; beans, 25 cents per quart; peas, 40 cents per quart.

Chicago, March 20.—Mushrooms, 20 cents per pound; cucumbers, \$1.15 to \$1.35 per box, small; lettuce, 17 cents to 18 cents per pound; radishes, 15 cents to 50 cents per dozen bunches; rhubarb, 30 cents to 50 cents per dozen bunches.

### Seasonable Notes.

Where cucumbers or tomatoes are planted among lettuce, a close watch must be kept against crowding. At this time of the year lettuce grows fast and the future crop of cukes or tomatoes is very easily injured by choking the young plants. The best way to remedy this is to have a careful person cut out one head of lettuce, preferably to the south of each cucumber or tomato plant just as soon as the lettuce is fit to sell. This opening can be increased a little later on by cutting to the right or left one or two heads and thus a tremendous crop of lettuce can be matured without damaging the successive crop.

Just as soon as the entire lettuce is cut, the fertility of the soil must be looked after. In nine cases out of ten greenhouse soils are deficient in phosphates for producing fruit, hence we add a heavy mulch of bonemeal and hardwood ashes. These may be equal parts and hoed in shallow. From then on if the lettuce beds have been run moist, the water supply should be reduced to induce sturdy growth of the cucumber or tomatoes, in fact, it pays to water the hills only for several weeks and run the beds rather dry.

MARKETMAN.

### Yonkers Horticultural Society.

A largely attended meeting of the society was held on March 3. Shows were discussed, and it was decided that the fall exhibition be so arranged that the date will not clash with other shows in the New York district. Robert Henry was elected an active member. A committee was appointed to arrange for a clam bake, the date to be decided upon later. R. Cochrane's prize brought out quite an array of exhibits Messrs. Wright, Hoffman, and Hebach were appointed judges, and reported as follows: First, Lillium Harrisii var. Jamesii, finely shown by S. Untermeyer (A. Herrington, superintendent); second, Violet, Princess of Wales, of excellent quality, W. B. Trevor (H. Nichols, superintendent). Gardenias from the Lilienthof estate (H. Scott, superintendent), received honorable mention. The new

white carnation White House was exhibited by C. H. Totty, of Madison, N. J. The next regular meeting is to take the form of a social evening, with a prize given for the most meritorious exhibit.

A regular meeting of the society was held March 17 and largely attended. Various committees reported, notably the executive, bringing forward a schedule of classes for the June show, which was adopted with a few amendments. W. Ellis was elected as an active member, and four nominations for membership made. A prize given by W. MacDonald brought out some fine exhibits, notably carnations of splendid quality from J. Canning, superintendent for A. Lewisohn of Ardley, receiving first prize. R. Cochrane, superintendent of the Bwing estate, was second with blooms of very fine quality, and H. Scott third with My Maryland roses. E. Bennett, L. Milliot, and F. Featherstone acted as judges.

The resignation of Lee Whitman, president, was read and accepted with regret. The lure of the "Great Northwest" is responsible for Mr. Whitman's resignation, and he received a standing vote of thanks for his services and innumerable good wishes for success. After business, the evening was given over to sociability, songs, stories and refreshments, all serving to make the evening a most pronounced success.

H. M. B.

### Lenox Horticultural Society.

A special meeting was held March 18 which was devoted and known as rose and carnation night. A few of the members, who felt in lighter vein, attempted to develop it into a social gathering also, but it was very spasmodic; in fact, it did not get any further than the embryo stage of existence. There were some very fine blooms staged, although the competition in some classes was very weak, yet that did not detract from the quality of the blooms. The feature of the evening was two vases of roses sent by S. S. Pennock-Meehan Co., Philadelphia, and grown by Robert Scott & Son, Sharon, Pa., the new Irish yellow rose, Melody, and Double Pink Killarney. The judges awarded both a first class certificate of merit. A vase of lupins, staged by A. J. Loveless, was very striking, being grown to perfection from seed sowed last September. It was awarded a hearty vote of thanks. Four new members were balloted for and elected working members of the society, which makes seventeen this year, and more to follow.

The following is the prize list of the evening: 50 carnations, Elm Court Farm, first; 24 Enchantress, Elm Court Farm, first; 24 scarlet, C. Lanier, first; Elm Court Farm, second; Mrs. J. Sloane, third. 24 pink, C. Lanier, first; Elm Court Farm, second; Mrs. J. Sloane, third. 24 crimson, C. Lanier,

first; 24 white, C. Lanier, first; 12 white, Elm Court Farm, first; A. MacConnachie, second. A. MacConnachie, first, for 12 each scarlet, light pink, pink and variegated. 24 red roses, Mrs. J. Sloane, first; 24 white, Mrs. Parsons, first; 24 Double Pink Killarney, C. Lanier, first. The judges were: E. Jenkins, J. W. Pybus, G. A. Breed and W. Jack. J. W. PYBUS, Sec'y.

### Connecticut Horticultural Society.

The meeting held March 10 brought out a splendid exhibition of cineraria plants by President Huss, mostly of the single hybrid kinds, but including a number of the stellata and cactus types. He also showed two blooming amaryllis plants. C. H. Siernan, Carl Peterson and Howard A. Pinney acted as judges, awarding a certificate of merit for the single hybrids and the cactus plants, a certificate of merit for the stellata collection, and honorable mention for the amaryllis.

This being Cineraria Night on our schedule, an appropriate paper was presented by George B. Baker, of New Britain, who gave many useful facts concerning the history, propagation and culture of the florists' cineraria, as well as the other and less common kinds. Following his address, considerable discussion ensued regarding seed germination of this plant. Some of the members sow the seed on the surface, dampening the soil, and covering with a light sprinkling of moss. Mr. Baker recommended sowing the seed about an eighth of an inch deep. Mr. Baker was tendered a hearty vote of thanks for his address. Work is now being commenced on our schedule of prizes for the two fall exhibitions. It was decided at this meeting to hold the annual dahlia exhibition at Hartford on September 19-20, and the chrysanthemum exhibition on November 7-8. The next meeting will be held on March 24, and will be Greenhouse Rose Night, and we are hoping to be favored with an address by George A. Parker, superintendent of the city parks of Hartford, on the interesting topic of "The Improvement of Small Homes."

GEORGE W. SMITH, Sec'y.

## The Nursery Trade

**American Association of Nurserymen**  
W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shogandoah, Ia., Vice Pres-  
ident; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

GERMANTOWN, N. Y.—S. W. Studley is making arrangements to start a nursery of 75,000 trees as early in the spring as possible.

THE jury awarded William Hallowell \$4,800 damages for twenty-six maple trees which the borough of Conshohocken, Pa., chopped down in opening up Seventh avenue. The trees were planted by Mr. Hallowell half a century ago.

STAMFORD, CONN.—The property of the Fernwood Nursery Co., on West Broad street, which recently went into a receivership, was sold at public auction. Lowell M. Palmer was the purchaser, the amount paid being \$50,298. The property consisted of 60 acres of land and 25,000 square feet of greenhouses.

### Worcester, Mass.

Business has been exceptionally good ever since Christmas and there has been a decided scarcity of roses and carnations of all kinds. Tulips, hyacinths and narcissus are in good supply and find ready sale.

### NOTES.

Lange had the largest wedding decorations of the season in February. The decorations at the church were in pink. Flat baskets of My Maryland roses were placed on each end of the choir rail, and on top of four tall pillars at either aisle and near the center, were masses of roses falling on either side in torch effect, the pillars being twined with smilax. The platform was banked with southern tree-fern palms and foliage plants, with vines falling over the front. The guests' pews were marked off with My Maryland roses and pink ribbon. At the home the receiving party stood in a window alcove in the library in front of a screen of southern smilax. All around the room, tiny electric lights peeped from among the ferns and smilax. The double mantle being banked with ferns, Chinese primroses and American Beauty roses. In the music room the color was rose, Gloire de Lorraine begonias being massed about the mantles. The centerpiece and the dining room decorations were of white lilacs.

At the meeting of the Worcester County Horticultural Society, held in February, Prof. F. A. Waugh of Amhurst was the speaker and he gave an able talk on "Horticultural Travels," illustrated by numerous beautifully colored views of suburban life in England, France, Germany and Italy. The views were particularly interesting, giving a clear idea of the attractiveness of the garden, homes, river banks and country in general. Prof. Waugh was accorded a vote of thanks. He was also the guest of the society at luncheon in the Warren before the meeting.

### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January 19, 0, also at the Chicago Flower Show, November 19, 9. It is a pure, bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per 5000, \$400.00. 25¢ at 100 250 at 1000 rates. Place your order now to be in on early deliveries.

# FINE FERNS

—Ready for—  
Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first class plants of exceptionally good value—plants that will please the most critical buyers, both in regard to quality and value.

## Nephrolepis Elegantisima (Improved)

The finest of this type, never showing a Boston frond. It has not reverted for the last four years. Fine plants 6 inch pots, \$6.00 per dozen; 8 inch \$12.00 to \$18.00 per dozen; large specimens in 12-inch pans, \$3.00 to \$5.00 each.

## Small Ferns for Fern Pans

Best and hardiest varieties, assorted—Pteris Mayii, Winstetii, Adiantoides, Aspidium Tessimense, Cyrtomium Falcatum, etc. Nice plants, 2½-inch pots, \$3.50 per 100.

## Nephrolepis Elegantisima Compacta.

This bears the same relation to Elegantisima that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6 inch pots, \$6.00 per dozen; 8-inch, \$18.00 per dozen; extra fine specimens in 12-inch pans \$5.00 each.

## CROTONS

Fine assortment, well colored. 5 inch pots, \$9.00 per dozen.

BUSINESS FAIR.

Business is pretty fair, considering the Lenten season. Stock of all kinds being very plentiful. Saint Patrick's day created quite a demand for white carnations, but not quite up to last year, notwithstanding prices were lower. Saturday found quite a few green ones unsold around in the various stores. We had quite a blizzard here March 16. A few shippers were caught unawares, and their stock arrived in a frozen condition.

### NOTES.

W. A. Herbert, Wellsville, O., was in town Friday and states business has been a little slow. Mr. Herbert is just getting over a bad case of influenza.

Wm. Wittman, Youngstown, O., was a recent business caller. Mr. Wittman is well pleased with his business, which is more than doubling itself.

The Florists' and Gardeners' Club will hold their next meeting April 4. The subjects will be Easter flowers and plants. A large exhibit is expected.

J. Gerwig, Pittsburg, formerly with J. B. Murdock Co., is now located in Chicago in the same line of business.

L. I. Neff, Bellevue, has the sympathy of the trade in the death of his wife.

Araucaria Excelsa, 5 in. pots, 3-4 tiers, 50c; 6 in. pots 75c.

Clematis, large flowering varieties, 2-year-old plants, \$3.00 per doz.; 1-year-old plants, \$2.00 per doz.

Clematis Paniculata, strong 2-year-old, \$10.00 per 100; 1-year-old \$5.00 per 100.

Asparagus Sprengeri, strong, 3 in. pots, \$4.00 per 100; 2½ in. pots, \$2.50 per 100; 2 in. pots, \$2.00 per 100.

Dracanea Indivisa, 4 in. pots, 10c; 5 in. pots, 15c; 6 in. pots, 30c each.

Stock from 3 in. pots, \$1.00 per 100; Lemon Verbena, Moonvine, large flowering, the true variety, Fu. hsias, 4 varieties; Echeveria

Glaucia; Salvia, Bonfire and Zurich; Variegated Geranium, Mrs. Parker; Geraniums, best commercial varieties; Swainsona

NO LULL DURING LENT.

The lull usually evinced during the Lenten period has been conspicuous by its absence, though the last few days have witnessed decidedly cold weather with the thermometer dropping as low as zero, a higher temperature is now coming our way and with it an increased supply of stock is looked for, the demand for roses has been large all through the season, and the stock at present is very fine, American Beauties which have been decidedly out of crop since Christmas now show indications of growth, the buds are forming nicely and they will be listed soon, Richmond are coming on long canes with good color and well shaped blooms, Killarneys are both fine, while a few very superior Mrs. Jardine occasionally find their way to the stores. Carnations of the better grades are plentiful enough to fill orders, a pleasing feature is the absence of the quantity of inferior stock which was noticeable in other years, our carnation growers are getting wise to the rule that it is the good stock which pays. Bulbous stock moves out nicely and at times is scarce which is caused by the increased demand. Violets have been the only flower which has been over plentiful but even these are moved at a price. The wearing of the green was responsible for a good day, the large number of banquets called for a lot of stock and the sale of shamrocks and green carnations was above the average. The storemen took advantage of the occasion and some very good windows were shown.

NOTES.

Harry Johnston, gardener at Government House, has been having a busy season of it. The entertainments have been many, but he always manages to have enough stock to put up a good decoration.

McIntyre & Trimbee are quickly moving towards the front. They grow a fine lot of ferns and at present have some fine cybiums.

Wm. Fendley of Brampton was a visitor. His violet houses are a mass of bloom and the quality holds up fine for the late season.

J. H. Dunlop, who has been on the sick list so long, is slowly recovering but is still confined at the hospital.

Thos. Manton has a nice lot of snowdrops which appeal to the many Englishmen in this section. H. G. D.

MINNEAPOLIS, MINN.—The nasturtium was selected as the official flower for the civic celebration early in July.

## Seasonable Stock

Azalea Mollis, bushy seedlings, 12-15 in., \$25.00 per 100; 15-18 in., \$35.00 per 100.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

## Morehead Steam Traps

! The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

! It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

! The majority of florists are using Morehead Traps If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

! By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department "N"

Detroit, Mich.

## What the Users say

There Is No Better Boiler.

Gentlemen:—The Kroeschell Boiler works better in every way than the boiler I had before and has given me all the satisfaction I want.

Yours truly,

ROBERT HARDIES, Mannheim, Ill.

From the Far West.

Gentlemen:—Your Kroeschell Boilers are it.

Very truly,

INLAND NURSERY & FLORAL CO., Spokane, Wash.

Heats Canadian Range Easily and Saves Fuel.

Gentlemen:—I had a flue boiler before I got the Kroeschell, which could hardly heat the glass, although it used more fuel than yours. I also have your Generator, which is giving good satisfaction. I think a Generator would pay for itself in a few weeks.

Yours very truly,

J. L. HILLBORN, Leamington, Ont.

Send for Catalogue.

## We Are Going to Exhibit at the Boston Show.

**T**HAT is how important the show looks to us. It is going to be the greatest flower show this Country has ever known.

The way the exhibitors have rallied around the flag has been a revelation. The enthusiasm of it all got into our system and we wired for double space, and have prepared an exhibit that is right in keeping with the U-Bar greenhouses. We just had to make it top notch—and better. There will be a U Bar Greenhouse there showing construction strong points that will set you thinking. It will be an exhibit of serious interest, not alone to Superintendents and Gardeners, but florists as well. Both florists who need show houses, and growers who are so frequently asked by their private customers about the best house to build.

Come and see the new fashioned greenhouse, inside an old fashioned garden.

Cane Stakes, Yokohama Nursery Co., Ltd., 31 Barclay St., New York.

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

## Joseph Heacock, the Orchid and Rose Grower says this about Lord & Burnham Houses:

That Iron Frame house you built for us in May and June was planted the first week in July with 18,000 roses of the varieties Killarney, White Killarney and Richmond. We commenced cutting flowers for the market the first week in September. The growth, owing to the great amount of light in the house, has been most rapid. The house, while light, is strong and substantial, every post being cemented into the ground, and is built to grow roses for the next half century at the least possible outlay for repairs.

Before giving out the contract we had an estimate from another construction company for a house of the same size. While there was over \$3,000 difference between the two bids, we decided that the Lord & Burnham house was the cheaper at the higher figure. We see no reason to regret our decision. We expect to build more houses in the future and do not see how we could improve on what we have already built.

When I go up to our place at Edgewood, 18 miles from Wyncote, and go through our new greenhouse, so well designed for **strength and light**, and see how the roses fairly revel in the sunshine, and note the difference in their growth and those growing in our houses built fifteen to twenty years ago, I marvel at the great advance in greenhouse building and am more than pleased with our new venture.

#### CLUB MEETING.

About twenty-five members attended the club meeting March 20. The chief feature was a most instructive paper read by Ferd. Kolbe on "Carnation Culture." The essayist is a very successful grower of this flower but not extensively, and this perhaps is one of the reasons why he can give such close attention to his modest area of glass. A lengthy discussion followed the reading of the paper and in this the essayist gave more fully and in detail his cultural methods, the essential features of which were shown to be most careful attention to temperature and watering. He uses no manure of any kind beyond that used in the original compost prepared a year before using. A hearty vote of thanks was given Mr. Kolbe. Thos. Browne had on exhibition a vase of seedling carnation blooms of fifty-five distinct varieties, all of desirable shades of color and magnificent large flowers on strong stems nearly thirty inches long. A vote of thanks was given the exhibitor, who stated that they were seedlings in their second year and further trial will be given all of them before selections are made for dissemination. It developed that only the following named florists will visit the National Flower Show at Boston, from here: Philip Breitmeyer and his son Harry, Robt. Rahaley, A. Pochelon, C. H. Plumb, C. H. Maynard. Pres. Browne appointed the following members of the Boston visitors to make an extended report of their observations while east at the meeting of April 17: Natl. Rahaley, on features of the wholesale trade; C. H. Plumb, from the growers' viewpoint, and A. Pochelon will keenly inspect features of the retail trade. An attempt will be made to hold a trade exhibit of plants and flowers about April 3 and for this purpose Pres. Browne appointed a special committee consisting of Chas. Plumb, A. Pochelon, Thos. Browne, M. Bloy and Robt. Rahaley.

#### NOTES.

Frank Danzer spent several days last week visiting the trade in Pittsburg and Cleveland. In comparing trade conditions as he observed them there with this city he is impelled to feel proud of the City of the Straits.

Breitmeyers had a very extensive and unique decoration of the big Hudson store this week. The left hand work of Mr. Danzer was here seen to his credit.

Frank Holznaple has recently purchased a big Winton touring car that he will use for the double purpose of business and pleasure.

E. A. Feters has added to his equipment a handsome Oliver delivery car.

Visitors: Martin A. Leganger, representing A. L. Randall Co., Chicago, J. F. S.

The National Florists' Board of Trade, NEW YORK

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,**

and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO.,** 3124 West Lake St., CHICAGO, ILL.

## THE SECOND NATIONAL FLOWER SHOW

Boston, Mass., March 25-April 1.

### Grand Success—Opening Exercises.

The Second National Flower Show of the Society of American Florists, in co-operation with the American Rose Society, the National Sweet Pea Society, the American Gladiolus Society, the Massachusetts Horticultural Society, the National Society of Gardeners and the Gardeners' and Florists' Club of Boston, was opened to the public, March 25, and will continue to April 1. The flower show committee, the board of control and the city of Boston have achieved wonders. The exhibition is a marvel of beauty and words will fail to properly describe what has been accomplished.

When the doors were thrown open to the public at 8 p. m. March 25, the exhibition was formally opened with a crowded meeting in Paul Revere Hall, a spacious room in the Mechanics' Building, in which the exhibition was held. John K. L. M. Farquhar first addressed those present, introducing Chairman F. R. Pierson, who gave a brief resume of the reasons for, and aims of this great show, also reading a cablegram, just then received from W. W. Wells, of England, expressing a wish for the success of the exhibition. Mayor Fitzgerald, of Boston, being introduced, extended a hearty welcome to all, and mentioned incidentally that Boston had been in the lead in horticulture since 1829 when her first Horticultural Society was organized. Governor Eugene N. Foss, of Massachusetts, on being introduced, extended a hearty welcome for the state and remarked that such exhibitions as this had much to do in attracting the attention of people to the beauties and pleasures of leading a rural life and accomplished a great deal toward bettering the conditions of a great many people. Congressman Samuel McCall spoke briefly, referring to W. R. Smith, who was on the platform, as one of our greatest benefactors horticulturally, and relating the story of how a certain congressman who wanted flowers in Washington, was advised to say something pleasant about Bobbie Burns, to

Mr. Smith and he would be sure of receiving them, unfortunately, he said something about a Jimmie Burns and got into hot water. President Chas. W. Parker of the Massachusetts Horticultural Society, spoke briefly, he being followed by Geo. Asmus president of the S. A. F. Mr. Asmus gave a most interesting talk and in his remarks expressed the hope that people when admiring the many beautiful flowers and plants, would give some credit to the hybridizers, as well as to the growers. W. R. Smith then made a few remarks and the great national flower show was officially open.

Saturday, the opening night, there was a large attendance and on Sunday when the doors opened crowds began to flock in, the people of Boston surely are good patrons of flower shows. The attendance at the show is extremely large, the halls being crowded every day.

Three orchestras furnished the music which added much to the entertaining of the people, refreshment counters were on two of the floors, making it very convenient for the many workers.

The many silver cups offered as prizes were displayed in the main corridors and attracted a great deal of attention.

After the rose classes were judged, the exhibits were re-arranged in a very artistic manner, straight lines being avoided entirely in the arrangement of the color groups, adding a great deal to the beauty of the exhibition.

### The Exhibition.

The Mechanics Building is all that could be desired for flower show purposes, three immense floors, and an unusually large amphitheatre. In this amphitheatre, most of the garden exhibits were located, the stage and a goodly portion of the arena was laid out as a Dutch garden by the firm of R. & J. Farquhar & Co. A windmill was a conspicuous feature of the landscape, behind which was seen plantings of somber evergreens. The foreground,

laid out with curving paths and undulating flower borders, the flowers in seemingly endless variety in the Dutch style were simply grand in their effect, gravel walks helping to carry out the reality of the scheme. Among the flowers employed were splendid examples of cyclamens, tulips, many varieties of narcissi, hyacinths, Begonia Gloire de Lorraine, etc.

Following the gravel path from the Dutch garden a green and gold mass is reached, the exhibit of Thos. Roland, Nahant, Mass., and which consists of large specimen acacias, some 25 varieties, all literally loaded with their yellow blossoms, and just enough of the light feathery foliage showing to make the green and gold effect perfect, this was surely one grand display.

On one side of this yellow mass the Julius Roehrs Co., Rutherford, N. J., erected a colossal mound of orchids, surmounted by a towering tree fern, the varieties of orchids in flower were very numerous and many very choice things were among them.

Further we came to a charming group of plants from A. N. Pierson, Cromwell, Conn., azaleas, adiantum Farleyense, rhododendrons, hydrangeas, spiraeas, ferns in many kinds, young stock begonia and budded roses and a few vases of their two new roses Dark Killarney and Prince de Bulgarie, both of which look very promising; the latter is a pleasing pink and seems to have stem and foliage desirable for all purposes. A collection of dwarfed Japanese plants by the Yokohama Nursery Co., New York, was a most attractive feature.

Bobbink & Atkins, Rutherford, N. J., made elaborate exhibits of varied commodities, their large collections of clipped box, baytrees, and decorative plants were special features as was also their showing of evergreens, this collection embraced 100 varieties, and they were all grown in their own nursery, no imported plants being among them.

F. R. Pierson Co., Tarrytown, N. Y., showed several collections of ferns, the exhibit of large specimens of the nephrolepis family being particularly good. Some of the varieties were *N. viridissima*, *N. elegantissima* and *N. amepohlii*.

Lager & Hurrell, Summit, N. J., made a beautiful and seemingly complete collection of flowering orchids, together with a number of unestablished plants. The Easter Nurseries, Jamaica Plain, showed a nice collection of conifers. Knight & Street, New York, exhibited a collection of commercial flowering plants. W. W. Edgar Co., Waverley, had a very fine group of flowering and decorative plants, among which were choice specimens of hydrangeas, genistas, lilies and ferns. Ellwanger & Barry, Rochester, N. Y., had a collection of evergreens. W. A. Manda, South Orange, N. J., made extensive exhibits of nursery stock, palms, ferns and orchids.

Henry A. Dreer, Philadelphia, had many fine things in their group of plants, notably the collection of variegated pineapple—the hollyfern, *Cyatium Rochfordii* and a double white marguerite Mrs. F. Sander. The Crow Fern Co. showed samples of hardy cut greens. Paul de Nave, Fall River, Mass., exhibited a small collection of

orchids and a collection of flowering plants was shown by R. C. Bridgham, Boston.

Some of the retailers took a lively interest putting up very creditable and attractive displays. S. Hoffman, Boston, had a garden scene laid out very prettily. Penn Bros., Boston, showed a bridal party under a rustic arbor which was also very attractive.

Thomas F. Galvin, Boston, an arbor of specimen decorative plants.

The New England Nurseries, Bedford, Mass., were exhibitors of evergreens, and the Mount Desert Nurseries, Bar Harbor, Me., made an extensive exhibit of their new fern *Nephrolepis Milleri*, a very fine fronded form of this fern.

McMullin, Boston, staged a collection of azaleas, rhododendrons, antirrhinums, genistas, etc., and that is about what constituted the exhibit in that particular hall, every plant and flower seemed perfect and the hall, as to arrangement and material was a picture such as has not perhaps been seen before.

A. Leuthy & Co., Roslindale, a massed group of decorative and flowering plants.

#### The Rose and Plant Exhibits.

Now let us glance into the other main hall, where roses, smaller flowering plants and cut flowers were the principal feature. Along one side is a typical rose garden, paths, borders, etc., laid out by M. H. Walsh, Woods Hole, Mass., and filled with varieties all of his own breeding and raising. Immense are the rambler plants seen here, and perfect in shape, carrying thousands of blossoms. Among varieties conspic-

uous are Winona, pink; Troubadour, deep pink; Celeste, single white; Hiawatha, red; Lady Blanche, double white, all of them grand and making this exhibit one of the distinct features of the show.

Close adjoining is another rose garden, filled with smaller specimens, but equally pleasing, enclosed in a fence covered with trailing roses with arbors of the same over each entrance. This unique and pleasing attractive garden was laid out by Thos Roland, Nahant, Mass.

Going down the centre is seen the prize group of crotons from Robert Craig Co., Philadelphia, then a charming group of schizanthus, followed in succession by groups of amaryllis, azaleas, lilies and some well grown specimens of that old fashioned greenhouse favorite, the chorizema, some of us had not seen this plant before for, well, a great many years.

Then we come to a pergola, erected and festooned by Carbone, Boston. Groups of statuary urns filled with aquatics and specimen rhododendrons all helped to make this an attractive feature. Immense specimen azaleas were dotted here and there, a plant of *A. vorteneana*, eight feet in diameter among them. *Cineraria stellata*, Ghent azaleas, schizanthus, lilies, tulips, hyacinths, cyclamens, were all subjects for separate groups and were a truly dazzling picture of color. Along the sides were tables devoted to cut flowers, everything in season represented and something in the way of a chrysanthemum that seemed out of season, a yellow sort, labeled Seven Oaks. Rhododendron Lady Alice Fitzwilliam, an almost white, lily shaped flower was also seen in this section.

FIRST PRIZE VASE OF KILLARNEY ROSES.

Exhibited by A. Farenwald Roslyn, Pa. at the Second National Flower Show, Boston, March 25.

R. & J. FARQUHAR & CO.'S DUTCH GARDEN AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 25.

#### Kift's Impressions of the Big Show.

William Kleinheinz said on the third day of the exhibition, "I would never forgive myself if I had not come to this great flower show," and there will be many hundreds all over this broad land who, after reading of the many features of this wonderful display, will say, "How I do wish I had been there." Not that the attendance was poor, in fact, it was quite as good, if not better than the average S. A. F. convention. Familiar faces were continually coming into view until it seemed as if every member of the old guard had reported and each one had brought a friend along.

All that can be said of this great collection of plants and cut flowers, with its bewildering array and magnificence of arrangement at every turn, should be heralded to every part of the land both by the press and the many members of the trade who were fortunate enough to be present, and received the inspiration that came from even the first glance of the main floor, and as the visitor progressed and one feature after another came into view he was held speechless with admiration. The rose garden of Thomas Roland was the acknowledged masterpiece of the show, it was a most beautiful and charming arrangement of climbing and polyantha roses ever planned for an exhibition in this country, and was at all times surrounded by an admiring crowd, not only amateurs, but by members of the trade who were as much taken with it as the laymen, and seemed to see in it something new every time they passed that way.

Next in interest was the wonderful collection of acacias and other hardwood plants, staged also by Mr. Roland. Nowhere in this country was

there ever seen such an assortment of plants of this character together, all were in full flower, having been timed to the day, to be in their best condition for this display. Men would stand and admire it, exchanging words of praise with one another over this plant and that, and the general excellence of everything, and go away only to return again and again as if they could not get enough. A similar entry in the same competition alongside was also very beautiful, but lacked the variety of Mr. Roland's. The plants that stood out in his group were the magnificent *Acacia pubescens*, *dealbata* and other choice sorts and the well-flowered *bougainvilleas*, *heath* and *boronias*.

Probably the next most attractive exhibit was the great collection of rambler roses from M. H. Walsh of Woods Hole. He has done great things in this line before, but some of the plants staged here were certainly more near perfection than anything he has ever shown. They were arranged separately with a garden effect, having a green imitation or green setting which showed them off to the best advantage. The larger plants were as well flowered and covered with blossoms as they could have been if grown outside, the large nearly white colored specimen *Lucille* was a mass of clusters of its lovely bluish-colored blooms, *Lady Gay* seemed equally as full and all the other famous sorts of this wizard of rose growers were of such excellence that it was difficult to select one more beautiful than the others. This exhibit was adjoining the rose garden of Mr. Roland, covering the same amount of space and many of the visitors, who came hundreds and thousands of miles, were heard to say it was alone worth the journey to see these roses.

Julius Roehrs' collection of orchids was wonderful in its assortment of rare and valuable varieties, to get so many of these plants, which are difficult to handle, in flower at one time was a feat indeed. The Dutch garden by Farquhar's was well arranged and contained an enormous lot of stock, magnificent bay trees and all sorts of semi-hardy foliage plants were arranged in attractive groups, and lighted up by much bulbous stock in the beds of the foreground. The collection of cyclamen in this exhibit were superb, and in fact, wherever these plants were seen they stood out in such general excellence that Boston can be said to be the natural home of the cyclamen.

There were many handsome groups of palms and other foliage plants in this section of the show, which was laid out with graveled walks to give the whole a garden effect. Numerous rustic chairs and settees placed at intervals, helped the general appearance and were a great comfort to the visitors. The Robert Craig Co. made a large exhibit of their well-known crotons, which were much admired. Other striking entries from the Quaker City came from the private collections of John Wanamaker, C. W. Newbold and the Pepper estate. Wm. Robertson, the gardener of the Pepper estate, won first prize with splendid *cinerarias*. Thos. Logan and Wm. Batchelor, manager and gardener for C. W. Newbold, staged two magnificent azaleas six feet in diameter and a mass of blooms. The largest cistibium in the show was also in their group of plants and they won several first prizes. John Dodds, gardener for John Wanamaker, entered a magnificent specimen of new *pandanus*, a sport from P. Sanderli. It is beautifully marked, being a clear yellow where the well-known P. *Vietchii* is

white, and is a most distinct novelty. It received first prize as the best specimen plant of any kind and many other honors. The display of cut roses, which were staged the first day, were quite equal if not superior to any of the exhibitions of the National Rose Society. American Beauty entries were scarce, there being but three vases in the class for fifty blooms, the prize being won by Myers and Samtman of Philadelphia.

The growers of the Quaker City did themselves proud and kept up their reputation as the first rose growers of the land, winning about all the first prizes. White and pink Killarney, Richmond, Mrs. Jardine and My Maryland. The first and second prizes were divided up among the Philadelphia growers with some additional merits for culture thrown in. It is not often that a first prize is backed up by an additional word of praise or special prize for further excellence, but such was the case in the Myers and Samtman's American Beauty roses and E. Towill's entry of fifty Richmonds. Robert Scott & Sons' new sport, Double Killarney, and the new yellow Irish tea Melody, scored 66 and 84 points respectively and were very much admired. Many large orders were booked on the spot by the busy Pennock-Meehan Co.'s attendants, whose company is the agent for the sale of these roses, and took advantage of this opportunity to meet so many growers and to display at their balcony stand samples of the flowers and young stock for this spring delivery.

Tuesday morning ushered in the sweet peas and brought forth a magnificent display of these increasingly popular flowers. Words almost fail to describe the beauty of the general effect of the immense number of blooms displayed. William Sim, that past

master in the cultivation of this flower, and the greatest commercial grower of sweet peas in this country, made a wonderful exhibition, filling a series of tall pyramid stands, four feet high, with magnificent long-stemmed blossoms, each stand containing one variety. The first sight of this display invariably called forth expressions of delighted surprise. There were other fine exhibits of these lovely flowers. The wonderfully fine vases of the seedlings, crosses of the orchid flowered Spencer type which opened up a new field in the development of this flower, were exquisite in coloring in their variety of shades of white, orange, pink,

Chester I. Campbell.  
Manager Second National Flower Show.

blue and, in fact, all colors of the rainbow. The broad fringed petaled blooms were very distinct and showed great possibilities, these creations were the work of Mr. Zvolanek, who says he is now done, thinking he has brought the flower to its highest point of perfection, and will work up a stock of the varieties for commerce. There were some very pretty decorated tables and arranged baskets and bouquets of sweet peas, which were surrounded at all times by an admiring crowd.

The Carnation Society's exhibits were being judged as I was leaving to catch a train. A hasty glance showed one of the leaders among the new ones to be a lovely blotched white and pink, a distinct and promising novelty, as it had everything in color, form and stem to make it desirable. It was called Mrs. Barron. Another winner by Peter Fisher was a striped sort similar to Mrs. Patten, but having distinct points of excellence over that undoubtedly fine variety. Wm. Kleinheinz was given a preliminary certificate for his excellent scarlet seedling, Miss Dimple Widener. The attendance which is so necessary to the success of such an exhibition was most encouraging in the early days and it was thought by the manager, Mr. Campbell, that it would be a record breaker, as it was better at this stage than the recently held auto show, which was so successful. To the hard-working officials, headed by F. R. Pierson, who have given so generously of their time to the working out of the details and bringing about such wonderful results, and to the magnificent efforts of Thomas Roland, who has worked with such zeal for two years past to show his fellows what could be done in this line, and to the Messrs. Walsh and Farquhar and all the other large exhibitors who have contributed so much to make this Na-

## NATIONAL FLOWER SHOW BOARD OF CONTROL.

tional Flower Show a success, there can not be given too much commendation and praise. K.

**Trade Exhibits.**

On the second floor are the trade exhibits of florists supplies which are attractively displayed by the several firms and the following were noticed:

Welch Bros., of Boston, have a noteworthy exhibit of florist supplies, including all kinds of fancy chiffons, bridal scarfs, ribbons, fancy baskets, artistic and metallic wreaths, glassware, fern dishes, palm pots. This exhibit covers 300 square feet and is full of the choicest specimens.

Henry F. Michell & Co., Philadelphia, Pa., display pottery and terra cotta ware and grass seeds.

S. S. Pennock-Meehan Co., Philadelphia, have an exhibit of ribbons for all the different shades of flowers and includes seventeen shades of tulle ribbon which are an exact match for the several flowers. They also exhibit Double Pink Killarney and Melody roses.

John Lewis Childs, Floral Park, N. Y., has a display of bulbs including

gladiolus, liliums and yellow callas in pots.

The Lord Frost Proof Plant Box Co., Minneapolis, Minn., show the box which they make is frost proof, and that plants can be shipped in all kinds of weather. It is provided with a special arrangement whereby even if the box is placed on the wrong end the plant will not be damaged, but is held in its proper place.

Cedar Acres, Wenham, Mass., have a display of gladiolus bulbs.

The Climax Manufacturing Co., Castorland, N. Y., exhibit the improved lock corner folding boxes.

Schloss Bros., New York, all kinds of ribbons.

Wertheimer Bros., New York, sprinkle proof ribbons and sprinkle proof chiffons.

Wm. Jurndahl, Cambridge, Mass., exhibit of light birch rustic work.

Wm. J. Boas Co., square lock flower boxes.

Stone & Forsythe, Boston, Mass., boxes and florists' supplies.

Fottler Fiske & Rawson Co., Boston, Mass., make a notable exhibit of florists' supplies, bulbs and Dutch hyacinths in pans. This is a very nice display.

Gt. Van Waveren & Kruijff, Philadelphia, Pa., Dutch and French bulbs, and Holland and Belgium stock.

Joseph G. Neidinger, Philadelphia, Pa., a nice display of wax flowers and metal designs and a fine line of novelties for floral use.

O. Cusamans, Boston, group of garden statuary.

Henry M. Robinson & Co., Boston, Mass., a very nice display of boxes, ribbons, imported baskets and wax flowers, metal and cypress wreaths, wheat, magnolias, their motto: "We never disappoint." They have also galax, hose and all general florists' supplies.

**Allied Trade Exhibits.**

In the basement were the allied trades, and the exhibits were very comprehensive. Among them were some of the prominent exhibitors:

American Blower Co., Detroit, Mich., return steam trap, The New Detroit.

Ideal return steam trap, Cleveland, Ohio, Ideal pipe clamps. Bate evaporators trap, first time shown, trap has new valve construction.

Thos. J. Grey Co., Boston, Mass., cold storage valley, spirea and tulips, they show two ploughs, one 150 years old, and a gold plated one from the Syracuse Plough Co. Thos. Grey Co. are their agents, horse and hand lawn mowers, seed sowers, land cultivators. The Iron Age.

A. F. Stearns Lumber Co., Boston, Mass., greenhouse material and pipe fittings, agents for The Challenge Ventilating Machine.

Boston Plate and Window Glass Co., Boston, Mass., greenhouse glass, plate and mirrors.

Revere Rubber Co., Boston, Mass., Revere hose.

Benjamin Hammond, Fishkill, N. Y., paint, putty and slugshot.

Kroeschell Bros. Co., Chicago, hot water boiler No. 14, 1910 model, capacity 48,000 square feet glass. Sold to John Barr, South Natick, Mass., also Kroeschell generator, threaded tube pipings system, Ideal chain wrench, shaking and dumping grates.

Lord and Burnham Co., New York, iron frame greenhouses and heating apparatus, also iron bench construction.

Hitchings & Co., New York, iron frame greenhouse, boiler exhibit and iron bench construction.

Church Power Sprayer, tree trucks, with gasoline engines and tanks, these looking like powerful machines.

Johnston Heating Co., New York, locomotive boiler used for steam or hot water, they show a water heater used in forced hot water circulation with baffle plates on each head.

United States Radiator Co., Geneva, N. Y., showing line of furnace boilers

for both hot water and steam. Rumsey pumps for every kind of service.

The American Agricultural Chemical Co., New York, farm and garden fertilizers.

Boston Belting Co., Boston, Mass., line of garden and greenhouse hose.

Ormsby Ventilating Apparatus, Boston, Mass., ventilating apparatus operated by springs.

Weatherhead Co., New York, patented tee for curved caves, with portable cement base, sold in 8-foot 33-inch sections.

American Auxiliary Heating Co., Boston, Mass., circulator.

Pierson U-Bar Co., New York, complete greenhouse iron frame, curved eave, slate, iron frame, and tile benches.

International Harvesting Co. touring car, auto wagon and spraying rig, one power plant.

Means and Thacher, Boston, Mass., paint and putty.

A. H. Hews & Co., Cambridge, Mass., general line of flower pots, pots and saucers were furnished free to every exhibitor in the show.

Danal Hliffe, Boston, Mass., greenhouse showing ventilating apparatus, sectional boiler for hot water or steam.

The C. W. Brownell Co., orchid, peat and moss.

Lunt Moss Co., Boston, Mass., nice exhibit of machinery for pumping water and making electricity.

Wilson Plant Oil and Fertilizer Co., Chatham, N. Y., plant oil and supplies.

Aphine Manufacturing Co., New York, aphine and fungine.

The Advance Co., Richmond, Ind., ventilating machines and brackets.

King Construction Co., New York, iron frame greenhouse and iron frame boiler house.

## Awards.

### Flowering Plants—Miscellaneous.

Acacias, best 18 plants not less than four varieties—Thomas Roland, Nabant, first; Mrs. Frederick Ayer, second.

Acacias, best six plants not less than three varieties—Thomas Roland, first.

Acacias, best three plants, one or more varieties—Thomas Roland, first; Mrs. F. Ayer, second.

Acacia pubescens, best specimen plant—Thomas Roland, first.

Acacia paradoxa, best specimen plant—Thomas Roland, first.

Amayrillus, best 36 plants not less than 18 varieties—Thomas Roland, first.

Acacia, best single plant—Thomas Roland, first; Thomas Roland, second.

Amayrillus, best 12 plants not less than nine varieties—Thomas Roland, first.

Anthurium, best six plants not less than three varieties—W. A. Manda, South Orange, N. J., second.

Anthurium, best specimen plant—Lester Leiland, first; W. A. Manda, second.

Azalea Indica, best 24 plants not less than six varieties—Julius Roehrs Co., Rutherford, N. J., first.

Azalea Indica, best 12 plants not less than six varieties—Peirce Bros., Waltham, first; W. W. Edgar Co., Waverly, second.

Azalea Indica, best six plants not less than three varieties—A. M. Davenport, Watertown, first.

Azalea Indica, best specimen plant pink or rose—Peirce Bros., first.

Azalea Indica, best specimen plant white—C. B. Newbold, first.

Azalea Indica, best specimen plant any other color—Peirce Bros., first.

Azalea mollis, best 12 plants not less than four varieties—Sidney Hoffman, first.

Begonia Gloire de Lorraine, best six plants—A. M. Davenport, first; A. M. Davenport, second.

Boronia, best six plants not less than two varieties—Thomas Roland, first.

Bougainvillea, best six plants—Thomas Roland, first; Thomas Roland, second.

Bougainvillea, best specimen plant—Thomas Roland, first; Thomas Roland, second.

Camellias, best specimen plant—W. A. Manda, first.

Chenaria hybrids, best six plants—Mrs. John L. Gardner, first.

Chenaria stellata, best six plants—Mrs. John L. Gardner, first.

Cyclamen, best 36 plants—R. & J. Farquhar & Co., first.

Cyclamen, best 12 plants—W. C. Rust, first; Robert Craig Co., Philadelphia, Pa., second.

Chorizanthe, best four plants—Mrs. John L. Gardner, first.

Chorizanthe, best specimen plant—Mrs. John L. Gardner, first.

THE EXHIBITION OF CUT ROSES AT THE SECOND NATIONAL FLOWER SHOW, BOSTON, MARCH 25.

GENERAL VIEW IN THE LARGE HALL AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 25.

Ericas, best 24 plants not less than six varieties—Thomas Roland, first.  
 Ericas, best six plants—Thomas Roland, first; Mrs. F. Ayer, second.  
 Erica melanthera, best six plants—Thomas Roland, first; Mrs. F. Ayer, second.  
 Ericas, any species, best specimen plant—Mrs. F. Ayer, first; Thomas Roland, second.  
 Flowering shrubs, best 12 plants standard or tree form, not less than six varieties (offered by the Massachusetts State Board of Agriculture)—W. A. Manda, first; Peirce Bros., second.  
 Gardenias, best six plants—John McFarland, North Easton, first.  
 Gardenias, best specimen plant—John McFarland, second.  
 Genistas, best 12 plants—Thomas Roland, first.  
 Genista, best specimen plant—Mrs. E. M. Gill, Medford, second.  
 Flowering plants, best group arranged for effect with palms and other foliage plants to cover not less than 200 square feet—Edward McMulklin, first.  
 Forced shrubs, best group of forced shrubs and herbaceous plants arranged for effect to cover not less than 200 square feet—Peirce Bros., first.  
 Hydrangeas, best 12 plants not less than three varieties—Thomas Roland, first; Thomas Roland, second.  
 Hydrangeas, best six plants not less than two varieties—Thomas Roland, first.  
 Hydrangeas, best specimen plant—J. W. Dudley & Sons, Parkersburg, W. Va., second.  
 Lilacs, best 12 plants, not less than three varieties—Julius Roehrs Co., first; Peirce Bros., second.  
 Lilacs, best three plants—Peirce Bros., second.  
 Marguerites, best specimen plant—James Marlborough (T. E. Procter, gardener), first.  
 Marguerites, best six plants not less than two varieties—James Marlborough, first.  
 Rhododendrons, best 24 plants not less than six varieties—Julius Roehrs Co., first.  
 Rhododendrons, best 12 plants not less than three varieties—W. A. Manda, first.  
 Rhododendrons, best specimen pink or lavender—W. A. Manda, second.  
 Rhododendrons, best plant white or nearly white—W. A. Manda, third.  
 Spirea or Astilbe, 12 plants not less than three varieties—Peirce Bros., second.  
 Wistaria, best specimen—Peirce Bros., first.  
 Geraniums, best 12 plants, 12 varieties—W. Ames, first.  
 Primula obconica, best 12 plants—W. C. Rust, first.  
 Schizanthus, best six plants—Mrs. E. S. Grew, Manchester, first; John L. Smith, second.  
 Specimen flowering plant other than above—W. A. Manda, first.

#### Palms and Foliage Plants.

Arecas, best pair—George Barker, first. W. A. Manda, second.  
 Arecas, best specimen—W. A. Manda, first.  
 Cocos Australis, best specimen—W. A. Manda, first.  
 Cocos plumosus, best specimen—W. A. Manda, first.  
 Kentia Belmoreana, best pair—W. A. Manda, first; E. McMulklin, second.  
 Kentia Belmoreana, best specimen—W. A. Manda, first.  
 Kentia Forsteriana, best pair—W. A. Manda, first.  
 Kentia Forsteriana, best specimen—W. A. Manda, first.  
 Phoenix Robelenii, best pair—Bobbink & Atkins, Rutherford, N. J., first; A. Bieschke, Norton, Conn., second; James McKau, Tuxedo Park, N. Y., third.  
 Phoenix rupicola, best specimen—W. A. Manda, first.  
 Palms, other than above—W. A. Manda, first.  
 One specimen palm, other than above—W. A. Manda, first.  
 Bay trees, best display—Bobbink & Atkins, first; R. & J. Farquhar, second.  
 Bay trees, best pair pyramidal—George Barker, first; S. Hoffman, second.  
 Bay trees, best pair standard—George Barker, first; S. Hoffman, second.  
 Box trees, best display—W. A. Manda, first; Bobbink & Atkins, second.  
 Box trees, best pair pyramidal—W. A. Manda, first; S. Hoffman, second.  
 Box trees, best pair standard—W. A. Manda, first; S. Hoffman, second.  
 Box trees, best pair bush—W. A. Manda, first; W. A. Manda, second.  
 Aracacias, best six plants, three or more varieties—W. A. Manda, first.  
 Crotons, best display—Robert Craig Co., Philadelphia, Pa., first.  
 Crotons, 25 plants, 25 varieties, not over 6 inch pot—Robert Craig Co., first.  
 Crotons, best six plants, six varieties—Mrs. F. Ayer, first; Robert Craig Co., second.  
 Cycas, best specimen—W. A. Manda, first; W. A. Manda, second.  
 Dracaenas, best 12 plants, six varieties—W. A. Manda, first; Thomas Roland, second.  
 Dracaenas, best specimen, green—W. A. Manda, first; E. McMulklin, second; W. A. Manda, third.  
 Dracaena, best specimen, red—Robert Craig Co., first; W. A. Manda, second.  
 Dracaenas, best specimen, any other color—P. B. Dane, first; Robert Craig Co., second; W. A. Manda, third.  
 Ficus elastica, best specimen—W. A. Manda, first.  
 Ficus pandurata, best specimen—W. A. Manda, first; Robert Craig Co., second.  
 Pandanus, best specimen—W. A. Manda, first.

Pandanus, best specimen any other variety—J. Doidge, first; W. Thatcher, second; W. A. Manda, third.  
 One specimen greenhouse or store foliage plant other than above—W. Thatcher, first.  
 Greenhouse or store foliage plant, six plants, six varieties—W. A. Manda, first.  
 Cacti or other succulent plants, best collection—W. A. Manda, first.  
 One specimen succulent plant—W. A. Manda, first.  
 Banana tree, best specimen in fruit—James Marlborough, first.  
 Confers, best collection, not less than 25 varieties—W. A. Manda, first; R. & J. Farquhar, second; Bobbink & Atkins, third.  
 Confers, best six specimens—W. A. Manda, first; W. A. Manda, second.  
 Confers, best three specimens—W. A. Manda, first; W. A. Manda, second.  
 Confers, best two specimens—W. A. Manda, first; W. A. Manda, second.  
 Confers, best single specimen—W. A. Manda, first.  
 Orchids.  
 Orchids, best collection arranged with foliage plants for effect, to cover not less than 100 square feet. For commercial growers only—Julius Roehrs Co., first.  
 Orchids, collection 12 plants, 12 varieties—E. B. Dane, Brookline, first; W. A. Manda, second.  
 Cattleya Trianae, best specimen plant—J. T. Butterworth, So. Framingham, first; W. A. Manda, second.  
 Cattleya Schroederi, best specimen plant—W. A. Manda, first.  
 Cattleya, any other variety—J. T. Butterworth, first; W. A. Manda, second; W. A. Manda, third.  
 Cypripedium, best collection not less than 25 varieties—E. B. Dane, first; W. A. Manda, second.  
 Cypripedium, best six plants, six varieties—E. B. Dane, first; W. A. Manda, second.  
 Cypripedium, best specimen—W. A. Manda, first; J. T. Butterworth, second.  
 Cologerie, best specimen—E. J. Milton, Brookline, first.  
 Dendrobium, best 12 plants, 12 varieties—W. A. Manda, first.  
 Dendrobium, best specimen plant—Henry Stewart, Waltham, first; W. A. Manda, second.  
 Dendrobium Wardianum, best specimen plant—W. A. Manda, first; J. T. Butterworth, second.  
 Lelia anceps, best specimen plant—T. T. Watt, Wellesley, first; T. T. Watt, second.  
 Odontoglossum, best specimen plant—W. A. Manda, first.  
 Oncidium, best specimen plant—W. A. Manda, first.  
 Phalaenopsis, best specimen plant—W. A. Manda, first.  
 Vanda, best specimen plant—Lager & Hurrell, Summit, N. J., first.  
 Specimen orchid in flower other than above—W. A. Manda, first.

## Ferns.

*Adiantum Farleyense*, best specimen—James Marlborough, first; W. A. Manda, second; James Marlborough, third.

*Adiantum runcinatum*, best specimen—E. B. Dune, first; Gen. Barker, second.

*Aspidium*, best specimen—W. A. Manda, first.

*Chloium Schiedei*, best specimen—C. B. Newbold, first; Mrs. Frederick Ayer, second; W. A. Manda, third.

*Davallia*, best specimen—W. A. Manda, first; Wm. Thatcher, second.

*Nephrolepis exaltata* and varieties, best display, one of each, pots not to exceed eight inches in diameter—F. R. Pierson Co., Tarrytown, N. Y., first; W. A. Manda, second.

*Nephrolepis Bostoniensis*, best specimen—F. R. Pierson Co., first.

*Nephrolepis Scottii*, best specimen—F. R. Pierson Co., second.

*Nephrolepis Piersonii*, best specimen—F. R. Pierson Co., first.

*Nephrolepis Piersonii elegantissima*, best specimen—F. R. Pierson Co., first.

*Nephrolepis Whitmanii*, best specimen—F. R. Pierson Co., first.

*Nephrolepis*, any other variety, best specimen—F. R. Pierson Co., first; F. R. Pierson Co., second; Kossley Bros., New York, third.

*Polypodium*, best specimen—W. A. Manda, first; W. W. Edgar Co., second.

*Stag Horn Fern*, best six plants—W. A. Manda, first.

*Stag Horn Fern*, best specimen—W. A. Manda, first; Mrs. Frederick Ayer, second.

*Tree Fern*, best specimen—W. A. Manda, first; W. A. Manda, first.

*Fern*, any other variety, best specimen—W. A. Manda, first.

*Fern*, best specimen not in commerce—W. A. Manda, first; F. R. Pierson, second.

## Flowering Plants—Roses.

Best display in pots or tubs, any or all classes, to occupy not less than 300 square feet—Thomas Roland, first; M. H. Walsh, Woods Hole, second.

Best 12 climbing or rambling, six or more varieties—M. H. Walsh, first.

Best Lady Gay, specimen plant—M. H. Walsh, first.

Best Hiawatha, specimen plant—M. H. Walsh, first.

Best climbing, any other variety—M. H. Walsh, first.

Best Baby Rambler, crimson, six plants—Thomas Roland, first.

Best Baby Rambler, pink, six plants—Thomas Roland, first.

Best Baby Rambler, white, six plants—Thomas Roland, first.

Best collection of standard or tree roses, 12 or more plants, six or more varieties—Thomas Roland, first.

The judges wish to call attention to the special excellence of the total exhibits. The competition was so keen that there was little difference in quality and size between the first and second prize winners, and the exhibits of the roses at large were of a quality exceedingly even and close second to the best.

## Flowering Plants. Bulbs.

*Hyacinths*, best eight 10-inch pans distinct varieties—J. L. Smith, Swampscott, first; George Barker, Swampscott, second; Wm. Patterson, Wollaston, third.

*Hyacinths*, best three 10-inch pans white—W. C. Rust, Brookline, first; Wm. Patterson, second.

*Hyacinths*, best three 10-inch pans pink or red—W. C. Rust, first; Wm. Patterson, second.

*Hyacinths*, best three 10-inch pans light blue—W. C. Rust, first; Wm. Patterson, second.

*Hyacinths*, best three 10-inch pans dark blue—W. C. Rust, first; Wm. Patterson, second.

*Hyacinths*, best 50 single pots not less than 12 varieties—J. L. Smith, first; Wm. Patterson, second.

*Lilies*, best display to cover not less than 100 square feet. Foliage plants may be used for effective arrangement—J. McFarland, No. Easton, first; Peirce & Co., second.

*Narcissus*, large trumpet, 12-inch pans, 12 varieties—J. L. Smith, first; Wm. Patterson, second.

*Narcissus*, short or medium trumpet, best 12 10-inch pans, 12 varieties—J. L. Smith, first; Wm. Patterson, second.

*Narcissus*, best three 10-inch pans Glory of Leiden—Wm. Patterson, first.

*Narcissus*, best three 10-inch pans Bicolor or Victoria—Wm. Patterson, first.

*Narcissus*, best three 10-inch pans Empress—Wm. Patterson, first.

*Narcissus*, best three 10-inch pans, Golden Spire—Wm. Patterson, first.

*Narcissus*, best three 10-inch pans double—Wm. Patterson, first.

*Narcissus*, best three 10-inch pans, any other double—Wm. Patterson, first.

*Tulips*, early single, 12 10-inch pans distinct varieties—J. L. Smith, first; Wm. Patterson, second.

*Tulips*, early single, eight 10-inch pans distinct varieties—J. L. Smith, first; Wm. Patterson, second.

*Tulips*, early single, best three 10-inch pans white—Wm. Patterson, first.

*Tulips*, early single, best three 10-inch pans scarlet or crimson—J. L. Smith, first.

*Tulips*, early single, best three 10-inch pans pink—Wm. Patterson, first.

*Tulips*, early single, best three 10-inch pans yellow—Wm. Patterson, first.

*Tulips*, early double, best six 10-inch pans not less than three varieties—Wm. Patterson, second.

Miscellaneous bulbs, best collection arranged for effect to cover not less than 100 square feet—R. & J. Farquhar, first; Sidney Hoffman, second.

The judges were so deeply impressed with the beauty and artistic arrangement of the first prize exhibit that they earnestly recommended the additional award of a gold medal.

One specimen bulbous plant in flower other than above—T. T. Watt, first. The judges were specially attracted by the cutty in this class of *Narcissus* King Alfred and would recommend a reward of a certificate of merit.

## National Association of Gardeners.

*Carnations*, six varieties, 10 blooms each, F. R. Pierson cup—Wm. Kleinheinz, first; John H. Dodds, second.

*Carnations*, three varieties, 10 blooms each, Alpine Manufacturing Co. prize—Abram Wynne (W. W. Heroy, grower), first; Thos. Aitchison, second.

*Carnations*, best seedling, Robert Cart cup—Wm. Kleinheinz, first; Abram Wynne, second.

W. Atlee Burpee

President Sweet Pea Society of America.

*Gardenia*, best 12 blooms, Gould Chemical Co. cup—C. B. Newbold, first; Henry Seigel, Maumrock, N. Y., second.

*Roses*, American Beauty, best 12 blooms, Hitchings & Co. cup—Wm. Kleinheinz, first.

*Roses*, four varieties, 12 blooms each—Alpine Manufacturing Co. prize—Wm. Kleinheinz, first.

*Roses*, best 12 blooms pink, Boddick & Atkins cup—James Stewart, second.

*Roses*, white, 12 blooms—James Stewart, first.

Best six foliage plants in pots for table decoration—Wm. Kleinheinz, first.

*Orchids*, best specimen cattleya, Julius Roehrs Co. cup—Donald McKenzie, first.

*Orchids*, best specimen in bloom except cattleya, Lager & Hurrell cup—John H. Dodds, first.

Sweet peas, best mixed vase, Old Farm Hotel cup—Wm. Kleinheinz, first.

*Cineraria stellata*, best three plants, Pierson Bar cup—Clement Newbold, first; John H. Dodds, second.

*Cineraria* hybrids, best three plants, Ellwanger & Barry cup—Wm. Robertson, first.

*Primula obconica*, best six plants, H. F. Mitchell Co. cup—C. B. Newbold, first; W. F. Rich, second; John H. Dodds, third.

*Cyclamen*, best six plants, W. & T. Smith Co. cup—John H. Dodds, first.

*Violets*, best 100 blooms, single, Association cup—Henry Darling, first.

Stocks, best vase, Association cup—Abram Wynne, first.

Best display cut flowers of bulbous or tuberous plants, Peter Henderson cup—Wm. Kleinheinz, first.

Best flowering plant, Alpine Manufacturing Co. cup—C. B. Newbold, first.

Best new or rare plant, Scott Bros. cup—John H. Dodds, first.

## Cut Flowers.

*Antirrhinum*, 12 white—James Marlborough, first; N. F. Comley, Lexington, second.

*Antirrhinum*, 12 yellow—T. E. Procter, first; N. F. Comley, second.

*Antirrhinum*, 12 red—T. E. Procter, first; N. F. Comley, second.

*Antirrhinum*, 12 pink—W. T. Walke, Salem, first; S. J. Goddard, Framingham, second.

*Antirrhinum*, largest display—N. F. Comley, first; W. T. Walke, second.

Display of pansies—N. F. Comley, first; W. C. Ward, East Milton, second.

*Pansies*, 100 double—W. E. Turner, Woburn, first; W. C. Ward, second.

*Violets*, 100 double—P. S. Smiley, West Roxbury, first.

*Violet*, 100 single—William Sim, Cliftondale, first; E. J. Cummings, Woburn, second; Sidney Hoffman, third.

Display of violets—William Sim, first; Henry Penn, second.

*Mignonette*, 25 spikes—William Nicholson, first.

Stocks, display of cut blooms, not less than six vases—P. S. Smiley, first; S. J. Goddard, first; W. T. Walke, second.

Display of lilac blooms—J. W. McIntyre, Philadelphia, Pa., first.

Display of cut blooms of lily of the valley—John McFarland, first.

Display of bloom of marguerites—Pierce Bros., first.

## Roses.

Fifty American Beauty—Myers & Santman, Chestnut Hill, Pa., first; Bassett & Washburn, Chicago, second.

Fifty Killarney—A. Farnwald, Roslyn, Pa., first; Waban Rose Conservatories, Natick, second.

Fifty White Killarney—Waban Rose Conservatories, first; Peckham Bros. Co., Chicago, second.

Fifty Richmond—Edward Towell, Roslyn, Pa., first; A. Farnwald, second.

Fifty My Maryland—A. N. Pierson, Cromwell, Conn., first; Myers & Santman, second.

Fifty Mrs. Jardine—Robert Scott & Sons, Sharon Hill, Pa., first; J. Stephenson's Sons, Philadelphia, Pa., second.

Fifty Kaiserin Augusta Victoria—Robert Scott & Sons, first.

Fifty Mrs. Aaron Ward—Waban Rose Conservatories, first; W. H. Elliott, Boston, second.

Fifty Cardinal or Rhen-Rid—W. H. Elliott, first; Bassett & Washburn, second.

Twenty-five Killarney—L. A. Noe, first; Myer & Santman, second.

Twenty-five Killarney—J. R. Andre, first; A. Farnwald, second.

Twenty-five White Killarney—J. R. Andre, first; Peckham Bros. Co., second.

Twenty-five Richmond—E. Towell, first; J. W. Young, second.

Twenty-five My Maryland—J. W. Young, first; W. Geiger, second.

Twenty-five King—L. A. Noe, first; Pittsburgh Cut Flower Co., second.

Twenty-five Bridehead—Waban Rose Conservatories, first; L. A. Noe, second.

Fifty Bon Silence—W. H. Elliott, first.

Twenty-five any other dissiminated variety—W. Geiger, first; Exeter Rose Conservatories, second.

To S. J. Renter & Son, silver medal for Improved Double White Killarney. Certificate to Robert Scott for sport of Killarney; silver medal for Melody. Certificate to F. R. Pierson Co. for sport of White Killarney, scored 81 points. Certificate to Myers & Santman for Hilda, scored 81 points.

The Hitchings silver cup was won by the Waban Rose Conservatories with White Killarney. The King Construction Co. cup was awarded to E. Towell.

Certificates were awarded to A. N. Pierson Co. for Lady, scored 82 points; Guide Rose, 81 points; Dark Pink Killarney, 82 points.

## Carnations.

The carnation exhibits did not seem to be so numerous as in other years and many of the growers are of the opinion that the blooms are not of as good quality nor so perfect as would have been the case had the show been held in January. Due to the late date the exhibits seem to be of the highest type of perfection. The exhibits of Fred Burk of Pittsburgh, Pa., and Edward C. Williams of Chicago, Ill., of Washington and F. Dörner & Sons Co. of Lafayette, Ind., did not arrive in time to be judged for the judges to pass upon them. No doubt the failure of these large exhibitors to be able to stage their blooms was one great reason why the show did not appear as large as some of the exhibitions held by the American Carnation Society in previous years. Following are the awards:

Vase 100 blooms white—Cottage Gardens Co., Queens, N. Y., first; Patten & Co., Tewksbury, second; Littlefield & Wyman, North Abington, third.

Vase 100 blooms flesh pink—John Barr, Natick, first; Peter Fisher, Ellis, second; with May Day, S. J. Goddard, Framingham, third, with Pink Delight.

Vase 100 blooms light pink—John Barr, first; Joseph Heacock Co., Wyncote, Pa., second; Peter Fisher, third.

Vase 100 blooms dark pink—Cottage Gardens Co., first; Chas. Wobber, Lyubrook, N. Y., second.

Vase 100 blooms, red or scarlet—Patten & Co., first; with Beacon, S. J. Goddard, second; Peter Fisher, third.

Vase 100 blooms, crimson—W. D. Howard, Milford, first; with Harry Penn; Wanka Greenhouses, Barnveld, N. Y., second; James Wheeler, Natick, third.

Vase 100 blooms, yellow or yellow variegated—Patten & Co., first; with Hattie Starret.

Richard Vincent, Jr.  
Vice-President Society of American Florists.

George Asmus.  
President Society of American Florists.

W. F. Kasting.  
Treasurer Society of American Florists.

Robert Craig.  
Member of National Flower Show Committee.

Eugene Dailledouze.  
Judge.

H. B. Dorner.  
Secretary Society of American Florists.

Robt. Cameron.  
Member of Schedule Committee.

F. H. Traendly.  
Member National Flower Show Committee.  
SOME NATIONAL FLOWER SHOW WORKERS

James Wheeler.  
Judge

Vase of 100 blooms, white, variegated—Patten & Co. first, with Mrs. C. W. Barrow; Wanaka Greenhouses, second; John Barr, third.  
Fifty White Perfection—S. J. Goddard, first; Peter Fisher, second.

Fifty White Enchantress—Peter Fisher, first; Pierce Bros., second.

Fifty any other white—Patten & Co., first; William Nicholson, Framingham, second.

Fifty Pink Delight—Patten & Co., first; Peter Fisher, second.

Fifty any other flesh pink—Peter Fisher, first; Charles S. Strout, Biddeford, Me., second.

Fifty Rose Pink Enchantress—Pierce Bros., second.

Fifty Winsor—A. A. Pembroke, Beverly, first; Patten & Co., second.

Fifty Winsor—N. Comley, second.

Fifty Afterglow—William Nicholson, first.

Fifty any other dark pink—S. J. Goddard, first.

Fifty Victory—F. R. Pierson Co., first; C. S. Strout, second.

Fifty Beacon—John Barr, first; S. J. Goddard, second.

Fifty any other scarlet—L. E. Small, first.

Fifty Harry Penn—W. D. Howard, first.

Fifty any other crimson—Littlefield & Wyman, first; Patten & Co., second.

Fifty Mrs. M. A. Patten—William Nicholson, first.

Fifty any yellow variegated—Patten & Co., first; H. Schrade, Saratoga Springs, N. Y., second.

Fifty any white—Patten & Co., first.

Fifty five other—Patten & Co., first; Robert Main, second.

Twenty-five pink—Cottage Gardens, first; Henry Eichholz, Waynesboro, Pa., second; W. D. Howard, third.

Twenty-five red or scarlet—E. G. Hill Co., Richmond, Ind., first; William Kleinbein, Ogontz, Pa., second.

Twenty-five crimson or maroon—Samuel Kinder, Bristol, R. I., first.

Twenty-five any other color—Patten & Co., first.

Sweepstakes prize of above classes—Patten & Co., first and second; E. G. Hill Co., third.

Best 100 blooms, any variety—Patten & Co., first, gold medal; Peter Fisher, second, silver medal; Wanaka Greenhouses, third, bronze medal.

Preliminary certificate awarded William Kleinbein, Ogontz, for Miss Diaple Wilener, scoring 55 points.

Sweepstakes prize for best 100 blooms—Cottage Gardens Co., the Hitchings & Co., cup.

Best 100 Pink Delight—S. J. Goddard, the F. Dörner & Sons Co.'s special prize.

Twelve largest blooms—C. S. Strout, the Kroschell Bros. Co.'s prize.

One hundred blooms, Dorothy Gordon—S. J. Goddard, the Joseph Heacock Co.'s prize.

Fifty blooms, Conquest—N. F. Comley, second, Chicago Carnation Co.'s prize.

Fifty Shasta—Patten & Co., second, the Baur & Smith prize.

Fifty Scarlet Glow—L. E. Small, first, the F. Dörner & Sons Co.'s prize.

Fifty Dorothy Gordon—William Nicholson, first, the Joseph Heacock Co.'s prize.

Fifty Bon Ami—Patten & Co., first, the Geo. E. Buxton prize.

C. H. Potts of Madison, N. J., made an exhibit of plants and flowers of the fine white variety Wodenette.

#### Sweet Peas.

The baskets, dinner table decoration and the bride's bouquets of sweet peas were beautifully arranged and striking examples of the possibilities of this flower when placed in the hands of designers who are able to make the most artistic arrangements.

White, 100 blooms—William Sim, first.

Pink, 100 blooms—William Sim, first; Halifax Gardens Co., Halifax, Mass., second.

Pink and white, 100 blooms—William Sim, first; Halifax Gardens, second.

Light pink or salmon, 100 blooms—William Sim, first; Halifax Gardens, second.

Lavender, 100 blooms—William Sim, first.

Red or crimson, 100 blooms—William Sim, first.

Waved or variegated, 100 blooms—William Sim, first.

Any other color, 100 blooms—William Sim, first.

White, 50 blooms—William Sim, first.

Pink, 50 blooms—William Sim, first.

Pink and white, 50 blooms—William Sim, first.

Light pink or salmon, 50 blooms—William Sim, first; A. Zvolanek, second.

Red or crimson, 50 blooms—William Sim, first.

Yellow or primrose, 50 blooms—William Sim, first.

Blue or purple, 50 blooms—A. Zvolanek, first.

Any other color, 50 blooms—William Sim, first.

#### Retailer's Section.

Table decoration—Penn, the Florist, first; E. McMillen, second.

Basket of sweet peas—S. Hoffman, first; Boston Cut Flower Co., second.

Table Bouquet—Boston Cut Flower Co., first; Penn, second.

#### Special Prizes.

Eight or more varieties, 100 blooms each—W. Sim, first; Halifax Gardens, second; Zvolanek, first.

Ten or more varieties, 25 blooms each—W. Sim, first; Halifax Gardens, second; Zvolanek, first.

Display of not less than ten varieties, 50 blooms each—W. Sim, first; Halifax Gardens, second; A. T. Boddington prize.

Display of not less than 1000 blooms—William Sim, first; Lord & Burnham prize.

## American Rose Society

The Twelfth Annual Convention,  
Boston, Mass., March 27.

### The Opening Session.

The annual meeting of the American Rose Society convened at 2:30 P. M. March 27. President W. H. Elliott in the chair and with a good attendance of members.

President Elliott read his address, which was upon motion accepted and the recommendations therein adopted. Secretary Benjamin Hammond followed with his annual report, after which Treasurer H. O. May read his annual statement, which showed the finances of the society to be in good condition.

Upon President Elliott's recommendation to have a committee appointed to take up the question of tariff on glass, owing to the fact that prices fluctuate so much, a lengthy discussion ensued, participated in by A. Farenwald, August Poehlmann, Robert Simpson, Philip Breitmeyer, F. Burki, W. R. Pierson, C. Meehan and Irwin Bertermann. Finally the following committee was appointed: R. Simpson, F. Burki and B. Hammond.

The adoption of a universal naming of the grades of cut roses was taken up and discussed at length and on a motion by W. R. Pierson a committee was appointed to bring in recommendations for a standard of grades, the committee appointed being C. Meehan, H. O. May, Eber Holmes, F. Burki, Philip Breitmeyer, Otto G. Koenig, August Poehlmann, W. F. Kasting, W. F. Gude.

Secretary Hammond's suggestion about getting amateurs interested brought out a lengthy discussion, and upon motion a committee of three was appointed to bring in suggestions as to what is the best way to interest the amateurs so that they will become members of the society. The president appointed on such a committee, S. S. Butterfield, R. Simpson and B. Hammond. Adjournment then was made until 8 P. M.

### EVENING SESSION.

Monday evening the society again convened, President W. H. Elliott in the chair. On motion it was decided that this meeting should also take in the one proposed to be held on Tuesday morning, concluding the two meetings as scheduled in one.

The election of officers was then proceeded with and resulted as follows:

- A. Farenwald, president.
- P. Breitmeyer, vice-president.
- H. O. May, treasurer.
- B. Hammond, secretary.

The secretary and treasurer being re-elected. E. Holmes and W. R. Pierson were elected to the executive board, the latter to succeed himself.

Detroit was selected as the next meeting place in 1912.

F. R. Pierson gave notice that after the proper time had elapsed necessary for such a motion, he would move that members of the executive board who failed to be present at three consecutive meetings may be replaced by the president, that is, some other member of the society may be appointed to their place on the board.

August Poehlmann then read his paper and an interesting discussion on

transportation, soil, help problems, etc., took place, participated in by A. Farenwald, P. Breitmeyer and others.

Answering questions, Mr. Poehlmann said his firm used the express company for transportation, they employed 265 men, and had little difficulty with the help problem, while for soil, they bought farms whenever available, and thus secured new soil.

W. R. Pierson then read his paper, following which many questions were fired at him. A rising vote of thanks was tendered the two essayists.

Chas. Meehan, for the committee on adopting a name method for roses that would be universally understood, presented the method of naming the lengths of stem by inches as 6-inch, 9-inch, 12-inch, 15-inch, 18-inch, 24-inch, etc., in lieu of the present diverse names such as ones, twos, extras, specials, etc. After some discussion the method presented by the committee was adopted as the standard one by this society. The meeting then adjourned.

### CLOSING SESSION

Upon reconvening with President Elliott in the chair the attendance was large, and the president announced that the meeting had been planned with the express purpose of making it interesting to the amateurs and then introduced Richard Vincent Jr., who read a paper upon his trip to the Brussels exhibition. The secretary then announced that he had received word from the Rev. S. S. Sulliger that he would be unable to be present, but had forwarded his paper, which was read by Secretary Hammond. G. W. McKendrick was also unable to attend and his paper was read by President Elliott.

### President Elliott's Address.

The floral queen has called her subjects to convene in Boston once more. This is our twelfth annual convention and the third that has been held in this city. I am glad to welcome the American Rose Society, and all lovers of the rose, to Boston at this time. This meeting is under different conditions to what we have ever met before. We hope this will prove satisfactory to all who are attending the joining in with the great work that we are here carrying on. It is a great thing to get together in this way and show the people what floriculture really means at the present time. This is certainly a great exhibition. We have admired its beauties and the enterprise of the producers of the various lines exhibited here. The carnation, the orchid and the violet are contending for an advanced position, but no matter how strenuously the devotees of these various flowers may push forward their carnation, orchid or Dutch bulbs we can feel assured that the rose will always lead, as it has from the first, and Boston can feel proud when she remembers that forty years ago the commercial flower business was here born. The mother of that business was the old Bon Silene, which stands proudly in our exhibition today and can feel proud, not only of her history, but of the fact that she pays just as well today as any of the newer and larger varieties. We are proud of our city; not because the commercial floriculture was born here, but for what we have done in all lines of horticulture and I think we can safely say

that Boston still leads in the line of ornamental horticulture.

The progress of our society has not always been satisfactory in regard to membership and finance. Our membership seems very small when we read of the great Amateur Rose Society of England. We will hear an account of the great work it is doing from our members, who are to address us at our amateur rose meeting on Tuesday afternoon. It is a question as to how any society which is partly amateur and partly commercial can succeed along both lines. As far as I know those societies making the great success across the water are purely amateur. We have always endeavored to develop the amateur side of our society, as well as the commercial. I hope that our amateur rose meeting here may be the beginning of an advancement of that branch of our society. I have found that the commercial rose grower always takes more interest in the amateur side of our society as he becomes more familiar with its general work and the aim and object of our society.

From a commercial standpoint our exhibitions in the past have been very successful. The attendance and the general financial results have not always been so satisfactory. Our present exhibition is the first that we have ever had under these conditions in connection with the other societies. In the future I should recommend that exhibitions be held under the guarantee plan, as is being done with this show. There are enough rose growers to put up a guarantee fund to finance the exhibition in some leading city where admission could be charged to the public and the society be in a position to pay its way. With the success of our national exhibitions a guarantee fund could be produced without any trouble. I believe exhibitions that would interest the amateur and the commercial rose grower could be made to pay.

Never before has there been such a large number of new varieties of roses offered for our trial. All these varieties should be tried out thoroughly, but one grower cannot undertake to try out the whole number. He will select what looks best to him, labor with those with the usual uncertain success. Let us hope, however, that these wonders of beauty and productivity will largely increase the profits to all experimenters. The careful, arduous work that hybridizers have done for us certainly deserves our support.

Greenhouse building has gone ahead at the usual rate. Some new places of great promise have been added to our list and many additions made to the old. There seems to be no lack of enterprise among the growers in this line of work. What is going to be the effect and what will be the outcome of this low price of glass? It looks as if there would be as much greenhouse building done in the next year as has been done in the past five years. With this increase of glass it will bring a very large immediate increase of stock. What the effect of this production on the prices will be we do not know, but there seems to be some danger that the low price of glass may do us more harm than good. Is our supply really nearing our demand? Can we go ahead with safety

W. H. Elliott.  
President American Rose Society.

A. Farenwald.  
Vice-President of the American Rose Society.

Judge.

Otto G. Koenig.  
Judge.

SOME NATIONAL FLOWER SHOW WORKERS.

with such tremendous amounts of building? It seems a question that should be considered at the present time.

Now is the time for our society, and kindred societies, to use their influence in regard to tariff rates. The tariff on glass has always been an unreasonable burden on the greenhouse men. The great variations on the price during the past year has been such that upsets the glass business and the greenhouse business as well. Before our convention closes I would like to see a committee appointed to take up the matter of influencing congress on this matter. Do not think that because the price of glass is low at the present time that it is going to remain so.

A good many years ago, soon after the Society of American Florists was started, they took up the matter of standard pots and they settled it in such a satisfactory manner that no trouble has developed on that score since. A standard length or grade of cut flowers, with names that would have some definite meaning that could be understood by all, would be of great deal more benefit to the trade than standard measurement of pots has ever been. It seems strange, when the matter would be so simple, that no standard of grading or naming of the different grades of roses has ever been adopted. When one goes to New York they inquire what number ones sell for in Boston and what we get for fancies. It is just as clear as mud to the Boston grower. Why should roses be called firsts, seconds and thirds, A, B, C, fancies or extras, when it is just as easy to call them by their right names, so that everybody would understand. We have a nomenclature committee on roses and that sort of thing, yet we have no system of naming the different grades of roses under which any florist can send to another city and have any definite idea what he will receive. The names of these different grades refer only to the length of stem, no two cities using the same names for the different grades, and in the same cities hardly any two grading the same way. One florist's number twos may be longer than the other florist's number ones. It certainly is no more trouble, in ordering roses to mention 15 inch Killarney than it is to say "special Killarney," and it would be much more simple and systematic to write such orders. Why could we not call these roses by the length of stem, 9-inch, 12-inch, 15-inch, 18-inch, 21-inch and 24-inch and so on, that anyone can understand and that anyone may use and can also tell if he receives what he has ordered. I have used this kind of a system for the past two years and it has proved very satisfactory. I would like to have a committee appointed to take up this matter and report at our Tuesday morning meeting, under miscellaneous business.

#### Secretary Hammond's Report.

This exhibition makes the twelfth annual rose show held by the American Rose Society, and when a society has lived and prospered for twelve years there must certainly be elements of interest in its make-up of general service, or it would not have thrived. The society has gradually accumulated an invested fund of over \$3,000, it owes no man anything which it cannot pay.

It's annual report is looked for and sought far and wide. It's representatives, accredited to the general horticultural or floral assemblies of other nations are received with favor. It counts among its members men with national reputations, as growers of the finest and most cherished of the flower kingdom, the rose, the flower which has the highest place in poetry and sentiment among all the blossoms of the earth. This is no mean force, this appreciation by all civilized mankind of this flower, second to none. The rose, in variety is innumerable, yet always known as the one great flower universally admired, and this society aims to increase its popularity.

The medals of the society are comparatively inexpensive, but sought and highly prized. The secretary would like to make a suggestion or two, one of which is, that hereafter, our medals be provided with a suitable case. This has not been previously done. Another matter is this, the increasing need of some way to get into touch with an amateur membership. Here we are lacking. The subject has been touched upon, and its importance recognized, that is a quarterly issue of a journal to go into the hands especially of amateurs or home gardeners, something that is exclusively devoted to the society and its membership. Until this is done, one aim of the society, I fear, will not be reached. We ought to count our membership by thousands, but we do not.

The past year, we have not had as many meetings as usual in committee or otherwise. It seems to me as though the Rose Society should be more in evidence than we are. The trade papers certainly do everything they can to boom the society, but somehow our membership does not enlarge as it should. Our annual meetings, hitherto, have been held in choice places—Boston the center of culture always gives us a fine welcome, and the show, which is here today is one that all the people may enjoy. But, for one, I would like to see the American Rose Society extend its popularity, so that it may become a living reality. "A rose for every home, and a bush for every garden." This spring meeting is a combination effort which it will remain to be seen whether it be not better to hold, and to have a combination exhibition rather than one solely of a class. We want to have all the support possible as an organization. Our program, which you all have, makes plain the scope of our work. The Rev. Dr. S. S. Sulliger, of Vancouver, Washington, who presents in a paper of much interest, his account of a visit to the National Rose Society of England, is not able to be present, owing to family affliction. We ask a large general attendance to all our meetings.

#### Treasurer May's Report.

The following is a brief of Treasurer May's report:

|               |            |
|---------------|------------|
| Receipts      | \$7,785.00 |
| Disbursements | 7,277.01   |
| Balance       | \$ 487.99  |

There are 61 life memberships.

HOLLAND, MICH. — The Berrydale Experiment Gardens are having a heavy run on their new Himalaya Berry plants. Contracts have been made for all their Gladiolus America for both fall and spring 1912 delivery. They report there is room for other growers to produce more of America.

#### Developing a Modern Rose Establishment.

Paper read before the American Rose Society by August Pochmann of Chicago at Boston, Mass., March 27, 1911.

In compliance with a wish expressed by our worthy president, W. H. Elliott, and vice-president, A. Fahrenwald, I have prepared a paper on the "Development of an Up-to-Date Rose Growing Establishment," which, I believe, will also apply to other interests. I can't quite understand why I was selected, but I have an idea the gentlemen referred to, know its one of my short suits. In deference therefore, to those present, I will confine myself to a few brief remarks, touching the subject in a general way. The development of any business depends not only on one or two things, but upon a happy combination of conditions properly applied. Classified, I would say, under the following factors: ability, integrity, demand and locality and environments.

Classed separately I would say, ability means able to accomplish, to build, to grow good stock, to manage well, to anticipate and have power to do. As a rule most large up-to-date rose growing establishments of the present day began business in a very small way. Spurred on by initial success, the earnings were reinvested from time to time to provide for the increasing demand of its product. It becomes second nature then to plan extensions and improvements, which in regular course create new heads. Responsibility is shifted. The work becomes more specific, each head a specialist. This system is general throughout, therefore, on ability to do, depends much the ability to supply demand. Ability to discern the value of new varieties by previous knowledge of parents or otherwise and anticipate demand for same can properly be included under this head. Good stock creates demand, necessitating increase in output, demanding more labor, skilled and unskilled, labor saving machinery, new materials, etc. Thus one may say that the development depends principally upon the demand, which in turn is fostered by necessity. The demands of a growing or rapidly developing business can only be temporarily satisfied. Likewise, so do the personal demands increase.

Under integrity would come, maintained credit, good will, honest administration, efficient labor, confidence, and credit of customers, integrity of purpose.

Locality and environment cover transportation facilities, nearness of markets for certain commodities used extensively, prompt and efficient service to customers, labor requirements, homes, water, soil, manure, and coal supplies.

Natural advantages must be taken into serious account when building is contemplated. An unfailing water supply is absolutely necessary, suitable soil, plenty of it for years to come, must be provided for. Coal must be easy to obtain at fair prices. The markets for the sale of goods close at hand, rapid transportation is desirable at all times, not only for the distributing of stock and to facilitate purchasing, but it is a material aid in providing necessary help. All these various matters require careful working out, and each is an essential cog in the wheel which make for the successful development of the business.

SOME NATIONAL FLOWER SHOW WORKERS.

An up-to-date rose growing establishment includes in its make up, rose growers, steam fitters, painters, teamsters, blacksmiths, firemen, book-keepers, stenographers, temperance men, engineers, carpenters, glaziers, packers, salesmen, laborers, and what not,—and the money to pay for their combined efforts must come from the product.

### The Science of Growing Roses.

Paper read by Wallace R. Pierson of Cromwell, Conn., before the American Rose Society at Boston, Mass., March 27, 1913.

Upon receipt of the invitation from your society to speak upon this subject I had an interview with Webster's Dictionary to find out just exactly what science means, and upon learning that science, as applied to the subject at hand, means the assemblage of the general principles of rose growing, I accepted the invitation, for the word had lost much of its dread, and I felt much as the Yale student did, according to the story so often told. This student was to take an examination in Bible history, and he came to the conclusion that he ought to learn the names of the kings of Israel, and thus be prepared for the coming examination. Imagine his surprise when he was asked to criticize the acts of Moses. After thinking the matter over he wrote as follows, and his answer was enough to pass him in his examination: "Far be it for one as humble as I to criticize the acts of a great man like Moses, but if you want to know the names of the kings of Israel, here they are." And he wrote out the list he had so carefully learned. So I am availing myself of the chance to present to you a collection of the general principles of rose growing, and trust that in doing so I may carry out the instructions of our president who has asked me to bring before you certain subjects which are in dispute, and to give my opinion regarding these points in the hopes that an interesting and profitable discussion may arise therefrom.

The method of growing roses to-day is built upon the knowledge that has been gained in the past by experience, and many times the lessons have been costly, but it is by mistakes that we learn, and by observing the self-evident disclosures that nature makes we can profit. In considering first the question of soil I want to quote to you a little of what is now ancient history; information that has been handed down to me, because these points were observed before my day as a rose grower. About 25 years ago we were using almost entirely soil from uplands that had a clay body, but contained some lighter elements. This, composted with manure, was our rose soil. One year part of the place was planted with soil taken from the lowlands, where at times there was standing water. This lowland soil produced better roses than we were getting from the same varieties, under the same treatment, when the upland soil was used. The variation was so marked, and so strikingly in favor of this lowland soil, that we believe it is far better suited to roses than the upland soil. It is true that our wild native roses exist on uplands, but the rank, strong-growing wild roses are always to be found in swamps or in low, marshy land. These same lowlands, through the wash from the surface of the soil in years past have accumulated a richness and character

that is not found in soil at higher levels.

At about the same time we were trying to combat club root, which is caused by eel worm, and the noticeable fact that the eel worm did not exist in soil that at some time in the year was under water, had much to do with our selection of lowland soil for roses. The eel worm had also another influence which has been far reaching in its effect, and brings up the proposition of young stock, which is one of the most serious importance. At this time we were growing La France, and running short of enough to fill a house of own root plants of the variety, enough imported grafted plants were purchased to fill the house. The eel worm attacked part of the own root plants, but the grafted plants were not affected at all, although the own root plants adjoining them were affected. The best and strongest growth we have ever been able to get, and the greatest producing plants, were the grafted plants in that house of La France. The lesson was plain. We grafted our Bride and Bridesmaid, and since then we have been grafting roses. Own root plants are grown only occasionally as a check on the grafted, and in every case the grafted have given us increased production with a corresponding increase in revenue. In some cases two full crops have been cut from grafted plants before those on their own roots have attained sufficient size to throw a crop of salable flowers. There are, however, a few exceptions, and the noticeable exceptions are Perle, Sunrise and American Beauty. And speaking of grafted plants, there are several points worthy of mention before we pass over the subject. The old method of gauging the value of a plant by the size of the pot which contains the roots has little worth, and deservedly, for the reason that a well-nourished and properly grown plant in a 24-inch pot can be the equal, or the superior, of a plant poorly nourished that has been forced into a 3-inch pot before the shift is necessary, and this same rule applies to plants on their own roots. Make your plants strong and sturdy, with plenty of root action, and do not shift too soon. Get the size and growth in the small pots, and if you are shipping plants, save the buyer from paying express charges on surplus soil.

Be sure of your union of scion and stock, and with the increase in the planting of varieties having hybrid blood in them, with a tendency to sluggishness in midwinter, a safe way to get good unions is to graft when the sap flows freely. Graft such varieties as My Maryland and Prince de Bulgarie early in the season, or wait until later in the year, when with the warm weather and more sun the sap begins to flow normally. Keep above the wood with black thorns, for that wood seldom has the right amount of sap, and seldom makes a good union. If the above named varieties were grafted when the wood was right there would be less heard about this type of rose doing better on their own roots than they do as grafted plants. A plant that is properly grafted, and with a perfect union, will live just as long and do more business than an own root plant, and the fact that those who are the best growers in this country are grafting roses because it pays them is

a proof of the assertion I make, and I am willing to allow the own root advocates all the bottom breaks they can get from their own root plants, but I have yet to see as many bottom breaks per plant in an own root house as we had last year in a carried over house of grafted Killarneys.

Leaving then the discussion of plants, let us return to the soil, and the preparation of a house for planting. We try to lay composts in the winter for many reasons, one of which is the ground is frozen, and we can get our soil out from the lowlands better on frozen ground, the soil having been plowed into ridges in the fall, and another reason is that in the winter we can secure cow manure to compost with the soil, and can at that time lay our compost within easy reach of the houses that are to need it later. As soon as the frost is out, we cut this soil over, mixing the manure with it, which hastens the decomposition of the vegetable matter in the turf, and when ready to fill the houses we use a two-horse cutaway harrow to pulverize the soil, at this time adding bone meal, or rather a bone tankage, in the proportion of a pound of bone meal to each cubic foot of soil, or as near that as we can. I am aware of the fact that many do not use bone, and had our results been confined to an experience with one certain grade of bone, we should not be using bone, as this bone I would state was 30 per cent phosphoric acid according to analysis, with no nitrogen. This phosphoric acid was not available, and the results were no better than had so much lime been added to the soil. In time perhaps, such a bone might have returned interest on the money, but it seemed to prove the old farmer's statement that the man who can afford to use bone should do so, as he is preparing the land for his grandchildren. However, a bone tankage with available phosphoric acid, and some nitrogen, will show results, and mulching young stock in small pots will soon prove this if my assertion is doubted. And I might add that part of our success in producing large, strong plants from 24-inch pots has been due to mulching each individual plant with a mixture of soil and bone. One thing to be sure of in planting is that the union is covered, and often this is a problem when shallow rose benches are used, but to insure bottom canes, and to protect the plant from breakage, the union must be covered, and for that reason we graft our stocks as close to the pot as possible. Given then a good plant, well established and growing, and a compost of lowland soil with one-third cow manure that has been pulverized, and after adding bone tankage in the proportion of one pound to the cubic foot, we have two of the essentials that are necessary to good rose growing.

I wish now to take up the consideration of solid beds and benches as a very important essential in rose growing, and you will note that I am leaving the consideration of the house entirely out of it, for good roses can be grown in any house that has sun and air, although for economy in handling the large houses are to be preferred. There are two methods of preparing a house, one is to build wooden or cement benches, and the other to construct solid beds, and the purpose for which these are to be used at other times, for

LAURELS ON THE HUNNEWELL ESTATE, WELLESLEY MASS.

if they are not to be used all of the year for growing roses for cut flowers has much to do with coming to a decision as to which to put in. Wooden benches we believe to be absolutely essential for young plants in small pots. The root action is better, and the convenience of handling is a desirable qualification, but for the commercial production of cut roses a solid bed is, in my opinion, to be preferred, and we are using it almost exclusively. Our method of constructing a solid bed may be of interest to some. Our sub-soil is a clay, and impervious to water to any extent, and thus devoid of drainage. We make the sides of our beds of cypress plank or of cement, and these sides are 14 inches high above the level of the ground. We cut into the clay sub-soil, leaving the bottom V-shaped, and in this trench lay a 2 or 2½-inch common land tile, according to the length of the bed, with a sod over each union. These tiles drain to cross tiles, which are the outlets. We then fill the bed with coarse gravel to within eight inches of the top of the boards or cement. They are then ready for our soil, which is prepared as I have described. We use six inches of soil, and the two inches left between the top of the plank and the soil will allow for watering and mulching the beds from time to time. Good drainage is assured, and good drainage means air in the soil, for air is essential to root formation.

Given, then, a good plant, well established and growing, and a solid bed

such as I have described there are two methods in use to build up a plant before beginning to cut. One of these is to pinch all the new canes soft, and the other method is to allow these canes to mature and then to cut back to a good length when the bud shows color. Of the two methods the latter seems more satisfactory, as a plant is built lower, and the breaks will come stronger. The question of how many cutting leads a plant should carry is important. Too much wood, and too many shoots, often means small flowers, and the number of leads can be controlled by taking out the weaker, leaving six or seven to each plant. This does not mean six or seven bottom canes, but that number of growths which will produce flowers, and seven flowers per plant per crop is enough to insure a paying proposition, and a good quality of bloom.

Having covered the subject up to the mature plant in the bench, or bed, the next feature to consider is cropping or continuous cutting. Two ways are open, and there is a question as to which is to be preferred. By cutting back or pinching soft a bench of plants can be brought into crop as a whole, or by pinching one shoot per week on each plant so far as is practicable, the crop can be made continuous. For a holiday it is sometimes preferable to crop a section, or a bench, but for steady trade the continuous crop seems to be preferred. The plant never gets the severe check that cutting off an entire crop will give it, and the returns

may be ahead at the end of the season. In this case the treatment will be different, and the extremes of watering will need to be avoided.

Watering is also one of the essentials, and the use of water, or the failure to use it, has changed the output of many sections of rose houses. The rule is water sparingly when wholly off crop, and water at least three times per week, and when the plants are coming into crop always water thoroughly, but remember that if a bench is cropped, when you cut from the top the root action suffers correspondingly, and with less foliage less water should be given. Air is essential to root formation. Did you ever notice that the largest root a plant has is the one that comes out of the hole in the pot? And that the largest roots are nearest the edge? Air with sufficient moisture seems to be the reason for this. Thus, by withholding water when plants are off crop the new roots get a chance, and the new crop comes strong and heavy, and when it does come, feed it, and above all things water it. Liquid manure with some muriate of potash and nitrate of soda will help, but care in using these is essential because they are dangerous things in the hands of incompetent help.

For roses that are to be left in year after year there is nothing better than the solid bed and a thorough drying out in the summer before cutting back, and the question of how much to cut back a plant is important. Cut no more than is absolutely necessary if

your plant has not been thoroughly rested. Never dry a plant so the wood will shrivel, and do not try to lift plants to replant from solid beds unless they have been thoroughly dried out. As a rule roses lift better for replanting from benches than they do from solid beds, as in solid beds the roots are deeper. The question of removing the soil from the top of a bed after drying it out is one that is of interest, and I firmly believe that taking off soil, except that which has been washed to the center of the bed and is loose, is unnecessary work and labor wasted.

To be a successful rose grower is not all there is to being a successful florist, for there is the business side to consider, and the retailers must be taken care of, and that means a steady supply of such stock as he may need. Not all of the money in roses is made during midwinter and the spring months. We have a long summer when good roses are in demand, and the market usually supplied with poor stock at that time. How to remedy this has been a problem until the coming of new varieties, which have their places just as assuredly as Killarney has its place. Should we put ourselves in the places of the retailers and dictate what we should grow, it would not be all Killarney and White Killarney. The early planting of other varieties that have their strong points in spring, summer and fall will tide over the situation, and the returns will be found very satisfactory. To cite only one case, and that is My Maryland, 5,700 plants produced 120,000 bloom during July and August of this last year, and made a creditable showing the balance of the year. Without these flowers we should have been almost without roses, and have disappointed not only our customers, but their customers, who love the beautiful, and whose love for the beautiful has made the florist business what it is to-day. Give them novelty; give them variety; and the reward of increased business is sure to follow.

#### Ladies' Society of American Florists.

The Ladies' Society of American Florists had a very busy week, their headquarters was one of the crowded centers during exhibition hours. They held a business meeting March 27; on March 28 an auto ride through the park system was taken. On the afternoon of March 29 a theater party at the Boston theater was a feature. On Thursday, March 30, a trolley ride was had through Concord and Lexington and on Friday Mrs. W. H. Elliott entertained the entire body of ladies with a splendid reception at her residence at Brighton.

FLUSHING, N. Y.—Harry Turner, the florist for Howard Gould, has returned from a visit abroad.

WARREN, O.—Amasa T. Hoyt, who for fifty years had conducted a florist business here, was found dead in bed March 20. He had been in failing health for some weeks.

MINNEAPOLIS, MINN.—The growers and florists at a meeting held March 16 agreed to help in growing the different flowers required for planting in preparation for the civic celebration. It is estimated that 10,000,000 plants will be required in beautifying the city. The nasturtium has been selected as the official flower of the city.

## American Carnation Society

The Twentieth Annual Convention,  
Boston, Mass., March 28.

### The Business Meeting.

The American Carnation Society met Tuesday, March 28, being called to order at 8 o'clock in the evening. Ex-President M. A. Patten introduced to the members in attendance President Fred Burki, who proceeded to read his address, following which Secretary Baur and Treasurer Dornier read their respective reports. The secretary then read the report of the nomenclature committee, which thoroughly explained the great amount of work that was being done, but also stated that in order to complete the work there was much more yet to be done and the report was accepted. A letter from W. N. Rudd, tendering his resignation as judge, was read by the secretary and the same was accepted with regrets.

The nominations for officers being in order J. A. Valentine was nominated for president, Philip Breitmeyer for vice-president, and the present incumbents for secretary and treasurer.

The members of the party of British horticultural traders being present J. S. Brunton, C. Englemann and W. E. Wallace were called upon and addressed the meeting, all expressing their great appreciation for the hospitality which they had received since their arrival upon this side of the Atlantic Ocean. Mr. Englemann spoke of the varieties of carnations which were being grown successfully in England, stating that the Enchantress family had proved to be the best of all with them. Mr. Wallace in his remarks paid tribute to the three ladies so well known in carnation circles here, the Misses Hill, Dornier and Nicholson, and wondered what was the matter with the young men on this side of the water. A vote of thanks was then tendered the British visitors.

Philip Breitmeyer, in behalf of the city of Detroit and the florists of that city, extended an invitation to the society to hold the convention in 1912 in Detroit. The meeting then adjourned.

### ELECTION OF OFFICERS.

The society at the meeting held March 29 elected the following officers:

Philip Breitmeyer, vice-president.  
A. F. J. Baur, secretary.  
Fred E. Dornier, treasurer.  
Eugene Dailledouze, director.  
C. E. Stroud and William Nicholson, judges.

C. W. Johnson was elected judge to fill the unexpired term of W. N. Rudd, resigned.

Detroit was selected as the next place of meeting, the date to be the fourth Wednesday in January, 1912.

### President Burki's Address.

Permit me to share in the welcome of this twentieth convention of this very useful and prosperous society. I wish most heartily to express my appreciation of the work done by the members, who have worked so faithfully for the success of this meeting and exhibition, and we jointly also should show our appreciation and recognize the untiring efforts of our worthy Vice-President Pierce and our able Secretary Baur.

Boston, the recognized center of horticulture, has acted as our host sev-

eral times before; it is a pleasure to have the privilege of being here again, and I trust this meeting will be the best and most successful convention that we have ever had. "The premiums offered at this convention are more liberal than any of our former exhibitions; this is on account of us joining with this great flower show. Any person who has felt he was unable to come to this convention or felt that he was not financially able to attend this, "the greatest of all our flower shows," has lost much in knowledge, and he should have our sympathy.

There are but few recommendations that I have to offer, as the ground has been well covered by our former president. The most important matter that I wish you to consider is this: "The Society's scale of points for judging our exhibits." I especially refer to the seedlings or coming new varieties. It appears that we must rely on getting new varieties to take the place of those which we term "Standards" now grown. These seem to lose vigor in a few years under our present treatment. If we are going to keep up the popularity of the carnation, we must give more consideration to the keeping qualities which to my understanding would mean substance. For fragrance we only allow five points, just as if it did not count at all. Should we not require fifteen points for each of these, color, size, substance and fragrance, and ten points each for calyx and form, and twenty points for stem, making a total of 100 points? This scale to my judgment would be more uniform than the present percentage on which our judging has heretofore been made. I recommend the appointment of a committee to take up the matter of judging, and to consider the scale of points, on the percentage which I have just mentioned.

Is it not true that the carnation was made by the people the popular flower on account of its fragrance, keeping quality and comparatively reasonable price, compared with the rose? I may add that some of our most prominent retailers care to handle but very few carnations. In fact, they say that they would rather not handle them at all on account of the many complaints they receive, that the carnation blooms which they sold to their customers had gone to sleep on the day they were purchased. We should give this matter our serious consideration, for the buyer of carnation blooms has a right to expect in them both fragrance and keeping qualities. It is too bad that we have been getting away from this in most of our present day varieties.

Now that we have a Carnation Society button we want to carry out the recommendation of our former President Albert M. Herr, and that each member greet and welcome anyone wearing the button, and also constitute himself a committee of one, to secure new members to this society. Again I wish to thank the members of this society who worked so diligently for the success of this meeting and exhibition, and for the successful meeting held in my home city, Pittsburgh, last year.

### Treasurer Dornier's Report.

The following is Treasurer Dornier's report:

| EXPENDITURES.                            |            |
|------------------------------------------|------------|
| Paid orders on treasurer.....            | \$ 990.65  |
| Balance cash on hand March 24, 1911..... | 1,107.47   |
|                                          | \$2,098.12 |
| RECEIPTS.                                |            |
| Balance cash, January 24, 1910.....      | \$ 283.68  |
| Cash received from secretary.....        | 1,687.15   |
| Cash received, interest.....             | 127.29     |
|                                          | \$2,098.12 |
| PERMANENT FUND.                          |            |
| Reported January 24, 1910.....           | \$2,425.31 |
| Life membership, F. Burki.....           | 50.00      |
|                                          | \$2,475.31 |

Fred. Burki.  
President American Carnation Society.

Fred E. Dorner.  
Treasurer American Carnation Society.

A. F. J. Baur.  
Secretary American Carnation Society.

I. S. Hendrickson.  
President American Gladiolus Society.

L. Merton Gage.  
Secretary American Gladiolus Society.

Joseph H. Hill.  
Judge.

William Duckham.  
Judge.

Harry A. Bunyard.  
Secretary Sweet Pea Society of America.  
SOME NATIONAL FLOWER SHOW WORKERS.

Charles H. Totty.  
Judge.

### Florists' Telegraph Delivery.

The meeting of the Florists' Telegraph Delivery was called to order at 10:30 A. M. Wednesday, March 29, by President J. A. Valentine. They considered the ways and means of strengthening and obtaining a large membership. The members are to subscribe to and build up a guaranty fund, and then there will be an assurance that the payment for orders received by telegraph will be secure.

### Credits and Collections.

Paper read by President J. A. Valentine before the Florists' Telegraph Delivery Association at Boston, Mass.

In presenting to you this hastily prepared paper I wish to state that while the words are mine the paper is prepared from notes furnished me for that purpose by the secretary of our company, Miss Page, who has for years acted as our "credit man" in charge of accounts and collections. If the inner history of retail florists could be known, I firmly believe that it would show an astonishing number of failures due to the careless extending of credits and slovenly methods of collecting. Doubtless others have had problems to contend with that have not confronted us, and I hope that in the discussion on this paper many helpful points will be brought out.

In my opinion many florists make the mistake of being timid about asking a man for references when he wishes to open a charge account. This is all wrong and it is hard to see why any such attitude should have become at all common. The man who goes to the bank to borrow money expects to thoroughly satisfy the bank on all points concerning his capital, his credits and his antecedents. The florist's transactions are smaller, but it is just as essential for him as for the bank to see that credits are not extended to people who will not pay. If the customer has good credit he is generally glad to prove it to you; and if he gets indignant over your courteous inquiries it is pretty safe to assume that he is one of the numerous gentry whose capital consists of gall and a good front.

In our establishment we get all the information we can but when none is obtainable we are inclined to be fairly liberal in extending credit for small amounts but we follow up the collections very closely. During office hours all such matters are referred to the credit clerk, but salesmen are allowed some discretion in the early morning and in the evening. If the credit clerk has no record of a customer, the Retail Credit Men's Association, a local organization of which we are a member, and which includes about two hundred retail merchants, is called on the 'phone and asked in regard to the customer's rating. If they have no record of him, we then obtain what information we can as to the customer's residence, business connection, etc., from the city and telephone directories, and if the information obtained from these sources looks fairly favorable and the amount involved does not exceed three or four dollars, the charge is allowed to go through; otherwise, unless we can get the customer on the 'phone and get a satisfactory reference from him, the goods are sent C. O. D. If the flowers ordered are for a gift, and the amount is not large, we take the chance and fill the order. We have found that there can be no cast-iron rule in regard to these matters, but each

case is determined by the circumstances and the information obtained. Oftentimes on busy days charges to entire strangers and people concerning whom we can get no information will slip through; but the results of sixteen years of this policy have led us to think it is better to risk an occasional loss than to offend or turn away people who might otherwise become good customers.

Our office record is kept as follows: When charges to new customers come into the office, their names, together with such information as we can get concerning them, is entered on a card. This is a 4x6 card printed so as to allow the following information: Name, address, occupation, report on credit from Dun's, Bradstreet's and the local Credit Association, and the date of such report; also whether it is a retail, wholesale or discount customer, and the date the card is filled out. These cards are filed alphabetically in a vertical card file. The lower part of these cards is so ruled that a small square is given to each month in the year, for a period of ten years. When an account is paid, the approximate amount of it, indicated by a series of letters of the alphabet, is entered in the square allotted to the month of the year in which the charge was made, together with figures showing the time taken in which to pay the amount, 30, 60, 90 days, etc. This card becomes a valuable record of the way a customer pays his bills, and about how much he buys of us. This card file daily becomes of more value, not only in furnishing the names of our good customers to be used in connection with advertising matter, etc.; but it enables us to know the people whom we have to push for collections, or fight shy of altogether. When it has been decided that we do not wish to give credit to a man his index card is marked at the top with the letter R so as to be seen at a glance.

For our daily information as to the condition of past due accounts, we keep another card file. This includes all accounts not paid in the month following the purchase. At the end of each month a card is made for each new past due account, and placed in this file, and it stays in the file until the account is paid or charged off to Lost Accounts. This card shows the name, address, date and amount of the account. All memoranda relating to the collection of this account is entered on the card as soon as received—including date of letters written, promises of customer, reason, if any, for account being slow, etc. Each day this card file is checked with the cash book, and when an account is paid, or it becomes necessary to charge it off to lost accounts, the card is taken out and destroyed. A file of this sort is a great help to the credit man, because it gives concisely the information in regard to the accounts which need his attention.

### METHODS OF COLLECTION EMPLOYED.

At the end of each month an itemized statement is mailed of charges during the month, including past due account, if any; and a statement is also mailed, of all those accounts which are past due and which have no charges during the current month. Duplicates of these last are made for the collector. Only past due accounts are given to him, unless there is some reason for feeling timid about some new account. As a rule accounts are given the collector as soon as they are

delinquent, but this is somewhat governed by the customer's credit rating as shown by our records. Past due accounts of old customers who have been in the habit of paying promptly, are not given to a collector the first month after they become past due. This is also true of the most of our lady customers. We have found it to be good policy to be a little slower about sending a collector to lady customers than to the men, for the ladies seem unable to consider the business question involved without reference to their personal merits. The collector is urged to secure a promise for payment on a definite date, and not to be content with a promise to pay "soon." He then makes it a point to call for the money on the date set.

After the collector has had an account for a couple of months and it is still unpaid, a courteous letter is sent calling the customer's attention to the fact that the account is unpaid, and that a check will be appreciated. We use no form letters, as from experience we have found that it is better to make a personal appeal suited to each particular case. If this letter brings no results, what shall be done with the account depends on the circumstances of the case, the customer's standing in the community, his apparent worth and his local credit rating. Sometimes we have found it good policy to be patient for a number of months and coax a customer along, retaining his good will and finally educating him into paying his bills promptly. Sometimes customers let small accounts run month after month simply because the amount involved is small. If the bookkeeper deliberately adds a dollar or two to this man's statement it will often bring him into the office in a wrathful mood with sarcastic comments on your system of bookkeeping. Proper apologies are made, the bill corrected, and the right amount collected. There are said to be tricks in all trades and this is one of them. Its success shows that the customer had not overlooked the account but was wilfully neglecting it.

Our two local credit associations are of great assistance to us. One is called the Retail Credit Men's Association, the other the Denver Credit Men's Association. The first is an association of retail merchants, the members of which send in to the secretary of the association daily reports of their slow-paying and bad accounts, also their new accounts. The association keeps no record at all of a man's worth, but simply of the way he pays his bills to the members of the association. This information is available at any minute over the telephone. The Denver Credit Men's Association is more in the nature of a collection agency. It furnishes us with two form letters which are mailed by us but with the signature of the association. The first states that the account has been given to the association for collection, and asks that it be settled at once. The second letter, which is sent out about ten days after the first, states that if the account is not paid at once it will be necessary to include the delinquent in the monthly report to members of the association. These letters are not used until the collector has exhausted his resources. If the second letter brings no results we give up the account as practically hopeless, charge it off to "Lost accounts" and give it to a regular collection attorney with instructions to sue if it seems advisable. When a delinquent customer resides outside of the city of

THE ITALIAN GARDEN ON THE HUNNEWELL ESTATE, WELLESLEY, MASS.

Denver, if letters fail to bring results, we notify him that draft will be made on him on a certain date. If he does not pay by that date, draft is made on him in the regular way through our bank. If no attention is paid to the draft or it is refused, we then attempt to make collection through what is called the Credit Association. This is a New York concern which is also in the nature of a collection agency. There is a series of two dunning letters, and if these bring no result, a draft on a form furnished by the association, is sent to the bank designated by it in the town in which the customer lives. Attached to the draft is a letter to the association's attorney in that town asking him to proceed with the collection of the account. If the draft is not paid through the bank the account is then given by the bank to the attorney.

We also keep in our office a card file of all accounts which have been charged off as lost, and which have not been outlawed, bankrupt or gone out of business. The card shows in whose hands the account is at the present time. If the account is in the hands of an attorney the card shows that fact. The other accounts are simply carried along in the file in the hope of some time locating the customer who has changed his address and disappeared. These cards are looked over periodically, any further steps which seem advisable are taken to enforce collection, and as fast as an account is paid or outlawed, the card is taken from the file and destroyed. We some-

times get an account against a man who is notoriously bad pay—and generally for a small amount. In such cases our collector is instructed to be very persistent and if the account is not paid to continue to annoy the man even in the presence of his customers in his own office. The object of such methods is not the collecting of this account, for the small sum is not worth all the trouble and often we do not collect the account at all, but the next time that man wants flowers he will avoid us and go to some concern whose collection methods are less offensive and we are well rid of him. There seems to be a sort of fraternal feeling among men of this style who are continually living beyond their means and they evidently pass the word along to their cronies that we are mean and persistent in our collecting. We think that such a reputation among men of this sort is worth striving for. On the other hand when a man comes to the office with a story of sickness or genuine misfortune, we are glad to arrange for such extension of time as his necessities require—only asking that he make his promises of future payment as specific as possible. Misfortune sometimes turns into fortune and you will sometimes retain the good will of a man by considerate treatment and later find in him a prompt and valuable customer.

The policy, as herein outlined, is the same practically that we have followed for a number of years; but the detail is a matter of growth, and has been carefully thought out from time to

time, to meet the demands of our particular business and line of customers. We are always seeking to improve our methods, and read all available literature on the subject. We have found that very few accounts are lost if they are followed up promptly, but that a slow account can very quickly become worthless if the debtor is allowed to think that you are easy and negligent in such matters. Years ago I was repeatedly cautioned by well-meaning friends that any attempt to follow up accounts and make prompt collections would result in driving away from us our most desirable trade. It is true that some customers have taken exception to our sending their bills by our collector and some few of them have temporarily withdrawn their patronage. The most of these have eventually returned to us with the knowledge that we make prompt collections and they are generally models of promptness. Some few have never returned but are now adding to the burden of overdue accounts carried by our competitors. We have just adopted the plan of sending a letter with the first statement of account sent a new customer, expressing pleasure at finding his name among our charge accounts, promising him good service, hoping to please him, etc. In short, extending him the glad hand and making him feel that he has his own identity in the office.

The collection and bookkeeping department is a necessary expense and if it can help to draw trade or hold it when once secured it will thereby help

to pay its own way. The value of any system must be judged by the results obtained. I will simply state that by following the plan outlined above we have, for the past five years, collected an average of \$996.00 out of every \$1,000.00 charged. The retailers of the country can be vastly benefited by an exchange of thoughts and experiences in such gatherings as this. The growers have long met in conventions and made rapid progress in their end of the florist business by reason of such exchanges. To hold that your business knowledge is too valuable to exchange with your competitor is only one less antiquated than viewing each competitor as an enemy; and to consider ones self too well posted to be able to learn anything in a gathering of this sort stamps one as narrow and provincial. Let us give freely and hold ourselves ready to receive and retain the good points advanced. If each one can advance one good point all will be vastly benefited for each will have parted with one valuable idea and receive a great many in return.

#### Azaleas.

The great variety of blooming plants that can be produced for Easter, renders it impossible to make any one plant as prominent as at Christmas, yet the azalea is one the best and finest at this season, and it can be so easily grown in fine condition that it takes a high rank at this time. The azalea season, by purchasing early, midseason and late varieties, can be made, with little work, to extend from December to April, and for the Easter blooming varieties, especially when that holy day comes in April, it is best to select the later blooming sorts. The plants should have been kept in cool quarters until the middle of March, for at this season from three to four weeks in the greenhouse is plenty to have them in good condition at Easter. As soon as they are brought into the greenhouses they should be given a good watering and at this season of the year will require plenty of water throughout their growth. It should be remembered that the azalea naturally grows in a wet, peaty soil that is very retentive of water, and with the small amount of roots that is left on the ball when it is shipped to this country and the plant placed in a small pot, the roots dry out very quickly. As the sun gets higher and the heat stronger plants like azaleas will demand close watching to keep them in first-class condition. They should be frequently syringed and the house kept well wet down and with a nice moist atmosphere. Under no circumstances should they be allowed to be in a warm dry atmosphere, for if attacked with red spider they will be quickly ruined. There may be tender growths that spring from around the buds, these should be carefully removed as early as possible, for if allowed to remain they are apt to blight the growing flowers and are taking the strength from the plant. The azaleas grown in the full sunlight will be of much higher color than those grown under shade, but during April, if the plants are advancing rapidly, it is better to give the house a light shade, as they are a cool growing plant and are not fond of high temperatures. Everything should be done to keep the foliage at its best, for it is the beautiful setting to the bloom that

makes this plant such a favorite. It may be that at Easter some of the plants will remain on the grower's hands, and as it will require but little labor, and as they can be grown outside, it does not pay to throw the plant away, but grow it on through the summer, and fine specimens can be obtained for another year, and if properly handled as good a plant can be grown as can be purchased. But they must be taken care of and given every opportunity. If they were crowded into as small a pot as possible when received last fall, they should be potted in good soil in a pot large enough for them to make roots, but they are slow growers and will not require too much pot room. They should be plunged in the soil in a good airy location in partial shade, but not under heavy foliaged trees, for they are better in the full sun than in too shady locations. A good cold frame is a very good position for them. The hose should, at any rate, be very handy and the plants frequently syringed and watered throughout the summer. They should be kept trimmed into shape until early summer and all long rank growths cut back. If it is found by the first of September that the buds are not setting well, the water can be withheld for a short period and the buds will set immediately.

## WITH THE GROWERS

Joseph Heacock Co., Wyncote, Pa.

The visitor to the Joseph Heacock Co.'s establishment at Wyncote, will find much to interest him in the very extensive stock of kentias, which it would be safe to say is the largest stock of home grown plants in the country. They are seen here by the thousands not counting the seedlings and one and two-year-olds, but those of larger sizes from six-inch pots up to twelve-inch tubs that are here by the house full, in fact, as Mr. Heacock says, "We had to get into a larger stock particularly in the extra sized plants as we were always sold out before the season was over and from the inquiries that are coming in, I question even with our increased stock that they will last the season out."

All the sizes over eight-inch pots are in the cedar tubs which Mr. Heacock says are much better than pots, first, for the reason that they do not break and are more easily handled than pots, and that they hold the moisture longer, not requiring the same attention that the plants do that are grown in pots. If a plant in a pot happens to be a little dry and is picked up to be carried by the trunk, as is the

AZALEA TIED DOWN.

ATLANTA, GA.—The Atlanta Floral Co. is making some unusually beautiful and artistic floral window displays.

NEW HAVEN, CONN.—Wm. Fischer is making additions to his greenhouses. Two new houses are in process of construction, and another is to be erected to be used as a propagating house.

GARY, IND.—George Poole, a florist of Gloversville, N. Y., visited here and looked over different pieces of property suitable for greenhouses, with the intention of building and establishing a florist business.

case when decorators are in a hurry, the pot is very apt to drop off and break, and the plant suffers if another is not handy to replace it. All the stock here is in the very best condition, but the large made up Kentias Belmoreana and Fosteriana in twelve-inch tubs, are especially notable, they being exceptionally well grown plants.

Cibotium Schiedeii is also a feature here, there being a large stock grown on pedestals raised above the smaller palms where they have ample room to spread out and make perfect plants.

This is one of the most effective of decorative plants and fast becoming a staple with the decorators. It is also becoming popular with the buying public, the medium-sized, closely set stock selling readily for house decoration.

A house of the Dorothy Gordon carnation was full of buds and flowers, although it had given a crop of over 100,000 cuttings, a last batch of cuttings in the sand were an example of successful propagation, as not a plant could be picked out of the lot but what was all that could be desired. The sand used was a light yellow "bank" sand from a neighboring quarry, that was sharp and gritty and rather coarse, in which it would seem impossible, for fungus to generate.

Orchids are also a specialty and a fine lot of cattleyas fill a large house which is entirely given over to them. Cutting has been continuous the entire season, large quantities being shipped to Chicago and New York in addition to the demands of the home market.

A house of Killarney roses are to be tried for the fourth season next year, it would not have been thought possible before, but the good crops of this season from the stock which has been on the same benches for three years has earned it another lease of life, and the plants will be continued next year. K.

#### Godfrey Aschmann, Philadelphia, Pa.

One of the most interesting places to visit at this time, is that of this Philadelphia grower whose establishment, besides being so well stocked with the best of plants, just right for the Easter trade, is one of the most unique of its kind, being situated right in the midst of a built-up residence district where as the business grew, residences were purchased and the rear yard spaces filled with greenhouses, until now there is quite an extensive range and every house crowded with well-grown stock that is good to look upon. From the beginning, Mr. Aschmann has always had to be an economizer of space, and it is wonderful to see how systematically the various crops are handled with this end in view. Under the benches is stored stock that is not now in season and which has to give way for a time, while on upper stages and hanging to the roof are shelves filled with boxes containing seedlings and small potted plants, all in readiness for the empty bench space that will come after Easter. Nothing seems neglected, the whole place being an example of what can be done in economizing valuable greenhouse space. Specialties at this time are azaleas, hydrangeas, spiraeas, lilies, cinerarias, rambler roses and bulbous stock.

Mr. Aschmann grows for the buyers of medium priced stock which are largely in the majority and no attempt is made to produce the large specimen plants that are the pride of some growers. The medium grade of stock that is seen here, however, is finished in the best possible manner, and almost every plant is saleable. Mr. Aschmann goes to Europe every summer and makes a personal selection of his azaleas, which assures perfect plants well budded and uniform in shape. His lilies are for the most part multiflorum, which he thinks the best all round variety, there being too many failures with giganteum and the other sorts.

Hydrangeas are well done as are spiraeas which are very full of buds and dense with foliage, Rambler roses are heavily budded and fine shapely plants. Two houses of cinerarias are a beautiful sight grown from a carefully selected strain, they are salable almost to the last plant. A large quantity of bulbous plants were being brought into the house from the frames and filled

#### Frank Oechslein, Chicago.

The plantsman, four weeks before Easter, is a busy man, and his greenhouses are a scene of general activity. A visit to the establishment of Frank Oechslein, on the west side of Chicago, found the stock of Easter plants in splendid condition. Four houses of lilies were in excellent shape, the buds all set, and just dividing away from

AZALEA CARL EUKE.  
A Well Flowered Specimen.

into spaces made as the stock was shipped out. Mr. Aschmann says that orders are going out all the time, as he has a trade from all over the states. Reports had just been received from a city in Utah accompanied with a check that the goods had arrived safely and were very satisfactory. Mr. Aschmann is a great believer in advertising and finds it the best way to reach the wholesale buyers. He has few losses, as his request is "Cash with order, please." C. O. D. by express is all right but sometimes goods arrive late and are not received and then it is a fight with the express companies, and this he tries to avoid if possible, as it is generally a losing business. He says we try to give good value and see that the plants are packed carefully, then after they are delivered on time to the express company, our responsibility ceases and we expect to be paid for our work. K.

BOSTON, MASS.—William F. Aylward has filed a petition in bankruptcy, the liabilities amounting to \$4,077; assets, \$800.

The varieties grown are giganteum and multiflorum, and the plants all showed fine culture, being of the right height for florists' use and the foliage in the pink of condition. From the outlook the plants will be forward enough to properly harden them up for the time when they will be desired, and a large airy building used for this purpose is a part of the establishment. In rambler roses there is a large quantity—all of which are in superb condition and just showing color. The foliage is particularly bright and glossy and the plants well covered with buds. Baby Rambler is extensively grown and these are to be seen in many attractive forms. The pink baby rambler, Mrs. Cutbush, is also largely grown and is found to be very popular. Fine plants of Tausendschon, Crimson Ramblers, Dorothy Perkins and other climbers were noted twined into pyramidal and basket forms all in fine condition. A house of Primula oboconica was a beautiful sight, the plants being covered with bloom. Azaleas in quantity just showing color, rhododendrons with their

large buds starting to burst open, and a house of hydrangeas in the pink of condition. The decorative stock was also in splendid shape, and the palms of salable size, the graceful Phoenix Roebellii and stately kentias were beautiful plants, and a bench of Pandanus Vietchii were as fine a colored lot as we have ever seen. Large quantities of ferns are grown and to be found in all stages and sizes. Boston ferns and its sports and Cibotium Schiedel, and of small ferns for fern dishes a very large stock in all sizes from seedlings up to three-inch plants.

At one end of the range is a large shed well ventilated in which the stock can be retarded or hardened up before being shipped. It was full of bulbous stock on our visit and beautiful pans of tulips, narcissus and hyacinths were ready for store use. These are grown in frames built about three feet high with a heating pipe running through them, to be used in case of severe weather, and the appearance of the stock certainly showed that this is a splendid way to handle bulbs, the pans being far better than many we have seen grown in greenhouses.

#### The Drummer as a Factor in Horticulture.

Paper read by S. S. Skidelsky of Philadelphia, Pa., before the Detroit Florists' Club, February 20, 1911.

When we alternately look at the methods employed by the horticulturists of a generation or two ago, and those of the present day, we must concede that the tremendous changes in our business and the numerous improvements along all lines to be found everywhere are, in a small measure at least, due to the men, called "drummers," who, never daunted, brave storms and blizzards, discomforts and discomfures, in order to accomplish results. The commercial man has unquestionably played the part of missionary, educator, collaborator and scapegoat all in one—and his reward—but of this later.

In an article entitled "The Psychology of Business" which appeared in a business magazine for January, Walter Dill Scott, of the Northwestern University, speaks of "the love of the game" as the greatest stimulus to man in business. "First," he says, "a man will develop a love of the game in any business in which he is led to assume a responsibility, to take personal initiative, to feel that he is creating something and that he is expressing himself in his work." Furthermore, referring to the capitalist who has already made his "pile," he continues, "Love of the game has been engendered within him and his enthusiasm has become unbounded."

Those acquainted with the typical traveling man, making his annual or semi-annual calls on the trade, will likely hear me out when I say that it is the "love of the game" rather than the monetary reward that is responsible for hardships endured and disappointments encountered during a life's work, which at its best, is neither conducive to good health, nor to the accumulation of a fortune. It is not my object, however, to portray the hardships of the drummer, who, for all I know, may take a brighter view of road life, and find the comforts of a hotel or the luxuries of a Pullman sleeper preferable to home life. Be that as it may, what interests me most is—has the commercial man con-

tributed his share towards the progress of horticulture, and, if he has, to what extent, and in what manner? Let us see.

The time is not so far gone but you can easily recall it, when your potting benches and other "available" places were literally stocked up with all sorts of handsomely engraved or lithographed likenesses of plants, highly recommended to yield nothing short of a fortune to the investor. As a matter of course, the growers yielded their dollars, not to mention the greenhouse space, their time and their work, with the result in most cases, of sheer disappointment in the end. Now I do not wish to insinuate that the horticultural concerns meant to employ such means, namely the highly colored lithograph, and the equally highly convincing adjectives, with the sole object of fleecing the grower. Not at all. Those were the only available methods, in the good old days, before the advent of the drummer. The finer the catalogue, the more elaborate the lithograph and the descriptive matter, the more orders were sure to follow. If Mr. Smith chose to be tempted and invested in a novelty, regardless of whether that novelty suited his purpose or his locality, why, it was Mr. Smith's own look-out. Had not Mr. Brown, perhaps one out of ten, made a success of it? The introducer of the novelty, I repeat, never intended to fleece Mr. Smith. On the contrary, he meant to benefit him, to give him a meritorious thing, full value for the money. There were no other ways of reaching him, no other means of talking it over. On the face of it, it looked good, that is the picture and the descriptive matter, and that settled the matter. As a result of such knocks, the grower for a time became

of that truly excellent novelty, made a most heroic attempt to unload a dozen or twenty fine rooted cuttings upon the only florist of that town. "No, sir, you can't fool me, not much I am through with novelties, and you had better not waste your time here," ejaculated the florist, with all the determination and ardor of one fully convinced that he knew what he was talking about. The "love of the game" however, succeeded in the end. Upon his solemn promise, that, should the "Tidal Wave," God forbid, engulf his, the florist's interests and prove a failure, there would be no pay, a whole dozen of rooted cuttings was ordered and benched. Well, the Tidal Wave came up to the promise. When Day-break appeared, the drummer had no hardship in unloading a hundred upon the selfsame customer. Scott was planted most profitably, so were Flora Hill, White Cloud, Lawson, Enchantress and others. The florist in question now buys carnation cuttings by the thousand and is regarded among the progressives in the craft. I cite this instance, one of a multitude of similar instances, in order to prove that the pioneer drummer, who, because of the "love of the game" succeeded in accomplishing his object, was a missionary in the true sense of the word, contributing his share towards the uplift and the dissemination of a worthy carnation, thus benefiting not only the introducer of the novelty, but the grower and the community at large as well.

In looking back over a period of twenty-five years, following the career of the small grower in the "one-horse town," up to the time when both he and his town made the remarkable growth characteristic of our American enterprise, one must not overlook the

PRIMULA OBCONICA AT FRANK OECHSLIN'S, CHICAGO.

ultra-conservative, skeptical, suspicious, often missing really good and meritorious things. But conditions were changing, and with the appearance of the commercial man on the stage of horticultural interests, there came a change in the general attitude of the trade. Let me cite but one instance.

It happened in a small town in Ohio, it does not matter where, about the time of the appearance of the Tidal Wave carnation. One of the "pioneer drummers" of that time, who took hold

hard-working, painstaking, well-meaning and honest drummer, who, whatever his shortcomings, has not failed to contribute his share towards the progress of horticulture, of which we are justly proud. The man who is interested in his work will, as a matter of course, observe things, and thus add to his own store of knowledge and experience. If he is honest and honorable in his intentions (and there are but very few who are not), he will bear in mind that the interests of his trade must be protected first.

last and all the time, believing that a satisfied customer, one whose confidence is won and held, is an asset of far greater importance than a profitable order, that may prove a loss to the man who placed it.

Imbued with such a belief, the commercial traveling man will draw either upon his own experience, obtained by dint of close and intelligent observation, or upon the experience of other growers who often paid dearly for it, in order to put his man upon the right track. Reasoning from the promises that "honesty is the best policy," the commercial traveler, simply as a matter of policy, draws the line between "unloading" a thing fit for the dump, and selling an article which may prove of value to the grower. Having just returned from a trip to Chicago, for example, he will, in all likelihood, have something of interest to tell to his Boston florist friends. To be sure, So and So has planted largely of this or that rose, having found it profitable, while another rose, proving itself unworthy of the bench room given it the season previous, was discarded.

"How does Mr. Brown grow his begonia Lorraine, or his cyclamen, or his lilies so well?" "Why, he treats his plants 'just so,' and therein lies the secret of his success." The commercial traveler, if he "loves his game," in other words, if he takes an active, intelligent interest in his work, bearing in mind the welfare of his friends in the trade, does not ignore the hints and bits of information that he may pick up from time to time during his traveling career. Combining honesty of purpose, with the knowledge and experience that he thus acquires, he becomes a sort of "Bureau of Information," and, depend on it, he will not knowingly mislead his patrons, if his advice is sought.

But wherein, after all, lies the drummer's contribution towards the progress of horticulture? It is claimed, and on good grounds, that the success of any business concern hinges largely upon its organized working force, and that if we trace the history of our great captains of industry, we can read at the same time the history of well-trained, intelligent, persevering and hard working men, each and all of whom have helped to build the fortunes of our Napoleons of finance. What holds true of individual concerns or individual enterprises, holds equally true of interests not necessarily concentrated in the hands of a few individuals. The economic principle underlying the successful management of a machine shop or a printing establishment, bears a like application to any industry. The man behind the gun may upset the plans and calculations of the most skillful admiral; while on the other hand, the man who hits the mark, and can do it again and again as occasion may require is largely responsible for the victory with which his chief is credited.

To be sure, our progress in horticulture is due to the men who have made horticulture their life's work, who have sacrificed their time and their means experimenting, often meeting with disappointments, discouragement, even financial difficulties, but persevering, nevertheless, in spite of those obstacles. I say, all credit is due to these men, whose untiring ef-

forts along experimental lines have enabled us to make such a marked advance within but a comparatively short time. At the same time let us bear in mind that the man "behind the gun" is not to be overlooked either, and that in the general results he fully deserves his share of credit.

The commercial man who succeeded in "unloading" a dozen Tidal Waves on the florist, contributed his full share towards the advance and progress of floriculture in that locality. The drummer who gives a "straight tip" to his customer, and thereby enables him to

an order for White Perfection, but so does the grower and the grower's patrons, and the very locality where such a change is brought about. This is simple logic. But whether self interest is of primary or of secondary importance to the average traveling man, there is no denying the fact that he constitutes an integral part of the organized working force that has helped to advance horticulture to its present stage.

When the traveling man volunteers to speak in the interest of the Society of American Florists, or in the inter-

PANDANUS VEITCHII AT FRANK OECHSLIN'S, CHICAGO

plant a bench with White Killarney, for example, in place of Ivory, is benefiting not only his customer, but the general interests of horticulture as well. The man taking a long and tiresome tramp across some country road in order to see the grower, who has neither the time for the trade papers, nor any use for a local or national flower show, and succeeds in persuading him that there is more "bread and butter" in White Perfection or White Enchantress than there is in Boston Market, is a missionary, an educator and a benefactor in the true sense of these terms. He has contributed that much towards the progress of floriculture in that locality. "As a matter of course, some might suggest, 'it is the self interest, the desire to make a sale, that is chiefly responsible for the drummer's efforts.'" I will not deny that self interest is a potent factor in the shaping of a traveling man's career; he must live, and in order to live, he must earn a livelihood. The preacher, for example, who tells us about the kingdom of heaven, and who is so much interested in the moral welfare of the heathen or the Jews, will not at all hesitate to leave his small, struggling congregation when a larger salary is held out by a wealthier one, as an inducement. And why? Simply because he finds he must earn a livelihood. But the acceptance of a better salary does not necessarily mean that the man of the cloth is a selfish, sordid sort of a creature. The traveling man unquestionably benefits by booking

ests of the Carnation and Rose Societies, or the National Flower Shows, etc., as he often does, and succeeds in converting some of his friends to the good cause, self interest does not enter into his mind, and horticulture is certainly benefited to a very great extent. I might go on and cite numerous other instances tending to prove that the drummer has contributed his full mite towards the general progress of horticultural interests. What I have said, however, will fully suffice to answer our purpose. It will thus be seen, and I hope I have succeeded in making myself clear enough on the subject to have you see it, that in spite of the idea, entertained in some quarters at least, of the drummer being a sort of all around nuisance, in spite of the fact that some still regard him as a necessary evil, only to be tolerated and dismissed, he did his full duty and should therefore be entitled to his full share of credit.

Far be it from my intention, however, to plead the cause of the drummer; to be sure, he can take care of his own interests, and what is equally certain he has already succeeded in demonstrating his services to the craft in many a way. But for him, and his hard work at the exhibition halls, our annual florists' conventions would hardly draw the attendance they generally do; but for him, his enthusiasm or his "love of the game," many a good and "money making" thing would never perhaps have seen the light of day. If, perchance, his en-

thusiasm carries him too far, and his "money maker" proves a soap bubble, take it for granted that he never intended to fleece you. "To err, you know, is human." Like yourselves, he may now and then use poor judgment, and like yourselves, he well realizes that success in the broader sense of the term hinges primarily upon a policy that is honest and above board. In his hard and uphill race, questionable means, he well knows, can only serve to hinder his progress. He is learning in his school of experience that business integrity and honesty of purpose must constitute his stock in trade, his main equipment, else he cannot possibly run the race. I know of instances, where traveling men, disregarding instructions, have, at the risk of losing their positions, declined to unload undesirable things upon their customers, and such men, I will remark in passing and in conclusion, are by no means in the minority.

### Back to the Land Illusion

SHATTERED BY PROF. L. H. BAILEY.

In an address before the Massachusetts Horticultural Society at Boston, Mass., Professor L. H. Bailey took for his subject "The Outlook Countryward," and said in part:

"Two important movements are now before the country—the country-life movement and the back-to-the-land movement. The country-life movement is the expression of the desire to make the farming regions as satisfying and effective socially and economically as are the towns and the cities. The movement is not only sound but is fundamental, for the reason that an effort to effectualize any necessary existing society is part of the progress of civilization.

"The present back-to-the-land agitation is largely a city effort, expressing many motives and ideas. It is in part an effort of the city to relieve its congestion, in part a desire to find labor for the unemployed. In part the result of the doubtful propaganda to decrease the cost of living by sending more persons to the land, in part the desire of certain persons to escape the city, and in part the effort of real-estate dealers to sell land. There can be no objection to properly qualified city persons moving out to the open country, and many of them make good farmers; but for the most part the back-to-the-land movement is socially and economically unsound.

"Something can be done, perhaps, to relieve city congestion by finding opportunities for urban citizens in the country, but the extent of relief that really can be secured in this way is very small and it does not reach the core of the question; for the core of the question is that the city must learn to take care of its own and to solve its inherent problems, and that the whole interrelation of city and country must be solved by fundamental processes. Part of the congestion of cities is the increase due to immigration. Undoubtedly much can be done properly to disperse our aliens and to place them where they will be of service to themselves and to employers without constituting a problem of congestion. This, however, is a question of plain distribution rather than of land settlement. The real country-life movement itself will

do something directly to relieve city congestion, because it will tend to keep country people in the country; and yet we must recognize the fact that many country people are better fitted by temperament for city life than for agricultural life.

"There seems to be much needless alarm over the decline of rural populations. We must remember that we have passed through the rural or agricultural phase of our evolution. In 1790, about nine-tenths of all our people were on the farms; a hundred years later about one-third (counting men, women and children) were on the land or very closely connected with it. I expect that the present census will show a smaller proportion, and possibly the census of 1920 will show a still smaller ratio, although the ratio

Prof. L. H. Bailey.

has already undoubtedly sunk too low in some localities or regions. We shall never again be a rural people. The best society is neither exclusively rural nor exclusively urban. What proportion the rural population must hold to the whole population, no one now knows. The decline in rural population is only one expression of the sorting of our people into their groups; and we have not yet struck bottom in this process.

"The powers of a single farmer are being much augmented by the application of knowledge, the development of business management, the use of machinery, and by co-operative enterprises. Of course, the actual number of farmers will immensely increase, but the ratio cannot be expected to increase. There will be a great increase in demand for products of the farm as civilization progresses and as tastes become more complex, but the expanding powers of individual landmen will be able to supply these enlarging demands. What will be the ratio of increase in demand for agricultural products, no one yet can say. It is true that the progress of civilization does not greatly enlarge a man's eating capacity, but it greatly increases the variety of his food and improves its quality, and this of itself, wholly aside from the quantity of the demand, will call for much greater activity and

skill on the part of the farmer. But human food crops are probably not one-half the agricultural produce, and these other products increase in intimate ratio with the progress of civilization. These other supplies are cotton, wool, hemp and other fibres, timber and all timber products, all paper materials, the output of floriculture and other special industries, leather, and practically all other produce of the earth with the exception of metals and minerals and coal. Very much is going to be demanded of the farmer to supply all this wealth and variety of material.

"There is probably sufficient ratio of persons now living on the land, to supply all this increasing demand for the raw materials, if only these persons were properly effective. To displace them or to augment them by city people may provide a corrective here and there, but it can be only an incidental factor. The great question is how to reach the people who live on the land, how to sort out those who ought not to live on the land, and how to direct our economic and social growth so as to make it profitable and attractive and in every way worth while for a man to live on the land throughout his life.

"I do not think that the mere lessening of the numbers of rural people has any very close relation to the cost-of-living question. The great problem in this regard is to improve our means of distribution, so that the materials may be taken from the producer to the consumer with the least delay, the least cost, and the least waste. It is a shameful commentary on our economic and social system that in these days of great production of agricultural produce in the fertile land of North America, people still suffer for food in the great cities. We need to give much more attention to the distribution of our products than merely to placing more persons on the land. Persons will be satisfied to live on the land just as rapidly and as far as it is economically profitable and socially pleasant for them to live there.

"Our civilization is a system of economic loss. Society is built on the process of waste. The city drains the goods from the open country, extracts the kernel, and throws the husks into the rivers and the sea. The cities are half-way stations between the potash, phosphoric acid and nitrogen of the farms and the bottom of the ocean. The city tends always to destroy its province. It sits like a parasite, running its roots into all the surrounding country and draining it of its life-blood. Many a rural community is already sucked dry. Our business or commercial structure is responsible for the wastes of distribution. That it should require sixty-five cents out of every hundred to remove a good part of our produce from the land to the dinner-table, is an indication that we are living in a very imperfect and undeveloped economic era.

"The organization of society does not seem to have within itself the means of its own correction or salvation. We are obliged to apply correctives by extraneous legislative and legal processes in order to control the streams of waste. Until we evolve a structure in which economic waste is inherently reduced to the minimum, we cannot expect to make great progress toward

BRITISH HORTICULTURAL TRADERS AND LOCAL TRADE REPRESENTATIVES AT WASHINGTON PARK, CHICAGO, MARCH 24.

a self-sustaining civilization. We have yet no large permanent agriculture; and this means that we have yet no permanent civilization.

"To find some real economic relationship between city and country whereby the city will give back something to the country rather than to take everything from it, and whereby it will be as much interested in maintaining the producing-power of land as in developing art and literature and municipal systems, is the fundamental problem of civilization. City and country are coming together sympathetically, but this is largely a matter of acquaintanceship. There is no real adequate co-ordination between the two. If the city is ever really to aid the country, it must be mostly by the development of this mutual co-ordination and not by the city going into farming. Farming is a business for farmers.

#### Hardy Water Lilies.

ED. AMERICAN FLORIST:—

I desire to grow water lilies that will be hardy in a lake in Michigan and would like to plant some red and yellow varieties. Can you give any information as regards the varieties and culture?

T. H. R.

All water lilies, designated as hardy, will grow in any section of the country where our native pond lilies thrive. The various hybrids of American, French or other origin, are also as hardy as our native varieties. Almost any soil, such as is usually found in ponds or lakes, is suitable for planting in without any addition of manure or fertilizer, only in places where a gravelly or stony bottom exists, would it be necessary to supply suitable soil for placing. When planting time arrives, the roots can readily be pressed into the soil where the water is about two feet deep; in a short time new roots will be emitted, which will anchor the plants. If the water is deeper, or unsuitable for planting, another method can be adopted, namely, get stiff, loamy soil and wrap around each root and secure with burlap, just as trees are "baled," drop these where the plants are wanted to grow, the

weight of the soil will hold them in place and they will remain there.

The best yellow varieties are *Nymphaea Marliacea chromatella* and *N. Odorata sulphurea*. Of reds we have *N. Robinsoni*, orange red; *N. James Brydon*, rosy crimson; *N. Marliacea Ignea*, carmine red; *N. Laydekeri purpurata*, deep rosy crimson. All will succeed in Michigan.

WM. TRICKER.

#### British Horticultural Traders.

The illustration herewith shows some members of the British Horticultural Traders party at Washington Park, Chicago, March 24. The party arrived at New York, March 17, and after a short stay proceeded to Philadelphia, returning March 18, for the annual banquet of the New York Florists' Club, after which they went back to Philadelphia and then visited Baltimore and Washington, proceeding thence to Richmond, Ind. (where E. G. Hill received and entertained them), and then went on to Chicago, arriving in the latter city March 24 and were shown around the city in autos, visiting the various parks, Swift's packing plant at the stockyards and the greenhouse establishment of the Poehlmann Bros. Co. On the day of their arrival they were met at the station and escorted in automobiles to the Hotel Sherman by representatives of the Chicago Florists' Club, who entertained them at luncheon at the South Shore Country Club and dinner in the evening at the Union Restaurant. The party remained in Chicago three days, leaving March 26 for Niagara Falls. All the members of the party expressed themselves as greatly pleased with the enthusiastic reception given them at all points.

The members of the party in the illustration are J. Brown, of W. & J. Brown, Stamford; W. A. Cull, Lower Edmonton; C. Engelmann, Saffron Walden; J. S. Gunn, of Gunn & Sons, Birmingham; L. M. Graves, of St. George's Nursery, Harlington; G. Prickett, of Samuel South & Sons, Tottenham.

The local trade representatives in the group are Vice-President Kohlbrand, of the Chicago Florists' Club; M. H. West, superintendent of Lincoln Park; E. A. Kanst, of the South Side park system; Alex Henderson, John P. Degnan, W. W. Winterston, J. C. Vaughan and Michael Barker.

J. S. Brunton, Burnley; E. Barker, Manchester and J. Simpson, Burnley; were slightly indisposed on the day of arrival, hence their non-appearance in the group picture.

## OBITUARY.

#### William Schlatter.

William Schlatter, head of the house of William Schlatter & Son, of Springfield, Mass., one of the older florists of Western Massachusetts, died Monday, March 27, aged 64 years. The funeral was held Wednesday, March 29, and the interment was in Oak Grove cemetery.

#### Miss Fannie M. Anderson.

The death of Miss Fannie M. Anderson, of the firm of Anderson & White, of Lexington, Ky., occurred in that city March 20. Miss Anderson and her partner, Miss White, have been connected together in the florists' business at No. 159 Georgetown street, Lexington, for many years. Starting in a very small place, their business has increased year by year, until they have built up a flourishing business. Miss White was the hustling partner and Miss Anderson acted in the capacity of clerk and looked after the orders. The many friends of both extend their sympathy to Miss White in the blow which she has sustained in the death of her partner. E. G. G.

PECKVILLE, PA.—W. J. Broad has a fine lot of lilies and other plants for the Easter trade.

WOBRUN, MASS.—John Cummings, while removing a load of ashes from his greenhouse, made a misstep, fell several feet and broke one of his legs. He was attended by physicians and is getting on nicely.

### National Flower Show Guarantors.

On the list of guarantors of the National Flower Show, Theodore Wirth's name appears in the schedule. Credit should be given, not to Mr. Wirth personally, but to the Minnesota State Florists' Association, of which Mr. Wirth is president. The Minnesota State Florists' Association, wishing to show its interest in the affairs of the National Association, was among the first to subscribe to the guarantee fund. Proper credit is given on the stationery of the National Flower Show, but through some inadvertence, in the schedule only Mr. Wirth's name appears. It should be the Minnesota State Florists' Association, Minneapolis, Minn.

RENEW subscriptions promptly so that no copies of the papers may be missed.

This March with snow and cold is in marked contrast to that of 1910 and the season may soon be called a late one.

MUCH winter-killing of lawns is apparent on private and public parks about Chicago and lawn grass seed has never been so dear!

SAN FRANCISCO and Boston indulge in fan shows on the same dates that Omaha, Chicago, Cleveland and Buffalo have a snow blizzard.

THE snow blizzard swept the west and northern states March 27, followed by a drop of the temperature at night to a serious danger point to much horticultural stock in transit.

AMONG florists in this country there is a lurking suspicion that the reason some of the Hollanders keep coming earlier each season is because they can by so doing secure new business before their customers can tell definitely the flowering quality of the stock supplied the previous season.

THE paper by August Poehlmann, Chicago, on the "Development of an Up-to-date Rose Growing Establishment" and that of Wallace R. Pierson, Cromwell, Conn., on the "Science of Rose Growing," presented at the Boston meeting of The American Rose Society, March 27, were considered very notable contributions to the literature of floriculture, and some of those in attendance said they were the best yet given to the trade. These papers will be found elsewhere in this issue.

### Society of American Florists.

#### DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the roses, Double White Killarney and Killarney Queen, by A. N. Pierson, Inc., of Cromwell, Connecticut, becomes complete.

H. B. DORNER, Sec'y.

March 29, 1911.

### Chrysanthemum Society of America.

The following special prizes have been offered for the Chrysanthemum Society Show to be held in St. Louis next November.

E. G. Hill Specials: For the best 10 blooms, Chrysanthemum Emberta, \$10.00; for the best 10 blooms, Chrysanthemum Wells Late Pink, \$10.00; for the best 10 blooms, Chrysanthemum Golden Gem, \$10.00.

Prizes offered by The E. G. Hill Co., Richmond, Ind.

C. W. JOHNSON, Sec'y.

### National Flower Show Attendance.

The attendance at the National Flower Show at Boston is reported good, but so far no figures have come to hand. At the first National Flower Show, held in Chicago November 6 to 14, 1908, the paid admissions for the eight days exceeded 28,000. This was probably a high record in America considering that the adult admission fee charged was 75 cents. At the St. Louis world's fair flower show November 7-12, 1904, admissions for the six days numbered something like 33,000 at 25 cents each, but it must be remembered this exhibition was held during the progress of a great world's fair.

### English Cut Flowers.

Indoor cut flowers in England, grown in American style greenhouses and following to a large extent American methods, principally roses and American carnations, are commanding high prices in London and invading the Paris, Berlin and St. Petersburg markets. It is significant that the importations to England of cut flowers from southern France, according to W. E. Wallace, the well known grower of Dunstable, is falling off and that the long-stemmed roses and carnations are taking their place in the British market as well as on the continent at fancy prices. During the recent holiday season fancy carnations on the London market brought as high as eight cents and on February 15 fancy blooms of Pink Delight brought six cents. Pink Delight, Mayday and many other American carnations are great favorites in Europe. The Richmond rose is also in high favor with European buyers of winter cut flowers.

### American Carnations for Coronation.

There has been considerable discussion in the English newspapers recently as to the flower which would be selected for the festivities in connection with the coming coronation of the king and queen. The rose, of course, being the national flower of England, had many adherents, but the sweet pea and the carnation were strong favorites in the contest. Now it is reported that Queen Mary has intimated to the Gardeners' Company, whose offer she already had accepted to compose the bouquet which she will carry at the coronation, her wish that it should be composed of carnations. The flowers from which it is understood her choice will be made are the varieties Enchantress, Mrs. Lawson and Winsor, all American varieties it will be noted.

R. F. Felton, a well-known English florist, says that next to the rose, which was really England's flower, there could be no better choice than the carnation. "The perfection to which perpetual flowering carnations have now attained," he said, "makes them perhaps more sought after for purely decorative purposes than almost any other flower. You can decorate with carnations in a way that cannot be successfully undertaken without them. In the first place, they have magnificent lasting qualities when cut. The petals do not fall, no matter what the atmosphere of the room may be. However hot coronation day is, and we all hope it will be brilliant, the carnation will stand the heat better, perhaps, than any other flower."

### The Book of the Sweet Pea.\*

In the series of Handbooks of Practical Gardening edited by Harry Roberts and published by John Lane, The Bodley Head, London, England, there has just been issued The Book of the Sweet Pea by D. B. Crane. The book is very complete in handling the subject of one of the most popular flowers under cultivation today, dealing with the history and evolution, the culture and propagation, the gathering and exhibiting, pests and diseases, the classification and the work of the National Sweet Pea Society, and is replete with beautiful illustrations of the more beautiful varieties and their arrangement. Price \$1.00.

\*We can supply any books here noted on receipt of price quoted.

## Meetings Next Week.

Albany, N. Y., April 6, 8 p. m.—Albany Florists' Club, 71 State street.  
 Buffalo, N. Y., April 4, 8 p. m.—Buffalo Florists' Club, 385 Ellicott street.

# DENVER PLANTS AGAIN!!

If you have bought of us before we feel sure you will buy again, for you know the stock has been right. Texas and Oklahoma points more quickly reached from DENVER than from any other plant supply, and at less transportation cost.

If the stock is satisfactory the above points should bring us your orders. If you have not bought of us before send us a part of your orders and compare goods and costs.

## Our Rambler Roses

are promising to be the best lot we ever had. Last year we were sold out early on small sizes. This year we have a much larger supply. **Tausendchon, Lady Gay, Crimson Rambler, Perkins, Newport Fairy, Hiawatha**, in all sizes, 75c, \$1.00, \$2.00 up to \$5.00.

**Baby Rambler** and **Phyllis**, 75c, \$1.00 and \$1.50.

**American Beauty**, 50c and 75c.

**Hydrangea Otaksa**, 75c, \$1, \$1.50

**Rhododendrons**, \$2.00 to \$3.50.

**Azaleas**, \$1, \$1.25, \$1.50, \$2.25 and \$5.00.

**Lilacs**, \$1.50 to \$2.50.

**Genistas**, 25c, 40c and 75c.

**Spireas Gladstone** (white)

**Queen Alex** (pink); good foliage and well flowered, 75c, \$1 and \$1.50.

**Callas**, 40c and 50c.

**Primula Obconica gigantea** is one of our specialties. Nothing better for your customers. Good stock at 25c, 50c, \$1.00 and \$1.50.

We have potted up some spring Bedding Plants and got them in bloom for Easter for those who need low priced plants.

**Salvias, Geraniums, Heliotropes and Marguerites** at 15c, 25c and 40c.

**Asparagus Plumosus and Sprengeri**, 15c 25c and 50c.

**Araucarias**, \$1.25 to \$5.00.

**Begonia Rex**, 25c and 40c.

**Farfugium**, (Leopard plant) 6-inch \$1.00.

**Ferns**, Boston and Whitmani, 5-inch 40c, 6-inch 60c.

**Ferns**, assorted 2 or 2½-inch for ferneries, \$6.00 per 100.

**Kentia Palms** in all sizes.

**Phoenix Roebelenii**, \$1.50 to \$7.50.

**Raphis flabelliformis**, \$3.00.

**Write us about young bedding stock for Spring. Our Pansies are from the very best strains of seed.**

Terms, cash with order or C. O. D. unless you already have an account with us.

# THE PARK FLORAL CO. Denver, COLORADO.

## Put Down These Facts About "Dorothy Gordon"

"DOROTHY GORDON" is a carnation of **tried and known worth**. First of all, we grew it ourselves 'or two years, to determine beyond question that it was as good as we thought—and we found that it lived up to every one of its promises.

Then, two years ago, we began selling rooted cuttings to other growers, all the way from Maine to Illinois.

We have kept them followed up, and find that, in the majority of cases, "Dorothy Gordon" has succeeded in a big way—that it is making **more flowers and better flowers**, and more money, than any other carnation they could grow.

"Dorothy Gordon" is particularly sturdy and vigorous—it is a seedling of Lawton on Enchantress with the strong constitution of both. Color light flesh pink; the flowers average three inches or more in diameter—and are of extra-good substance and form. It is in short, an exceptionally fine carnation, and brings correspondingly high price—25 to 50% more than "Enchantress," which we grew for years.

Get in line for a good fall business; start some "Dorothy Gordon" in your houses **now**. We offer strong rooted cuttings at

**\$6 per 100; \$50 per 1000.**

Come and look over our stock; our "latch-string is out" every week-day.

## Warm Days—Outdoor Decorations—Heacock's Palms

YOUR trade will be getting flower beds, etc., ready from now on just as fast as they can, with **that** out of the way, the next thought will be for permanent decorations for veranda and lawn. Most of them will think of Palms the first thing; these people won't need much coaxing to buy from you, if you can show a stock of Heacock's Home-Grown Palms—clean, healthy and well-grown.

You can help the other folks—those who aren't quite sure what they want in the way of outside stuff—by showing them some of Heacock's Palms, suggesting a few pleasing ways of arranging them and explaining how easy it is to keep them in good shape just by watering and sponging the leaves.

**We want your Palm business and we want to help you increase your Palm sales.** We have a bigger stock this year than ever—thousands of big, fine specimens and hundreds of thousands of little ones—every last one of them grown right here from the seed by palm specialists, and each given as much care as though it were the only one in our whole plant.

We'd like to tell you more about them and quote prices. Let us hear from you.

When in Philadelphia, be sure to look us up

# \$250 Net Profit on an Investment of \$75

## TO ALL WHO GROW WASHINGTON

Here is a statement that will remove any doubt you may have about this new carnation, **Washington**, which we prove is the most profitable for any florist to grow; furthermore you know the Enchantress family are the easiest to grow as well as being the "money makers."

### Let Us Consider the First Cost of the Plants

|                                                 |         |
|-------------------------------------------------|---------|
| 1000 Washington sport of Enchantress.....       | \$75 00 |
| 1000 Lawson or any other standard dark pink.... | 25 00   |
| Difference in cost.....                         | \$50.00 |

|                                                                                                                                                  |          |
|--------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Washington or Enchantress will average 20 blooms per plant per season at the low average of 3c per bloom, 60c per plant, 1000 plants.....        | \$600.00 |
| Lawson or other dark pinks will average 15 good blooms per plant per season at the high average of 2c per bloom, 30c per plant, 1000 plants..... | \$300 00 |

|                                                    |          |
|----------------------------------------------------|----------|
| Difference.....                                    | \$300.00 |
| Gain in profits for <b>Washington</b> .....        | \$300 00 |
| Difference in cost of <b>Washington</b> and Lawson | 50.00    |

**Washington** net gain per 1000 plants..... \$250.00

There is no use to argue, we show you plain figures that actually show you that an investment of \$75.00 will bring you \$250.00 or better clear profit in one season with less trouble or care than any other variety of dark pink.

**Washington** is a true sport of Enchantress, a beautiful cerise, the exact Lawson color.

Cuttings are strong clean and healthy, ready for immediate delivery. Order To-day. We Ship Tomorrow.

\$10.00 per 100; \$20.00 per 250; \$75.00 per 1000.

Now is the time to get your cuttings of **Washington** or Enchantress, as they keep growing; never get hard and give you the best results next season. Cuttings for our own use will be taken at this time. Order at once before they are all sold.

## Plant Growers, Attention

LOTS OF CASH ON HAND

All who have plants suitable for the New York trade should call and see me personally

## CHARLES ABRAMS, FLORIST

Subway Station, Hoyt and Fulton Streets,  
**BROOKLYN, N. Y.**

Why deliver your plants and wait thirty days or longer for your money? I will pay spot cash on delivery. My system admits of no disputes and precludes all possibility of loss to you.

I need all kinds of **Flowering and Decorative Plants**, as I have charge of the flower and plant department in one of the largest department stores in Greater New York.

Only first-class stock can be used.

**I NEED LARGE QUANTITIES AT ALL TIMES.**

If your stock is right, you can dispose of your entire output to me.

Remember, your dealings with me will be on a strictly cash basis, so you will not have to worry about your account after the plants are delivered.

**AGAIN I SAY: COME AND SEE ME**

Come Direct to Headquarters for

# EASTER PLANTS

Wishing You a Joyful, Happy and Prosperous Easter

## Prepare for Easter

Unexpected business has prevented us from making an exhibit at the National Flower Show, Boston, March 25th. But I herewith invite all my customers and others who can find time to come to our establishment, to the great mill of plant production, and form your judgment of our great Easter stock in person. The Germantown and Chestnut Hill and Willow Grove trolley, at 18th and Eighth and Market streets, will take you direct to Ontario street. From there walk two squares east to 1012 W. Ontario street.

All florists should this Easter-time, come see my stock quite superfine: My glistening Araucaria, my Lilies strong and wondrous fair: Ferns, big and green no rival know. Bulbs of all sorts, the best I grow. There's not a flower you now can need, but I can sell you cheap indeed: Azaleas like a plant on fire, with blooms that fill the heart's desire: Choice Primroses with colors chaste. Palms grown to suit the highest taste. The spring-time jewels are my flowers, pictures of life that brighten ours: None fairer, better, you can find—I have the best of every kind.

## Spirea Gladstone.

What is a home, what is a store, what is a church, what is an Easter present, without having a few plants of the so much admired and so greatly in demand **Spirea Gladstone**, the pride of Holland? O, those charming sprays of beautiful pure white flowers! And the foliage, of such a beautiful waxy deep green is a jewel in itself! Mixed with beautiful lilies and other blooming plants they will complete the flower decoration for your happy, joyful Easter home of 1911. Knowing the great demand for these plants during past Easters, when not half the customers could be supplied, we are well prepared this year for the rush, and were fortunate in spite of the scarcity last fall in Holland. When other florists' supplies were cut short by Holland growers, we obtained enough of the bulbs to fill two houses with the choicest, and we are able to supply all incoming orders promptly. Price: 5½, 6 and 7 in. pots, full of buds and flowers, 35c, 50c, 75c to \$1.00 each: dozen or more, the same price. Some are as big as a small washbub.

## Cineraria Hyb. Grandiflora.

Readers, please just a minute, I wish to call your attention to one of our biggest houses filled with a big selection of that so much admired Easter novelty, the **Cineraria Hybrida Grandiflora**, which will have no equal in the flower market for Easter, 1911. If you are not fortunate enough to see them growing at our establishment, then just imagine you were promoted to a paradise, to a garden in Eden, standing before a mass of flowers in various beautiful colors. This is the condition one of our Cineraria houses represents at Easter-time. Our new improved strain, planted in 6-in. pots, of medium tall sizes, are unsurpassed in the size and color of the flowers. The flowers are about twice the size of the old ordinary varieties, has big heads of flowers, good foliage: some of the plants are as big as a small apple basket. Price: 6-in. pots, 25c, 35c, 50c, 75c to \$1.00 per plant: dozen or more, same price.

## Azalea Indica.

Remember we are headquarters for **Azalea Indica**, grown for us under contract in Ghent, Belgium, under my personal inspection, by going abroad every year and looking them over. **Azalea Indica**, Easter forcing: *Vervaeana*, *Deutsche Perle*, *President Oswald de Kerkove*, *Emperor of Brazil*, *Professor Wolters*, *Empress of India*, *Schryveriana*, double variegated 60c, 75c, \$1.00 to \$1.50; also *Mme Van der Cruyssen*, *Simon Mardner*, pink, *Niobe*, white, *Apollon*, red, and *Empress of Brazil*, 60c, 75c, \$1.00, \$1.25 to \$1.50; full of buds and flowers; right for Easter. In large plants we have *Niobe*, *Helena Thielman*, *Bernard Andreas Alba*, white, *Empress of India*, *Mme. Van der Cruyssen*, and others, \$1.50, \$2.00 to \$2.50.

**Adiantum Hybrida**, 6-in. pan, 25c to 30c.  
**Asparagus Sprengeri**, 2½-in. 3c; 4-in., 10c.

## Lilium Multiflorum.

We have Lilies this Easter (1911) to burn, to burn; they are crackjacks, to beat the band, the best in the land, the best in the land, the best in the land.

Three houses in **Lilium Multiflorum** the genuine Japan Easter Lily, better than ever before. Our own importation from our general grower in Japan, raised from 9-10 in. bulbs, started in 6-in. pots last October; have kept cold. Good, perfect foliage from bottom up. Plants medium size, and in all heights, from 5 to 10 buds to the plant, 10c per bud: plants under 5 buds, 12c per bud, just right for Easter. We have the finest lilies this year in Philadelphia and all over the country, is the town talk from florists and agents daily visiting our place. We never have seen anything like it," said two well-known growers from Cincinnati and Short Hills, N. J., the other day, when visiting our place together. We have three houses full in 6-in. pots, nicely stacked up, medium height, and can supply all applications.

On account of selling our lilies cheap, and most all florists know there is no profit in growing lilies (we only keep the good ones; the bad and the diseased ones we dump out fully 30 per cent every year), therefore we kindly ask our customers to buy a suitable portion of other plants in connection with lilies.

**Hyacinths** of our own importation, four best colors, *Gertrude*, best white; *King of the Blues*, best blue; *Grand Maitre*, light blue; *La Grandesse*, best white; 4-in. pots, in bud or bloom, \$12.00 per 100.

**Begonia Rex**, 5 to 5¼-in. pots, 20c to 25c.

## Araucarias Our Specialty.

We are the largest importers of these lovely decorative plants the **Araucaria Excelsa**, **Robusta Compacta** and **Glaucia**, the choicest last spring (1910) importation, ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Look! Bargains in **Araucaria Excelsa**. Such low prices as are quoted below were never known in the history of Araucaria Excelsa. Just think! 6 to 7 inch pots, 4½ years old, 4½-6 tiers, 25-30-35-40 in. in height, for only \$1.00, \$1.25, \$1.50 to \$2.00 each. These prices are record-breakers—money makers for you.

**Araucaria Excelsa**, 6-7 in. pots, 5-6 tiers, 4-5 years old, 25-30-35-40 in. high, perfect tiers, green from bottom to top. Price \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

We also have the nicest **Araucaria Robusta Compacta** and **Excelsa Glaucia**, a house full, for only \$1.25, \$1.50 to \$2.00, worth double.

Our **Hydrangea Otaka** can't be beat: full of buds; right for Easter trade; every branch nicely stacked up, 2-3-4-5-6-7 heads to the plant, 6 in. pots, 50c; 7 in., 75c, \$1.00, \$1.25 to \$1.50.

**Dracena Bruniata**, 25 to 30 in. high, 6 in. pots, 40c to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

**Von Sion Daffodils** (double nosed), best double Narcissus in cultivation, three bulbs planted in a 5½ to 6 in. pot, \$2.50 per doz. pots.

**Tulips**, Tournecole double, red and yellow variegated and *Murillo*, beautifully shaded rose pink, three bulbs in one pot (4 in.), \$15.00 per 100 pots: \$1.80 per doz.

**Ipomoea Noctiflorum**, our so well-known pure white, waxy *Moonvine*, bearing flowers very fragrant and as big as *asaucor*, 2½-in. pots, will make good stock for you to propagate from, \$5.00 per 100.

**Latania Borbonica** (Chinese Fan Palma), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

**Kentia Forsteriana**, in fine shape, 6-in. pots, 30-35-40-45 in. high, 4-5-6 years old, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

**Kentia Belmoreana**, 30-35-40 in. high, 5-6-7-8 in. pots, 5-6 years old, \$1.25, \$1.50 to \$2.00 each.

**Kentia Belmoreana**, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25 to \$1.50; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine. **Boston**, **Scottii**, **Whitmanii** and **Scholezi**, 5½ and 6 in., 35c, 40 and 50c; 7 in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches—**Scottii**, **Whitmanii** and **Scholezi**, 8-in., 1.50.

**Neph. Glazefanii**, a new beautiful fern, an improvement on **Scottii**, much shorter and bushier than **Scottii**, 5½ in. pots, 30c; 3 in. pots, 25c.

**Ferns for Dishes**, big assortment, 2½-in. pots, at \$4.00 per 100.

**Crimson Rambler Roses**, 6-in. pots, 3 feet high, nicely bent down and staked up, 75c \$1.00, \$1.25 to \$1.50 each.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

# Decorating with Roses

The right time to buy roses is when they are fresh and well ripened. Roses potted up in the winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

## Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name:  
Price, 75c for 5 (one variety), \$13.00 per 100, \$120.00 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.  
Anne de Diesbach. Bright carmine.  
Ball of Snow (Boule de Neige). Large, pure white.  
Baron de Bonstetten. Blackish crimson.  
Baroness Rothschild. Satiny pink.  
Capt. Christy. Delicate flesh color.  
Clio. Satin bluish.  
Duke of Edinburgh. Bright vermillion.  
Fisher Holmes. Dark velvety crimson.

## English Moss Roses

Assorted. White, Pink, Red. Large dormant plants, from open ground. 75c for 5, \$14.00 per 100.

## Baby Rambler Roses.

PHYLIS. Very fine clear pink, highly recommended, \$1.25 for 5, \$20.00 per 100.  
PHYLIS (Grown as a Standard). \$2.00 for 5, \$35.00 per 100.  
BOSKOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30.00 per 100.  
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 50c for 5, \$15.00 per 100.  
BABY DOROTHY (Grown as a Standard). For description see above. 60c each, \$4.75 for 10, \$45.00 per 100.  
CATHERINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowered than the type. White with yellowish center. It has the true rose perfume. 50c for 5, \$15.00 per 100.  
MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 50c for 5, \$15.00 per 100.  
MME. NORBERT LEVASSEUR (Baby Rambler). Strong, field-grown plants. 75c for 5, \$14.00 per 100.  
BABY RAMBLER (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c each, \$3.75 for 10, \$35.00 per 100.

## Ramblers and Other Climbing Roses.

CLIMBING BABY RAMBLER (Miss C. Messman). A novelty for 1911. Where the Baby Rambler is popular, the climbing type will soon become so too. We have a small stock and offer same as follows. It is a true Polyantha type, color deep rose. 50c each, \$2.25 for 5, \$40.00 per 100.  
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown, \$1.50 for 5, \$22.50 per 100.  
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and potted in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15.00 per 100; 4 to 6 feet, \$2.25 for 10, \$20.00 per 100; 7 to 8 feet, extra heavy, \$4.00 for 10, \$35.00 per 100.  
DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 8 to 9 feet, \$2.00 for 10, \$18.00 per 100.  
TAUSENSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15.00 per 100.  
TAUSENSCHON (Grown as a Standard). Fine for forcing. 40c each, \$3.75 for 10, \$35.00 per 100.

## Something New in Roses for Florists

### Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and one-half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY RAMBLER (Half Standard). Crimson. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY CATHERINE SEIMETH (Half Standard). White. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY "STARS AND STRIPES" (Half Standard). White and red, grafted on the same plant; most attractive. 45c each, \$4.50 per doz., \$35.00 per 100.  
PHYLIS (Half Standard). Carmine pink. 45c each, \$4.50 per doz., \$35.00 per 100.  
TAUSENSCHON (Half Standard). Soft pink. 40c each, \$4.00 per doz., \$30.00 per 100.  
MRS. CUTBUSH (Half Standard). Rose pink. 40c each, \$4.00 per doz., \$30.00 per 100.

## English Grown Hybrid Tea, or Ever-blooming Roses, etc.

Hybrid Tea or Everblooming Roses are becoming more popular every year. As hardy as the perpetuals, with almost perfect winter, they give a wealth of bloom all through the summer months and late in the fall till frost checks them.

THE GRAND ROSE LYON. Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp-pink at the ends of the petals, center coral-red or salmon-pink shaded with chrome yellow. Very fragrant. 40c each, \$1.75 for bundle of 5; \$22.50 per 100.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation; is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 for bundle of 5; \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for summer-flowering and cutting. Maman Cochet (Pink). Color a clear, rich pink, changing to silvery rose, very double and fragrant. Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride. \$1.25 per bundle of 5; \$22.50 per 100.

ROSE, ETOILE DE FRANCE. Flowers large, possessing petals of very good substance; magnificent cupped form. Superb crimson velvet, the center of the bloom vivid coral-red. The flowers are very fragrant and last very long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong, 2-year-old plants, field-grown, \$1.25 for bundle of 5; \$22.50 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10; \$22.50 per 100.

GRUSS AN TEPLITZ. No Rose in commerce can compare with this as a bedder. It is a perfect sheet of richest crimson-scarlet all summer. A strong, vigorous grower, \$1.75 for 10; \$15.00 per 100.

VISCOUNTESSE FOLKESTONE. A large, full flower of creamy pink, shading to deep salmon-pink at the center; very floriferous, \$1.25 for 5; \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower, \$1.25 for 5; \$22.50 per 100.

RICHMOND. The well known Red Rose of commerce, \$1.25 for 10; \$22.50 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink; very distinct and excellent for indoor or outdoor summer growing, \$1.25 for 5; \$22.50 per 100.

BETTY. Copper, yellow, overspread with golden rose. A fine formed Rose, large and moderately full, \$1.75 for 5; \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink. \$2.50 for 10; \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 for 10; \$22.50 per 100.

AMERICAN BEAUTY. Almost too well known for description, but as popular today as twenty years ago. Rose carmine, shaded salmon, flowers large and full; very floriferous. Strong field-grown plants, 75c for bundle of 5; \$14.00 per 100.

CAROLINE TESTOUT. Bright satiny rose, with brighter center, large, full and globular; sweet scented, \$1.25 for bundle of 5; \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalog which will be sent on application.

KAISERIN AUGUSTA VICTORIA. An almost pure white Rose. Shaded a beautiful primrose. Fine for indoor or outdoor summer-blooming. \$1.25 for bundle of 5; \$22.50 per 100.

**N**OTE the substantial construction of the two houses to right—they are built to last a half a century with proper care and are as near perfect as ever houses were built and are the pride of Mr. Barber and his gardener, Mr. Scott, recently from England.

**N**OTE below, the very neat and entirely substantial steel frame without belly rod or strut, for houses up to 20-ft. wide, these are amply strong—cast little or no shade and are inexpensive.

**N**OTE in center picture below construction of single house 30-ft. wide, with Galvanized Steel Gutter both sides—side sash also—same general construction in single as in double houses.

Will send blue prints and costs of these or any other kind of houses, private or commercial also **Heating Plants** on application.

Write us for information about our new Ventilating Machine, now ready for delivery. Try it.

**Foley Triumph Machine** has no equal to-day for ease, speed and safety.

Western agents for the famous **Giblin Sectional Cast Iron Boilers**. Also headquarters for **Pipe and Fittings** of all kinds.

**THE FOLEY MANUFACTURING CO.**  
2541 South Artesian Avenue, Chicago.

**M**R. O. C. BARBER, of Barberton, Ohio, desirous of engaging in Grape and Peach Culture and wanting up-to-date greenhouses has installed two double houses as shown in cut at top of page—each house 30x157; two single houses 30x157, as shown on bottom of page, and one smaller single house, 18x157. These houses are all substantially built on concrete foundation with hollow cement block walls—all houses supported on 2-in. Galvanized Pipe Posts with the Foley Galvanized Steel Channel Gutters with Concentric Wood Sills and rafters of Louisiana Red Gulf Cypress. All houses have two rows of Ventilation and Side Sash throughout operated by Foley Ventilating Machines.

The 30-ft. houses are built with extra strong steel frames and heavy trusses—trusses attached to pipe posts, independent of gutters. The smaller house is a substantial steel frame without any trusses—all the steel work and iron work being galvanized—and all being built stronger than required for flower culture as the roofs are designed to carry tons of weight in

vines and fruit in years to come, as well as to withstand the wind pressure, snow loads, etc. There are no interior supports other than stated above. Should Mr. Barber at any time desire to he can turn these houses into good commercial houses for cut flowers or plants.

**B**ELOW please take notice of the very powerful yet neat and light truss work, special connecting arms were made for connecting trusses to 2-in. pipe posts—these trusses **are trusses** and not imitations or flimsy make-shifts—all who use our trusses will tell you this.

**W**e are now at work on the material for a range of vegetable houses to be built on Mr. Barber's Anna Dean farm at Barbertown—there being in this range six houses 800 feet long made of Foley's Unequaled Louisiana Red Cypress—**Air Dried**.

Write us for prices on **Glass**.

Mr. Barber is a great lover of nature in all her phases, and when his plans are fully matured Anna Dean farm will be as near to Eden as human hands can work.

**All the material for these houses was furnished and erection supervised by**

#### Chicago.

#### A BOUNTIFUL SUPPLY.

A visit to the stores and flower stands in the market finds every one bountifully supplied with all the different spring flowers, and of almost everything there is more stock than is required and it is becoming difficult to dispose of all that arrives and in some cases the quantity accumulates rapidly. A glance into the refrigerators sees them full of excellent stock awaiting the purchaser. The trade with the retailers is rather light, the greatest call being for funeral work with the demand for social entertainments not as large as during the early winter months. The prices of all flowers is consequently low and the buyer who can handle a large quantity of almost anything has no trouble in obtaining all the stock desired, and at about his own figures. The retail stores are taking advantage of the lower prices and making beautiful window displays, especially of bulbous stock and the early Easter plants are seen, some very handsome azaleas and rhododendrons being shown in the stores. The boxes of tulips and narcissus trimmed with crepe paper are very decorative and give the window a spring garden effect. Roses are now coming in large quantities and of splendid quality. American Beauties are more plentiful, especially the shorter grades, and prices upon this stock have fallen. Killarney, White Killarney, My Maryland and Richmond are being received in vast quantities and the stock is elegant, but the shorter grades are at times a little druggy. Mrs. Jardine and Mrs. Marshall Field are of excellent quality and in great quantity. Of the other tea and hybrid tea roses, Bride and Bridesmaid are in full crop and plenty of Rhea Reid,

Randolph 2758.  
Automatic 41770. **CHICAGO.**

outside grown blooms from the south. Lilies and callas are also in large supply and the prices are low. Cattleyas are not in so bountiful supply as they were, but there is plenty to meet all the demand, and they as well as other orchids are feeling the downward tendency of the market. Sweet peas are being sent in in large quantities, much of the stock is short stemmed, but some extra grade blooms are to be obtained, and the price is cheap. Violets are beginning to show the effects of the brighter sun, and are losing size, color and keeping qualities. Lily of the valley is in plentiful supply, but the prices hold up well and some very nice white lilac is to be had. There is some extra fine mignonette to be obtained which brings a fairly good price, but the small grade is like the rest of the stock, cheap. Spanish iris are a feature in the store windows, and with the Poeticus narcissus add to the great display to be seen at this season. Greens are in good supply, but the prices of this stock hold very firm.

#### NOTES.

The S. Wilks Manufacturing Co., 2503 Shields avenue, have in preparation a catalogue illustrating their new style hot water greenhouse boiler, which they expect will be ready for distribution soon.

At Wiator Bros.' store the stock is arriving in splendid condition and in large quantities. The Mrs. Jardine roses are of an extra fine grade and a pride of the proprietors and growers.

Zech & Mann are supplying their customers with a fancy grade of Killarney, White Killarney and Richmond roses. Carnations are arriving in quantity and of unsurpassed quality.

Henry Roth, the enterprising florist of Lafayette, Ind., has placed an order for a number four boiler with the Su-

perior Machine & Boiler Works, of this city.

Geo. Reinberg is cutting a large quantity of carnations and roses. The Richmond roses are particularly noticeable, and of extra fine quality.

Chas. W. McKellar is the recipient of large consignments of Princeps narcissus from the Hubert Bulb Co., of Portsmouth, Va.

Ernest Farley has accepted a position with the J. B. Deamud Co. and entered upon his duties March 24.

## ORCHIDS

For Easter

I will have a fine lot of Cattleyas, Dendrobiums, assorted Orchids, Gardenias, Lilies, Roses, Carnations, Bullous flowers and all seasonable cut flowers and decorative Greens, Supplies of all kinds. Send for complete price-list, pot plants of all kinds. Let me book your order now on all your requirements.

A recent visit to the Geo. Wittbold Co.'s greenhouses at Edgebrook, found the Easter stock in splendid condition. The white and pink rambler roses will be in full bloom for Easter, as will also a large quantity of lilacs and spiraeas. Otto Wittbold, the superintendent of the place, is particularly proud of the latter and he has reason to be, for they are in splendid condition. The three principal varieties grown are Peach Blossom, Gladstone and Queen Alexandra.

The British Horticultural Traders' party visited the Pochlmann ranges March 25, under the guidance of John Pochlmann and John P. Degnan. The visitors were quite enthusiastic in praise of what they saw of American methods at this establishment and at the commission houses earlier in the day.

Phil Schupp, of J. A. Budlong's, extends a cordial invitation to the trade to visit them in their new store at S2-S4-S6 East Randolph street, into which they will move next week. The store has been renovated and the necessary alterations made and a new Orr & Lockett ice-box constructed.

H. N. Bruns has a very pretty window display of blooming plants and cut flowers at his store on West Madison street. An aquarium of goldfish plays an added feature in the display.

Wm. Lynch, of E. H. Hunt's cut flower department, is looking for a busy Easter and is well prepared with a choice grade of lilies, roses, carnations and other seasonable stock.

The A. Dietsch Co., will furnish the material for the three greenhouses that the C. C. Pollworth Co., of Milwaukee, Wis., will erect this season.

A. Lange and his force of assistants are kept very busy at his store on

The Chicago delegation to the National Flower Show was not as large as anticipated, some going ahead of the regular party and some going later. The party that left on the Lake Shore and Michigan Southern March 23 included: Geo. Asmus, J. W. Davis, Davenport, Ia.; H. B. Dörner, Urbana, Ill.; Emil Glauber, Denver, Colo.; Wm. Hartshorn, Joliet, Ill.; H. B. Howard, C. W. Johnson, Aug. Jurgens, I. O. Kemble and wife, Marshalltown, Ia.; W. E. Kemble and wife, Oskaloosa, Ia.; Otto G. Koenig, St. Louis, Mo.; L. E. Partridge, H. A. Philpott, Winnipeg, Man.; Adolph Pöhlmann, August Pöhlmann, A. T. Pyfer, Joliet, Ill.; W. J. Smythe, J. A. Valentine, Denver, Colo.; C. L. Washburn, Blaine Wilcox, Council Bluffs, Ia.; Glen Wilcox, Council Bluffs, Ia.; J. F. Wilcox and wife, Council Bluffs, Ia., and Mrs. E. A. Wood.

Bassett & Washburn won second prize on American Beauty and Rhea Rheids roses at the National Flower Show held at Boston this week. Con-

sidering the distance traveled, this is a very creditable showing, and they are receiving congratulations from their many friends in the trade. E. B. Washburn reports a good demand for grafted rose plants, especially White and Pink Killarneys, one of the pleasant features of the many orders received is that they come from customers that they supplied last year, who evidently were well pleased with the plants that they received.

Pöhlmann Bros. Co. is cutting a magnificent grade of all kinds of stock, lilies are arriving in good condition and in quantity large enough to meet the demands. This firm won second prize in White Killarney roses at the National Flower Show, held at Boston this week.

The J. B. Deamud Co. is well supplied with a splendid grade of roses, carnations, sweet peas and all other seasonable stock. This firm is having quite a call for a very pleasing daisy which is received and is taking well with the trade.

**U S Budlong's**  
**E Blue Ribbon Valley.**

mention the American Florist when writing

At Vaughan & Sperry's the stock is arriving in large quantities, and a splendid grade of Killarney and White Killarney roses can be seen at the store this week.

The sympathy of the trade is extended to Mrs. E. Misiewicz, 1166 Milwaukee avenue, in the loss of her mother, whose death occurred March 22.

Max Ringier, the well-known store man at Vaughan & Sperry's, is the proud father of a baby boy, which was born on March 27.

# EASTER PRICES

We have never been so well prepared for what we believe will be the **Busiest Easter on Record.** The whole of our vast greenhouse plant is in splendid condition and crops will be at their best for Easter.

## ROSES.

**Not a few but all the best varieties.** The crops are large, the quality absolutely perfect. There are no better flowers coming to this or any other market.

## AM. BEAUTIES.

Our Beauty crop is at its height and we shall have large supplies in all grades for Easter.

## CARNATIONS.

Our immense carnation range is producing magnificent stock in abundance. The flowers were never so good or plentiful and we can truthfully say there are **no carnations in the world to beat ours.**

**Send Your Orders Direct to the Grower and They Will be Taken Care of.**

## Welch Bros.

Wholesale Cut Flower Market

226 Devonshire Street, Telephones { 6267 { Main Boston, Mass.  
6268

In accordance with the provisions of an ordinance passed by the city council, the new street numbering system which provides for one hundred numbers in each block, will become effective April 1, 1911. This will necessitate a change in the numbers of all the business houses of the city and to facilitate the sorting and delivery of the mail, customers ordering of the wholesale houses should address their mail to the new numbers which will be found in the advertisements. The new postal regulations do not provide for Sunday deliveries, except on special deliveries, and orders for Sunday shipments should be forwarded so as to arrive Saturday, or mailed with special delivery stamps.

Hoerber Bros. are supplying their customers with Killarney roses of A 1 quality, the mignonette that they are cutting is eagerly sought for by the best trade. Will Hoerber presented each of the British Horticultural Traders a souvenir postal of their large range at Desplaines, when they visited their store last week.

The Foley Manufacturing Co. will furnish the material for a range of vegetable houses to be built on O. C. Barber's Anna Dean farm at Earberton, O. This range will consist of six houses 800 feet long.

Vaughan's greenhouses have a fine stock of Easter Rambler, Dorothy Perkins and other roses, hydrangeas, genistas, rhododendrons and other seasonable plants.

Peter Sroczynski, 153 North Harding avenue, has several houses of lilies that are in splendid condition.

County Commissioner J. A. Mendel made a business trip to Springfield on March 27.

Visitors: Frank E. Rue and John Nelson, Peoria, Ill.

LARGE SUPPLY.

Stock is arriving in quantity, with the exception of American Beauty roses. Other roses and carnations are of fine quality and are being received in quantity, and there is a full line of bulbous stock in the market.

### NOTES.

Wm. Currie and wife are visiting in the east, they are attending the National Flower show at Boston this week. Roy is in charge of the store and is having his hands full looking after splendid trade, which the store has built up.

Holton & Hunkel Co. is cutting a choice grade of roses, carnations, lilies and lily of the valley, the latter is of A 1. quality and is greatly appreciated by the trade. This firm is well supplied with blooming plants for the Easter trade.

C. C. Pollworth Co. is filling a large number of orders for a fancy grade of carnations. The Mrs. C. W. Ward that were seen at the store this week were of exceptionally good quality.

The M. A. McKenney Co. is having a good call for funeral and other work. J. Newbeck, with this firm, is looking for a busy Easter, and is making preparations for a big trade.

Gustav A. Pohl will rebuild three of his greenhouses this spring, and has already placed the order for the material with the John C. Moninger Co., of Chicago.

C. C. Pollworth and Nic. Zweifel are attending the National Flower Show at Boston this week.

Walter M. Maas & Co., 128 Oneida street, reports trade in general as exceptionally good.

G. H. Hunkel Co. is kept very busy filling the many mail orders that are received.

Nohos & Co. are enjoying a good transient trade at their store on Grand avenue.

Wm. C. Zimmerman has had a busy season at his large store at 432 Grand avenue.

Clark E. Adams, of Racine, Wis., is a frequent visitor to this market.

### Chicago Bowling.

On March 23, the Orchids won three games from the Carnations and the Roses won two and lost one to the Violets. Allie Zech was high man of the evening, having a total of 290 pins in the last game played. Fisher, Winter-son and Huebner also bowled in the neighborhood of the 200 mark. The following table shows the number of games won and lost by each team to date:

| Won Lost                                              |             | Won Lost       |             |

### AMERICAN BEAUTY ROSES SCARCE.

The feature of the market is the extreme scarcity of American Beauty roses the past week, it was two days' work to raise a dozen specials. It is hard to account for this state of affairs as there are house after house of this variety under cultivation for this market, but just at present everybody seems to be off crop, and buyers have to take Killarney or Richmond. There seems to be an abundance of other stock for business. The past week has been slow, many of the flower buyers apparently being out of town at the shore, where the hotels are reported at doing a rushing business. There is a fairly good shipping trade reported by the wholesale men, who are able to keep down the surplus by this outside demand. Orchids are a bit scarce, but the Cattleya Mossiae crop is showing strong and before long will be in full flower. There is no question but the demand for cattleyas is constantly on the increase and this city is rapidly becoming a factor in the sale of these flowers. The stocks that are being grown for this market have passed the experimental stage and thousands of dollars are now being invested where hundreds were thought extravagant before.

The poor attendance of the spring show of the Pennsylvania Horticultural Society, the excellence of which merited greater recognition from the public, is a matter of deep consideration with the friends of the society. Henry F. Michell thinks that tickets of admission should be sold at greatly reduced rates to seedsmen or florists or horticulturists, who would mail them with their compliments to customers or others whom they think would be interested, and thus get them to the exhibition. Some think it would be wise to have a last day free to the public so that on seeing the beauty of the show they might become interested in the work of the society.

Lilies will be fairly plentiful, but for some reason plants all run short. All growers complain that they could not get height to the gigantesms, which is the variety that is mostly grown this season. Hydrangeas will be a feature as with most growers they have done especially well this season, having come along without forcing and are good and hard.

News comes from Hathboro that Eugene Weiss has concluded to give up business and has sold his place, greenhouse and business to Harry Weiss and Sons, who will carry on the business. Messrs. Weiss and Sons are large growers of carnations, whose place adjoins that of E. Weiss and the two will now be operated as one plant.

The Floracraft Gardens have put a Ford car in use in their delivery service and are much pleased with its work, as it makes a nice appearance and appears to be a great time saver. Lily of the valley is a special feature with this firm, the output being over 10,000 per day during the winter season.

Easter preparations are growing with the near approach of the holiday, the store men are full of preliminary work

arranging their stock to make every foot of room possible. Baskets are being touched up, new stock laid in and everything possible done to lighten the extra work at this busy time.

## Boston.

### THE FLOWER SHOW

Trade is about the same as that of last week. White roses and white carnations are scarce and bring good prices in the markets. If anything, prices are a little steadier than they were. The flower show is the all absorbing topic, and from the attendance on the opening night and part of Sunday, the financial end ought to be all right. It has been well advertised (this is the greatest proposition in any business undertaking, to know how to advertise, and draw the crowd) this also applies to our trade advertising. Some may be brilliant in many lines, but the wording and general make-up of an advertisement is what catches and holds the prospective customer's attention. The visitors from everywhere are coming in to see; and the opinion of many with whom I have spoken is "the greatest show that was ever got together." There is a great quantity and the quality is ahead of anything expected.

## NOTES.

Some of our noted, far-sighted florists are helping the show by putting in a nice exhibit. One in particular is Fred Palmer. He made a nice display of palms, ramblers, azaleas, and spring flowers. It is men like Mr. Palmer who help things along, while expecting nothing in return.

FREDERICK, Md.—Charles Hermann has erected a large addition on the South street end of his greenhouses, which is now filled with flowering plants making an attractive sight.

TRENTON, N. J.—Four greenhouses filled with Easter stock belonging to Groeller Bros. were destroyed by fire March 17. The fire was caused by the boiler house stack blowing down which crashed through one of the buildings and sparks ignited the woodwork. The loss is about \$3,000, partially insured. The buildings will be replaced as soon as possible.

## RICE BROTHERS

Wholesalers of Cut Flowers  
and Florists' Supplies.

Minneapolis, Minn.

Pittsburg.

STOCK VERY PLentiful.

Very little can be said of the change in this market for the better. Outside of the funeral work there is very little doing this week, and prices remain very low. Lilies and all bulb stock are coming in very plentifully. Violets are a drug. Fakirs are selling them on the streets at 10 cents per bunch. Greens of all kinds are plentiful, excepting asparagus plumosus.

NOTES.

J. J. Bolton, of Beaver Falls, has dispensed with coal for heating his greenhouses. A big "gasser" was drilled on his farm last week.

B. Huscroft, Steubenville, O., has the auto fever bad and we expect shortly, to hear of him breaking a few records.

Frank Farney, of Rice & Co., Philadelphia, Pa., was a business caller March 25.

Geo. L. Huscroft, Steubenville, Ohio, stopped off in Pittsburg on his way east.

J. G. Neville, East Liverpool, Ohio, was a recent business caller.

Charles Dougherty, McKeesport, is laid up with lagrippe.

J.

## To Whom It May Concern:

To meet the demand we are in need of good **Lillies** and **Roses** and can secure for you the best market values. **Growers** of all other good stock can find a steady and continuous market here.

## BADGLEY, RIEDEL & MEYER, Inc.

### 34 West 28th St., NEW YORK CITY.

Telephone: 1664-1665 Madison Square.

Growers are cordially welcomed to use our office facilities when in New York City.

#### New York.

##### COLD WEATHER.

The severe cold weather we have been having has had everything but a good effect on the flower trade. Some kinds of stock have shortened up in supply on some days owing to continued cold winds prevailing. Roses are plentiful enough for all demands, and little change in prices are seen. Carnations are very plentiful and violets are almost a glut. Narcissus of some kinds are not so numerous consequently, not much cutting of values is being done. Gardenias are much more plentiful than they were. Cattleyas continue in steady supply, with no change in prices. Lupins and antirrhinums are received in larger quantities, trailing arbutus has arrived though in small lots as yet. Lily of the valley is plentiful as also are callas and longiflorum lilies. The street men can not operate much owing to the cold and flowers of most sorts are accumulating in the hands of the dealers.

##### NOTES.

The following visitors and New Yorkers en route for the Boston show proceeded by the Fall River boat, March 24: H. Komitsch, Secaucus, N. J.; Geo. Baldwin, Mamaroneck, F. L. Moore and daughter, Chatham, N. J.; J. L. Powell and wife, Millbrook, J. A. Manda, Orange, N. J.; John Hay, John Westcott, A. Pericat, Geo. Watson, Chas. Meehan, T. Logan, S. Batchelor, W. Kleinheinz, J. Dadds, all of Philadelphia; Fred Burki, A. Randolph, E. Reinemann, Pittsburg, Pa.; L. B. Codrington, Murray Hill, N. J.; D. McIntosh, Tuxedo, R. Simpson, Clifton, N. J.; James Dean, W. Kessler, C. F. Meyer, John Miesem, O. V. Zangen, W. E. Maynard, New York; W. Duckham and wife, Chas. H. Totty and wife, Madison, N. J.

Mrs. W. C. Krick has purchased the retail business long established by J. Herman, Gates avenue, Brooklyn, taking possession about March 10. This is close to the location where the late W. C. Krick carried on a retail business for many years.

Wm. A. Blaedel, who for many years has conducted a retail store at 482 West Twenty-third street, died March 15. The business will be continued under the firm name of W. A. Blaedel Sons.

There is still quite a little delay in the express deliveries in the wholesale district every day, occasioned by the drivers and helpers being new to the business, rather than to anything else, the strike is supposed to be over.

John Donaldson is still suffering from his attack of rheumatism, and much to his as well as his friends' regret he was unable to go to the National Flower Show at Boston with the New York party.

At John Scott's, the Easter stock is looking in splendid condition, lillies,

azaleas and hydrangeas are in very large quantities and there is a fairly large stock of *Acacia paradoxa*.

W. E. Wallace, the English grower, together with Mrs. Wallace, sailed for home in the Campania March 29, they spent a few days at the Boston show prior to leaving.

The early morning plant market will open April 1 at Fifty-ninth street, under the arches of the new bridge, between First and Second avenues.

Carl Strumm has so far recovered from the broken ankle which he sustained several weeks ago as to be able to lay his crutches aside.

Visitors: E. N. Kroninger, Allentown, Pa.; G. H. Hoskins, Reading, Pa.

The Bowling club is very well pleased with the new alleys at the Ardsley hotel at Fourth avenue and Thirty-second street, and will bowl every Friday evening for the balance of the season, and after Easter there will be several match games. The scores March 25 were as follows:

#### Buffalo.

##### MARCH WEATHER.

Spring weather with the usual winter furies, has been with us the past week. Stock has been equal to all demands, as society is not very active. All Easter stock, according to reports, is up to all expectations, and with favorable weather everything should be of good quality.

##### NOTES.

Lenten quietness in the flower business was enlivened by the marriage of Oscar Loewindorff, an employee at S. A. Anderson's to Miss Irene Juerns. The wedding took place March 18. The happy couple are now living like turtle doves in a neat little cottage built for two.

S. A. Anderson has had some fine rhododendron plants from his Elmwood avenue place that have been the talk of the city; other potted plants of various kinds are seen in the stores, making all the windows very attractive.

The Buffalo contingent to Boston was quite large, and with the visitors from the other cities the National Flower Show will have a large attendance, not only from the United States, but also from Canada.

Bargain sales in violets, carnations, etc., are seen well advertised on the windows on Saturdays, which help to make what would be a somewhat quiet day very lively.

DETROIT, MICH.

### St. Louis.

#### ABUNDANT SUPPLY.

High winds have prevailed during the week which have done more or less damage to glass. Flowers are plentiful and prices low. Violets are approaching the end, and sweet peas have become far too plentiful. Carnations are in abundance and sell cheap in order to clean out. Roses are also in good supply with the exception of American Beauties.

The retailers surprised Wm. H. Smith March 24, when Chas. Schoenle, Robert Windler and J. J. Beneke, on behalf of his friends, called at his home and presented him with a solid silver punch bowl and glasses.

Otto G. Koenig, will boom the St. Louis Flower Show which is to take place next fall, when the Chrysanthemum Society meets here, while attending the National Flower Show at Boston.

F. C. Weber, Theo. Miller, Fred Meinhardt and J. F. Ammann left for Boston March 25, to attend the National Flower Show.

The Paris Floral Co. have rented the two stores adjoining the one they now occupy and will have a roomy and commodious store.

Joseph Wors, son of C. W. Wors, has accepted a position at the C. Young & Sons Co.'s greenhouses.

During the week the plantsmen have been kept busy with store openings and spring sales.

W. F.

### Nashville.

The flower trade has been very quiet since the beginning of Lent, even St. Patrick's day making very little stir. The usual supply of green carnations was on hand and a good sale, but nothing remarkable, made on them. The supply is fair and sufficient for all demands. Activities are kept up just now almost entirely in funeral work, which is good. Carnations are a little off crop, but roses are beginning to come in nicely and will surely be in full flower for Easter. All energies are being bent now on the Easter supply which promises abundantly in both plants and cut flowers. There will be plenty of lilies, roses and carnations. All the bulbous stock is plentiful now, and fills in for whatever shortness there is in roses and carnations.

#### NOTES.

McIntyre Bros., who are among the most industrious and successful florists of the city, have made a new purchase of a large place on which to establish their greenhouses, while the old ones will not be abandoned. The new place consists of thirty-six acres on the Kilvington boulevard, located two and one-half miles from the public square,

and approached very nearly by the trolley cars. They will not take possession of the property for some months yet, but in the meantime will be preparing to make their improvements in the quickest manner possible.

M. C. D.

### Rhinebeck, N. Y.

The largest violet producing section in this country, if not in the world, is at Rhinebeck, N. Y., a town located in a delightful section on the Hudson river, a short distance from New York, amidst the many towns which the wealthy New York merchants and bankers have selected for their residences. Many of the growers of this section ship their product to the large commission houses for here are located from 175 to 200 establishments devoted to violet culture. The Rhinebeck Violet Association, however, deals directly with the florist and a correspondent of the Poughkeepsie Evening Star thus describes this enterprise: "In five years this association has built six houses of modern construction, 20x200 feet each and under these roofs which cover an area of 24,000 square feet, are housed 45,000 plants. The rich soil taken from the grounds of the association adjacent to the houses, where the company own several acres, has much to do with the healthy perfect growth of the plants and the development of the blooms. The growing is under the charge of Superintendent John Kolbinski, a practical grower, who thoroughly understands violet culture and the propagation of and culture of the plants and the shipment of the flowers are under his personal supervision. Connected with the houses are the packing and shipping rooms, which are provided with modern lavatories, baths, etc., and here are located stationary tanks which receive the bunches of violets as fast as they are made up, keeping them fresh. The facilities are such that seventy thousand and blooms can be speedily handled, and the company has acquired a reputation for getting its flowers into market in prime condition.

Speaking of the industry in general about Rhinebeck, Ernest Steenburgh, president of the association, says: "The violet raised in the Rhinebeck houses is acknowledged the superior of others. It is not raised elsewhere to any extent. This is said to be due to the soil, water and air. We grow the Marie Louise and Farquhar, the double violets, which bloom in deep rich color, have a soft velvety surface, and an enduring freshness and fragrance, largely because of the experience of the growers and the care they give them. The violet is taking the place of lilies for Easter, is in greater demand for the holidays, and has become

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, June, 1911.

GLADIOLUS planting stock should go into the ground early.

INCOMPETENCE, not dishonesty, is the bane of seed trade helpers, says an experienced seedman.

POTATO growers are stiff on contract prices. They need a 17-cent spring trade again to bring them back to earth.

"LITTLE brown brother," Japanese bulb dealer and grower, is thought to be willing to boost lily prices as well as dividends.

ONE Western mail order seedman, who reports the season 20 per cent behind last year, attributes the falling off to the bad drought of last summer.

Chicago.—Prices on the board of trade March 29 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

VISITED BOSTON: W. Atlee Burpee, Philadelphia, Pa.; J. C. Vaughan and wife, Chicago; R. Livingston, Columbus, O.; W. E. Marshall, Ralph M. Ward and Harry Bunyard, New York.

EIGHTEEN THOUSAND packages of flower and vegetable seeds are to be turned back to the Department of Agriculture from this state because nobody wants them.—Schenectady (N. Y.) Star, March 21.

H. CHEESEMAN, representing Vaughan's Seed Store, writes from San Jose, March 21. "The floods in the valley are the worst in 20 years, considerable damage to crops must result. I noticed several onion fields under water, some lettuce in same condition. It will be some time before much work can be done."

FRENCH BULB prices, wholesale, probably will be fixed in the growing district about the first or third of April. There is no certainty that the slow sales of these bulbs in America last season and the surplus of white Roman hyacinths will be reflected in the new prices as local conditions are more likely to be considered.

## California Seed Crops.

Hollister, Calif., March 22.—It is difficult at this time to estimate the actual damage from flood and rain. In a general way we would say that onion has been damaged 15 to 20 per cent, one grower having entirely lost 90 acres. All growers are more or less injured, several hundred acres being under water, one to four days. Lettuce is also severely injured, but this item can be replanted. Radish being grown generally on higher ground, was not seriously injured. Some of the growers had not finished planting when the rain commenced March 6 and have been unable to work the ground to date. There will be a considerable acreage, lettuce, radish, etc., to be planted as soon as ground is in condition, which will make a large proportion of the California seed crops very late this season and in the absence of late spring rains they will be considerably under normal. One grower lost his entire carrot crop. One seed ranch had 200 acres under water several days. The storm carried away all bridges in San Benito county, where several large growers are located. Santa Clara county suffered heavily, also San Joaquin. There is heavy damage in the seed growing section in the southern part of the state, particulars of which we have not received as yet.

PIETERS-WHEELER SEED CO.

## Business Conditions.

Comparing the business conditions for 1911 with the same period in the years 1909 and 1910, the following have submitted their views in regard to the situation up to the date of writing.

Des Moines, Ia.—The Iowa Seed Co. advise us as follows: "We have received far more catalogue inquiries this season than we did last year. During January and February we received more retail orders than last year, but they amounted to less in money. So far in March our trade has been just about 10% less than last year, both in number of orders and in amount of money. We think the difference is in the seed corn trade which is almost nothing this year, while the demand was unusually heavy last season. This year's trade is better right through in all departments than two years ago. Last year we had considerable warm weather during the first half of March so that the local trade started in earlier, while this year, we had rather cold backward weather, and nothing could be started. During

the past week, however, trade has started up lively and the local demand is rapidly gaining what it lost in the early part of March."

St. Paul, Minn.—L. L. May & Co. state: "The catalogue trade in comparison with last year, has been disappointing so far, and not up to the volume of sales a year ago. We note a falling off in the demand for field seeds. We presume, however, this is largely due to the adverse season of last year on account of the drought, and it seems, at the present writing, the same condition may exist this year. Everything is exceedingly dry in the northwest. If we have a quantity of moisture next month, it would help very materially, but we doubt if this year's catalogue seed trade will equal 1909 or 1910."

Grand Rapids, Mich.—The A. J. Brown Seed Co. writes: "Trade with us the first part of March was not up to last year by 20%. Since March 15 it has been on the gain and up to date we are not very far behind last year. If the demand continues we think we shall not fall behind March a year ago, and there is a possibility that we may show a slight gain, although that can hardly be expected for March 1910 was a record breaker."

Orange, Conn.—S. D. Woodruff & Son, write: "We are in the midst of what we believe to be the biggest rush of business in the history of our establishment and trade in all lines has been far ahead of 1909 and somewhat ahead of 1910. The demand for critical stocks has never been so great. From present indications, it looks as if the year's business would show a material growth above any year in our experience."

Minneapolis, Minn.—Northrup, King & Co., inform us that the 1911 business compares favorably with that of 1910. Our section of the country needs moisture. If we had good rains for a week or more our trade would improve very much.

Louisville, Ky.—Woods, Stubbs & Co. state that the seed business shows a marked improvement over previous years, on both garden and field seeds and high prices on some stocks has lessened the demand.

Chicago.—Vaughan's Seed Store reports: "Book accounts are ahead, mail orders ten to fifteen per cent behind. Counter trade about the same."

# The Two New Carnations for 1911

## WHITE WONDER.

The largest and most productive white carnation. Has all the white varieties outclassed.

## GLORIOSA.

Pure glistening bright pink. A decided improvement over all the pink varieties in color and every other respect.

The two carnations that will prove to please all growers and the most critical buyers. Commercially they will head the list of varieties grown in the future. Do not fail to grow these varieties that have been inspected and have met the approval of many of our best carnation growers. If you have not already ordered, **Do So Now.** Next delivery—White Wonder March 27, and Gloriosa April 4. Our March 15 delivery of White Wonder and March 15 and 27 delivery of Gloriosa were all sold in 5 days after our advt. appeared.

Prices: \$12.00 per 100; \$100.00 per 1000; 2,500 for \$237.50; 5,000 for \$450.00.

## F. DORNER & SONS CO., La Fayette, Ind.

# CARNATIONS

## White House

The Quality White. Won the Silver Cup at Morris-town for best undisminated variety; Bronze Medal at Pittsburg, and five other certificates. Absolutely non-bursting, clean and kind in growth, and a variety that will make good. We have 10,000 for March delivery, and that is all we will be able to supply.

## Princess Charming

The finest thing in sight in the Enchantress shade of pink. Every bud a perfect flower, and your net returns per square foot will surprise you.

Our stock is limited, but we are still in a position to supply first-class rooted cuttings of this variety at \$12.00 per 100; \$100.00 per 1000.

## CHRYSA nthemums

We catalogue over 500 varieties, and surely we have the kind you want.

CHAS. H. TIPPY,

MADISON, N. J.

### Cleveland.

#### CHANGEABLE WEATHER.

The past week was a typical March sample of weather, snow, rain and bright springlike weather in liberal proportions, but the business was satisfactory notwithstanding. Callas and Easter lilies had a remarkably good call, and stock is of exceptionally fine grade. Roses are becoming plentiful, but the demand so far has kept them moving along nicely, some very good sized orders coming in daily, both for city and shipping trade. Carnations are becoming more plentiful, but the demand is good, although the price on quantities has lowered somewhat. Several orders for white carnations for the churches cleaned this color up, and red was also much in demand. Sweet peas are good, and clean up nicely. Violets are in better demand. Greens are becoming more plentiful, but smilax is a little scarce. Bulbous stock is not in such large supply as last week. Box-wood is good and selling in case lots.

C. B. Wilhelm has about completed his new store at 3610 W. Twenty-fifth street, which is modern and up-to-date in every particular. Mr. Wilhelm intends to move from W. Fourteenth street where he now resides to the apartments over the new store.

Copas Bros., Elyria, will move into their new store about April 1.

C. F. B.

## Geraniums

|                                              | Per 100 |

| Saint George, brilliant orange scarlet .....                                                     | oz., 10c          | .40 1.50 |
| Salopian, one of the best of the dark bright reds .....                                          | .10               | .25      |
| Scotchman, chocolate, striped white .....                                                        | .10               | .30      |
| Sun's Queen, creamy buff, flushed pink .....                                                     | oz., 10c          | .25 1.00 |
| White Wonder, the many-flowered white .....                                                      | .10               | .40      |

### SWEET PEAS

Vaughan's Prize Mixture—This mixture contains the cream of the new and standard sorts, including most of the new Spencer varieties. It is made up entirely of separate named sorts, carefully proportioned as to its composition, and we can safely say "there is no better mixture in existence," no matter at what price or under what name it may be offered. Per  $\frac{1}{4}$  lb., 20c; 1 lb., 60c; 10 lbs., \$5.50; 100 lbs., \$50.00.

### IN MIXTURE

Vaughan's Florist Mixture—This is a mixture made by ourselves, of principally light-colored varieties, suitable for florists' cut-flower trade. It is a very carefully proportioned mixture and gives satisfaction. Per  $\frac{1}{4}$  lb., 25c; 1 lb., 60c; 5 lbs., \$2.75.  
Eckford Mixture—This mixture contains over thirty varieties, including some of the novelties of 1910 and other choice sorts. Per  $\frac{1}{4}$  lb., 10c; 1 lb., 25c; 10 lbs., \$2.00.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice President;  
S. W. Severance, 503 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruettenk, Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

Plow and harrow quick; do it now.

MEXICAN cantaloupes will probably be a record crop this year and about 200 cars from the western part of the country will be shipped to the United States. The crop, according to figures given by experts, will mature about a month earlier than the Imperial Valley and Coachella (California) cantaloupes and owing to the abundant rains and absence of frost will be greatly in advance of other years in quantity and quality. The earliest shipments will go directly east but later western points will be served before local crops are ready.

### Prices of Indoor Fruits and Vegetables.

New York, March 24.—Mushrooms, 60 cents per pound; cucumbers, 20 cents each; lettuce, \$1 per dozen heads; tomatoes, 25 cents per pound; radishes, 50 cents per dozen bunches; asparagus, \$6 per dozen bunches; rhubarb, \$1 per dozen bunches; grapes, \$1.00 per pound; beans, 25 cents per quart; peas, 40 cents per quart.

Chicago, March 27.—Mushrooms, 30 cents per pound; cucumbers, \$1 to \$1.40 per box, small; lettuce, 17½ cents to 20 cents per pound; radishes, 20 cents to 40 cents per dozen bunches; rhubarb, 40 cents to 60 cents per dozen bunches.

### Diseased Lettuce.

ED. AMERICAN FLORIST.—

Can you inform me what is the matter with my lettuce plants of which I send leaves? I find a lively white bug on the leaves, is it the cause? Can I use sulphur and lime on hot water pipes and how much for a house 28x95 feet? If the sulphur and lime cannot be used could I burn sulphur? How much nitrate of soda should be used on a bench of lettuce, 5x95 feet and 4 inches deep. A SUBSCRIBER.

The specimen leaves arrived too shrivelled and dried up to permit a fair examination. The traces of white would lead one to believe the whole would lead one to believe the whole trouble was mildew. If this is the case, the enemy is a more formidable one than most any insect pest. We believe mildew is more destructive than an insect pest. It is generally caused by high temperatures followed by cold air currents such as open doors or too much air on ventilators in windy weather. Excessive moisture overnight is also a bad factor. Mildew will yield to sulphur, if combined with proper growing conditions, and the latter remedy is more important than the former. No amount of fumigation will correct bad management in regard to heating and ventilating. We have in these columns dwelled at length upon the importance of keeping lettuce on the cool side to encourage a sturdy growth which is almost immune to mildew. The

time to tone up lettuce is in the morning, just as soon as the temperature advances, put on some air.

Sulphur does not work well on hot water pipes as the temperature is generally too low. There are several patent fumigators on the market which evaporate sulphur. Burning it is dangerous practice. Sulphur is used to combat mildew and not insect pests. If the white enemy is an insect it must be a white fly, which we have never seen to attack lettuce. The remedy for white fly is hydrocyanic gas. If Subscriber wants to use this he had better study up thoroughly and commence with mild doses to find the proper strength. If we try a new remedy we never depend on any formula preferring to find our own safe line by a little experimenting. The amount of sulphur can be regulated by applying it while at work in the houses. It should not exceed a point where the operator would be compelled to leave.

The question in regard to nitrate of soda cannot be answered on a set formula as so much depends upon the condition of plants and ground. We always use nitrate and potash in combination, about one pound of potash to two of soda, and apply this between the rows after plants have a good hold. It is better to apply lightly once a week than heavy doses at one time. We have always had good results from the use of nitrate of soda but it is up to the grower to a very large extent to find the right amount and the right time to use it.

FALLING PRICES.

Going down! These two words give in a moment the movement of prices the last few days of last week and first part of this week. The demand was about normal, while the increased supply grew every day. This week started with a little stock left over from last week, but very large amounts came in on the early consignments from local growers, which until noon had not cleaned up entirely. Last week a number of large openings helped clean up the surplus in the market, but this was of course, at very low prices. Roses are coming in with a rush. The Killarney and White Killarney are as good as at any time this season. The Brides and Bridesmaids are excellent. Ivory and Mrs. Taft are arriving very strong. More than a sufficiency of Richmond are offered. Carnations are still holding up well as far as numbers and quality are concerned. The white is still bringing better prices than the others, but the prices of all have shaded. Easter lilies and callas are more than plentiful. To the list of bulbous stock has been added many shipments of small outdoor jonquils. On last Saturday some of the retailers along Vine street offered a special on these at five cents per dozen. Sweet peas, too, owing to the large quantities cut, have dropped in price. Lily of the valley sells none too well. The supply of and the call for asparagus, spengeri and plumosus is about equal. The early part of this week smilax ran short in the wholesale houses. H.

## The Nursery Trade

American Association of Nurserymen

W.P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shenandoah, Ia., Vice-Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

P. J. Berckmans Co., Augusta, Ga.

An erroneous report having been circulated that Fruitlands, the famous nursery owned by the late Prosper J. Berckman's, is to pass out of the control of his sons into the hands of his widow, who was Mr. Berckmans' second wife; it can be stated that the Fruitlands nursery is conducted by a corporation under the well-known name of P. J. Berckmans Co., the entire stock being owned or controlled by the late Mr. Berckmans' sons, Louis A., Robert C. and Prosper J. A. Berckmans Jr. Some years ago the late Mr. Berckmans made a deed of gift to his wife, but to the sons was left a large tract of land, which, in connection with other lands controlled and owned by them, will be amply sufficient for the conduct and enlargement of the business.

American Association of Nurserymen.

THIRTY-SIXTH ANNUAL CONVENTION  
JUNE 14, 15 and 16.

The members of this wide-awake association certainly have a great treat in store by the selection of St. Louis as the place for its thirty-sixth annual gathering.

The official program is not yet completed, but we have been able to learn from Chairman J. D. Dayton of the programme committee, enough to indicate a little of the treat in store. It is not intended to provide a surfeit of papers—just enough to fill the morning hours of each day, leaving the balance of the day at the disposal of the entertainment committee. Members will have the privilege of listening to such distinguished speakers as Professor Hunter and Professor William Trellease, of the Missouri Botanical Gardens, and a possible address of welcome by ex-Governor Hadley.

There will be no railroad certificates, the guarantee required being prohibitive, but tourists rates will be available from central points, and members should at once place themselves in communication with their local ticket agents. Taken altogether the outlook for an exceedingly large and successful convention is most excellent, and it will not surprise us if there are as many ladies present as gentlemen.

Secretary John Hall expects to issue his official circular early in April, and in the meantime he asks that members make prompt remittance of dues and applications for space in the badge book. His address is 204 Granite Building, Rochester, N. Y.

#### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown  
in the pink dark class.

Won first honors in the 100 class for the best dark  
pink at the A.C.S. meeting, Pittsburg, January, 1910,  
also at the Chicago Flower Show, November, 1909.  
It is a pure, bright dark pink of even shade, size  
3½ inches, an early and continuous bloomer,  
brings fully 25 per cent more flowers to the plant  
than Lawson at its best; flowers well shaped on  
long wiry stems; calyx does not split. It is a good  
shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per  
5,000, \$400.00. 25 at 100 250 at 1000 rates. Place  
your order now to be in on early deliveries.

# FINE FERNS

— Ready for —  
Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first class plants of exceptionally good value—plants that will please the most critical buyers, both in regard to quality and value.

## Nephrolepis Elegantissima (Improved)

The finest of this type, never showing a Boston frond. It has not reverted for the last four years. Fine plants 6-inch pots, \$6.00 per dozen; 8-inch \$12.00 to \$18.00 per dozen; large specimens in 12-inch pans, \$3.00 to \$5.00 each.

## Small Ferns for Fern Pans

Best and hardest varieties, assorted—Pteris Mayii, Wimsettii, Adiantoides, Aspidium Tasmense, Cyrtomium Falcatum, etc. Nice plants, 2½-inch pots, \$3.50 per 100.

## Nephrolepis Elegantissima Compacta.

This bears the same relation to Elegantissima that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants 6-inch pots, \$6.00 per dozen; 8-inch, \$18.00 per dozen; extra fine specimens in 12-inch pans, \$5.00 each.

## CROTONS

Fine assortment, well colored. 5-inch pots, \$9.00 per dozen.

**Wm. Swayne,**  
KENNETT SQUARE, PA.

Davenport, Ia.

The fifth annual banquet of the Tri-City Florist Club was held at the Outing club, Davenport, March 23. This affair was to have been held at the Watch Tower inn, Rock Island, but owing to an accident there, the change was made necessary. It was one of the pleasantest affairs ever given by the club and was well attended. The decorations surpassed anything ever made before, and were, no doubt, the finest ever seen upon a like occasion in this part of the country. The committee in charge deserve great credit for the manner in which everything was managed. Theo. Ewoldt, president of the club, acted as toastmaster, and the members responded in a happy vein. After the banquet, dancing was enjoyed for the remainder of the evening, and a most pleasant social time was held, until the early hours of the

#### EASTER PLANTS BACKWARD.

Three weeks before Easter and owing to the very severe winter plants will require a lot of forcing, almost all the plants will have to be forced to the limit to get them in on time. The same condition prevails almost everywhere, if Easter was not so late it would be next to impossible to have enough in on time. Lilies are well budded and with good foliage, but short in stem. Hydrangeas look promising with every shoot a bud, and if far enough advanced to color them in a cool house, will be grand. Spireas, as usual, will be in quantity. Lilacs, rhododendrons, deutzias and other flowering shrubs are forced in greater numbers now than formerly. Bulbous stocks are very fine and are easily handled at this time. Cut flowers are mostly shipped in, only about ten per cent of the supply being produced in this vicinity. The late carnations are looking very healthy and full of buds, and as the retailers always favor the home grown, the growers are bound to receive a handsome profit.

#### NOTES.

The sale of cut flowers in department and drug stores has forced several centrally located florists to prepare to move into cheaper quarters by the first of May. This is a serious competition to the florist. The stands are occupied at low rental in drug and other stores, sales are for cash only, no delivery except perhaps a boy, and the florist claims that prices are lower than those at which they are able to buy. This matter demands attention and the wholesaler made to see that if allowed to continue the cut flower trade is bound to go entirely into such hands, and then what is to become of the select and No. 1 stock?

The private conservatories were opened to the members of the Montreal Horticultural Society on certain named dates during February and March and list of places and dates furnished the members.

The delegation from this city to the National Flower show in Boston was not very large. James McKenna, G. A. Robinson, Wm. C. Hall, T. Gorman, A. Ferguson went March 25.

Radical regulations regarding the importation of nursery stock have been enacted by the government. Importation is restricted to certain ports and at stated periods.

LUCK.

READING, PA.—E. H. Bearse & Sons have moved to No. 40 North Ninth street. Owing to increasing business, the firm was obliged to secure larger quarters.

DENVER, COLO.—Preparations are under way by the Chamber of Commerce to hold a flower and fruit show in this city the coming fall. The agricultural committee of the chamber is composed of C. R. Root, Charles F. Best, William W. Griswold, Ed C. Howe, C. W. Keith, John A. Valentine and A. D. Wall.

## Gold Letters

Gummed Gold, Silver and Purple Letters for inscriptions on Floral Designs. Best and Cheapest on the Market. Send for Samples and Prices.

J. Lichtenberger, 1564 Ave. A. NEW YORK. Telephone Lenox 5644.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD CO., Youngstown, Ohio

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

## What the Users say

### Greenhouse and Residence Heated by One Kroeschell Boiler

Had different kinds of cast-iron boilers. I am assured that I can save about one-third fuel with your boiler. I started firing October 10th, and the fire never went out up to this time, May 12th, 1907. This boiler heats both my dwelling and greenhouses and gives the best of satisfaction. My dwelling is about 40 feet from the boiler. Can recommend your boiler to anybody. It is the only greenhouse boiler.

G. BASLER, Buffalo, N. Y.

# What Can a Man Be Thinking About to Use Wooden Posts?

Actual photograph of  
locust post set in years  
after being set. Former  
chestnut posts lasted  
only five years.

They cost more than iron posts.

Yes they do, and we will  
prove it. They cast more  
shade than iron posts. When  
they rot out, they are a cursed  
nuisance to replace.

You can space the L. & B.  
Guaranteed Wrought Iron Posts  
wider apart—that means less  
posts, less holes to dig—less time  
to set them. Once they are set,  
they are good for a century,  
which is probably as long as you  
will need them.

They are equipped with a base  
to imbed in the concrete, and a  
special fitting to bolt direct to  
our patented Angle Iron Eave  
Plate. The roofbars are fastened  
to the plate by Cast Iron Claps  
which carry off the drip and  
prevent the soaking and rotting  
of bar ends. What's the use of  
wasting your time and money  
on wooden posts and eaves?  
Buy the L. & B. lasters. Send  
for prices.

Actual photograph of  
L. & B. Guaranteed  
Wrought Iron Post five  
years after being set.  
See how light the entire  
side construction is.

**S. Jacobs & Sons,** Established 1871.  
1361-1383 Flushing Ave Brooklyn, N. Y.

## A Pointer on Fittings

There are just four things that go to make fittings fit for greenhouse heating.

**First:** The use of the right kind of tough grey iron—not junk, scrap heap brittle stuff.

**Second:** Cast them thick enough to stand the racket.

**Third:** Cast them accurate so they will be fittings that fit.

**Fourth:** "Know how."

There is about as much know how as iron in one of our dependable fittings.

Sixty years ago we "Knew how." Been getting more "Know how" ever since. That's a guarantee for you that can't be matched. Send for prices. See that Hitchings gets your order.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

**J. G. MASTIN CO.**

3124 W. LAKE STREET, CHICAGO, ILL.

**D**O you know that we have for you a complete ventilating machine, fully equipped, self-oiling and locking for \$10.50, and that we sell arms complete with screws for 24 $\frac{1}{2}$ c. and hangers complete with screws for 8c.? But these astonishing low prices will not surprise you as much as the quality you get for them. Every part made of the best material and designed by men that know. And combined with the numbers of important distinctions about our line is the fact that you and every one of our customers receive the same reasonable price and the best quality of material.

Can you not write us at once about your requirements?

### WE GUARANTEE THE KNOLLWOOD LAWN MOWER

to be equal to any mower made and far superior to most of them. We will prepay the freight to any railroad station east of the Mississippi River, and if it is not satisfactory after you have mowed your lawn with it once you can return it and we will pay the freight both ways and will refund you your money.

This mower is built on correct principles. It has high wheels, ball bearings, four knives made of best crucible steel. In fact, it is a custom made mower. The handles

are made to fit your hands. With the old style handle the hands are always in a cramped and

unpleasant position. Try one of these mowers and see the difference between a 1911 machine and an old pattern.

#### Our 1911 Catalogue

showing illustrations of 300 different tools, also giving price on all kinds of grass, garden and flower seeds, will be mailed free if you mention this paper. Also gives you price on this and our other styles of lawn mowers, both hand and horse.

Our Odorless Lawn Fertilizer is used on some of the largest and best cemeteries in New England.

## Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

## SUGGESTIONS FOR EASTER WORK.

### Easter Preparations.

With the date of Easter as late in April as it is this year, the florist should be provided with a great wealth of the finest stock for this great floral day. Easter marks the opening of spring, in the business world especially, and the bright and warmer days and the great variety of plants and flowers which the florist has at this season, creates a desire to purchase some of nature's beauties in every flower buyer. The winter just passed has been generally very satisfactory, and there is no question but that the Easter trade this year will exceed that of the preceding years. To meet this demand the grower and dealer must be prepared. The lily is, of course, the flower first associated with Easter and perhaps the most necessary plant, for no one can afford to be without this flower and plant at this time. There should be this year a good stock of this important plant, but the retailer should be sure that his stock is secured and it pays, wherever possible, to visit the grower and select the plants and have them reserved. It will be too late to wait until the stock arrives and then find it is not satisfactory, or to put off the selection so late that the choicest have been picked out and there are none left but the culls. The general reports are that the lily crop is of excellent quality, and there will be plenty to go around, but the latter statement is always conjectural until the demand is fully satisfied, and it never pays to get the idea that there is going to be plenty of good stock. The first quality stock sells early and the late buyer is obliged to take what can be obtained. The prices, as far as quoted, are the values at which this stock has been sold for the last few years, and if handled rightly, can be disposed of at good profit to the retailer. The lily can be put to so many uses at this time, it is the necessary plant in all church decoration, can be so nicely arranged in basket work and quantities of pot plants will be sold singly for house adornment, some with pot covers and many with no decorations at all.

Azaleas will be as usual one of the attractive plants at Easter, and while they do not last as long in the houses as do those sold during the earlier winter, there is no other plant that gives so much satisfaction to the buyer, or which gives the purchaser the amount of show for the money expended. These plants decorated with a Porto Rican mat of harmonious color, are great favorites with the best trade. Great care should be taken in the selection of the color of the mat, for these additional features, unless harmonious colors are chosen, detract from, rather than add to, the beauty of the plant. Another idea in much use is the procuring of a cheap pail or tub, of small size, placing the pots in these, and tacking the matting upon them. An added feature of this manner of treating plants is the safety of the pot, there being no danger of its being broken, and the mat is securely fastened so that it is impossible to slip off. The pots of other plants, such as hydrangeas, rhododendrons, rambler roses, and bulb stock can all be treated in the same manner. Low willow baskets of a size suitable for the bulb pans are valuable additions to these and can be procured at a small cost.

### Flowering Plants.

As has been mentioned, the azalea is one of the most important plants at Easter, and among the late blooming varieties are some of the finest of this beautiful and satisfactory plant. The deep pink Mme. Van de Cruysen, the light pink variegated Prof. Wolters, though single, is very beautiful, the lighter shaded Emperor of Brazil and Pres. Oswald de Kerkhove, the darker shades of Dr. Moore and Apollo, with the whites, Niobe and Bernard Andrea alba, are all excellent varieties and supply a variety of colors obtained in few of the many of the plants grown under glass. The azalea mollis also is very attractive, but it lacks the high and assorted colors of A. Indica, as well as the beautiful foliage. As specimens they are not so popular, for the bare stems detract from the appearance of the plant, but they are useful in basket work, especially with lilies or other

white flowers. Hydrangeas are one of the showiest plants at this season, and although among the more expensive, are very satisfactory and when well grown, with six or eight fine heads of bloom, are well worth the prices obtained. Rhododendrons are popular with the buyers who are willing to pay a good price for a large plant, and are very showy, but with a class of trade that does not want to spend more than one or two dollars for a plant can not be considered, for good specimens cannot be grown and bloomed at so low a cost. Spireas are a standby for Easter, and always meet with good sale, and are especially adapted to decorations of all kinds. They are comparatively a cheap plant, especially the older white varieties, but compacta has forced the old Japonica almost entirely out of the market. The latter makes a very good cut flower for some purposes, but as a pot plant is not in the same class with compacta. The varieties of more recent introduction, such as Gladstone, and Queen Alexandra, are valuable additions, and showier plants. It is well to advise the customers, as well as to always remember, that spireas require plenty of water, the heavy foliage and quantity of flowers are a severe drain on the small pot enclosing the roots. Marguerites are always a good selling spring plant if well done and full of bloom and the large plants can be made of use in decorations to good advantage. The bulbous stock is always a great feature at Easter, especially among the cheaper plants, and pans of tulips, narcissus and hyacinths are sure of good sale. Although they do not last long, yet the colors are bright and there is a great variety, and for the price demanded the customer has a very brilliant show. If the pots or pans are covered with water proof crepe paper, matting, or placed in shallow baskets, the sale of these can be materially increased at a small cost. Cinerarias at this season make a most beautiful display, and while perhaps not as satisfactory a house plant as some others, yet make a fine show and are a favorite with many. The variety stellata is much taller than the older hybrids, and makes more show, but does not have the compact heads of the latter. Lily of the valley in pots is always popular at Easter, and is of such easy culture that every grower should at least have a few pans at this time. It does not take the special culture to produce these flowers in early spring that is required during the winter season, and there is a place in every greenhouse that can be adapted to growing this flower in the spring. Cyclamen and primulas are always good Easter plants, and are easily grown for this season by retarding them during the winter months. They are invaluable for basket work. The ericas and acacias are beautiful plants and although slow growing are valuable additions at this time of the year. The flowering prunus are grown extensively near the larger cities, where there is a good demand for something novel, and find ready sale. A plant that is always popular is the genesta, with its bright yellow flowers, and these can be grown into fine specimens; they can be trained in various shapes, some growers having them in pyramidal form, trimmed and shaped like handle baskets or as immense yellow balls.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### Easter Plant Baskets.

SEE SUPPLEMENT WITH THIS ISSUE.

The plant basket has long been a favorite form of Easter present and has proven a profitable line for the retailer. At Easter there are perhaps more flowering and foliage plants than at any other holiday and a retailer has only himself to blame if he does not get a good variety into his baskets and other devices. Of late years simplicity in arrangement has been the prominent note in this class of work and this can be combined with grace and effectiveness with the material at hand. Our illustrations show, far better than we can hope to, how these baskets should be arranged. Beautiful effects can be worked out in one color styles. For instance, as a pink basket we have seen very beautiful results from using Dorothy Per-

nothing in the whole range of plants that can compare with it for the special festival after which it is popularly named. A lily can never be put in the wrong place; it associates well with any and every other kind of flower and plant and does not lose any of its fine individuality or detract from the beauty of the others. It is this quality that makes the white lily so popular for every class of decoration.

### Easter Suggestions.

THE SWAN.

Have a wire frame made in the shape of a swan and cover entirely with white roses, using asparagus plumosus for the necessary green and let it appear as if it were gliding through water, which can be represented with either a mirror, real water, or a plateau made of the delicate blue plumbago blossoms; bank around whichever foundation is used, an artistic wreath arrangement of asparagus plumosus. Take four little ducklings (stuffed Easter novelties) of fair

EASTER BASKET BY C. A. SAMUELSON, CHICAGO.

Crimson Rambler Rose and Adiantum Farleyense in Wicker Basket With Silver Grass Ribbon

kins or Lady Gay roses with Primula obconica or Sinensis, cyclamens or pink hyacinths. Narcissus and daffodils combined with genistas and tied with a ribbon of old gold makes a charming all yellow device and many others can be worked out in keeping with the stock at command.

No flower is so popular at Easter as *Lilium longiflorum*, either as a pot plant or cut and it is equally useful as a basket plant for associating with other species. It stands head and shoulders over everything else in its chaste beauty and charm and there is

size and to each attach narrow streamers of white satin ribbon and fasten to the beak of the swan. A fringe of white rosebuds or lily of the valley can be used around the asparagus plumosus. If a still more elaborate decoration is desired, a canopy can be prettily extended over the center made of lily of the valley and asparagus.

AN EGG LUNCHEON DECORATION.

Have a large wire frame made to represent an egg, cover this with variegated pink and white carnations and tie around the center a chiffon bow of pink ribbon—place the egg on a large

flat basket of lily of the valley arranged flat to the surface, place beneath this a rich fringe of maiden hair fern. The top of the egg can be hollow, so that on either side of the ribbon strawberries with their green stems can be placed in it, arranged so the stems stand upright. Around the egg, and in the midst of the lily of the valley, place smaller eggs at even distances, or better still, arrange the smaller eggs by themselves around the larger centerpiece, making a small mat of lily of the valley for each small egg to rest upon. To add to the color scheme a red mat of satin could be laid effectively underneath the centerpiece and smaller mats.

#### THE GRAPE FRUIT CENTER PIECE.

An odd center piece can be made of grape fruit skins, filling the halves with soft moss. Fill each with a graceful arrangement of yellow primroses, in the center a few sprays of lily of the valley. Attach to each grape fruit a yellow satin ribbon tied in a pretty bow, so that at the close of the banquet the grape fruit can be distributed to the guests as souvenirs, the ribbon serving as a loop to carry over the arm. Around this center arrangement place a wide graceful wreath of narcissus and pansies. Pansy boutonnières will go well with this arrangement.

#### A VENETIAN GONDOLA.

Make the frame work as graceful as possible, covering with red geraniums or carnations. From prow and stern, suspend Venetian lanterns and red flowers, and from one side of the stern extend a long oar of red flowers. This can be placed to good advantage on a bed of Kenilworth ivy surrounded with a dainty wreath of scarlet geraniums. As favors, use small Venetian vases filled with a solid mass of red geraniums, suggesting the rather stiff effect of the Venetian garden, finishing the same with white chiffon bows. The oblong effect of center piece should be accentuated and kept in mind.

#### THE NEST.

Take a large round flat basket and mound with moss to the height of five inches, and cover with white hyacinths arranging the flowers flat. Take a fair sized egg frame and make of violets, arranged closely and evenly, tied with a chiffon bow of violet ribbon. Finish center piece with a loosely arranged garland of maiden hair fern, around which place a tiny hedge of white hyacinths. Garlands of violets can be prettily arranged on the table and corsages of violets for favors. This can also be made prettily of pansies, using the dark purple shades and making the basket of yellow pansies.

A. E. KLUNDER.

#### Cut Flowers and Decorations.

While, of course, the great demand for Easter will be for blooming plants, yet there is sure to be an increased demand for cut flowers, and while the majority of the orders will be for boxes of roses, carnations and other flowers, in boxes, there will be some call for baskets, and on Easter morning a great many corsages will be ordered. Violets are always popular, but it looks this year as if they may be a little past their prime, and of poor quality. The month of March has this year been very bright, and the spring crop of violets has bloomed with a great rush and abundance, which may

cause a scarcity of these flowers by the middle of April. But sweet peas are in plenty and make beautiful corsages, and lily of the valley with orchids or mignonette for those demanding a rich combination, and the daffodils and other smaller flowers can all be used for this purpose. Church decorations are in many places, especially the large cities and towns, a great feature at Easter, and while in many places the plants and flowers are purchased and arranged by the people of the churches, still there are many orders placed in the florists' hands to complete the arrangement. In the first case a word of advice from the florist is greatly appreciated, and, if possible, a look into the church after the decoration is completed, suggesting changes, will greatly assist the amateur decorators and redound to the credit of the one interested enough in his customers to give his assistance. In the decorations arranged by the florist great pains should be taken. As a rule, churches are difficult to decorate; the walls and background are seldom fitting to show off the flowers. This is especially true of flowers of the color of pink and a setting of green is required to bring out the contrast so necessary to make the flowers prominent. The walls should be draped or a bank of palms arranged behind the flowers to make a decoration beautiful, and this should be explained to the one in charge of the ordering, in a manner that not only shows that the florist is a master of his art, but that the expense may be fully covered and the customer satisfied. Just a word in regard to prices. Flowers for the month before Easter have been in many cases very cheap, and while a small advance will be understood, the custom of boosting the prices up to mid-winter mark is uncalled for, and should be deprecated by every one having the interest of the business at heart. It is particularly at this season that the yearly custom of advancing the price to three or four times what the flowers have been sold at for the last two or three weeks that has caused many buyers to designate the florists as robbers. The customers are willing to concede that the demand is large, but they also know that the supply is generally adequate, and they feel that it is a case of "hold up." Be reasonable, young and old both buy flowers at Easter, and it hardly pays to scare away one who, perhaps if he thought he wouldn't be robbed every time he went into a flower store or greenhouse, would become a steady and satisfied customer. And, at all events, shun pickled stock. It is a shame, after accepting an order and taking the money, to send a customer flowers that show when they leave the store or greenhouse that they are going by. Better be honest and return the money, and disappoint the customer in that manner, than to send out stock that is going to be unsatisfactory. Remember the golden rule in a case of this kind, and keep the good will and trade of the customer.

WINNIPEG, MAN.—The cut flower trade has been very good all winter, with considerable funeral work, and the prospects for spring trade are excellent. Owing to so much dark weather the stock has not attained the high grade of some years, but is rapidly improving. The winter has been one of the most severe experienced in the last twenty years.

#### Foliage Plants.

The demand for foliage plants at this time is not as large as at the earlier holidays, for Easter is a flower day, but there is always more or less call for ferns and decorative plants, and they are indispensable in the filling of plant baskets. A stock of these in nice condition should be procured and the plants on hand should be gone over and put into salable condition. Boston ferns are sure to be in demand, for those purchased last fall have in many cases become woe-begone specimens in the residences, and something to replace them will be necessary. Rubber plants are another decorative pot plant that has a good sale; these should be in fine growing condition, and if pot bound should be potted up a size a week or two before Easter. There will be call for palms and stock of *Cocos Weddelliana*, and *Phoenix Roebelinii* are not only a great addition to the store or greenhouse in making a setting for the blooming plants, but in the smaller sizes are splendidly adapted to the filling of plant baskets. *Dracaenas* are always in demand, especially the variegated varieties, such as *D. Massangeana*. In the variegated plants *Pandanus Veitchii* is particularly bright and showy at this time of the year, and an attractive feature in every collection. Small ferns are necessary. The visit to the florist at this time is often a reminder to the householder that the fern dish needs replenishing, and a good stock and variety should be on hand. It is not always easy to find a good assortment of ferns in spring, for many are over grown, and some so badly pot bound that they are stunted, and the procuring of these should not be put off too late.

#### Rambler Roses.

Of late years the rambler roses have taken a very prominent place among the Easter plants, and with some second only to the lily. The many varieties of this rose that have been produced during the last decade give the grower a great selection and variety of colors, for they range from the deepest reds through the pinks to pure white. The old *Crimson Rambler* while still grown by many is being gradually replaced by the later varieties. The *Philadelphia Rambler* is an improvement on the *Crimson Rambler* making a much handsomer plant. *Tausendschon* is a beautiful variety with its mingling of white and red in the flower. *Lady Gay* is one of the most pleasing of the rambler varieties. *Dorothy Perkins* is a beautiful shade of pink, and is always admired when seen at the stores, and the white *Dorothy Perkins* is sure to be a great favorite. *Hiawatha* is still another good variety which, although the flowers are not as double, still are very pleasing and beautiful. These plants, grown in almost any form, are very attractive, but those having long canes are better twined into globular or pyramidal forms. The old rambler could be cut off at two or three feet from the not and make a head of bloom, but it never compared with the plants that were shaped, and many of the newer varieties require that they be grown with the canes twined into form. These plants can be used in handle baskets with telling effect, taking one or two of the long canes and twining them around the handle of the basket, mak-

ing an attractive plant, and it can easily be sold at a price remunerative enough to recompense for all the cost of materials and labor. The Baby Ramblers are very bright and attractive, and when well grown are good sellers, and with many growers are supplanting the taller growing kinds altogether. The crimson Baby Rambler, while not as bright as the old Crimson Rambler, yet is of very pleasing color, and Mrs. Cutchush, the light pink baby Rambler, is a very beautiful shade. The small plants are especially adapted to plant basket work.

#### Advantage of Hot Water Over Steam Heat. ED. AMERICAN FLORIST:

We are contemplating enlarging our greenhouse plant from 8,000 to 11,000 square feet, and would like to ask the following questions: How large a place can be economically heated by hot water? Would it be any advantage to use steam heat, and why? What are the merits of a tubular boiler over the sectional steam boiler?

SUBSCRIBER.

There is really no limit to the use of hot water for heating within the ordinary sized greenhouse ranges, as when it becomes too large to use the gravity or open tank system, a closed system could be installed, and for still larger ranges a forced system of hot-water circulation could be used. The length to which the pipes can be carried will depend on the elevation of the coils above the boiler, but ordinarily 200 to 250 feet is about as far as coils of 2-inch pipe should run. Within reasonable limits the fuel cost will be less with an open hot-water system than with either hot water under pressure or steam.

The cost of installing a steam heating system will be only about 80 per cent as much as for a hot water system, and ordinarily it will be found advisable to put in a steam heating plant when the range of glass is large enough so that a night fireman can be economically employed during the colder months.

While a plant with 12,000 of glass might be heated with steam if a new system has to be installed, it would by no means be the limit for hot-water heating, considering the fuel cost of maintenance.

The tubular boilers are lower in cost than sectional heaters, and generally have rather more effectual heating surface, but they are less durable than cast iron sectional heaters.

L. R. T.

#### Hydrangeas Turning Yellow.

ED. AMERICAN FLORIST:

The leaves on my hydrangea plants turn yellow or light green. Can you inform me what is the cause, and of any remedy? At what temperature should hydrangea cuttings be grown when potted from the propagating bed?

New York.

H. G. W.

The hydrangea plants have probably been grown in either too poor soil or in too shady a location. If the drainage is poor or becomes stopped, the leaves will turn light color owing to over-watering. Plants that are grown in good rich soil, in a light house, with good drainage, have a bright dark green foliage, if the soil was poor, the plants should be watered with liquid manure or with water in which nitrate of soda, one ounce to five gallons of water, has been dissolved. The cuttings when potted should be placed in a house with a night temperature of 50°.

W.

## THE SECOND NATIONAL FLOWER SHOW

Boston, Mass., March 25-April 1.—Continued

### The Closing Days.

The interest in the exhibition at the Mechanics' Hall, Boston, continued unabated throughout the week, and the attendance on all the days was good. The visitors were greatly interested in the great display, going back time and time again, overlooking the exhibits, discovering some new plant or flower that held their attention. The additional exhibits on Friday and Saturday, especially of the table decorations and other floral work, awakened a new interest, and they were the center of attraction on those days and were greatly admired.

The management decided to hold the show open an extra day. The halls were opened on Sunday, April 2, from one in the afternoon until ten in the evening. During the week there were many entertainments and trips to the outside growers which were very interesting. The ladies were entertained with a trip to Concord and Lexington and at a reception held by Mrs. W. H. Elliott at her residence at Brighton. The Gardeners' and Florists' Club held an entertainment and dance on Wednesday evening and a smoker at the Hotel Somerset was another enjoyable feature. Many visits were paid to the greenhouses of the noted growers in the vicinity of the city, one of the places of interest being the houses of Thomas Roland at

Nahant, where the beautiful plants exhibited at the show and so much admired were grown.

So much time was spent in inspecting the show and in enjoying the other attractions that were offered that it was at times difficult to get the members together to attend the meetings of the different societies, but the officers of the several organizations succeeded in carrying out the programme in accordance with the arrangements. Those that attended the show had but one phrase to utter, that it was the best show they had ever seen and they were well repaid for the time and expense spent in attending it.

### Notes and Gleanings.

There is always something interesting for the visiting florist to see in Boston. He can start the day with the markets, and it must be an early start, for they are in full blast at six o'clock. A great variety of stock is here offered; pansies are notably fine, there were plenty of single violets, but the lateness of the season was having its effect and, although better than any seen in the more southern cities, they were said to have been much better a month ago. Yellow primroses or cowslips were a feature and quantities of bunches were sold. Bulbous stock was seen in quantity, as were sweet peas, and such sweet peas. Boston can be said to be the home of

EASTER BASKET BY HARRY C. ROWE, CHICAGO.

Bougainvillea Tied With Pink Ribbon.

this lovely flower, which is nowhere else done as well. Quite a number of roses were offered but they were not of the highest grade. They were handled nicely, being kept in layers of twenty-five with a sheet of paper between which insured their handling without being bruised. There was a goodly quantity of carnations, with a fair showing of snapdragon. Some plants in pots were seen of cyclamen which were wonderfully fine. Nothing like them can be seen outside of Boston at this time; the flowers were of immense size, with stiff erect stems that stood well above the foliage, five and six inch pots carrying as many as fifteen blooms to a plant, and some with even more.

Welch Bros.' wholesale house is an interesting place; it is very commodious and a fine stock in all lines was seen; roses are not in vases, being kept in boxes in layers as seen at the market. They think they keep better this way and are not as liable to get bruised. N. F. McCarthy & Co.'s large auction and commission house is another place where everything looked businesslike and where an immense business is done. The retail stores are quite up to date and compare favorably with those of other cities. Penn's, on Bromfield street, while not one of the largest, was full of business; every inch of space was utilized, and the cases and counters were filled with the choice of the market, both of cut flowers and fine plants. The window was elaborated with sweet peas. At T. F. Galvin's they were moving around lively; the cases were filled with choice flowers, and handsome plants occupied prominent positions. The large show windows contained fine *Adiantum Farleyense* ferns. Handsome and valuable paintings adorn the walls of this store. Wax Bros. featured violets and pansies. Large flat bunches of choice pansies are kept made up for immediate sale. These are arranged with galax leaves which as they are placed in the bunch are cut or slit with scissors and into this opening is pulled the stem of a pansy and drawn down until the flower is flat. The flowers are placed so close together that the leaves are not seen except around the edge. They appeared to be popular as corsage bunches, as quite a number were noticed being worn by ladies on the streets.

E. MacMulkin's large store fronts on two streets and contained a large stock of fine plants and flowers. W. E. Doyle's is also a commodious store, with the added advantage of a conservatory in the rear in which were seen some splendid kentias. Carbone's pretty store is always worth seeing, as pottery and garden vases and statuary and china cut flower vases of many designs and all the exclusive importation of Mr. Carbone, who makes two trips to Europe each season to pick up novelties for his trade, are seen here in great variety, as are many baskets of unique shapes, which are also the selection of Mr. Carbone while abroad. The store is decorated at all times with samples of these pots and vases in use holding choice blooming or foliage plants of the proper size. Several small tables set for luncheon or dinner with cloth and plates were used to show off the various small vases, and clusters of the same filled tastefully with flowers. Many sales must have been induced with these displays, as they were very

EASTER BASKET BY JOHN MANGEL, CHICAGO.

Cross Handle Basket with Crimson Rambler Rose and Chiffon.

pretty and effective. Small china holders modeled after, or of the same pattern as the Japanese glass holders, looked very practical. The windows were filled with Ghent azaleas and lilac plants in flower. An Italian fountain was also a feature in one window.

F. H. Houghton's window was quite different with its dressing of laurel. Moss had been used to cover the bottom and left with an undulating surface rising to points made with up-turned pots and fibre flower vases. Into the surface of the moss was then placed short laurel branches until it was entirely covered, making a pretty green foundation for selected plants and baskets which were the feature of the window display. Galvin's Back Bay establishment is one of the finest in the country and has often been described. Its handsome specimen flowering and foliage plants, together with vases of choice cut flowers placed at vantage points, and the large flower case or refrigerator, into which the

customer may be taken, filled with the best stock showed that a strong bid for trade was being made. Hoffman, who is ideally located for family trade on Commonwealth and Massachusetts avenues, has a live up-to-date store, and the four large windows were all decorated with showy foliage and flowering plants, while the interior was looked after in a like manner. A feature of the store was a fountain around which in the water was a collection of very fine cut tulips. In the downtown district near the markets were the stores of Julius A. Zinn and H. R. Comley, which were nicely arranged, full of good salable stock, and presented quite an up-to-date appearance.

K.

#### Echoes and Lessons.

The show is a thing of the past. The influence it left will be felt in the florists' and allied trades for many years. As a florist expressed himself to me, "This show will put Boston 50 years ahead." I am sure every stranger

enjoyed Boston, and we enjoyed their company. New ties have been made and old ones renewed. It was with a feeling of regret that many saw the end of the show, and it was a glorious satisfaction to everyone that Boston could put up such an exhibition. Such an exhibition of both quality and quantity was never known. Mr. Manda, an expert in such things, says, "It was a revelation to me."

I have heard a great many compliments about the beautiful show number of THE AMERICAN FLORIST. Mr. Butterfield deserves great credit for the able way he handled the show reports. His work shows him to be a past master for such a big job.

It has been an educational show for the average florist. He has learned more than was expected, and the seed sown will bear fruit. The trade exhibits were a great drawing card and there are many other departments which could have been added to the show in the allied trade exhibit which would have been a benefit to us had their attention been called to the importance of the exhibition. The florist has at last been brought to see that he has been wasting coal and not getting the proper results. How many of us can tell the temperature of our feed water, temperature of return water, temperature of flue gases, how to avoid the unconsumed carbon going out to smoke? Is the florist getting the amount of heat in ratio for every pound of coal burned? Is his return water coming back as hot as it should for practical economy? These questions have been brought to our attention by the exhibits, and live men are thinking them over. There is more coal wasted by the florist than in any other business, and by the application of improved methods I am sure we will be able to take our proper place in our rapidly growing business.

Steam and hot water boilers were shown with shaking and dumping grates, thus obviating the grates being worn out by the careless fireman in charge. Recording gauges and improved damper regulators are all a direct benefit to us, and a saving of time and money. It would be hard to give a description of each exhibit and do it justice. In the plants and flowers they were so close that it would simply be impossible. In the trade exhibits each one has its particular merit. The Moorehead Trap exhibit was omitted in last week's report unintentionally, not being placed till after the notes were taken. They showed a No. 1 trap taken from the Hanover Greenhouses, Hanover, Mass., which was in operation for two years, and was in practically as good order as when new, it having been taken out to be replaced by a size larger, a No. 2. Mr. Gogan, their agent, shows a flue scraper and a reducing valve, both of good construction and practical. Another exhibit of merit was from the Johnston Heating Co. of New York City. It was a steel return tubular boiler of the locomotive type, differing from the latter in that the heat, instead of going out at the end of the boiler, returns in another set of tubes placed above those in the firebox. This boiler looks as if it was built for business, is rated for 150 pounds pressure of steam and the temperature of the flue gases upon entering the chimney is reduced one-third of that in some other types of boilers. The sheets are 3/8-inch

and head 7/16-inch in thickness. This boiler was sold to M. A. Patten, of Tewksbury, Mass.

Mr. Sanborn, of the A. T. Stearns Lumber Co., Boston, reports receiving many orders at their stand at the show. The personality of Mr. Sanborn during his 12 years with the company has made a host of friends in the trade, and it would be hard to find a man who can command so much confidence.

The entertainment and dance given by the Gardeners' and Florists' Club was one of the great successes. Speeches were made by many prominent men. The smoke talk given by the trade in the Hotel Somerset was attended by some 600 men. Mayor Fitzgerald attended and entertained the party with some of his happy and witty sayings. George Asmus, of Chicago, was chairman, and that alone testifies to the oratory of the occasion. Mayor Fitzgerald and the Penn Bros. sang, the mayor rendering his favorite song, "Sweet Adeline," and the party broke up at a late hour with the feeling expressed in the old song, "Say au revoir, but not good bye." MAC.

ing, breaking up a little after midnight.

No statements of amounts received for admission were given out, but it could easily be seen that the gate receipts were heavy—it is believed the record of paid admissions will run ahead of that made in Chicago two years ago.

C. I. Campbell is a show manager that manages. He got the people there. The show was as attractive on the last day as it was on the first.

Edwin Forsyth, artist, showed Saturday afternoon a striking impressionist painting of the show about three and a half by eight feet.

Prof. Craig made an extended talk on sweet pea records, which he stated has been made up for him by Prof. Beal.

Thos. Roland's acacias and M. H. Walsh's rambler roses were perhaps the two choicest exhibits.

W. A. Manda got \$250.00 for a Kentia Belmoreana. He also got 87 prizes and a gold medal.

A. H. Hews & Co. generously loaned many large pots and 10,000 saucers to the exhibitors.

HYDRANGEA IN BASKET BY JOHN MANGEL, CHICAGO.

#### On the Slide.

Representatives of the trade in Boston gave a smoker at the Hotel Somerset March 30. This was indeed a treat and a surprise. Upwards of 500 men were present, the viands served were just what were needed; it was entirely informal and everybody had a good time. Vaudeville talent provided amusement until the appetites were appeased, then the mayor of Boston called in and the meeting became one for general talk and story-tell-

ing. There were so many attractions in the exhibits that it was hard work to get attendance at the business meetings of the different societies.

Trade exhibitors all say business was good—better than at annual conventions.

There were few protests, hence the judges must have done their work well.

Bulbs brought for exhibition purposes sold well.

Palms and other plants sold in numbers.

F. E. PALMER'S DISPLAY OF SPRING BULBS.

At the Second National Flower Show at Boston, March 25.

### The Judges.

The judges who officiated were as following in the different classes: Miscellaneous flowering plants: Adam Graham, Cleveland, O., and Andrew S. Meikle, Newport, R. I. Bulbous flowering plants: William Duckham, Madison, N. J.; J. F. Huss, Hartford, Conn.; A. H. Wingate, Lenox, Mass. Orchids: A. H. Wingate, Lenox, Mass.; A. Pericat, Darby, Pa.; J. F. Huss, Hartford, Conn. Ferns: James Dean, Freeport, N. Y.; G. V. Nash, New York; John Westcott, Philadelphia, Pa. Palms and foliage plants: C. W. Johnson, Morgan Park, Ill.; Philip Breitmeyer, Detroit, Mich.; James Forbes, Portland, Ore. National Association of Gardeners' exhibits: W. F. Gude, Washington, D. C.; W. J. Smyth, Chicago; L. L. Powell, Millbrook, N. Y.; A. Schultheis, College Point, N. Y. Retail arrangements: W. J. Palmer, Buffalo, N. Y.; J. H. Hill, Richmond, Ind.; James Forbes, Portland, Ore.; J. R. Frothingham, Tarrytown, N. Y.; Emil Buettner, Park Ridge, Ill. Carnations: E. Dailedouze, Brooklyn, N. Y.; R. Witterstaetter, Cincinnati, O.; Wm. Nicholson, Framingham, Mass.; Joseph H. Hill, Richmond, Ind.; E. A. Stroud, Stafford, Pa.; C. W. Johnson, Morgan Park, Ill. Roses: W. F. Kastling, Buffalo, N. Y.; Otto G. Koellig, St. Louis, Mo.; Fred Burki, Gibsonia, Pa.; Emil Buettner, Park Ridge, Ill.

### The National Society of Gardeners.

This society had several business meetings. T. Logan, Philadelphia, was elected president and Stamford, Conn., selected as the next meeting place.

One of the features of the week was the annual dinner of this body, tendered March 29 in the restaurant on the upper floor of the Mechanics Building. A sumptuous dinner was served and a great deal of wit and wisdom followed the coffee. Chas. H. Totty was toastmaster and Mr. Totty has become quite an expert in this line, the long stay in Boston, where the dis-

section, derivation and delivery of all words in the English language is a fine art, has just given the necessary finishing touch to his already acquired eloquence. He made good as toastmaster and all of the speakers he called upon had something pleasant to tell upon the subject assigned them. Among the speakers were C. B. Weathered, Robert Craig, F. Kelsey, William Duckham and others. Past President Wm. Kleinheinz was presented with a diamond pin in recognition of his efficient work on behalf of the society.

## Society of American Florists

The Adjourned Annual Convention.  
Boston, Mass., March 31-April 1.

### The First Spring Meeting.

The business meeting of the Society of American Florists scheduled to be held at the Mechanics' Building, Boston, Mass., March 31, was postponed until the next day, but at the evening session John Dunbar, of Rochester, N. delivered an illustrated lecture on "Trees, shrubs and flowering plants," which was full of interest from start to finish, before a good sized audience which listened attentively throughout the rendering of the paper.

Saturday, April 1, it became possible to get a meeting together, no meeting having taken place Friday. President George Asmus read his paper, and resolutions of thanks to the Gardeners' & Florists' Club of Boston were presented.

On behalf of friends Mr. Asmus presented to Thomas Roland a handsome silver service, suitable for a baby, for, during the exhibition Mrs. Roland presented her husband with a baby girl, it being born on Monday, March 27, and the silver set can at once be utilized.

The committee on final resolutions then reported the following:

After the adoption of the resolutions adjournment was taken until August, when meetings will be held in Baltimore.

The executive committee of the society went to Baltimore directly after the adjournment, and held a meeting April 3 at the Belvidere Hotel.

Whereas, the S. A. F., in the holding of its Second National Flower Show in the City of Boston, is deeply indebted to the Massachusetts Horticult-

JULIUS ROEHR'S CO.'S DISPLAY OF ORCHIDS.

At the Second National Flower Show at Boston, March 25

tural Society, the Gardeners' and Florists' Club of Boston and their ladies, Mayor Fitzgerald, the press, and the public of Boston, for courtesies extended and assistance rendered during the period of the show:

And whereas, the National Flower Show committee, through its board of control and its efficient managers, have all performed their duties in a manner entirely satisfactory to the society:

And whereas, Frank R. Pierson, the chairman of the National Flower Show committee, has given unlimited time and services to make the show a success:

Be it resolved, that the society extend its most heartfelt thanks for such courtesies and assistance rendered, and the entertainment so liberally furnished.

Furthermore resolved, that the society feels that the show has been an unqualified success, due greatly to the efforts of those mentioned.

And be it further resolved, that these resolutions be extended upon the members of the society, and copies sent to the organization's members.

#### President Asmus' Address.

It is with great pleasure I address you, ladies and gentlemen of the Society of American Florists, at this gathering here during the first spring meeting attempted by our organization in amalgamation with our kindred societies. It is the first time that the combination of holding flower shows, conventions and trade exhibits has been attempted, and it is for the purpose of ascertaining whether or not it has met with a general feeling of success by the different societies participating, and in view of the fact that our annual convention will take place as usual in Baltimore in August, the officers and members of the board of directors did not deem it advisable to interfere with the usual program of that meeting. I will, therefore, as briefly as possible, bid you, the members of the bodies participating in this gathering, a most cordial welcome in behalf of the Society of American Florists.

This gathering is the fulfillment of one of my most beautiful dreams. I, for a number of years, have thought that the concentration of all interested at the time of the year when the great-

est number of varieties of flowers are obtainable, namely, the spring, would be ideal for a convention. There are a great many things favorable to a spring meeting, one in particular being the time of the year to make displays of the goods we are most interested in, another being the doing away with excessive railroad travel, and time devoted to going to the different conventions when they are held separately in different cities and at different times. We are all very busy people, and time means money with all of us. It has been said that we have more time in August than at any other time of the year for convention purposes. This is true when a convention is taken in the way of recreation instead of business. I take the stand that conventions properly attended are strictly business, particularly when carried on as one would be by the amalgamation of the different societies, such as are represented at this, the Second National Flower Show.

While our membership has slowly increased, it is not an increase such as would be justified by the work done by our organization. Then there are so many large questions constantly coming up, and which are of vital importance to the success of our business, that it would seem two meetings a year were almost a necessity. Then again the big displays, that would naturally follow such spring meetings, would be of almost priceless value in the way of stimulating advertising. In the cities where such conventions and exhibitions were held, they would be self-sustaining to a certain extent, and it is not necessary that these exhibitions and conventions be held in the very largest cities, but any city of a population of two hundred thousand or more would perhaps be as good, taking into consideration the great good exhibitions of this kind would do local communities, as such exhibitions could not help arousing a great horticultural interest to the public at large, and this would be one of the ways our organization would do a great horticultural good. While there is no doubt about the grand hospitality that has been extended to the different societies at their meetings in the past, and while there is an open welcome in the hearts of all florists for their brethren in

business, we know that in some instances in towns and small cities the work falls upon a few people, and the precedent for entertainment having been established has become a custom, and has not always been an easy matter for the consideration of the local people. Instead of being anything of that kind to a large city, it would be just the reverse. It should mean such a big horticultural boom to that particular city or section wherein the same was held, that they would be more than recompensed for any trouble they may have had. I sincerely hope that the talks which follow after the close of my few remarks will be favorable to a continuation of the combined society meetings annually in the spring of each year.

I wish here to give credit to the untiring efforts of our chairman of the National Flower Show committee, F. R. Pierson, of Tarrytown, N. Y., also to the members of that committee, as well as to the board of control and to local horticultural organizations who have been untiring in their efforts to make this show the great success it has been. But few on the inside know the great amount of work and detail there is in connection with an enormous undertaking of this kind, but it has been ever thus in the workings of our society, untiring and unselfishness for the general good of all has been the watchword of the great majority of the members of this society. Let us assist them at any and all times it is in our power. Nor must we think we have achieved the greatest, or reached the top of the ladder, but put our knowledge and thoughts to greater things, many of which are in their infancy, and which I will dwell upon in my address at the August convention.

One of my predecessors, Ex-president Valentine, of Denver, Colo., in his address before the convention at Cincinnati recommended the setting aside of certain hours for the meetings of different florists who are interested in the different branches of the business, such as the Retail section, Carnation Society, Rose Society, etc., which at that time created a very favorable impression. I was one of those who was deeply impressed with the idea, and believe that the present meeting has to a great extent covered a great many of

DISPLAY OF SWEET PEAS AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 25.

Exhibited by William Sim, Cliffondale, Mass.

THOMAS ROLAND'S ROSE GARDEN AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 25.

the ideas advanced in his recommendation. Our business, branching out as it does, and specializing itself as it has, and will continue to do from this on, must have individual organizations to further their specific purposes. I do not suppose that we can have an exhibition on so elaborate a scale as this each year, but with the combined efforts of the Carnation, Rose and Sweet Pea Societies, and additional premiums for plants, etc., I think a good annual spring show ought to be a successful feature from all points of view, and would recommend to you the consideration of a plan whereby the advisability of such be considered. The Society of American Florists is not a society with any one object in view, but the general promotion of all interests. We want the membership of the members of these organizations in the mother society, we should support them, and they should support us, as we should be one in purpose and one in accord.

#### Secretary Dörner's Report.

As the regular secretary's report was given at the convention held during the past summer, the report at this time will be in the nature of a supplementary one covering the time from the last convention up to date.

The financial statement attached to this report, as well as the treasurer's report, show a gratifying increase in the general fund and a marked increase in the permanent fund. During the past year, the fees of 28 members were added to this fund. As has been the custom in the past, the executive board has ordered that all interest on both general and permanent fund be added to the permanent fund.

The trade exhibit of 1910 was unusually successful. The entire receipts for sale of space was \$2,460.43. The total expenditure, including the superintendent's salary, was \$944.52, leaving a balance of \$1,515.91 in the treasury. This was without doubt the most successful trade exhibition ever held

by the Society of American Florists.

A comparison of the membership of 1909 and 1910 may be of interest:—Life members: 1909, 219; 1910, 247. Annual members: 1909, 776; 1910, 826. Total: 1909, 995; 1910, 1,073. During the year 228 new members were taken in. This number also included old members reinstated. Of this number, 13 entered as life members. In addition to these, 15 members were transferred from the annual to the life membership roll. The total number of life members added during the year was 28. We are now past the thousand mark and have raised our goal to the two thousand mark. Let us hope that by united effort we will reach that mark in a few years instead of the 27 necessary to reach the thousand mark. This could be done very easily if each member made an effort and secured one new member. This would make our membership 2,146 instead of 1,073.

Up to date, 15 have been added to the life membership roll. Eleven are transfers and four are new members. Up to March 29, 47 new members have been taken in. The total number of members now in good standing is 854. This number includes the life members, pioneer members and those annual members who have paid their 1911 dues.

Since our last report in August, 1910, 26 registrations have been made. The plants registered were as follows:—one coleus, thirteen chrysanthemums, one canna, eight geraniums, three roses. A complete list of registration for the year will be given at the August convention.

#### National Sweet Pea Society.

This society commenced on the afternoon of March 29 with quite a good attendance. President Geo. Asmus of the Society of American Florists made a brief address of welcome. President W. A. Burpee, after a few opening remarks, introduced Prof. A. C.

Beal of Ithaca, N. Y., who presented a paper on the results of experiments at the trial grounds at Cornell University and of trials made under glass. This paper was referred to a committee and publication reserved for the present. G. W. Kerr of Doylestown, Pa., and William Sim of Cliftondale, Mass., presented interesting and instructive papers, which received close attention.

Philadelphia was chosen as the next meeting place for the exhibition and convention, which is to be held June 22-23, unless the committee who have the matter in charge decide that it will be more advantageous to have them on some other days, and that if the date be changed, decision must be made three weeks in advance of the dates mentioned, and the trade notified to that effect.

#### American Gladiolus Society.

An enthusiastic meeting of the American Gladiolus Society was called to order at Boston, Mass., March 30, President Hendrickson in the chair, who opened the meeting with a short address. The records of the last meeting were read and approved. The reports of the financial secretary, membership committee and treasurer were read and accepted.

The committee on bulletins reported that two bulletins had been issued and requested the members generally to make notes on diseases, failure to bloom and the same variety having two or more names, and contributing the same to the committee.

The committee on the Baltimore show stated that the schedule of premiums is not yet made up, owing to the fact that the trade had not been approached in the matter of offering special prizes, and it was hoped that the growers and trade generally will be generous in this matter. They recommended that the premiums in the amateur section be increased and that prizes should be offered for table dec-

orations, baskets, vases, designs, etc. They reported that T. H. Michell offers a cup valued at \$25 for the best vase of 25 blooms of Kunderd's Glory, and B. F. White offers to give \$35 towards a prize fund if 49 others will give a like amount. The report of the committee on nomenclature was then read by A. Cowee of Berlin, N. Y.

The committee on exhibitions suggested that the society should endeavor to induce all societies to enlarge their premium lists and offer larger and more attractive prizes, and requested that the members use their efforts in bringing this to the attention of those having charge of the matter, and offered the following: Your committee feels that the rules to govern the awarding of certificates of merit is such a vital and far-reaching matter to those who exhibit seedlings for certificates, and to the many points to be determined upon, that it is best to submit the following scale of points and ask for a full and free discussion, as the best solution of a difficult problem and one which shall be satisfactory to all:

|                                            |    |
|--------------------------------------------|----|
| Scale of points for judging gladioli:      |    |
| Resistance to disease.....                 | 5  |
| Texture of flower.....                     | 10 |
| Duration of bloom.....                     | 10 |
| Size of bloom.....                         | 10 |
| Color of bloom.....                        | 10 |
| Form of flower.....                        | 10 |
| Form of spike.....                         | 10 |
| Stem (length and stiffness).....           | 10 |
| Number of flowers on spike.....            | 15 |
| Vigor (aside from disease resistance)..... | 5  |

The adoption of the scale resulted in considerable discussion on the part of all in attendance. A committee on nominations, to be appointed by the president, was ordered. After a discussion of the trial grounds for varieties the meeting adjourned.

#### Gardeners' and Florists' Club of Boston

On the night of March 29 this society gave a reception and dance to visiting florists and ladies. An entertainment was furnished by the following artists: Mrs. McKeon, soloist; Miss Livermore, in monologues; the Misses Irvine, dancers; Neal Millar, soloist; H. A. Clark, humorist, and Miss

Rifford, accompanist. The remainder of the evening was enjoyed in dancing. During the evening lunch was served in an adjoining hall. The committee in charge was W. A. Hastings, floor director; W. J. Patterson, assistant; P. J. Van Baarda, James Miller, George W. Butterworth, B. Hammond Tracy and Edward Rose, aids. There was a crowded attendance, the festivities lasting until after midnight.

#### Additional Awards.

##### Classes Displayed March 31.

Display of cut roses covering 200 square feet of space and not to contain less than 200 blooms—A. N. Pierson, Cromwell, Conn., first; A. Farewald, Roslyn, Pa., second; W. H. Elliott, Brighton, third.

For the best and most artistic arrangement of 100 cut roses—S. Hoffman, first, with basket arrangement of Killarney roses; E. MacMulkin, second, using White Killarney roses. Exhibit of carnation blooms covering 50 to 100 square feet of space—Pierce Bros., first; S. J. Goddard, second; Patten & Co., third.

Table decoration in which carnations are the principal flower used—H. Penn, first; E. MacMulkin, second; J. J. Casey, third.

Mantel decoration in which carnations are the principal flower used—Boston Cut Flower Co., first; E. MacMulkin, second; E. MacMulkin, third.

Hamper of carnations—E. MacMulkin, first; H. Penn, second; S. Hoffman, third.

Basket of carnations—Julius A. Zinn, first; J. J. Casey, second; H. Penn, third.

Brides or Bridesmaid's bouquet—S. Hoffman, first; Julius A. Zinn, second; H. Penn, third.

These rose and carnation exhibits were of superior character indeed in A. N. Pierson's winning display, the new Dark Pink Killarney and Prince de Bulgarie were conspicuous features.

Best table decoration offered by the Ladies' Society of American Florists—S. Hoffman, first, with table of Ghent azaleas and corsage bouquets of Mrs. Aaron Ward roses.

Best floral design, offered by the Boston Flower Exchange—S. Hoffman, first, with wreath of Mrs. Aaron Ward roses and lily of the valley; H. Penn, second; J. T. Butterworth, third.

In the National Association of Gardeners classic.

Best specimen palm—Donald McKenzie. For exhibitor taking most prizes—Wm. Kleinbehn.

##### Orchids—Cut Flowers.

Best display and collection of cut orchids, each species or variety filling one vase, arranged for effect. Cut greens admissible in arranging the same—J. T. Butterworth, first.

Flowering stem of cattleya, any species—W. A. Manda, first; W. A. Manda, second.

Flowering stem of lilia, any species—W. A. Manda, first.

Flowering stem of lilia-cattleya or hybrid cattleya—W. C. Rust, first.

Flower cypripedium, any variety—W. A. Manda, first; J. T. Butterworth, second.

Flowering stem, denrobium—W. C. Rust, first; W. A. Manda, second.

Flowering spray odontoglossum, any variety—J. T. Butterworth, first.

Flowering spray oncidium, any variety—W. A. Manda, second.

Flowering spray phalaenopsis, any variety—W. A. Manda, first; J. T. Butterworth, second.

Flowering spray vanda, any variety—J. T. Butterworth, second.

Flowering spray of any orchid other than above—W. A. Manda, first; W. A. Manda, second.

##### Special Awards.

Silver medal to John H. Doids, gardener to John Wannamaker, Philadelphia, Pa., for Golden Pandeus Lindenlaurst.

Silver gilt medal to Charles J. Sander, gardener to Prof. C. S. Sargent, Brookline, for seedling azalea.

Bronze medal to Robert Craig Co., Philadelphia, Pa., for collection of seedling crotons.

Bronze medal to W. C. Rust, gardener to Dr. C. G. Weld, Brookline, for seedling rhododendron.

Bronze medal to W. A. Manda, South Orange, N. J., for Polypodium Maudiana.

Certificates of merit to P. R. Pierson, Tarrytown, N. Y., for Nephrolepis muscosa; Robert Craig Co. for croton, Mrs. Duncan Macav, and R. G. Wilson, Brooklyn, N. Y., for unnamed fern.

Honorable mention to J. C. Hatcher, Amsterdam, N. Y., for Asparagus Hatcheri.

Mass. Horticultural Society's Special Awards.

Gold medal—To W. A. Manda, South Orange, N. J., for display of palms, tree ferns and other tropical plants.

Gold medal—To Thomas Roland, Nahant, for group of acacias and other plants.

Silver medal—To Clement Newbold, Germantown, Pa., for two specimen Indian azaleas.

Silver medal—To Prof. Chas. S. Sargent, Brookline, for collection of imantophyllums.

Silver medal—To Thomas Roland, Nahant, for indoor rose garden.

Silver medal—To M. H. Walsh, Woods Hole, for collection of specimen Rambler roses.

Silver medal—To R. J. Farquhar & Co., Boston, for indoor Dutch garden.

Silver medal—To Mrs. Frederick Ayer, Newton Highlands, for collection hard-wooded plants.

##### Trade Exhibit.

The judges of the trade exhibit recommend a small entry fee, as this will prevent unworthy exhibits being entered. It is also recommended that more specific conditions be presented to those entering, and included in the entry blank, as many of the exhibitors do not clearly understand the conditions to be complied with.

Certificates of merit were awarded as follows: Caldwell Lawn Mower Co., Newburgh, N. Y., lawn mower operated by gasoline engine.

C. Keur & Sons, Hilleagon, Holland, bulbs.

Lord's Frost-proof Plant Box Company, plant box.

S. B. Church, J. Comer Jones, manager, Boston and Seymour, Conn., gasoline engines and spraying machines.

Revere Rubber Company (G. P. Whitmarsh), Chelsea, nozzles and couplings.

Hitchings & Co., Elizabeth, N. J., ventilating machines.

Wertheimer Bros., New York, gold and silver edged sprinkler-proof ribbon and wire edged chiffon sprinkler-proof ribbon.

Honorable mention was awarded as follows: Lord & Burnham Co., Irvington, N. Y., pipe hangers.

VIEW OF CARNATION EXHIBIT AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 28.

Hitchings & Co., Elizabeth, N. J., new model water boiler.  
 Revere Rubber Co., Chelsea, garden hose and spraying hose.  
 Mrs. C. R. Sanborn, Cambridge, patent forms for table decorations.  
 J. Jandahl, Cambridge, rustic work.  
 Eastern Nurseries, Jamaica Plain, collection of cactaceae.  
 O. Cusumano, Boston, florentine terra cotta.  
 Wilson Plant Oil and Fertilizer Co., New York, sprayers and tub carrier.  
 Eastern Library Supply Co., New York, (Macmillan Co.), works of Prof. L. H. Bailey, in horticulture.  
 Pearson U-Bar Co., New York, greenhouse exhibit.  
 Wertheimer Bros., New York, sprinkle-proof ribbons, radiom glass ribbons, greenidine ribbons and spun glass pins.  
 The following exhibits were highly commended:  
 Schloss Bros., New York, woven Easter greeting ribbon.  
 Lord & Burnham Co., Irvington, N. Y., curved box construction and ventilator.  
 Johnston Heating Co., New York, tubular fire-box boiler.  
 Thomas J. Grey Co., Boston, Detroit pruner.  
 Weathered Co., New York, greenhouse exhibit.  
 Wait's Interlocking Steel Co., Newburgh, N. Y., steel exhibit.

GLASS, Double A, was recently quoted at \$1.86.

NEW YORK, it is said, wants the next national flower show.

ENGLISH grown palms are said to excel the usual Belgian stock.

RENEW subscriptions promptly so that no copies of the papers may be missed.

WE are in receipt of the proceedings of the twenty-eighth annual convention of the Society of American Florists, held at Rochester, N. Y., August 16 to 19, 1910.

CAPE JASMINES.—We understand that on account of the unusual weather conditions the past winter, warm followed by a severe freezing temperature, about 60 per cent to 70 per cent of the buds were killed, making a considerable shortage in the supply. It is expected the shipping season will commence about May 1.

PROBABLY not more than 10,000 lily blooms will be imported from Bermuda this year, it is said at the New York office of the Bermuda Steamship Co. Last year during Easter week 500,000 were received.

DURING the recent Boston show most of the White Oxen were tied in their stalls, the Sucking Pig Club was in mourning, the Ananias Society was well represented, and the Prodigal Prophets were driven aboard the good sloop Mayflower and compelled to walk the plank in the historic harbor.

THE Department of Agriculture has issued an interesting bulletin on the "Determination of Nicotin in Nicotin Solutions and Tobacco Extracts." Every greenhouse man should get a copy, which may be had on application to the Secretary of Agriculture, Washington, D. C., requesting Bulletin No. 133, of the Bureau of Animal Industry.

THE preliminary premium list of the Cincinnati Florists' Society for the exhibition to be held November 13-16, 1911, has been published and received. More than \$3,000 is offered in premiums for chrysanthemums, carnations, roses and other plants and flowers and table decorations. Copies may be had by addressing George S. Bartlett, 131 East Third Street, Cincinnati, O.

## National Council of Horticulture.

WE have received the second installment of the articles sent out by the press service of the National Council of Horticulture, which includes "Do Not Plant Too Early," "Spring Prunings," "Spring Work on Lawns" and "How to Sow Seeds." These articles are distributed free by James H. Burdett, 1620 West One Hundred and Fourth place, Chicago, and seedsmen should advise their local editors to procure them as they are timely and stip up a desire for gardening in the localities in which they are published.

## Ladies' Society of American Florists.

THE Ladies' Society of American Florists were entertained right royally, and thanks are returnable to the ladies of the Boston committee and Gardeners' and Florists' Club for the good times. Especially did all enjoy the hearty welcome extended by Mrs. W. H. Elliott at her new home in Brighton, Mass., on March 31. And last, but not least, do we mention that the silverware given by the Ladies' Society of American Florists for best table decorations was awarded to Hoffman, the florist of Boston.

MRS. CHAS. H. MAYNARD, Sec'y.

## Our Supplements.

SUBSCRIBERS should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

THE papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

## Tulip Bulbs Not Starting.

WE are informed by Thos. E. Davis, superintendent of Government grounds, Ottawa, Ont., that the cause of tulips not starting in the spring is owing to the presence of millipedes, a pest that has troubled them very much. He advises that any tulip bulbs not showing growth should be examined for these troublesome creatures. He also states that they trouble some varieties more than others.

## To Prevent Poisoning From Thorns.

FLORISTS are continually getting thorns in their hands and fingers, and to prevent poisoning the following remedy is advised: Take a new needle, burn it with a match and wipe it clean, and then dig the thorns out. The hand, or the injured part of it, should be placed in a pan of vinegar on the stove, and allowed to remain until it becomes as hot as can be borne. The doctor says that in 900 out of 1,000 cases all danger of poisoning will be avoided. E. E. FISHER, Kennicott Bros. Co.

## A Word of Thanks From British Visitors.

THE British horticultural traders who have been visiting this country, sailed for home on the Mauretania, April 5. On the day previous, Arthur T. Boddington tendered them a luncheon at the Hotel Gee, where a three hour feast with much speechmaking was enjoyed, and then they bid farewell. J. S. Brunton and others of the party declared this one of the best entertainments which had been tendered them and gave special thanks to Mr. Boddington for his thoughtfulness and to Harry A. Bynard for perfecting the arrangements. A group photograph was taken, and before leaving the city Mr. Brunton gave out the following for publication:

Gentlemen: Permit us to express through your columns a word of thanks to the florists of the United States. We arrived on the Lusitania March 17, we depart tomorrow on the Mauretania. Our tour of the United States, embracing New York, Philadelphia, Baltimore, Washington, Richmond, Ind., Chicago, Niagara Falls and Boston, has been one grand triumphal procession. All along the line florists and florists' clubs have entertained us with genial and generous hospitality, affording us the maximum of pleasure and instruction, with the minimum of trouble and expense.

WE came to the United States with the desire to obtain "amusement and instruction hand in hand." American florists have provided both on a scale the magnitude of which is impossible to describe. We recognize that horticulture in America is a great commercial proposition, run by men of great brain power, and big hearts full to the brim with the milk of human kindness. Before we leave we wish to say, "Thank you, thank you, thank you" to one and all. This is only a feeble worded expression, but it comes from the depths of our hearts, and within each of us recollections of American florists and their hospitality will always find a place. Come over and see us at our International Horticultural Exhibition in London in May, 1912.

THE document was signed by J. S. Brunton, J. Brown, E. Barker, W. A. Cull, C. Englemann, L. M. Graves, J. S. Gunn, C. Prately, J. Prickett, S. South, J. Simpson.

RICHMOND, CALIF.—A large exhibit of flowers is part of the plan of the spring carnival to be held April 17-23.

Ormsby's

System

This system consists of a  $\frac{3}{4}$  inch solid steel rod, supported in suitable hangers, adapted to different style of houses. **B**, the upright lifting rack attaches to the ventilators and intersects with the cog wheel **D**, in which it travels when raising and lowering the ventilators. On the left side, and passing over the back of the rack is the guide **C**, used to prevent the teeth of the rack from separating from those of the cog wheel.

**C** This is held in position by the collar **E**, at the left. It is so constructed that it cannot

bind on the rack nor separate from its position

The Springs, **G**, are the **All Important Part** in the ORMSBY SYSTEM where lifting power is required. They are made in pairs and of the very best grade of Steel.

The set of beveled gears, and its connections, used simply to operate the horizontal rod that the ventilators are attached to; also its lock and latch, used as additional security to locking the ventilators at any required point.

1911

While one (1) lifting rack is sometimes used in operating the sash, it is much better to use two (2), as the work is preformed in a more rigid and direct manner, thus causing no side motion, wobbling, or wrenching of the sash and prevents them from warping as with one lifting rack.

Speed in action, neatness and simplicity in make-up, strength and durability in its work form the principal features in its favor.

Mr. E. A. Ormsby,

Arlington, Mass., March 7th, 1911.

Melrose, Mass.

Dear Sir:-

We are building two green houses which require a ventilating apparatus for one hundred and fifteen sash.

Having had the ORMSBY VENTILATING APPARATUS in several of our green houses for over fifteen years, during which time we have not had to pay out one dollar on repairs, but they have given us such satisfaction, that, considering them with other methods which we have had in use, we have decided to accept your proposal of March 4th, 1911, for installing the "ORMSBY" device in the above named green houses.

Respectfully yours

ORMSBY VENTILATING APPARATUS

#### A CARNATION FLURRY.

True to the old saying, March, having made its entry as mild as a lamb, went out like a lion, for the week was cold, windy and blustering, and April opened with a genuine blizzard with high winds and snow, and quite cold for so late in the season. What looked two weeks ago like an early spring may yet prove to be a late one. The result of this change of temperature and adverse weather conditions is a general shortening up of all the crops, and while in the early part of the week there was more stock than could be handled, at the end everything was well cleaned up. The sensation of the week was the carnation boom on Friday and Saturday. Some of the wholesalers had large orders to fill at the low prices which were prevailing, and began to buy up all the available supply, with the consequent result that prices advanced rapidly, and by Saturday the blooms were bringing three and four times as much as was asked on Thursday, and one of the dealers stated, that anybody who had a stock of good white carnations on Saturday afternoon could have got almost any price he asked for them. It was reported that two wholesale houses handled seventy-five thousand carnations on Saturday. The stock of roses is still of fine quality, and although the receipts are not quite as heavy as they have been, yet there are plenty to meet all demands. Bulbous stock is approaching the end and but few Paper White narcissus and Roman hyacinths are now seen in the market. Of other bulbous flowers there is still a plenty. Lilies and callas are in bountiful supply, and sweet peas are being received in very large quantities. The general tone of the market is sluggish, trade with the retailers be-

ing reported as light, and the storemen are busy getting ready for Easter. The demand for Easter plants has been good and the local growers are nearly all sold out already. A visit to the greenhouses finds large shipments being made and quantities of the differ-

ent blooming plants blocked together and marked sold or with the purchaser's name. Lilies are in fine shape and there is good stock, and there does not seem to be any question but that all the plants will find ready sale. Crimson Rambler and the other

# E. H. HUNT

**131 N. Wabash Ave.,**

Phone Randolph 4336 and 4337.

**CHICAGO**

climbing roses are looking finely. Some very nice hydrangeas are to be found with fine large heads and of good color. The promise for an excellent Easter trade is good, and it now looks as if the stock would be of fine quality.

### NOTES.

Poehlmann Bros. Co. is shipping out a large number of lilies in pots, all shipments being made direct from the greenhouses. A large supply of splendid stock of all kinds can be seen at the store this week, the only shortage being in American Beauty roses. This week's features are Spanish iris and lily of the valley of good quality.

E. E. Peiser, of Kennicott Bros Co., says that never before in his many years of experience in this market has he known ferns to sell for \$3.50 per 1,000 on April 1. Another thing that he has never experienced is the price of flowers increasing one hundred per cent in 24 hours as was the case on March 31.

The Geo. Wittbold Co., 737 Buckingham place, is busy shipping out the orders received for spires, rambler roses, lilies and other choice Easter stock. Henry Wittbold and his force of assistants are now busily engaged with landscape and decorative work.

Joseph Ziska is suffering from a severe attack of rheumatism. He is, however, seen at the store busy as usual. He will, owing to ill health, dispose of his greenhouses at Libertyville if a suitable buyer can be found. Manager Fryer of the Chicago Carnation Co., says that the carnation exhibit at the National Flower Show at Boston was fine and proved very interesting to the large crowd that attended.

The J. B. Deamud Co. is supplying their customers with a good grade of all the different flowers of the season.

# Chicago Carnation Co.

A. T. PYFER - Manager.  
Phone Central 3373.

**30 E. Randolph St., CHICAGO**

Wm. E. Lynch, of E. H. Hunt's cut flower department, called on the firm's growers this week. He found the lilies and other stock in good condition, which will guarantee them a good supply for Easter.

Wietor Bros. are cutting a large quantity of carnations with Mrs. Law-

son showing up exceptionally well. The Mrs. Jardine and other roses that were seen at the store this week are of good quality.

Weiland & Risch will erect some new greenhouses this season, but just how large the addition will be has not been decided.

# EASTER PRICES

We have never been so well prepared for what we believe will be the **Busiest Easter on Record**. The whole of our vast greenhouse plant is in splendid condition and crops will be at their best for Easter.

## ROSES.

**Not a few but all the best varieties.** The crops are large, the quality absolutely perfect. There are no better flowers coming to this or any other market.

## AM. BEAUTIES.

Our Beauty crop is at its height and we shall have large supplies in all grades for **Easter**.

## CARNATIONS.

Our immense carnation range is producing magnificent stock in abundance. The flowers were never so good or plentiful and we can truthfully say there are **no carnations in the world to beat ours**.

**Send Your Orders Direct to the Grower and They Will be Taken Care of.**

H. E. Philpott, on his return from Boston, says that the National Flower Show held in that city last week was the best that he ever had the pleasure of attending, and he wouldn't have missed it for anything. Mr. Philpott informs us that he has sold his large residence in Winnipeg and will purchase another in the near future. He will return home the latter part of this week.

John Michelsen, with the E. C. Amling Co., says that business has increased wonderfully the past week, the demand for stock being much better than for some time past. Mr. Amling is expected home this week from Orange, Cal.

In the large consignment of narcissus that Chas. W. McKellar is receiving, the following varieties, Princess, Empress and Emperor were noted.

Fred Liebermann, the enterprising florist at 1611 Wells street, reports business good, with a large amount of funeral work this season.

J. H. Schwenk, of the Poehlmann Bros. Co.'s shipping department, left

The above prices are for select stock. Extra select or inferior stock billed accordingly. All other stock at lowest market rates.

**WIETOR BROS., 162 N. Wabash Ave., Chicago**

C. L. Washburn, in speaking of the National Flower Show, held in Boston last week, says that the plant and rose exhibits were easily the features of the show. If the growers in the vicinity of Boston could hear all the good things that Mr. Washburn says about them they would feel amply repaid for their labor and the courtesy shown the visitors during their brief visit in their city. Mr. Washburn was evidently a good pupil, for he was seen a few days after his return, escorting a party of westerners around the various retail stores of this city.

Frank X. Stuppy of the Stuppy Floral Co. of St. Joseph, Mo., accompanied by Samuel Murray, the well-known florist of Kansas City, Mo., passed through Chicago on their return to their respective homes, on April 3, after enjoying a brief visit in the east. Mr. Stuppy was greatly pleased with the National Flower Show held at Boston last week, and like the other visitors who attended, says it was the best show he ever saw.

Peter Reinberg is receiving the congratulations of his many friends for the excellent manner in which he, as chairman of Carter H. Harrison's campaign committee, conducted the political campaign during the past few months. A prominent gentleman, well known to the trade, said that he wouldn't be at all surprised if Mr. Reinberg were to be some day the successful candidate for the office to which Mayor Harrison was elected.

The J. C. Mastin Co., 3124 West Lake street, reports a good demand for the Mastin automatic spraying machine, which is proving very successful for spraying purposes. The Junior sprayer, made in brass only, has been placed on the market, which is designed for use by florists and plantmen, being especially adapted for con-

servatory, garden or household purposes.

George Fisher on March 31 bought an exceptionally large quantity of carnations for the H. A. Fisher Co.'s stores at Battle Creek and Kalamazoo, Mich. He claims he cleaned up the market, which was the cause of the advance in price the following days.

Paul M. Paley of Vestal & Son, Little Rock, Ark., spent a few days in the city, returning home April 1. He was shown around the city by Frank Ayers, Chas. W. McKellar's popular storeman.

N. P. Miller of the J. B. Deamud Co., was missed from the store on Monday, he being in attendance at the funeral of his uncle which occurred that day.

Now that election is over and all bets paid, the opening game of the White Sox is the principal theme of conversation with the baseball fans at the market.

Miss M. C. Guntenberg, of the Flower Grower's Market is receiving a good supply of American Beauty roses of high quality.

Henry Van Gelder of Percy Jones is receiving a good supply of carnations in the leading varieties.

The E. F. Winterson Co. is supplying their customers with a fancy grade of lilies and carnations.

Vaughan's Seed Store received a carload of nursery stock this week, European specialties.

Visitors: J. F. Wilcox, wife and two sons, Council Bluffs, Ia.; Carl Hirsch, Hillsdale, Mich.; James Forbes of Martin & Forbes Co., Portland, Ore.; Paul M. Paley, of Vestal & Son, Little Rock, Ark.; Frank Stuppy of the Stuppy Floral Co., St. Joseph, Mo.; Samuel Murray, Kansas

## U S Budlong's E Blue Ribbon Valley.

City, Mo., and J. A. Pettigrew, superintendent of parks, Boston, Mass.

### Chicago Bowling.

On March 29, the Violets won three games from the Carnations and the Roses won two and lost one to the Orchids. John Zech was high man of the evening, having a total of 219 pins for the opening game. Friedman bowled 212 and Allie Zech 203 in the second game played. Al. Fisher and Allie Zech both hope to win the Vaughan & Sperry cup which will be awarded to the individual champion at the close of the season. A return match with the Milwaukee bowlers has been arranged for May 7, and preparations for giving the visitors a good time are under way. The following table shows the number of games won and lost by each team to date:

|                  | Won | Lost |               | Won | Lost |
|------------------|-----|------|---------------|-----|------|
| Orchids .....    | 54  | 18   | Roses .....   | 30  | 42   |
| Carnations ..... | 37  | 35   | Violets ..... | 24  | 48   |

Individual and team scores for games played March 29:

| Carnations     |             | Orchids      |             |

### Milwaukee.

#### A DECREASE IN SUPPLY.

The cold snap and dark weather have made quite a difference in the market. Stock has once more shortened up and is bringing normal prices. There are carnations enough to go around, the heaviest demand being for red and white, which are somewhat scarce. Killarney roses have shortened up a little, but are of a fine grade and mostly long stems. American Beauties are practically out of this market. Lily of the valley is plentiful. Violets are still hanging on, but the sale is not as brisk as formerly, it seems as though people were becoming tired of them. Easter lilies are arriving in small quantities and selling readily, the flowers are fine, but the stems are short. Green goods of all descriptions are plentiful enough to fill all orders.

#### NOTES.

Holton & Hunkel Co. is commencing to cut some fine Kaiserin roses at their Brown Deer plant. This firm is busy shipping plants to their out-of-

town trade and are already increasing their force of men. They have a fine selection of plants at their Humboldt avenue greenhouses, especially spirea and rambler rose bushes.

The Milwaukee florists contemplate a return match with the Chicago florists Sunday, May 7, the date having been changed by request of A. Zech. Every Milwaukee florist is invited to join the party, and for particulars inquire of Gus Rusch, care of Holton & Hunkel Co.

C. C. Polworth Co. reports business good. This firm expects to cut quite a few carnations for Easter and are busy filling advanced orders for Easter plants. Walter Halliday, the store manager, was on the sick list last week, but is back on the job again.

W. C. Zimmermann is sporting around in an automobile. He reports business good, having had a considerable amount of funeral work the past week.

Nic Zweifel has returned from Boston and reports a good time. G. R.

# You Run No Risk

In letting us book your order **Now**. If prices fall you will get the benefit. If they rise we charge you current prices on date of order. We are strong on

## Roses

Killarney, White Killarney, Bride, Maid, My Maryland, Richmond. All first-class stock, the best in this or any other market.

## Carnations

Plenty of white, red and pink in all the best varieties. No better stock to be had anywhere.

**Bulb Stock, Tulips, Valley, Jonquils** all in first-class order.

**Greens of all kinds.**

We give personal attention to every order and this careful service counts. We shall be glad to hear from you for today's shipment or for Easter.

#### INCLEMENT WEATHER.

The large influx of stock continues and moves out slowly, and the prices as a result are very low. The weather held back the flowers considerably last week, the days being dark and cloudy. Roses are coming in very strong. The Killarney and Richmonds are very fine. The other roses, too, are doing nicely, but American Beauties are on the short side. Carnations are still abundant and sell at low prices, white enjoys the largest call. The amount of bulbous stock on hand seems adequate for all demands. Local grown Easter lilies, judging from reports from the growers, will be short at Easter time. Right now they are apparently adequate for requests. There are enough lily of the valley and sweet peas. The green goods supply is ample. The appearance of the stands in the Jabez Elliott flower market bespeaks the approach of bedding season. Last Saturday there were few vacant ones. Carnations were the principal cut flowers offered. Other blooms were bulbous stock, lilies, sweet peas, pansies and forget-me-nots. The list of plants included all decorative plants and quite a few geraniums and bedding stock.

#### NOTES.

Al. Sunderbruch, Alex Ostendorf, Chas. H. Hoffmeister and Otto H. Hoffmeister were guests of Wm. Sunderbruch, the president and manager of Bloomhurst Floral Co. of Lockland, April 2. All the stock in the Bloomhurst greenhouses is in splendid condition. They are in the midst of a crop of Killarney and Richmond, and the carnations look as well as at any time this season. The whole year has been a remarkably successful one for the new firm.

The attendance at the bowling club meet April 3 was small but eight enthusiasts were present. Wm. Sunderbruch rolled the highest score yet made by any member of the club this season in a record game.

P. J. Olinger moved into larger and more commodious quarters April 1. He now occupies the old La Fayette Bank quarters, two doors west of his old location.

The Florists' Society meets next Monday evening at the club rooms.

E. O. Woodruff, representing The Sefton Mfg. Co., was a caller.

Geo. Corbett is reported as on the sick list.

#### STOCK ABUNDANT.

There is an abundance of all grades of stock at present. Carnations continue plentiful and some very large orders were taken and filled. White and red carnations had the call the past week. Callas and Easter lilies had a very remarkable run during the week owing to events in the various churches, and the large amount of funeral work. The supply of short-stemmed white and pink roses is a little under the demand, the longer grades being more plentiful. Short Richmond and American Beauties for funeral work find a good market. Long American Beauties are beginning to come in and the quality is of the best, long stiff stems and large blooms. Sweet peas are fine, swain-

## U S Budlong's E Blue Ribbon Valley.

sona is coming in slowly. Violets have been in good demand and lily of the valley is moving very slowly. Asparagus is a little more plentiful, while smilax is rather scarce. Bulbous stock is in large supply. Some very large orders for potted plants for Easter are taken daily and the stock is in fine condition. Whitman and Boston ferns are selling well.

#### NOTES.

Mrs. Geo. W. Smith, who has been ill for some time, was taken to St. Alexis Hospital, March 28, where she underwent an operation the following morning. She has been in very poor health, but it is hoped that she will again regain her strength. At last reports she was getting brighter and stronger, and the doctors say she will soon be able to sit up. She has the sympathy of the trade, who wish her a speedy recovery.

All the boys who went to the Boston flower show have returned and report a good show and a good time. "You don't know beans" until you have seen Boston, is what they all say.

The Taylor Flower Shop has a window decoration for Easter in which about 500 hyacinths, growing in baskets, will be used.

CLUB MEETING.

The club meeting Monday evening, April 2, was made specially interesting by the additional feature of a trade exhibition of considerable magnitude. This as well as the meeting was held in the spacious quarters of the Michigan Cut Flower Exchange. The exhibit was hastily arranged and was intended to show what the local growers have for the Easter trade and fine stock in all cases was shown. There was no schedule of prizes or classification of exhibits, but on the recommendation of Robert Unger, chairman of the exhibition committee, the club's certificate of award was given to the following exhibitors whose stock seemed to merit special mention: Fred Breitmeyer, for well grown antirrhinum, mignonette and roses, Canadian Queen, Bridesmaid, White and Pink Killarney; Thos. E. Browne, meritorious seedling carnations, especially well grown standard sorts; Chas. H. Plumb, excellent display of blooming plants, including fine genistas, rhododendrons, lilacs, lilies, azaleas, hydrangeas and Baby Rambler roses, also a good display of roses and carnations; L. Bemb Floral Co., unique arrangement of the new roses, Aaron Ward, Melody and Double Killarney. These were sent by S. S. Pennock-Meehan Co., Philadelphia, Pa., and most of them, it is understood, were grown there by Robt. Scott & Son. Other exhibitors were: Beard Bros., bulbous and other flowering plants, including marguerites, azaleas, hydrangeas and lilies; J. K. Stock, carnations, forget-me-not and schizanthus (a scarce flower in these parts); Ferd. Kolbe, fine antirrhinum and well grown standard varieties of carnations; Fred. Miesel & Son, sweet peas and carnations, primulas, hydrangeas, acacia, deutzia, weigelia, wistaria, viburnums and roses; M. Bloy, lilies, spreas, carnations and roses, all well grown; Louis Rush, plants of bulbous stock, primulas and spreas; J. B. Dinsner, Boston ferns, lilies and bulbous plants.

With a view to further developing trade in carnations on Mother's day, President George Browne appointed

the following committee: J. F. Sullivan, Philip Breitmeyer and A. Pochehon. This committee will solicit the aid of the superintendent of schools in giving publicity and full significance to the spirit of the day when carnations should be universally worn as contemplated by the founder of Mother's day.

At the next meeting of the club, April 17, a full report will be made of the National Flower Show by the committee appointed for the purpose: C. H. Plumb, E. Rahaley and A. Pochehon. This feature of the meeting will, it is expected, be most interesting. At the same meeting a paper will be read on "Adaptability of wooden benches contrasted with results with cement and solid beds" by Barney Meyers, Lancaster, N. Y. A review of Easter trade is also scheduled for this meeting, at which a full attendance is expected.

### BUSINESS DULL.

Last week's business was very dull until Saturday, which livened up a bit, and this demand, together with a rather light supply on account of the cool weather, which hangs on rather too tenaciously for the season, saw a general clean-up. Southern daffodils were seen on all the street stands offered very low and quantities were handled in this way. The feature of the rose market was the scarcity of American Beauties. Crops appear to be off with all growers alike and it now seems as if there will not be very many for the Easter demand. Killarney, Richmond and White Killarney are fairly plentiful, but there is no piling up. There appears to be use for them even in the light general demand. Carnations are quite equal to the demand and are of excellent quality. Violets are fast going out and it is a question if there will be any for Easter. The stores are all showing a fair sample of the Easter stock, displayed to catch early orders. All the buyers were out in full force the past week and for the most part the orders were all placed by the first of the month. As said before in these columns, the stock is very fine, that of W. K. Harris and the Robt. Craig Co., the largest growers in this vicinity, being very fine. At Harris' the leaders are azaleas, rhododendrons, Rambler roses, duetziyas, hydrangeas and gardenias; while everything is in the greatest state of perfection the gardenias are exceptionally fine. They are a wonderfully flowered lot of plants. There are also several houses of fine lilies. Robert Craig & Co.'s specialties are Rambler roses in variety, many of them trained as globes, pyramids, umbrellas, fan shaped, etc., with quantities of large fall bushy plants, and all loaded with buds. Hydrangeas are very full of blooms and there are quantities of azaleas and spiraea and several large bunches of Easter lilies, which are of good height and well flowered.

### NOTES.

They had a narrow escape from a serious fire, April 1, at the Robert Craig Co. establishment, when a combined boiler house and carpenter shop was totally destroyed and the ends of five greenhouses adjoining were burned out and quite a good deal of the stock at that end of the houses destroyed. It was noticed by a passer-by and the city fire department was on the job almost before the night fireman knew of it. Fifteen hundred dollars will probably cover the loss. Had the fire gotten a little more headway all of one section of the place would have gone, and made a serious loss. As it was none of the Easter stock was damaged and this part of the business will not be interfered with.

The wholesale men say that orders are coming in nicely for cut flowers for Easter and they expect a good demand for lilies. \$12 to \$15 is the price asked for good flowers.

Adiantum Farleyense are all sold out in this section. Orders for three or four hundred at a time have been

turned down at H. A. Dree's, the demand for this fern has been so large this season. K.

## Boston.

### TRADE GOOD.

Trade has been fairly good the past week, and everything is moving fairly well. Violets are about done. The growers are throwing them out to plant tomatoes and crops for Decoration day.

### NOTES.

The meeting of the Gardeners' and Florists' Club will be held April 25. A lecture on the gladioli will be given by B. Hammond Tracy. This ought to prove interesting, as Mr. Tracy is an expert in that line and there will be some points brought out worth knowing.

Thos. Roland, Nahant, gained many prizes and honors at the flower show, but I am sure the prize that arrived at his home March 31 is more highly valued than all the prizes or medals he ever received. "It is a girl; congratulations."

Paul De Nave is sending some high class Dendrobium thyrsiflorum to Welch Bros. They are well grown and do the grower great credit.

F. J. Lake, Wellesley Hills, is sending to his agent in the market some very fine white and yellow marguerites.

Everett Cummings, Woburn, Mass., is building new houses for violets. The wholesalers report business as being good.

W. E. Doyle is reported as sick.

Spanish Iris, etc., in season.

## U S Budlong's E Blue Ribbon Valley.

St. Louis.

### COLD AND CLOUDY.

The weather still remains cold and cloudy and trade is light, with the prices of stock low. Sweet peas are very plentiful but violets are becoming shorter in supply and there is doubt whether there will be any at Easter. Hardy ferns are sold at good figures.

### NOTES.

Willie Dee, window decorator at C. Young & Sons Co., has put up some very fine window displays. The chickens attract a great deal of attention.

F. C. Weber, Theodore Miller, Fred H. Meinhardt and Otto G. Koenig have returned from Boston where they had a royal time.

C. A. Kuehn is receiving a good supply of American Beauty roses from the J. F. Ammann Co., Edwardsville, Ill.

The meeting of the Florists' Club April 6 will be an important one and a large attendance is desired.

H. G. Berning is receiving a fine stock of lilies and expects a nice lot for Easter.

The Mullanphy Floral Co. has a fine assortment of plants for Easter.

## New York.

### COLD SPRING WEATHER.

Very cool weather, considering that we are in April, is the rule; in fact, March is proclaimed as the coldest on record, and winter is surely running well into the lap of spring. Supplies of all kinds of cut flowers are more than ample for all demands; prices are not advancing on any lines, rather are they retreating if anything. It can freely be stated, however, that roses are more steady in the market than are carnations; the latter have become unduly plentiful, and prices consequently have been more erratic. Cattleyas have experienced little change in market conditions. Lily of the valley, callas, lilies, tulips, and narcissus in several varieties, are all in plentiful supply, prices remaining almost as in the week previous. The gardenia supply is quite a little heavier than has been the rule for some time past. Sweet peas are very numerous, the best grades keep up their values very well, however. Retailers are fairly busy right along, and a great deal of material is being purchased daily; the supply is so abundant, however, that prices, as we inferred above, remain almost stationary.

### NOTES.

Kessler Bros. will have the sympathy of the trade in the death of their father, Louis Kessler, aged 70 years, which occurred at his home, Secaucus, N. J., March 30. The interment was in Greenwood cemetery, Brooklyn, April 2. Besides the two brothers, who are in the plant business, there are left two girls and two boys to mourn his loss.

The next meeting of the Florists' Club will be held April 10 in the club's rooms, corner Twenty-third street and Eighth avenue. The essay committee has secured Arthur Cowee, Berlin, N. Y., to give an illustrated lecture. Gladys Joli will be the theme, and Mr. Cowee is an expert in that subject, so we are assured of something good.

New Yorkers who attended the Boston show are all enthusiastic over the sights seen there; the flower show is considered as the best ever and the unbounded hospitality of the Bostonians will long be remembered.

A meeting of the directors of the New York Cut Flower Exchange was held on April 1. President John Donaldson, of Elmhurst, is still suffering from an attack of rheumatism and was too ill to attend.

Arthur T. Boddington, seedsman, gave a luncheon to the visiting English horticulturists on April 4.

W. J. Palmer stopped off a few days here on his way from the National Flower Show in Boston.

John I. Raynor is home again after spending the winter in California.

Visitor: W. Currie, of Currie Bros., Milwaukee, Wis.

## Pittsburg.

### GOOD MARKET.

What might be termed a good market, satisfactory to grower, wholesaler, and retailer, is the condition now. Carnations and roses are lightening up somewhat, due to several days dark weather. Lilies are very plentiful, and calla blooms in quantity, some coming from California. In the small flowers, such as violets, sweet peas, etc., the demand is better than for some time past. White lilac is in regular supply, and a few forget-me-nots are seen. Greens are a little scarce.

### NOTES.

A. W. Smith Co. has closed a campaign, whereby more flowers were disposed of during Lent than ever was before by any retailer. A "quantity" dollar box was put up every Saturday, with the result that no wholesaler in the city carried over a rose or carnation on Sunday.

Klinke & Wehrheim are now settled and are ready for Easter in a store room that while not so large ranks well to the front in appearance. Adolph Cooper, formerly with H. L. Blind & Bro., is associated with them.

H. L. Blind & Bros. are cutting a very large crop of Emperor and Empress narcissus, which they are using to advantage in their store decorations. Every one seems to be busy on the Northside these days. G. & J. W. Ludwig state that their new store has brought them much new business.

F. H. Westhoff, De Haven, states that his carnation cuttings are the finest he has ever had, and looks for his banner year next season.

The Penn avenue store of Randolph & McClements state that "Red letter days" in the East End clean up large quantities of flowers.

The Ziegler Co. have had several large decorations lately, all requiring new and novel features.

The McCallum Co. is handling an Easter novelty composed of boxwood and fancy flowers.

The Pittsburg Cut Flower Co. has handled quite a lot of southern daffodils this year.

The South View Floral Company are cutting a nice crop of callas.

Visitors: Miss McDowell, of A. L. Wells Co., Steubenville, O.

J.

WAYNESBORO, PA.—The greenhouses of Charles F. Happel at Highfield were destroyed by fire in February, together with all the contents, the loss being \$2,000. Mr. Happel will rebuild at once.

SPRINGFIELD, O.—Christian Binnig and John M. Good, representing the Florists' Club, presented a plan to the members of the board of education to beautify the yards around the public school buildings. The club offers free seeds, bulbs and plants if the children do the work and are given instruction in floriculture.

# Dreer's Offer of New Dahlias.

## New German Giant CACTUS DAHLIAS

**Nerthus.** Flowers fully 6 inches in diameter, of splendid form, borne on stout, stiff stems, held well above the foliage. The centre of the flower is a rich, glowing bronzy orange-yellow, passing to a carmine-rose at the tips, the whole suffused with a glowing golden color, which gives it an iridescence which it is not possible to describe. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Rheinkönig.** In this we believe we are offering the ideal white Cactus Dahlia which has been a desiderata for a long time. In habit of growth it is robust, similar to the varieties *Lavine* and *Flora*; in color a pure snow-white, with flowers 5 to 6 inches in diameter. These are of great substance, lasting splendidly when cut; they are borne on long, stiff stems held well above the foliage, making it as valuable for garden decoration as for cutting. Our own representative had the opportunity of comparing this variety with many other sorts which were planted for comparison at the trials which during the past summer were made at the *Palmen Garten* at Frankfurt, Germany, where it showed up in such superior form over all others that we at once secured all available stock. We offer it, believing it to be the most desirable acquisition in Dahlias offered in many years. Strong plants, ready April 15th. 50 cts. each; \$5.00 per doz.; \$35.00 per 100.

**Walter Rhein.** Flowers frequently 7 inches in diameter, raised well above the foliage on stout stems; the petals are broad, curled and twisted, forming an ideal flower, the color of which is yellow suffused with salmon-rose; a beautiful, attractive and imposing flower. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Wodan.** This is the strongest-growing variety in the collection, the plant being exceptionally robust and growing fully 6 feet high, with large, bold flowers, frequently over 7 inches in diameter; but with this large size there is no coarseness, the flowers being a graceful arrangement of semi-incurved tubular petals of a most pleasing, delicate salmon-rose color shading to old gold in the centre. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Wolfgang von Goethe.** A splendid large, free-flowering variety, with gracefully arranged, perfect flowers of a rich apricot with carmine shadings; a splendid cut flower. Strong plants, ready April 15th. 35 cts. each \$3.50 per doz.; \$25.00 per 100. One each of the above 5 new sorts for \$1.75.

NEW GERMAN GIANT CACTUS DAHLIA RHEINKÖNIG.

## Decorative Dahlias of Recent Introduction

**Beloit.** Particularly effective on account of its very large flowers, borne on stems 18 to 20 inches long and held well above the foliage; these are full double, of splendid form, of a rich purplish-garnet, shading deeper towards the centre. Plants ready April 15th. 35 cts. each; \$3.50 per doz.

**Delice.** Its beautiful soft, yet lively color, a glowing rose-pink, together with its perfect shape, stout, stiff stems which hold the flowers well above the foliage, and the fact that when cut it retains its freshness longer than any variety we know of, makes this one of the most valuable for cutting, and one of the most decorative sorts in the garden. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

**Le Grand Manitou.** The first variegated Dahlia of the decorative type introduced, and which attracted much attention in our trial ground the past season. The flowers are from 5 to 6 inches across, the ground color being white, prettily spotted, striped, blotched and suffused with deep reddish-violet; these are borne on stout, stiff stems and held well above the foliage. Plants ready April 15th. 35 cts. each; \$3.50 per doz.

**Perle de Lyon.** The most valuable white Decorative Dahlia yet introduced, and which is certain to become a leader as a cut flower, perfect in form, pure in color, and produced on long, stiff stems, and very free-flowering. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

**Yellow Colosse.** Flowers of very large size, of perfect form, pure primrose-yellow; the best of its color and valuable for all purposes. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

One each of the above 5 new Decorative Dahlias for \$1.00.

See our Current Wholesale List for other varieties of Dahlias, Seasonable Plants, Seeds, Bulbs, etc.

DECORATIVE DAHLIA, PERLE DE LYON.

The above prices are intended for the Trade only.

# Decoration by Roses

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

## Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, at the following prices:  
Price, 75c for 5 (of one variety), \$13.00 per 100, \$120.00 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.  
Anne de Diesbach. Bright carmine.  
Ball of Snow (Roule de Neige). Large, pure white.  
Baron de Bonstetten. Blackish crimson.  
Baroness Rothschild. Satiny pink.  
Capt. Christy. Delicate flesh color.  
Clio. Satin blush.  
Duke of Edinburgh. Bright vermillion.  
Fisher Holmes. Dark velvety crimson.  
Frau Karl Druschki. The finest white in existence.  
Gloire de Margottin. Dazzling red.  
Gen. Jacqueminot. Brilliant crimson.  
John Hopper. Bright rose.  
La France. Peach blossom pink.  
Mme. Charles Wood. Bright carmine.  
Margaret Dickson. White, with pale flesh center.  
Marshall P. Wilder. Cherry rose and carmine.  
Magna Charta. Dark pink.  
Mme. Gabriel Luizet. Light, satiny pink.  
Mrs. John Laing. Rich satiny pink.  
Mrs. Sharman Crawford. Deep rosy pink.  
Paul Neyron. Lovely dark pink.  
Persian Yellow. Hardy yellow Rose.  
Princes Camille de Rohan. Dark crimson-maroon.  
Soleil d'Or. Gold and orange to reddish gold.  
Ulrich Brunner. Cherry-red.

For prices see above.

## English Moss Roses

Assorted. White, Pink, Red. Large dormant plants, from open ground. 75c for 5, \$14.00 per 100.

## Baby Rambler Roses.

PHYLIS. Very fine clear pink, highly recommended, \$1.25 for 5, \$20.00 per 100.  
PHYLIS (Grown as a Standard). \$2.00 for 5, \$35.00 per 100.  
BOSKOOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30.00 per 100.  
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c for 5, \$15.00 per 100.  
BABY DOROTHY (Grown as a Standard). For description see above. 50c each, \$4.75 for 10, \$45.00 per 100.  
CATHERINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type, White with yellowish center. It has the true rose perfume. 85c for 5, \$15.00 per 100.  
MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85c for 5, \$16.00 per 100.  
MME. NORBERT LEVYASSEUR (Baby Rambler). Strong, field-grown plants, 75c for 5, \$14.00 per 100.  
BABY RAMBLER (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c each, \$3.75 for 10, \$35.00 per 100.

## Ramblers and Other Climbing Roses.

CLIMBING BABY RAMBLER (Miss O. Mossman). A novelty for 1911. While the Baby Rambler is popular, the climbing type will soon become so too. We have a small stock and offer same as follows. It is a true Polyantha type, color deep rose. 50c each, \$2.25 for 5, \$40.00 per 100.  
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown, \$1.50 for 5, \$22.50 per 100.  
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 5 to 6 feet, \$1.75 for 10, \$15.00 per 100; 4 to 6 feet, \$2.25 for 10, \$20.00 per 100; 7 to 8 feet, extra heavy, \$4.00 for 10, \$35.00 per 100.  
DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely sherry pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 8 to 9 feet, \$2.00 for 10, \$18.00 per 100.  
TAUSENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15.00 per 100.  
TAUSENDSCHON (Grown as a Standard). Fine for forcing. 40c each, \$3.75 for 10, \$35.00 per 100.

## Somthing New in Roses for Florists

### Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and one-half feet high, and will be a novelty for your trade you cannot probably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY RAMBLER (Half Standard). Crimson, 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY CATHERINE SEIMETH (Half Standard). White. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY "STARS AND STRIPES" (Half Standard). White and red grafted on the same plant; most attractive. 45c each, \$4.50 per doz., \$35.00 per 100.  
PHYLIS (Half Standard). Carmine pink. 45c each, \$4.50 per doz., \$35.00 per 100.  
TAUSENDSCHON (Half Standard). Soft pink. 40c each, \$4.00 per doz., \$30.00 per 100.  
MRS. CUTBUSH (Half Standard). Rose pink. 40c each, \$4.00 per doz., \$30.00 per 100.

## English Grown Hybrid Tea, or Ever-blooming Roses, etc.

Hybrid Tea or Everblooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in winter, they give a wealth of bloom all through the summer months and late in the fall till frost checks them.

THE GRAND ROSE LYON. Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp-pink at the ends of the petals, center coral-red or salmon-pink shaded with chrome yellow. Very fragrant. 40c each; \$1.75 for bundle of 5; \$30.00 per 100.  
THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation: is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong. 2-year-old field-grown stock, \$1.25 for bundle of 5; \$22.50 per 100.

MAN COCHET ROSES. The best of all Roses for summer-flowering and cutting. Maman Cochet (Pink). Color a clear, rich pink changing to silvery rose; very double and fragrant. Marman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride. \$1.25 per bundle of 5; \$22.50 per 100.

ROSE, ETOILE DE FRANCE. Flowers large, possessing petals of very good substance; magnificent cupped form. Superb crimson velvet, the center of the bloom vivid coral-red. The flowers are very fragrant and last very long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong. 2-year-old plants, field-grown, \$1.25 for bundle of 5; \$22.50 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10; \$22.50 per 100.  
GRUSS AN TEPLITZ. No Rose in commerce can compare with this as a bodder. It is a perfect sheet of richest crimson-scarlet all summer. A strong, vigorous grower. \$1.75 for 10; \$15.00 per 100.

VISCOUNTSSE FOLKESTONE. A large, full flower of creamy pink, shading to deep salmon-pink at the center; very floriferous. \$1.25 for 5; \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower. \$1.25 for 5; \$20.00 per 100.

RICHMOND. The well known Red Rose of commerce, \$1.25 for 10; \$22.50 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor summer growing. \$1.25 for 5; \$22.50 per 100.

BETTY. Coppery yellow, overspread with golden rose. A fine formed Rose, large and moderately full, \$1.75 for 5; \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink. \$2.50 per 10; \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 per 10; \$22.50 per 100.

AMERICAN BEAUTY. Almost too well known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong field-grown plants, 75c for bundle of 5; \$14.00 per 100.

CAROLINE TESTOUT. Bright satin rose, with brighter center, large, full and globular; sweet scented, \$1.25 for bundle of 5; \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

KAISERIN AUGUSTA VICTORIA. An almost pure white Rose. Shaded a beautiful primrose. Fine for indoor or outdoor summer-blooming. \$1.25 for bundle of 5; \$22.50 per 100.

# EASTER PLANTS

Wishing You a Joyful, Happy and Prosperous Easter

## Prepare for Easter

And purchase your Easter supply direct from your old reliable friend, Gofrey Aschmann, of Philadelphia. Two more houses devoted this year to Easter plants, and we have an immense stock for immediate shipment.

Unexpected business has prevented us from making an exhibit at the National Flower Show, Boston, March 25th. But I herewith invite all my customers and others who can find time to come to our establishment, to the great mill of plant production, and from your judgment of our great Easter stock in person. The Germantown and Chestnut Hill and Willow Grove trolley, at 13th and Eighth and Market streets, will take you direct to Ontario street. From there walk two squares east to 1012 W. Ontario street.

All florists should this Easter-time, come see my stock quite superfine: My glistening *Araucaria*, my *Lilies* strong and woodruss fair; Ferns, big and green no rival know. Bulbs of all sorts, the best I grow. There's not a flower you now can need, but I can sell you cheap indeed: Azaleas like a plant on fire, with blooms that fill the heart's desire; Oh, yes, *Primroses* with colors chaste, *Palms* grown to suit the highest taste. The spring-time jewels are my flowers, pictures of life that brighten ours; None fairer, better, you can find—I have the best of every kind.

### Spirea Gladstone.

What is a home, what is a store, what is a church, what is an Easter present, without having a few plants of the so much admired and so greatly in demand *Spirea Gladstone*, the pride of Holland? O, those charming sprays of beautiful pure white flowers! And the foliage, of such a beautiful waxy deep green is a jewel in itself! Mixed with beautiful lilies and other blooming plants they will complete the flower decoration for your happy, joyful Easter home of 1911. Knowing the great demand for these plants during past Easters, when not half the customers could be supplied, we are well prepared this year for the rush, and were fortunate in spite of the scarcity last fall in Holland. When other florists' supplies were cut short by Holland growers, we obtained enough of the bulbs to fill two houses with the choicest, and we are able to supply all incoming orders promptly. Price: 5½, 6 and 7 in. pots, full of buds and flowers, 35c, 50c, 75c to \$1.00 each; dozen or more, the same price. Some are as big as a small washtub.

### Cineraria Hyb. Grandiflora.

Readers, please just a minute, I wish to call your attention to one of our biggest houses filled with a big selection of that so much admired Easter novelty, the *Cineraria Hyb. Ida Grandiflora*, which will have no equal in the flower market for Easter, 1911. If you are not fortunate enough to see them growing at our establishment, then just imagine you were promoted to a paradise, to a garden in Eden, standing before a mass of flowers in various beautiful colors. This is the condition one of our *Cineraria* houses represents at Easter-time. Our new improved strain, planted in 6 in. pots, of medium tall sizes, are unsurpassed in the size and color of the flowers. The flowers are about twice the size of the old ordinary varieties, has big heads of flowers good foliage; some of the plants are as big as a small apple basket. Price: 6 in. pots, 25c, 35c, 50c, 75c to \$1.00 per plant; dozen or more, same price.

### Azalea Indica.

Remember we are headquarters for *Azalea Indica*, grown for us under contract in Ghent, Belgium under my personal inspection, by going abroad every year and looking them over. *Azalea Indica*, Easter forcing: Ver-zee-nove, Deutsche Perle, President O. wald de Kerkove, Emperor of Brazil, Professor Wolters, Empress of India, Schryveriana double variegated 60c, 75c, \$1.00 to \$1.50; also Mme Van der Cruysen, Simon Mardner, pink Niobe, white, Apollo, red, and Emperor of Brazil 60c, 75c, \$1.00, \$1.25 to \$1.50; full of buds and flowers; right for Easter. In large plants we have: Helene, Helene Thielman, Bernard Adressa Alba, white, Empress of India, Mme. Van der Cruysen, and others, \$1.50, \$2.00 to \$2.50.

*Asparagus Plumosus Nanus*, 4-in., 10c; 2½-in., 3c. *Asparagus Sprengeri*, 2½-in., 3c; 4-in., 10c.

### Lilium Multiflorum.

We have *Lilies* this Easter (1911) to burn, to burn, they are crackers, to beat the band, the best in the land, the best in the land, the best in the land.

Three houses in *Lilium Multiflorum*, the genuine Japan Easter Lily, better than ever before. Our own importation from our general grower in Japan, raised from 9,100 in bulbs started in 6 in. pots last October; have kept cold. Good, perfect foliage from bottom up. Plants medium size, and in all heights from 5 to 10 buds to the plant, 10c per bud; plants under 5 buds, 12c per bud. Just right for Easter. We have the finest lilies this year in Philadelphia and all over the country, is the town talk from florists and agents daily visiting our place. "We never have seen anything like it," said two well-known growers from Cincinnati and Short Hills N.J., the other day, when visiting our place together. We have three houses full in 6 in. pots, nicely stalked up, medium height, and can supply all applications.

On account of selling our lilies cheap, and most all florists know there is no profit in growing lilies (we only keep the good ones; the bad and the diseased ones we dump out fully 30 per cent every year), therefore we kindly ask our customers to buy a suitable portion of other plants in connection with lilies.

*Hyalanthus* of our own importation, four best colors. Gertrude best pink; King of the Blues, best blue; Grand Maître, light blue; La Grand-esse, best white; 4-in. pots, in bud or bloom, \$2.00 per 100.

*Begonia Rex*, 5 to 5½ in. pots, 20c to 25c.

### Araucarias Our Specialty.

We are the largest importers of these lovely decorative plants the *Araucaria Excelsa*, *Robusta Compacta* and *Glaucia*, the choicest last spring (1910) importation, ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the *Araucarias* in the future.

Look! Bargains in *Araucaria Excelsa*. Such low prices as are quoted below we have never known in the history of *Araucaria excelsa*. Just think! 6 to 7 in. pots, 4-5-6 years old, 4-5-6 tiers, 25-30-35-40 in. in height, for only \$1.00, \$1.25, \$1.50 to \$1.00 each. These prices are record-breakers—money makers for you.

*Araucaria Excelsa*, 6-7 in. pots 5-6-7 tiers, 4-5-6 years old 25-30-35-40 in. high, perfect tiers, green from bottom to top. Price \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

We also have the nicest *Araucaria Robusta Compacta* and *Excelsa Glaucia*, a house full, for only \$1.25, \$1.50 to \$2.00, worth double.

*Dracena Bruni*, 25 to 30 in. high, 6 in. pots, 40c to 50c. Highly recommended for store and house decoration; stands heat cold and dust.

*Von Sion Daffodils*, double, ready for Easter, best double *Narcissus* in cultivation, three bulbs planted in a 2½ to 6 in. pot, 4-5-6 years old, 4-5-6 tiers, 25-30-35-40 in. in height, for only \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

*Tulips*, *Tournecole* double, red and yellow variegated, and *Murillo*, beautifully shaded rose pink, three bulbs in one pot (4 in.), \$1.50 per 100 pots; \$1.80 per doz.

*Ipomea Noctiflorum*, our so well-known pure white, waxy *Moonvine*, bearing flowers very fragrant and as big as a saucer 2½ in. pots, will make good stock for you to propagate from, \$5.00 per 100.

*Lantana Borbonica* (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each. *Kentia Forsteriana*, in fine shape, 6 in. pots, 30 to 40-45 in. high, 4-5-6 years old, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

*Kentia Belmoreana*, 30-35-40 in. high, 5½-6-7 in. pots, 5-6-7 years old, \$1.25, \$1.50 to \$2.00 each.

*Kentia Belmoreana*, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25 to \$1.50; 4 in., 20 in. high, 20c to 25c.

Our *Boston* this year are exceptionally very fine. *Ferns*, *Scotti*, *Whitman* and *Scholz*, 5½ and 6 in., 35c, 50c, 75c, 1.00; 7 in., 50c, 75c, 1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember all our *Ferns* are pot-grown, not lifted from benches.

*Scotti*, *Whitman* and *Scholz*, 8 in., \$1.50. *Neph. Glatraei*, a new beautiful fern, an improvement on *Scotti*, much shorter heads of flowers than *Scotti* 5½ in. pots, 50c; 3 in. pots, 25c.

*Ferns* for Dishes, big assortment, 2½ in. pots, at \$4.00 per 100.

*Adiantum Hybridum*, 6 in. pan, 25c to 30c.

Our *Hydrangea Otaksa* is in a very fine state for Easter trade; 6-7 in. pots, every branch nicely taken up, with 4-5-6-7-8 large heads of flowers to the plant. Price: 75c, \$1.00, \$1.25, \$1.50, \$2.00 each. Sold out of 25c, 35c and 50c sizes.

*Crimson Rambler Roses*, 6 in. pots, every bush nicely taken up and bent down 36-40-45 in. high, full of flowers and buds, big value for the money. Price: 75c, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Durfee, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, June, 1911.

FARMERS report that seed corn is not sprouting.

COLD weather has diminished seed trade activities.

BURPEE'S seeds are sold in "Noah's Ark" in Denver.

CHICAGO.—Prices on the board of trade April 5 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.—Potatoes have advanced 20 cents per bushel this week.

VISITED CHICAGO: C. F. Eltzholtz, returning to the coast; J. E. Northrup, of Minneapolis Minn.; Wm. Currie, of the Currie Bros. Co., Milwaukee, Wis., returning from the Boston show; Linnaeus Allen, Floral Park, N. Y., who reports that orders are smaller than usual.

It is reported that the June meeting of the American Seed Trade Association will be held at Marblehead, Mass., but we are without official notice of hotel headquarters. We suppose the date will be June 20-22.

VISITED BOSTON.—Among the National Flower Show visitors last week, in addition to those already mentioned in this column, were John Lewis Childs, Floral Park, N. Y.; S. F. Willard, Wethersfield, Conn., and A. M. Kirby, New York.

THE Nebraska Seed and Commercial Feeding Stuffs bill, H. R. No. 219, requires that seed corn shall germinate 94 per cent and further that broken kernels shall be considered impurities. The penalty for selling such seed is \$100 fine. If this bill passes it would almost seem that the Nebraska seedsmen will have to handpick their seed.

THE new cabbage Copenhagen Market introduced by Hjalmar Hartmann & Co., Copenhagen, Den., is being favorably received. The heads mature early and all at the same time, averaging about 10 pounds in weight, are very solid with small core and of fine quality. The leaves are small and tightly folded and the plants can be set closer than other varieties.

## The Latest Novelties in Sweet Peas.

Paper read by G. W. Kerr of Doylestown, Pa., before the National Sweet Pea Society of America at Boston, Mass., March 29, 1911.

Not so many years ago, if one mentioned sweet pea novelties, it was quite unnecessary to ask the raiser's name, as they were then practically all the result of the patient and painstaking labor of the late Henry Eckford, but of recent years, more especially since the introduction of that glorious variety, Countess Spencer, all this is changed, as the past six years has seen the advent of many sweet pea specialists and raisers, with the result that our list of varieties is growing by leaps and bounds. So much so that were they all distinct it would be almost an impossibility to keep in touch with them. But as it is, only a few of the many novelties which are introduced each year are found worthy of a permanent place in the garden, the majority of the novelties being either synonymous with existing varieties or in many cases inferior. For instance we are, "trying out" at Fordhook this year considerably over one hundred of the season's introductions and I fancy I am safe in saying that there will not be twelve out of that number which will be found worthy of perpetuating.

As far as we can judge by paper reports, the most sensational English novelties of the year are Stirling Stent and Charles Foster. Stirling Stent is a waved orange colored flower and for which the introducer has been charging seven shillings, six pence (almost two dollars) for six seeds. It was awarded a first-class certificate and the silver medal of the English Sweet Pea Society as being the most meritorious novelty in their trials, and Charles Foster is said to be the first of quite a new shade in sweet peas and is described as a blending of rose, salmon and apricot on a lavender and violet ground, both are of immense size and generally produced four on a stem. And after having read such glowing reports of their merits I am eagerly looking forward to the advent of their first flowers some two and a half months hence.

Of the 1910 novelties Miriam Beaver easily takes first place, in fact I consider it the most exquisitely beautiful variety in cultivation, the color being soft light terra-cotta on cream ground. Of the other novelties the only varieties of outstanding merit were Mrs. Hugh Dickson, soft pink on cream ground; Martha Washington,

white edged and suffused rose; W. T. Hutchins, buff pinkish apricot; Earl Spencer, or Nancy Perkins, salmon-orange; Marie Corelli, rose; Ruby, glowing orange-scarlet, wings rose, and Arthur Unwin, a much improved Mrs. Ireland, and if we add the following, the cream of the earlier Spencer novelties—this may be said to embrace the very finest set now in commerce, namely: Mrs. Routhahn, apricot pink and creamy buff; Constance Oliver, a cream ground Countess Spencer; Dainty Spencer, white with a picotee edging of rose; Mrs. C. W. Broommore, or Evelyn Hemus, primrose with picotee edging of pink; White Spencer; Primrose Spencer; Asta Ohn, soft lavender, standard flushed pale rose; Tennant Spencer, heliotrope; John Ingman, or George Herbert, rosy carmine; Helen Lewis, deep orange; Florence Morse Spencer, pale pink; Othello Spencer, rich crimson; Flora Norton Spencer, deep maroon; King Edward Spencer, pale blue; Aurora Spencer; Queen Victoria Spencer; Cocleina Spencer and last, but not least, Countess Spencer, the forerunner of this magnificent new race.

So much for this popular flower as we know it in the summer time, but what of our winter flowering varieties? After having admired the magnificent exhibits of roses, carnations and other winter and spring flowers exhibited at the show, you may imagine I am a rash and false prophet when I say that there is a race of winter flowering sweet peas coming that will, to a great extent, oust many of these from popular favor and that their introduction will revolutionize the cut flower market. I am referring to the Spencerised type of winter blooming sweet peas. Although the winter flowering type as we have it today is extremely popular, it is still in its infancy, and the new race to which I refer is as much superior to it as is the summer flowering Spencers to the grandifloras, and all sweet pea lovers appreciate this marked difference, but I believe it is even more accentuated in the new winter Spencers. I had the pleasure of visiting Mr. Zvolanek, at Bound Brook a few days ago, where I saw this new class in perfection. There were pure white, primrose, bluish pinks, pink in various shades to rose and orange, the size of flowers and the magnificent frilled blooms, strong stems and robust and vigorous growth to which I was introduced were magnificent and I am certain the introduction of this new race will place the sweet pea at the forefront of all winter flowers, especially for table decorations and boutonnières.

I understand that the Rev. Edwin Arkwright, of Algiers has also been working on this form. I have also been hybridizing for the same results for the past few years, so that we have now at Fordhook a large family of promising youngsters of various ages from which I am expecting great things.

# The Two New Carnations for 1911

## WHITE WONDER.

The largest and most productive white carnation.  
Has all the white varieties outclassed.

## GLORIOSA.

Pure glistening bright pink. A decided improvement over all the pink varieties in color and every other respect.

The two carnations that will prove to please all growers and the most critical buyers. Commercially they will head the list of varieties grown in the future. Do not fail to grow these varieties that have been inspected and have met the approval of many of our best carnation growers. If you have not already ordered, **Do So Now.** Next delivery—**White Wonder March 27, and Gloriosa April 4.** Our March 15 delivery of White Wonder and March 15 and 27 delivery of Gloriosa were all sold in 5 days after our advt. appeared.

Prices: \$12.00 per 100; \$100.00 per 1000; 2,500 for \$237.50; 5,000 for \$450.00.

## F. DORNER & SONS CO., La Fayette, Ind.

# Chrysanthemums

Two good American seedlings: **F. E. Nash**, light pink Japanese, and **Pioneer**, a beautiful soft pink with wide petals, toothed at the end. These were both certified by the C. S. A.

We are now in a position to supply good stock of these varieties at \$5.00 per dozen; \$35.00 per 100.

We catalogue over 500 varieties in addition to these here described. If you are interested write us.

**CHAS. H. TOTTY,**

**MADISON, N. J.**

### Growing Cyclamens the Second Year.

ED. AMERICAN FLORIST:

What is the proper treatment to carry cyclamen plants over for the second year? Can primulas be grown in for the next year? Will *Narcissus alba plena odorata* bloom another season and how should they be treated?

B. E.

Cyclamen can be grown a second year if the plants are strong. Generally the best plants are picked out and only the poorer ones left. In this case it is better to start with seedlings. The plants should be placed in frames outside, the pots sunk to the rims and shaded with lath frames, white-washed sash are not as good as the lath frames, for they are much hotter during the summer. Care should be taken not to over water until the new growth starts, when they should be potted, the soil to consist of two parts fibrous loam and one part leaf mold with a liberal amount of sand added. The pots should be just large enough to hold the bulb and roots, so that they can be shifted into larger pots in the fall, given new soil and not have them in too large a pot at that time. The primulas are such a rapid-growing plant that it is far better to sow the seed now and have nice young stock than to attempt to grow the old plants a second year. The *Narcissus alba plena odorata* bulbs would probably not bloom satisfactorily a second season, and would hardly pay for their room and culture. W.

### Sowbug Remedies.

ED. AMERICAN FLORIST:—

Our greenhouses are badly infested with sowbugs. Will you kindly inform us of the best remedy to employ to get rid of them without injury to the plants? We do not care to use Paris green on such an extensive scale as the case appears to demand.

SUBSCRIBER.

In the treatment of sowbugs poisoned baits are standard remedies. The great fondness of sowbugs for potatoes long ago led to these being used, poisoned either with Paris green or London purple. The potatoes are sliced and a thin covering of powder applied. Sprinkling the soil around an injured plant with Paris green, or dusting the same under boards and other haunts of the sowbugs is also very effective.

In addition to Paris green and London purple, arsenate of lead may be used. There is no danger from the use of any of these arsenicals, if they are not sprinkled or sprayed on the plants. A still cheaper substitute for Paris green is white arsenic, which is quite inexpensive; it is, however, dangerous to apply it to delicate plants. One or two tablespoonfuls of white arsenic to a bucketful of bran, sweetened with a quart of syrup or molasses and the mixture sprinkled about the beds will prove very effective in the control of these creatures.

If the sowbugs are injurious in a cultivated patch—after treating the ordinary haunts—it is best to keep the ground well broken and raked to prevent clodding and cracking, which gives them protection. Old boards, cans and rubbish should not be allowed to accumulate. Such precautions will tend greatly to prevent any great damage or annoyance. F. H. C.

HARTLAND, N. Y.—White Bros. have not sold their greenhouses here as has been reported, but have purchased property at Medina where they will erect a greenhouse establishment to be operated in conjunction with the plant here.

— THE GRANDEST FERN OF THE AGE —

# Nephrolepis Roosevelt

**N**EPHROLEPIS ROOSEVELT is a sport from Nephrolepis Bostoniensis, but a wonderful improvement over the parent variety and others of stiff, upright growing habit, known as Harrisii or the Harrisii type. It is a stronger maker of fronds and young plants than any other variety, and will produce a larger finished plant in a six-inch pot than Boston or Harrisii will produce in a larger size.

The finished fronds of Nephrolepis Roosevelt are at least a third wider than Boston and have more graceful drooping habit. The pinnae are distinctly undulated, giving them a beautiful wavy effect which attracts the eye instantly. Cut flower dealers will find fronds of Roosevelt invaluable for design work. A single plant of Roosevelt grown in a six-inch pot will when finished almost double the number of fronds produced by Boston or Harrisii type varieties, and while Boston and Harrisii show stiff, upright growth in a six-inch, the wide, wavy fronds of Roosevelt droop gracefully over the pot, hiding it completely from view. Finished three-inch plants of Roosevelt are equally large and more attractive than the average well-grown four-inch Boston, and growers of Harrisii and the Harrisii type admit they cannot produce attractive plants of these varieties in pots smaller than ten-inch. Without an exception, Nephrolepis Roosevelt is the most valuable fern ever offered for florists.

use. It has the vitality to withstand more rough treatment than other varieties and does not revert to the parent type. In our long experience we have never offered the trade any plant with greater assurance of entire satisfaction, and predict Nephrolepis Roosevelt will very soon lead in popular demand, sweeping from the list Boston, Harrisii and the Harrisii types. We are booking orders for delivery June 1st, 1911, and will fill them in strict rotation as to the date received. Get yours in early; you will not be disappointed in this fern. 2 1/2-inch pots, 40c each; \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000; 25 plants at 100 rate; 250 plants at 1000 rate.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice-President;  
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

TOMATO COMET is a good general crop variety under glass. It is trained to stakes.

EARLY WHITE CORY sweet corn of the large-eared type can be started in pots and planted out in warm soil when weather permits, thus gaining over two weeks' time on the crop.

### Prices of Indoor Fruits and Vegetables.

New York, March 31.—Mushrooms, 60 cents per pound; cucumbers, 20 cents each; lettuce, \$1 per dozen heads; tomatoes, 25 cents per pound; radishes, 50 cents per dozen bunches; asparagus, \$6 per dozen bunches; rhubarb, \$1 per dozen bunches; grapes, \$1.00 per pound; beans, 25 cents per quart; peas, 40 cents per quart.

Chicago, April 3.—Mushrooms, 30 cents per pound; cucumbers, \$1 to \$1.50 per box, small; lettuce, 15 cents to 16 cents per pound; radishes, 15 cents to 45 cents per dozen bunches; rhubarb, 10 cents to 20 cents per dozen bunches.

### Plant Notes.

The raising of vegetable plants for sale can be made quite a profitable side line to any florist business. If good plants are sent out, such trade becomes very regular and dependable, as a rule, good plant growers sell out easily each spring. We will give a few important pointers, such as we practice ourselves.

One of the greatest mistakes made is using over-rich earth in which to start the seeds. Nothing could be worse. The young seedlings should be compelled to form a good root system which they will never do in excessively rich earth. Then such soils are very much liable to produce damping off in dark weather. We prefer to use new soil each season, using a liberal proportion of sand, and only a moderate amount of old manure. Some of the very best composts we ever used were obtained in dry runs, digging up the deposits of floods. Next in importance is thin seeding. There are nearly always twice as many seed scattered as necessary, producing at best thin plants and often causing heavy losses by damping-off. Further we must have proper temperature. It is all wrong to start a cool-loving subject in a warm house, or a heat-loving plant in a cool house. Thus, lettuce, cabbage, cauliflower, celery and onions should be in a low temperature, while peppers, egg plants and tomatoes belong in warm quarters from the start.

Light is also to be considered, especially in hotbeds. There is no more trying time in hot beds than during a heavy snowfall, the light is reduced and the light blanket of snow increases the temperature in the bed, owing to accumulation of the heat, we make it a point to sweep off the snow several times a day on all plant beds to give all the light possible and also to re-

duce the temperature by the cooling effect of the fresh snow on the glass. During dark spells, low temperature must be obtained in order to reduce growth as much as possible. The practice of covering beds with shelter and mats during snowfalls, and leave closed several days, cannot be too severely condemned.

Moisture is as important as any; once up, the plant can get along with very little water, and any watering should be done in the morning on a light day to secure thorough drying off before night. Evaporation in hot beds is very low at this season, and one will find that the beds will absorb moisture over night; further, one sunny day is often followed by a week of dark weather, hence use water sparingly.

MARKETMAN.

### Soil for Tomatoes.

#### EDITOR AMERICAN FLORIST:

Will you kindly inform us which would be the better of two kinds of soil for tomato culture: one taken from sub-irrigated land that is black, and the other from a hill that is sandy and very light? How should the soil be prepared? Is it better to plant tomatoes in well-manured soil or in light soil and give them fertilizer when the roots are all through the benches?

State of Washington. SUBSCRIBER.

In our opinion no better soil could be prepared than what is known as a good rose soil for greenhouse benches. This kind and its preparation has so often been described that the very mention of the term rose-soil brings to mind the decayed sod and cow manure. However, while tomatoes do splendidly in a rose soil, they are not as particular as the rose by any means, and any good soil can be made to grow good tomatoes. Very often it is more the man than the soil. The value of any soil depends upon its humus content. This humus may be decayed sod

or old manure. Any soil lacking in humus is unfit for greenhouse use. The best results are generally obtained from a soil of good heart by which we mean a clay loam, well balanced with humus. The color of such soil varies greatly, so much so, that it has little to do with its desirability.

Tomatoes being gross feeders, should have rich earth from the start, always controlling growth by regulating the moisture supply. The tomato is a plant that is better off without any syringing, hosing or over head watering of any kind, and the supply at the root should be governed by the growth made, always aiming for a sturdy short jointed growth. After tomatoes set fruit, we mulch with manure, to which is added a liberal amount of bone meal, or an application of one-half hard wood ashes and one-half bone meal may be worked into the soil lightly and afterwards the manure mulch put on. To sum up, if we had subscribers choice of black bottom soil and sandy hill soil that is very light, we would most likely mix the two in equal parts and then add at least one-quarter of old manure and a sprinkling of bone meal to begin with and feed and watch as above as soon as the fruit shows. Too much importance cannot be placed upon the young plants. If they are starved for room or food, or checked by low temperatures, or weakened by excessive water, no amount of later attention will correct the damage. The road to success in tomatoes, as with any other crop, is liberal treatment from start to finish, always bearing in mind that they can hardly be overfed on benches if in good thrift, and provided that manure is balanced by additions of potash and phosphate in the shape of ashes and bone.

## A GRAND NEW CARNATION

# Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best. Flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000 \$100.00; per 5,000 \$400.00. 25 at 100 250 at 1000 rates. Place your order now to be in on early deliveries.

## The Nursery Trade

### American Association of Nurserymen

W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shegandoah, Ia., Vice-Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

SPRINGFIELD, MASS.—Theodore R. Dallett has opened a flower store in the Marble block.

PASADENA, CALIF.—Manager Stenger of the Altadena nurseries has purchased four lots on Lake avenue and is moving to the new location.

### European Horticulture.

#### FROM THE FRENCH TRADE PAPERS

The Anchusas and their Culture.—The Borage family is distinguished for furnishing flowers most nearly approaching in color to the azure of the sky. Among the thirty known varieties of anchusa those cultivated in our gardens, too rarely, are comprised in the following list: *Anchusa Barbellieri* (Southern Europe), perennial growing about 18 to 24 inches high, leaves lanceolate, stalks terminating in May in paniculate clusters of blue flowers, with yellow throat and tube.—*Anchusa capensis*, annual or biennial if well protected; 20 inches high and at least as broad; leaves lanceolate, rough and hairy, the stems terminating from May to July in racemes of a fine ultramarine blue, with white eye. A variety, *atrocoerulea*, has flowers of very dark ultramarine.—*Anchusa Italica*, three to 4½ ft. high, leaves rough and lanceolate; blooms from May to August in loose terminal clusters of star-like flowers of an intense blue; its newer varieties are—*A. Italica Dropmore*, may reach four ft. in height; blooms in June and July, flowers a pure gentian blue; a superb plant which cannot be too highly recommended.—*A. Italica Opal*, pretty variety with flowers paler than those of *Dropmore*.—*A. Italica Perry*, similar, but flowers very dark blue.—*Anchusa sempervirens*, 15 to 20 inches; broadly oval leaves; small bright blue flowers in axillary clusters in May and June. *Anchusa* are grown from seed by preference, though *Italica* may be multiplied by division; not hardy without protection, but will repay the care given them.

Three New Roses of Souperet and Notting—Hugo Maweroff Climbing (Crimson Rambler X Mrs. W. H. Cutbush) color warm carmine; flower small, very regular, in erect well filled clusters, free of bloom and very attractive.—Manuel O. Azavedo—Hybrid tea, (Etoile de France X Ulrich Brunner). Color fresh cerise red, vigorous upright bush; flower very large, perfect, double, lasting, heads, bud long and fine. This novelty combines the form and vigor of Ulrich Brunner with the abundant bloom of Etoile de France, and its color is the intermediary note between the parents. Out of doors it blooms early and late, and for forcing its long stiff stem and lasting qualities commend it highly.—Souvenir d'Antonio Peluffo—Tea. (Manie Souperet X Mme. Constant Souperet). Color light transparent yellow washed with soft pink on the edges. Flowers extremely large, double, iridescent in form, opening well, buds long and elegant; plant of good vigor, foliage decorative.

*Inulas floribunda purpurea*.—Under this name Barber and Co. are introducing a new ornamental apple, the reddest of all red-leaved malus. The flowers are very abundant and of a bright red crimson or corse, large and single; buds are blood red; the foliage is a deep purple bronze in

MORRISVILLE, PA.

Mention the American Florist when writing

the young state passing to dark bronze green; under the bark the wood is blood red and rosy in the heart. The fruits, produced in clusters of two to five, are very decorative, deep red, passing to scarlet in the autumn, resembling those of *Prunus pissardi*. Vigorous, free, early flowering, it should be very useful for forcing.

*Spiraea Aruncus*, or Goat's-Beard, has been neglected in gardens for some years, but for beauty and hardiness it is not easily surpassed; the fern-like foliage, long spikes of white so freely produced in June, are most decorative. It is as a solitary plant, like the peony, that it shows to best advantage; it likes a cool soil, rich in humus, a north slope, a water-side or an opening among the trees, and here it develops into a stately plant, decorative in the landscape and furnishing charming sprays for bouquets.

*Begonia Concurrent*.—Is claimed as the best of the hybrids of *Gloire de Lorraine*; brighter and more abundant foliage than the mother plant, and of such vigor that it does not require support; large umbels of salmon pink flowers of unusual size, produced all winter.

STAFFORD SPRINGS, CONN.—Clarence Metzger, manager of the Mt. Carmel Forest and Nursery Co. of Mt. Carmel, gave a short talk upon the care of trees, especially with regard to the elm beetle, before the Progressive Federation on March 22.

### Some Easter Plants on Long Island.

H. D. Darlington, of Flushing, makes a specialty of heather and other novelties for high-class trade. He has for years made a study of their requirements and by his skill as a grower and the climatic conditions of this section, which are favorable to this class of plants, has made a success of this branch of the business. One of his specialties is Erica cypripedium, which is the leader for Easter, its lovely pink blossoms are produced in great profusion. It is beautiful at all stages, the three inch pot plants being a cloud of blossoms, and very valuable for basket work or low table decorations. Although the stock is much larger this year than ever before, orders have been turned down for thousands, as everyone who sees it is captivated with its beauty and possibility as a seller. The heather has probably the smallest beginning of all stock that is propagated by cuttings, as the merest mites of branches, some less than half an inch in length, are seen in the sand coming on for next season. Boronias are another of his specialties, a large house being filled with this graceful plant, looking just right for Easter. Genistas are well grown, a specialty being the standard shape, a round head and tall stem. Mr. Darlington is progressive and always on the lookout for new varieties of heather and hard wooded plants. He has grown acacias wonderfully well. He is fast adopting the cement table, one erected the past season is a very complete piece of work. The legs were cast first, being made with a sort of step shoulder or top so that the cross supports would have a better hold. These posts were set in concrete in holes in the ground, care being taken to have them plumb and in perfect alignment. When firmly set the frame work for the table, sides and bottom was put in place, and the wires for reinforcing stretched, and the rest was easy. By using old boards the cost of the materials is not nearly that of new lumber, except that it takes more labor, but when once done it is permanent, and Mr. Darlington says is without doubt the bench of the future.

Louis Dupuy's establishment at Whitestone is always a place of interest at the holiday season, and especially at Easter, when there is such a wealth of bloom in the many high colored pink and blue hydrangeas. The new variety, Avalanche, a fine white of decided merit, a much better sort than the well-known Thomas Hogg, is seen here in quantity, and is quite distinct. A collection of the new French seedlings of a variety of colors are very promising; the plants were young with only one head of bloom. There were shades of blue, white and pink, and one with a decided yellow cast. The individual flowers of some sorts were serrated and of others they were very large, one measured two and one-half inches in diameter. Mr. Du-

## Seasonable Stock

**Azalea Mollis**, bushy seedlings, 12 1/2 in., \$25.00 per 100; 15 1/2 in., \$35.00 per 100.

**Rhododendrons**, best named varieties, 18 1/2 in., \$75.00; 24 30 in., \$100.00 per 100. Bushy seedlings, 18 1/2 in., \$60.00; 24 30 in., \$75.00 per 100.

**Roses**, Baby Dorothy, White Baby Rambler and Clothilde Souper, one year, field grown plants, cut back and grown cool in 3 and 4 in. pots all winter, now in full growth, fine stock \$ 0.00 per 100.

**Nephrolepis Scholzei**, strong 5 in., \$5.00 per dozen; \$35.00 per 100.

**Nephrolepis Bostoniensis**, fine 2 1/2 in. stock, \$4.00 per 100.

**Nephrolepis Scottii**, strong 4 in., \$25.00 per 100.

Send for Catalog No. 5 if you have not received it.

**THE STORRS & HARRISON CO., Painesville, O.**

Mention the American Florist when writing

puy said that Avalanche is very hardy and will be a good variety to cut from out of doors. Rambler roses are done well here, as are lilacs in pots. Giganteum lilies were wonderfully fine being of good height and very well budded. Heather is also a feature and very fine plants are seen. Several houses of gardenias for cutting are wonderful in their luxuriance of foliage. Mr. Dupuy is a past master in handling this plant, always having a quantity when there is good demand.

Pankok & Schumacher at Whitestone are celebrated growers, and their Rambler roses are certainly in the first class. They are exceptionally fine, particularly the Dorothy Perkins, and large specimen Crimson Ramblers. Tausendschon is also grown largely, and is very well done. Standard hydrangeas are a novelty, and as seen here are largely in demand. A large bushy head with a number of blooms on a stem about three feet above the pot make a tree hydrangea that would immediately attract attention in a group of plants.

K.

### Publicity for the Florists.

There is one method of "Publicity for the Florist" that might be used in many instances, and where it is reasonably well done, I believe that it will result in good for the trade in general and the local florist in particular. I refer to a "Floral Department" in one of the leading local newspapers. This department to be conducted by the local florist. Generally the most practical plan would be to have the feature in the Sunday edition, if in a morning paper, or in the Saturday edition, if in an evening paper. In any event, it should be in whichever is the special feature edition of the paper which is used.

Now I will state that it is some work all right, and must be done carefully and judiciously. But where the florist

can give it the attention and thought required, and has the ability to make his articles readable, I am sure that it will be found worth while. The department can be conducted on the "Question and answer" plan, with an article each week, if possible, along some line that is seasonable. These articles can be educational in character, and at the same time their seasonableness and local character will give them added force and interest. One will need to watch that the personal advertising element does not creep in and destroy the force of the articles, or prejudice the reader, or give the publishers of the paper grounds for dissatisfaction. I think in many cases the publishers of the paper will be willing to pay for this at the rate which they allow for news, and possibly more. In addition, the name of the florist who conducts the department can appear under the heading, and that will generally be of at least some compensating value.

All of the foregoing is based on my personal experience on this line, and I can recommend the plan wherever it can be carried out.

PUBLICITY.

# Bobbink & Atkins

## World's Choicest Florist and Nursery Products.

We are growing in our greenhouses and in our 250-acre nursery a large variety of material constantly in demand by florists.

Our New Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

## B. & A. SPECIALTIES

**Palms, Bay Trees, Ferns, Boxwood and Hardy Herbaceous Plants, Evergreens, Conifers and Pines, Flowering Shrubs and Fruit Trees, Roses, Rhododendrons and Trees, Vines and Climbers, Bulbs and Roots.**

We manufacture **TUBS** in every shape and size for florists. Ask for special list.

Florists are always welcome visitors to our nurseries.

We are only a few minutes from New York city; Carlton Hill station is the second stop on main line of Erie Railroad.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD & CO., Youngstown, Ohio

## Trade Directory

Of The United States and Canada Price \$3.00.

American Florist Co., — 324 — Chicago Dearborn St.,

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

## Morehead Steam Traps

! The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

! It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

! The majority of florists are using Morehead Traps If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

! By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "W" Detroit, Mich.

## What the Users say

Fired Boilers Since 1885---The Kroeschell is the Best of All

"I have fired greenhouse boilers since 1885, both steam and hot water. Yours suits me the best. I have two of your boilers. At one time I had two cast-iron boilers working together and during a blizzard the rear section of one boiler gave out and the front section of the other sprung a crack a couple of months later. No more cast iron boilers for me. I came very close to freezing out in both instances."

G. M. THOST, DeSoto, Mo.

## HARDY CARNATIONS.

The new hardy ever-blooming CARNATION "CRIMSON KING." Everybody has asked for a carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long, never a day that you cannot cut blossoms. By putting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. You know of the florists who do not offer to their patrons that will give as much satisfaction as the Hardy CARNATION CRIMSON KING. Per dozen, \$1.25; per 100, \$8, per 1,000, \$75. 25 plants sold at 100 rates; 250 plants at 1,000 rates. Our new Trade List of everything you need now ready, mailed on application. Write today. THE GOOD & REESE Co., The Largest Rose Growers in the world, Springfield, Ohio.

If You Do Not Find What You Need in our Ready Reference Department, Write Us About It

ERECTED FOR THOMAS SPERRY, CRANFORD, N. J. JAMES BELL, GARDENER.

**H**ERE is a greenhouse plan and design that makes everybody sit up and take notice. It hasn't a duplicate anywhere. It is the first time, to our knowledge, that a nine sided palm house has ever been built.

Five firms were competing for the order. Each firm submitted at least two designs—some more. We submitted one—that one won. That one is this one.

**Lord & Burnham Co.,** Irvington, New York, Boston, Philadelphia, Chicago, N. Y. St. James Bldg. Tremont Bldg. Heed Bldg. The Rookery

"CUT-SEED" Cherry red pots are made by Geo. E. Feustel, Fairport, Iowa.

Florists' Supplies of all kinds. J. Jansky, 19 Province St., Boston.

## Reasons

When a boiler salesman comes smilingly into your workroom, shakes hands vigorously and slaps you on the back with one hand, while he jingles the keys in his pocket with the other, and tells you his boiler can save 25, 30 or even 50% of your coal bill—do you believe him?

Suppose, Mac, our trouble man, should sit down quietly with you and explain just how our boilers are made and give you the reasons why they are made that way; and then answer every question flatly and frankly—would you believe him? Of course you would. Then send for him when you want a boiler.

**HITCHINGS & CO.**  
ELIZABETH, N. J.  
NEW YORK, 1170 Broadway.

Pots of all kinds. L. Hrudka Pottery Co., 2610 Herndon St., Chicago.

### Production of Perfumery Plants.

Of the countless numbers of plants in the vegetable kingdom, many possess peculiar aromatic odors. Before the art of distillation was known, the ancient peoples used odoriferous plants and spices in their dried forms for their agreeable odors. Gradually, however, the development of special utensils for other domestic purposes may have resulted in the discovery of methods for the separation of odors from plants and plant products. The first mention in ancient Greek writings of the separation of an odor from a crude substance is that of the oil of cedar, which was separated from the oleoresin by means of the crudest form of apparatus. With the development of the necessary apparatus, extensive perfumery industries have arisen. In southwestern France a general perfumery industry of great importance, based on the production of lavender, cassie, rose, violet, and other perfumery plants, has grown up. The attar of roses from Bulgaria and Turkey, the rose-geranium oils from Algeria, Reunion, and other French colonies, the lavender and other essential oils from England, and the citrus oils from Italy, as well as the lemon-grass, citronell, vetiver, and other volatile oil and perfume-producing products from India, may be mentioned as important industrial products. In the United States and in Japan the production of peppermint oil and its products constitutes an important industry.

At the present time the number of plants in the United States yielding oils in a commercial way is very small, but the number capable of yielding oils of probable value is correspondingly great. At present the cultivated plants are principally the mints, peppermint and spearmint, together with small quantities of wormwood, tansy and wormseed. The wild plants include saffron, wintergreen, sweet birch, Canada beebalm, blue-gum, wild bergamot, horsemint, and pennyroyal.

Oil of turpentine has been distilled commercially for more than a century and is produced on a very extensive scale. Unlike most volatile oils, the oil of turpentine is not distilled directly from the plant but results as one of the products of the distillation of the oleoresin obtained from several varieties of pine trees.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

J. G. MASTIN CO.

3124 W. LAKE STREET, CHICAGO, ILL.

## Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable! The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

**Pulverized  
Sheep Manure**

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

The Pulverized Manure Company

32 Union Stock Yards.

Chicago

Mention the American Florist when writing

## HOTCHKISS Paper Fastener

A labor saver; always ready instantaneous in action; automatic Feed.

The staples when inserted into the machine are automatically cut and fed forward accurately and without failure. The staple is always ready to be driven and a single blow will suffice to drive it through 1 to 25 sheets of paper, and with the same movement feed forward the next staple. After the strip is used up, it is very easy to place another strip in the machine.

Price, Machine and 500 Staples, \$1.50.

### SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

OFFICERS—Geo. ASMUS, Chicago, President;  
RICHARD VINCENT, JR., Baltimore, Md., Vice-  
Pres.; H. B. DORNER, Urbana, Ill., Sec'y; WM.  
F. KASTING, Buffalo, N. Y., Treas.  
Annual Convention at Baltimore, Md., August,  
1911.

### CHRYSANTHEMUM SOCIETY OF AMERICA

Annual convention and exhibition in conjunc-  
tion with the St. Louis Horticultural Society, St.  
Louis, Mo., November, 1911. ELMER D. SMITH,  
Adrian, Mich., President; C. W. JOHNSON,  
Morgan Park, Ill., Secretary.

### AMERICAN GLADIOLUS SOCIETY.

Next meeting and exhibition at Baltimore, Md.,  
August, 1911. I. S. HENDRICKSON, Floral Park,  
N. Y., President; L. MERTON GAGE, Orange,  
Mass., Secretary.

### AMERICAN PEONY SOCIETY.

Next annual meeting and exhibition June 1911.  
B. H. FARR, Reading, Pa., President; A. H.  
FEWKES, Newton Highlands, Mass., Secretary.

### THE AMERICAN CARNATION SOCIETY.

Next annual convention and exhibition at  
Detroit Mich., January 24, 1912. J. A. VALENTINE,  
Denver, Colo., President; A. F. J. BAUR, Thirty-  
eighth St. and Senate Ave., Indianapolis, Ind.,  
Secretary.

### AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Detroit,  
Mich., 1912. A. FARENWALD, Roslyn, Pa., Presi-  
dent; PHILIP BREITMEYER, Detroit, Mich., Vice-  
President; BENJAMIN HAMMOND, Fishkill-on-  
Hudson, N. Y., Secretary.

### NATIONAL SWEET PEA SOCIETY.

Next meeting and exhibition at Philadelphia,  
June 24, 1911. W. ATLEE BURPEE, Philadelphia,  
President; HARRY A. BUNYARD, 342 W. Four-  
teen St., New York, Secretary.

## SUGGESTIONS FOR PLANT GROWERS.

### Kochia Scoparia.

A plant that has sprung into favor very rapidly the last few years is the kochia and well it may, for it is very decorative all through the summer, and has been called Summer Cypress, and when it covers itself with red flowers in the fall it makes a most brilliant showing and has been called Mexican fire plant. It grows very rapidly and seeds sown in March or early in April will make fine plants. During the summer months the pyramidal shaped plants are sure to attract attention. The seeds are very small and germinate quickly and care should be taken in the sowing. After the seeds are up and potted the culture is very easy and simple, similar to other annuals.

### Tuberose.

One of the easiest summer flowers to grow if a little attention is given to a few details, and one from which flowers may be had all the season by successional plantings, for the bulbs may be started from January to August, giving flowers from May to November. The early bulbs should be started in good heat, the temperature being not less than 75° or 80°. The bulbs should be placed closely together in shallow boxes with two inches of moss on the bottom, these boxes being placed over hot pipes where the necessary temperature can be maintained. In four or five weeks the tubers will have sent roots all through the moss and they should then be potted in four or five-inch pots or in a bench containing five or six inches of soil. They will require plenty of moisture in such brisk heat, and thrips should be kept in check, as these are the worst enemy of tuberose. The bulbs that are grown later in the season will not require so great a degree of heat. The plants to get the best blooms should be grown in the greenhouse, for in out of door culture the blooms are not as pure a white and lack the lustre of the indoor product. Practically no shade is needed while the plants are making their growth and the spikes of bloom forming, but as soon as the lower flowers begin to

open a moderately heavy shade and a drier atmosphere will be of benefit, preventing the blooms from taking on a yellowish tinge. The bulbs for later growing should be kept in a dry location until wanted for the plantings to occur through the season.

### Care of Decorative Stock.

The greatest care of decorative stock is needed at this season, for the sun is now very high and bright and these plants should be heavily shaded or they are in danger of being burned and ruined. It should also be taken into consideration that the palms and other stock are usually grown in as small pots as possible, and that the soil during the long winter season and heavy firing has become pretty well exhausted, and frequent examinations are necessary to see that the plants do not become dry. Keep a nice humid atmosphere all the time, and during pleasant weather syringe the plants heavily, and dampen down all the dry places. This will not only give the plants a proper growing atmosphere but keep down many insects that infest this stock. An old gardener once told us that there was no excuse whatever for a man to have mealy bug on his plants that had a good force of water in his hose. The ventilation should be carefully attended to, but little is needed on these plants, just a crack of air to keep the atmosphere pure and prevent any of the close feeling that is sometimes felt in going into one of these houses, as if the air were dead; open the ventilators as soon as the sun warms the houses, but they should not be left open too late, closing them directly after the mid-day. Any plants that are beginning to look as if they were impoverished may need a little feeding with liquid manure. If there is not a liquid manure tank, a watering of water in which nitrate of soda is dissolved will greatly benefit them; an ounce of nitrate of soda in four or five gallons of water will be a great stimulant, and the plants will quickly assume the bright green so much desired, and this will carry them along until it is time to repot them.

### Summer Flowers.

The demand for summer flowers is greatly on the increase, and too often the florist is poorly supplied with a variety, simply having a small and poor stock of annuals, but judicious plantings of perennials and herbaceous stock will produce a fine display during the summer months. In the perennials one of the finest plants for cut flowers is the bright colored pyrethrums. If seed was sown last fall and protected during the winter, they should be planted in their permanent quarters as early as possible. Delphiniums, especially the dark blue varieties, produce beautiful showy flowers and added to these may be gaillardias, Shasta daisies, columbines, Coreopsis grandiflora, rudbeckias, lychnis and doronicums. In the herbaceous plants the larger and more prominent flowers such as peonies are, of course, well known, but there are many very useful plants in this class that are too seldom seen and can be easily grown, and nearly every grower has a location where they can be planted and will be found of great value, and should be in all collections. Achillea, The Pearl, should be one of the plants on every florist's place, for it is extremely useful throughout the season of blooming. Gypsophylla paniculata should be in every garden. The hardy candytuft is another valuable plant generally blooming about Memorial Day. Iberis Gibraltarica is the best of these, but it does not prove hardy in some locations. Anemone Japonica is one of the most beautiful fall flowers. Tritomas are very showy and come into bloom in late summer and fall when large bright flowers are in demand. If a grower is not supplied with these he should procure a few of each and get up a stock for they will be found very useful and inexpensive.

### Fumigating.

As the spring advances and the temperatures fluctuate and run to greater extremes, the conditions for the propagation of insects increase and continual vigilance is required to keep the stock clean of the many pests. Aphis will sometimes appear in a house very suddenly, and only in one small section, but if not checked at once, will rapidly spread and cause great damage. The only way to be at all sure of keeping rid of them is by constant and regular fumigations. Light fumigating often is far preferable to waiting until the insects have become grown, when heavier doses will be required. Burning tobacco stems is, of course, the cheapest method, but the growers of cut flowers have nearly dispensed with this manner of fumigating, owing to its leaving the disagreeable odor in the flower. In the greenhouses heated by steam there are two methods used. Some fill a barrel full of tobacco stems, and have a short pipe with a valve attached that can be placed into the barrel, and the valve opened and the house filled with the vapor which has passed through the barrel of tobacco stems; others use the nicotine extracts, painting or dropping it upon the hot pipes, or by placing the extract in evaporating pans. Those not having hot steam pipes burn the nicotine papers, which are very efficacious and do not injure the flowers. Still others spray with the different preparations prepared for that

purpose such as nicotine extracts, aphine and others, but whichever method is used, the plants must be continually watched and the remedy applied.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### Bargain Sales.

I am glad to read the plan for figuring the cost of flower growing by A. M. Herr, in THE AMERICAN FLORIST, issue of December 31, page 1147, with a view of growers adopting such a method, dictating their own prices, and thereby helping legitimate middleman and legitimate retailer. Is it not rather difficult to solve the problem of cost in advance with the numerous factors of expense, stock cost, weather disaffection (never known in advance), increasing area space for plants while maturing, etc.? And why, sir, should each grower keep to himself the figured cost of production? This plan, if to become of value, must be universal, and can only become so by interchange of all possible information. Why would it not be feasible for the horticultural

upon and credited with points, for size, stem and free blooming, so why not also on cost of growing?

Now, to get at a quick estimate as to the cost of any variety of flower, without a multiplicity of factors, let us take the case of a supposed grower whom we shall call John Smith. Smith makes a specialty of carnations and sends to market one hundred thousand flowers from November 1 to May 1 last season. He has received various payments from his wholesalers during that time, and as he thinks it over during the summer, he is at a loss to know whether he is a year ahead or a year behind. Although he received big prices at certain periods, which made him feel rich temporarily, there were also poor payments which gave the opposite effect. Armed with a strong resolution to know the truth he adds up his receipts from November to May and finds the total of \$2,250. This sum he divides by the total number of flowers sent to market, which gives him the average or real price for which he sold every carnation grown in his houses—2½ cents apiece. Now without going into Mr. Smith's personal affairs, to inquire whether his wife has had sufficient new bonnets, or his help has been paid a fair wage, we

LILY OF THE VALLEY IN BASKET BY JOHN MANGEL, CHICAGO.

societies to lend aid to growers, great and small, to ascertain cost figures of various flowers, towards the end of standardizing the same? If necessary, appoint committees to look after this subject and report findings, to be disseminated through the columns of THE AMERICAN FLORIST for the benefit of the entire craft. Today, the merits of various flowers are passed

only have to ask him one question, "Mr. Smith, would you be satisfied to sell all the carnations you can raise for 2½ cents apiece?" Possibly the answer might be, "Not on your life!" But nevertheless it is just what he has been doing for a whole season and he was none the wiser.

Now we may leave this gentleman of good intentions and poor devices to his

further aptitude for figuring and I'll guarantee that twenty-four hours afterwards he could give a safe and sane figure over  $2\frac{1}{4}$  cents for which he would sell all the flowers he could raise and be willing to work for a big output. He would not only produce fine flowers, for, as a specialist he could do it, but he would also determine the proper price for which he would sell all or none, and thus do away with the ridiculous spectacle of middlemen establishing so-called market prices, which are neither founded on any idea of the producer's proper income, nor for what the public demands and is willing to pay.

Obviously the middleman occupies the same sphere as an express company; each are conveyors or distributors. Neither one has the moral right to regulate the value of the goods because neither takes any part in the productive labor. Supposing the express companies should demand higher rates for carrying orchids and gardenias than asters and gladioli. What a howl would go up! And yet the wholesaler can fix the price on any flower, but he keeps an eagle eye on the wholesaler across the street, while the grower is on one end of his seesaw and the store man on the other; they both take turns in getting dumped. And so, Mr. Grower, you place this arbitrary power in Mr. Wholesaler's hands simply because you do not take the trouble to make better arrangements for yourself.

A word about the demoralizing custom of selling by wholesale one hundred flowers from one shipment at a price, and closing out the balance to the firm of Tom, Dick & Harry at a heavy reduction. The flowers are, of course, of a uniform quality, the shipment of one man, and it costs as much to grow one flower as another (same variety), and yet this mode of trade is like selling the first hundred copies of a book with the author's autograph at one price and bringing out all the rest in paper covers of a cheap edition. There is, however, this difference. Every flower that is grown and cut, is handled by individual labor. There is no machine to turn them out two at a time or ten at a time at a less cost, therefore they demand the market conditions of an approximately uniform price.

The art of the flower craft rests with the store man. The genius and patience come from the grower. Exercise less patience in a certain way and go to this proposition with more brains and your incomes will be less spasmodic and more satisfactory.

CARL STUMM.

WESTPORT, CONN.—The Fillow Flower Co. has purchased five acres of land on Clinton avenue.

ATLANTIC CITY, N. J.—W. F. Sheain who conducts The Sign of the Rose Floral Shop has opened a branch store at 933 Broadwalk.

SCHENECTADY, N. Y.—J. H. Frederick has purchased the business of Howe the florist at Jay and Franklin streets. Mr. Frederick was formerly connected with Chas. Limmer on State street.

ELIZABETH, N. J.—Henry Leahy has moved into his new store, 1169 East Jersey street, and now has the largest floral establishment in the city, and it is brilliantly lighted with electric lights. The formal opening took place April 1.

Rambler Roses, Hyacinths, Primula Obconica and Asparagus.

#### Florists' Telegraph Delivery.

The Florists' Telegraph Delivery met at Boston, Mass., March 29, President J. A. Valentine in the chair; Irwin Bertermann acting as secretary. Much discussion took place as to the best means of making this association one whereby all the retailers in the country may be induced to be enrolled in its membership, and to a proper proportioning of the dues from each member. It was the sense of those present that the dues should be regulated according to the population of cities, and finally a committee consisting of W. J. Palmer, Buffalo, N. Y.; W. J. Smyth, Chicago, and W. L. Rock, Kansas City, Mo., together with the president and secretary, was appointed to submit a schedule of dues at the afternoon meeting.

At 3 p. m. the same day a well-attended meeting again convened. The committee on dues reported that in cities with a population of less than 5,000 a deposit of \$1.00 to the guarantee fund and annual dues of \$1.00

shall be required from each member. In cities of from 5,000 to 25,000 the guarantee fund deposit shall be \$2.50, annual dues \$2.00. Cities having from 25,000 to 50,000 the guarantee fund deposit shall be \$5.00; annual dues \$2.00; cities having from 50,000 to 100,000, the guarantee fund deposit \$10.00, annual dues \$2.00; cities having from 100,000 to 150,000, guarantee fund deposit \$15.00, annual dues \$2.00; cities 500,000 and upwards, guarantee fund \$50.00, annual dues \$5.00. It was explained that the guarantee fund is for the purpose of liquidating bad bills, should there be any among the members, and that as the fund would only be a deposit, each member could retire from the society and have his deposit refunded at any time. The recommendations contained in the committee's report were adopted by the society.

Geo. Asmus read a paper on how the rush work can be handled with facility at holiday times, giving a somewhat detailed account of his own

methods. Auditing registers, he thought, were of more importance than any other one thing, as by that system there was no possible chance of a charged account not being properly recorded, and the safeguarding of charge accounts was perhaps the greatest item in the running of a retail store. The system he used for securing additional help, the delivering of orders and adjustment of customers' cards all came in for mention; and he recommended more effort toward making St. Valentine's day a larger feature in the flower trade than it is at present. Mr. Asmus also mentioned the importance of keeping a diary on quantities and kinds of material used; this is always useful for future reference. Penn, the Boston florist, told how he had succeeded in working up a good trade at St. Valentine's day by plenty of advertising in the daily press.

Pres. J. A. Valentine then read his paper on credits, etc., which was published in THE AMERICAN FLORIST, issue of April 1, page 476. The meeting then adjourned to meet next August in Baltimore.

### Wallflowers.

ED. AMERICAN FLORIST:

Will you inform me as to the best way to grow wallflowers? W. E. K.

Wallflowers are perennials but are better treated as biennials as it is much more preferable to have young plants coming on than to grow the old plants after flowering, especially when grown for winter blooming. The seed should be sown in spring and as soon as large enough potted in small pots and shifted into larger pots as is necessary. If the seed is sown early and the plants given good culture they will flower the following winter. They can be planted outside and lifted in the fall, but they do not lift well and if they are to be grown for cut flowers it is much better to plant them from the four-inch pots into the bench where they are to bloom. They can also be grown in pots, but the spikes will not be as large as those grown in the bench. The soil should be similar to that used for roses and carnations, and the plants set eight to ten inches apart. W.

### Pipling Greenhouses.

ED. AMERICAN FLORIST:

I am about to build two greenhouses, 15x125 feet each, eleven feet four inches to ridge, side walls eight feet high, four feet concrete and four feet boards on the north and glass on the south. I intend to use a hot water system. Would you advise using 4-inch or one and a half-inch pipe for the heating plant? SUBSCRIBER.

Wisconsin.

From the description it is not clear whether there are four or eight feet of glass in the south wall. While 1½-inch pipe might be used in a house less than 600 feet in length, it will be better to use 2-inch pipe in the houses described. This has several advantages over 4-inch pipe. The houses can be heated by using to each three 2½-inch flow pipes and then 2-inch returns, for a temperature of 60 degrees, supposing that there is only four feet of glass in the wall. If there is eight feet of glass use two additional returns in each house. L. R. T.

## American Gladiolus Society

Special Meeting, Boston, Mass., March 30.

### Secretary Gage's Report.

A great deal of my work since the Rochester meeting, has been devoted to soliciting new members. Besides mailing about 1,200 of the little leaflets, that we had printed for distribution, I have written a great many personal letters, and I find that the personal correspondence is much more effective. These leaflets, to the number of about 30,000 were also distributed by about 15 of our members who have sent them out in catalogs and letters, and they have only brought us six new members, against 20 secured by letter writing, there being ten of this number credited to myself. President Hendrickson, however, holds the record for gathering in new members from the time of our Boston meeting. It is not, of course, to be expected that every member should do this amount of soliciting; but if each member would send in a new name occasionally, which I believe can be done with a little effort, we could more than double our membership by next August; and it would be a source of much encouragement to your officers, who are trying to make our society a success, and it would also stimulate a

utilizing. Arthur Cowee then read a letter from a European firm in regard to the grading of sizes and the quoting of prices to European growers, and a committee was authorized to consider and report on this matter. The recommendations in the report of the committee on nomenclature were adopted. A bulletin for the Baltimore show, a vote of thanks to Messrs. Gage and Youell, and the payment of expenses of the latter was authorized.

J. Keur, of C. Keur & Sons, Hillegom, Holland, addressed the meeting, calling attention to the practice of cutting the flowers of gladioli by growers who sold the bulbs, claiming that this results in injury to the bulb. He also stated that in as much as some varieties never produced large bulbs, a graded mixture of gladioli was not desirable, as this would throw out a large number of fine varieties in a general mixture.

### Gladiolus Nomenclature.

BY A. COWEE, BERLIN, N. Y.

The opening of the discussion as to "What action shall our society take, when the same name has been given to different varieties of gladioli, and when different names have been given to the same variety?" has been assigned to me by our president, but for what reason he has chosen me to begin the discussion, I cannot imagine

EASTER BASKET BY JOHN MANGEL, CHICAGO.

Pink Baby Rambler Roses in Gilt Basket.

spirit of interest in all of the members. I have distributed 950 copies of bulletin No. 1, and 2,000 copies of bulletin No. 2 are now being distributed. These bulletins should be the means of bringing us new members; and, in fact, I received four applications from following up parties who had written for copies of the bulletin. Since August 20, my expenditures for stamps have amounted to \$17.08, and for express and freight charges, \$7.65.

At the meeting of the society held at Boston subsequent proceedings were as follows: A letter was read from Prof. Craig, of Cornell University, on food and soil and the best methods of fer-

unless it may be that he thinks I have been more or less the cause of the present partial chaotic condition of gladiolus nomenclature. Methinks I hear him say, "If the coat fits, put it on?" and ever since I was notified that I was to open this discussion I have been wrestling to get into that coat, more than one half of which does not seem to fit me. A good physician, before prescribing for his patient, usually makes a diagnosis of his case and I believe that the same principle should apply to the present condition of the gladiolus nomenclature, and, so far as my knowledge goes, I will proceed to diagnose the case.

Gladioli have been grown for more than a century, but up to only a few years ago has there been extraordinary interest taken in their extensive culture, and up to which time there really had been no trouble in the re-naming or the duplication of names. From the year 1902 to 1907 there were distributed in this country alone, over one million new seedlings and named novelties of most unusual types, and many bearing colors and combinations of colors never before seen or thought possible by the average grower of this flower. Such stock (and no wonder!) attracted the attention of many growers of other flowers, as well as some who had never grown for the market. Immediately after possessing which these new gladioli growers, without the knowledge of existing varieties, as well as being ignorant as to what had already been done toward naming many of these new seedlings, started in to mark, classify and establish a named list of their own. Under such conditions, is it any wonder that many varieties have been re-named? The wonder to me is that we have not more of them. So much for my version of the cause of re-naming.

In most if not every department of horticulture as well as floriculture, the grower in selecting names for his plants, flowers, fruit, etc., aside from the botanical standpoint, tries, so far as it is possible, to select names which will indicate to the purchaser of his product some particularly good attribute which his plant, flower or fruit possesses. It may be color, size, form or some characteristic which, as said above, he wishes to imply in the name. Now, with this idea in mind, is it any wonder that there are today two, three, or even more varieties of gladioli bearing the same name? We have now diagnosed these two cases, what remedy, and how shall we apply it, is the question.

We have a well-organized society and while as yet but few foreign members, I believe we will be able to secure the co-operation of those foreign growers who may not join our society, and anticipating this, I trust I may be permitted to offer the following procedure as a remedy and the application of the same. First: I would have our society possess both at the trial grounds and at the office of our secretary, a copy of the catalogue of every gladioli grower in this country and Europe, from which a list of all existing varieties, together with descriptions of the same, could be made up and, with many varieties, we could at the same time secure the name of the originator, and also, in many cases, the year in which the variety was first disseminated. Your committee could then easily ascertain where names were duplicated and upon such information request those growers having such varieties to send to the trial grounds three to five bulbs for testing, accompanied with the following statement:

1. Name of variety.
2. Name of grower offering the variety.
3. Full description, including form, color, habit, etc.
4. By whom originated.
5. The date or year of introduction.

With this information and a thorough trial upon the grounds at Ithaca there should be no doubt as to which grower should be entitled to the use of the disputed name, which should be

EASTER PLANT BASKET BY W. J. SMYTH, CHICAGO.

Lily, Pink Spirea, Rambler Rose, Pandanus Veitchii and Primula Obconica.

withdrawn by the other claimants upon the receipt of such request from the superintendent of the trial grounds, endorsed by the president and secretary of the society. The remedy and application of same to the second complication (re-naming) is more difficult, the proper adjustment of which will depend largely upon the individual assistance of the members of our society, both professional and amateur. To the professional grower I would recommend the following:

First, when sending out mixtures of any kind, either general or under color selection, that he have printed on the reverse side of every label a notice that the mixture so offered is either composed of named varieties, or seedlings under process of classification, or both, and the purchaser should be warned against naming any of such without first consulting the producer and submitting a spike of the variety which he may wish to name.

Second, I would recommend that wherever or whenever any grower may have knowledge of the re-naming of any variety, that he give to the superintendent of our trial grounds such information, accompanied with three to five bulbs of the variety so re-named, together with three to five bulbs of the variety bearing the correct name.

This last suggestion would be equally applicable to the amateur, and by such co-operation I feel sure we would be but a short time in clearing up the gladioli nomenclature. It is true that in the execution of such measures as I have suggested, more or less disappointment is sure to fall to some growers, and I, for one, will be only too glad to take my medicine with a smile, if, in the end, the loyal and enthusiastic amateur as well as the professional grower, can be assured of protection against this practice, the elimination of which I believe will stimulate greater demand for our favorite flower, and which can certainly be accomplished by our society, but only through the hearty and unselfish co-operation of its members.

OUT.—The long-promised book on "The Gladiolus," by M. Crawford and Dr. W. Van Fleet.

DENVER, COLO.—With the idea of making Denver a city of flowers and gardens, a public spirited real estate man has asked the chamber of commerce and real estate exchange to stimulate the work of beautifying the city, and has personally offered prizes aggregating \$100 for the best kept flower beds, gardens, back yards and alleys in Berkeley, a section in which he is interested.

## THE ROSE.

### Potting Young Stock.

Do not let the rose cuttings stay too long in the sand—when the roots have attained a length of half an inch they can be safely potted. Always prepare the potting soil a few days ahead of the time it is to be used in order to have the chill taken out of it. The soil should be heavy clay soil—soil full of fibre—when mixing use one part finely screened well rotted cow manure to three parts soil. Both soil and manure can be screened through half-inch mesh screen. For the general run of cuttings the 2½-inch pots will be the thing for them. Some prefer the 2½-inch pots for American Beauties. Still, when the Beauty cuttings are potted at the right time the 2½-inch pots are large enough, and this makes a good size to shift from when re-potting the stock into the 3-inch pots. There are several ways of potting rose cuttings, yet there is only one correct way, and that is to pot firmly by pressing the soil around the roots after the soil has been sifted in around the roots carefully, holding the cuttings well up towards the top of the pot, as the roots should only be about half an inch below the soil when potted.

Give the young rose stock the very best location possible, where they can get plenty of sunshine and air, and prepare the benches with care, using finely screened coal ashes to set the pots on. Do not attempt to plunge the pots but pack the ashes firmly and set the pots on top. The cuttings must be kept shaded for several days or until the plants begin to make new root action in the soil. The shading can then be removed with safety. Spray the young stock early on every bright day and, if necessary on an exceptionally warm windy day, spray them again at noon. As soon as they make a growth in the first pots and

the growth gets ripened, they should be shifted into larger pots.

The grafted stocks require more attention than the cuttings and they must be watched all through the day, after taking them out of the case, for a week or 10 days. They will require shading to begin with, and for the first few days it is best to keep the sun off the plants altogether. The shading can, of course, be removed on cloudy days. Be careful about putting air on the house when the stock has just been taken from the case, as the young plants wilt quickly. The small feeding roots are not very plentiful at this stage, but when once they get started the pots are soon filled with them and they will require heavy watering. Look out for the raffia; it soon cuts into the scions and many fine plants are permanently injured by neglecting to remove the raffia in time. The plants should be staked in the pots as soon as the raffia begins to cut into the scions, using the ordinary wire rose stakes cut into lengths about a foot long, and when tying secure the scion quite firmly to the stake in such a way that it will be impossible to break the plant when syringing. These stakes can be left in until after the stock is benched, and is of the greatest importance where grafted stock is handled.

It is now about time to give the roses a mulch of some kind. The plants should be looking quite vigorous at this time, and during the month of March the weather varies, one day being extremely cold, the next warm, with prevailing high winds, making it a difficult matter to ventilate. The sun is much stronger and there are many roots near the surface of the soil that must be protected, so a mulch is in order. In the first place tie the plants carefully, clean all the yellow leaves off, give the beds a good cleaning and remove all of the loose material left from previous mulches, and apply a mulch of well rotted cow manure about three-

fourths of an inch deep. Break the manure up finely, and do not pack it on the beds. If the decomposed manure cannot be procured and fresh manure has to be used, do not fail to cover the manure with a layer of soil to prevent the fermentation of the manure from spotting the flowers and foliage. Look out for the red spiders and green fly, syringe on all bright days and get under the foliage, using all the pressure possible when spraying. Do not be in a hurry to prune the plants and when pruning remove no good healthy foliage, only the tinged growth. E.

### Diseased Roses.

#### ED. AMERICAN FLORIST:

Can you give me any information as to the cause of the condition of the rose bushes which I have forwarded to you? They were planted the middle of June from 2-inch pots. The roots extended into the soil but do not seem to have any fibrous roots at present. The growth is very light colored and does not seem strong. The varieties are Bride, Bridesmaid and Golden Gate. Is it a disease? Will plants such as sample ever amount to anything? INQUIRER

In reply to INQUIRER, will state that the roses received were in no condition to get at the cause of the trouble; reaching us in a dried-up condition, however, one plant was found to be dead and this plant was what the grower usually terms a "Black Leg," having a black ring around the stem at the base, denoting a plant unfit for planting as it is often the sign of anthracnose in its first stages. The other plant (although the soil was dry at the base), had made some good roots in transit, caused by (we think) the extra water it received when packed for shipment, which causes us to think if the beds are allowed a little water some of the plants may start into new growth if handled intelligently. However if they are off color, showing extremely yellow foliage throughout the

A. N. PIERSON'S FIRST PRIZE EXHIBIT OF ROSES AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 31.

house and by carefully examining the base of the plants they are found to be discolored, the bark showing black or having a bruised appearance, it would in all probability be better to throw the plants out and try some other crop, as the plants forwarded are small and at this season, even if healthy, they could hardly be expected to produce any great amount of flowers until spring. We are inclined to think that the soil is to blame for the diseased plants, as it seemed to contain no fiber whatever and appears to have no "life" in it, forming a compact mass on the benches coming under the name of dirt rather than soil, although in this respect we may be mistaken owing to the poor condition in which the samples reached us, and, as stated above, for the same reason we can only guess at the real cause of the diseased plants.

#### Roses With Club Root.

##### ED. AMERICAN FLORIST:

Our roses, especially Richmond and Golden Gate, have club root. The leaves turn pale and drop off and some of them have the appearance of having been scalded. Can you tell us the cause and inform us what to do to remedy the trouble?

C. A. W.

This seldom appears upon other varieties of roses than *Perle des Jardins*, but the wild briar, common known as the French briar, invariably clubs at the root. Club root is generally supposed to be caused by a fungi in the ground.—Cabbage, turnips and certain weeds often have club root. In these cases it is caused by a two-winged fly which deposits its eggs in the ground around the stem of the plant which quickly hatching into maggots, work their way down the stem to the root, causing it to club. I have seen *Perle*

doing remarkably well even though badly affected by club root, and do not suppose that this alone would cause the roses to look as described. Roses, especially hybrid teas, drop a great many leaves in the fall, being half deciduous. These drop from the base up and it is a decided benefit to the plant at this time of the year, allowing light and air. *Golden Gate* will oftentimes hold onto its leaves until the last moment and then drop them very suddenly, dropping oftentimes more than one would wish.

We suppose that the leaves to which reference is made are dropping from the young shoots at the top of the plant. If this is the case there is something radically wrong with the roses. They probably have been burnt by gas escaping from the furnace, illuminating as well as sewer gas has a bad effect upon roses. By the description one would suppose that there had been burning flour of sulphur upon some hot surface, the effect from these fumes would be much the same as is described.

Roses at this season of the year, especially with the cloudy weather that we are getting, naturally get weak and soft, and susceptible to injury, great care should be taken of them until the turn of the year to keep them hardy and vigorous as possible.

E. W.

DENVER, COLO.—The park board are making extensive plantings of trees, shrubs and wild flowers in furtherance of the beautification of the boulevard system.

NORRISTOWN, PA.—Joseph N. King, the well known florist and also coroner, will, in the next few weeks, erect a large greenhouse in the rear of his nursery, which he will devote to the culture of carnations and American Beauty roses.

#### Some Good Red Bedding Roses.

As a flower suitable for bedding and massing the rose is rising in popularity year by year. There was a time, not so very long ago, when the rose was regarded more or less as a specimen plant; be it standard or bush, we procured one, or perhaps two, of a sort, and planted them in borders with other flowers, and sought for excellence in form, size, and color of the individual flower. We wanted quality, not quantity, and we found what we wanted in the hybrid perpetual. But compared with the modern rose, the true hybrid perpetual has but a short season, the designation "perpetual" simply denoting that, in contrast to the damask from which it sprang, the hybrid perpetual had more than one crop of flowers, not a continuity of flowering from June to October. The hybrid perpetual produced first-rate flowers in its first crop, but the second blooms were only second rate, mere echoes of the first. Ripening set in early; some varieties began ripening at the end of July if the season was dry, and then all was over.

But the coming in of the hybrid tea has changed all this, writes a correspondent in *The Gardeners' Magazine*. We found in it the hardness of the hybrid perpetual combined with the activity of the tea, and, moreover, we found also that the second, and even the third crop of flowers was just as good, and sometimes better, than the first. Nevertheless, the suitability of the hybrid tea rose for bedding purposes was not immediately recognized, and for this reason the hybrid teas, when first introduced, lacked qualities demanded of bedding plants, compactness of growth, floriferousness, and brilliancy.

We had this brilliancy in the hybrid perpetual, such as *Horace Vernet*, *Al-*

fred K. Williams, Charles Lefebvre, Duke of Edinburgh, and the like, but we sought for it in vain in the hybrid tea. Year after year new hybrid teas were introduced, first-rate varieties some of them as regards form, but in color they were no substitutes for the hybrid perpetuals. It was the teas that suffered. We no longer cultivated them to the same extent as heretofore, when it was found we could get the same shade of color in the hybrid teas. So time progressed, and we longed for some good red hybrid teas to take the place of hybrid perpetuals. Demand created supply; slowly, but surely, red hybrid teas are advancing, and, as a result, the hybrid perpetual is waning in popularity. It is not within the scope of this paper to refer to the new roses, except to observe there are now evident signs that before very long we shall have all we want in reds in the hybrid teas. One by one we have had to bid farewell to old favorites of the hybrid perpetuals, few now remain, and these will eventually become memories of the past. The dawn of the twentieth century witnesses the fading of the hybrid perpetual.

And in the class of hybrid teas such reds, such free-flowering reds, such brilliant reds, have come, and are still coming. Varieties, not perhaps up to exhibition standard, but what are far more in demand, fulfilling all the requirements of a bedding flower, compactness of habit, floriferousness, and brilliancy. Experts, specialists may appreciate yellow roses, but the color in popular favor is red. Clearly then in any grouping of beds of roses on the lawn, especially if roses are to be substituted for geraniums, we must have some good reds.

Granted, but what shall they be? If we look through a catalogue we shall find many reds that might suit our purposes; let us select half-a-dozen of the very best. They are not novelties, of this or last season cut from maiden

plants, nor those seen only at the early shows grown under glass, but well tested varieties of some few years' standing, all twentieth century roses, named, in the writer's opinion, in the order of merit; General McArthur, Chateau de Clos Vougeot, Earlate, George C. Waud, Warrior, Richmond. General McArthur, H. T. (Hill, 1905).—A rose of American origin. Very attractive. Color, bright scarlet. Flowers large and full, flat when fully expanded, freely produced on stiff upright stems, growing about twelve to eighteen inches high, compact. Very free flowering, constantly in bloom, good in autumn. Dark green leathery foliage. Very hardy, and a good bedder.

Chateau de Clos Vougeot, H. T. (Pernet-Ducher, 1908).—Color velvet crimson, sometimes scarlet. Flowers of moderate size, buds pointed, expanded blooms cupped shape with deep yellow stamens. Very fragrant and continually in flower. Wood and foliage pale green. Growth dwarf and spreading. The darkest red of all the hybrid teas, the flowers retaining their brilliancy in sunshine and rain. In habit it resembles a China rose. For massing, plant close together.

Earlate, H. T. (Boyntard, 1907).—This rose will supersede that prey to and distributor of mildew, Marquise de Salisbury, which it closely resembles in habit and form of flower. In color the blooms are brilliant scarlet, produced in bunches on upright stems, of medium size, and semi-double. One of the most suitable for massing, as it is constantly in bloom until late in autumn, and the color is dazzling when at its best.

George C. Waud, H. T. (A. Dickson and Sons, 1908).—A most attractive rose on account of its coloring, crimson-orange. It seems to assert itself, for visitors notice it at once, and enquire as to its name. Truly it is a veritable "Top Dog" amongst reds.

The flowers are pointed and full, after the style of the Newtownards rose. Habit is strong, but not too strong for grouping on lawns. Although active in growth, it bears but one to two blooms on a stem, and, therefore, a mass of flowers like General McArthur or Earlate is not to be expected. Nevertheless, its distinctive coloring, free flowering, and late blooming habit makes it suitable for bedding purposes.

Warrior, H. T. (W. Paul and Son, 1906).—In this rose we have a variety eminently adapted for bedding and massing. The flowers, of medium size, are dark red in bud, opening out scarlet-crimson. It blooms constantly, with great freedom, and is a good autumnal.

Richmond, H. T. (Hill, 1905).—An improved Liberty, retaining its color better, and of stronger constitution. The flowers are perfect in shape, pointed. Habit of growth, upright. It is so well known on account of its excellent forcing qualities that no further comment is necessary, except to recommend it as suitable for bedding.

#### Big Prizes for Sweet Peas.

The London Daily Mail offers several prizes for sweet peas, to be exhibited at a special show to be held in London, England, in July of this year, writes Consul General John L. Griffiths. The first prize is £1,000 (\$4,806), the second prize of £100 (\$486), and £50 (\$243), will be offered as a third prize. In addition 1,000 medals will be distributed. Only professional gardeners—that is, those who grow for profit—and amateurs who employ more than one gardener will be allowed to compete. The bunches exhibited must consist of not more than 12 spikes or sprays and not less than three varieties. It is stated a great deal of interest is being shown in the forthcoming exhibition not only in England but in foreign countries, and a large display is anticipated.

ENGLISH VISITORS AT BODDINGTON'S, NEW YORK, APRIL 11, 1911.

Reading from Left to Right, Back Row—J. J. Pepper, Harry A. Bunyard, W. H. Hughes, J. S. Gunn, L. M. Graves, J. Brown, W. A. Call, Alfred T. Bunyard. Front Row—G. Prickett, S. South, C. Pratley, J. S. Brunton, C. Engleman, J. Simpson, E. Barker, S. S. Butterfield, Arthur T. Boddington.

CARNATION VASSAR.

## THE CARNATION.

### American Carnation Society.

#### SECRETARY BUR'S REPORT

Your secretary begs leave to report on the past year's work as follows: The year 1910 may well be considered a very successful one, for the American Carnation Society. After a very successful convention at Pittsburg, Pa., in January, preparations for this present convention were almost immediately taken up, and have kept the secretary's office busy during the entire year. The mails coming in and going out have perhaps never been so large as during the past year.

The membership made its usual slight gain. During the year 1910 we added 57 new names, and against these we have 28 on the delinquent list. Sixteen new names have been added since the first of this year. We now have 244 members in good standing. We have collected the dues as diligently as possible and turned them over to the treasurer, taking his receipt therefor. There is however a good deal standing out.

Five deaths were reported during the year, namely: Lyman E. Crow of New York; Mrs. M. S. Vesey of Ft. Wayne, Ind., who died April 8; W. E. Hall of Clyde, O., who died May 3; Anthony Wiegand of Indianapolis, Ind., who died Dec. 19; Fred Dörner of LaFayette, Ind., who died Dec. 29. To the funeral of Mr. Dörner, who was one of our early presidents, we ordered a wreath of carnations, costing \$15.00, after having first secured the sanction

of the president. Nine members of the society attended the funeral services, which were held on Jan. 3rd.

Complying with instructions given by the last convention, we have had designed a permanent button. The design having been approved by the board of directors, we had 150 of them made, and are pleased to state that most of these have been sold among our members. They were sold at a slight profit to the society. A wide distribution being more desired than a profit. The annual report was gotten out and mailed to all the members, as is customary. The premium schedule for this exhibition was also gotten out in due time. We were able to secure slightly more advertising matter than was carried by last year's list. The amount being exactly 30 pages, amounting to \$300.00. The cost of printing the schedule ran slightly over \$100.00, and we have deferred payment until this meeting approves the account. This transaction is a violation of section six of article two of the constitution, and inasmuch as the printing of this schedule will vary in proportion to the amount of revenue it produces for the treasury, and as we expect and hope to see a recurrence of the same thing each year, we would recommend that the printing of the premium schedule be inserted in that clause which gives permission to spend over \$100.00 for printing the annual report.

We would also recommend a change in section eight of the by-laws. We recommend that instead of compelling a delinquent member to pay up all arrearages, that they be compelled to pay only one year's back dues. This

would cover the time we carried him on the books after the last payment of his dues. Or, that after a certain lapse of time, he be allowed to join as a new member.

The merging of our exhibition with the National Flower Show, was perhaps responsible for most of the activity in the secretary's office. Just how much the society will be benefited, or otherwise, remains to be seen. The liberal premiums, coupled with the rule compelling membership in the society of all competing exhibitors, has brought in several new members. More than usually come in before the convention takes place.

The large increase in the total amount available for carnation premiums, made it necessary to completely rearrange the schedule. The schedule as it is this year, seems much nearer perfect than any we have ever had, in that it provides for a more complete exhibition of the carnation and its possibilities. If this list can be reduced without eliminating too many of the decorative features, it would be a step in the right direction.

To the National Flower Show Committee is due our thanks, for placing at our disposal the generous sum of \$750.00, to be used for premiums at this exhibition. This added to our usual amount of cash, medals and special premiums, made the largest amount of premiums ever offered for carnations, totaling nearly \$1,400.00. The large number of entries shows that the money was wisely distributed. To our friends is due our thanks for the liberal special premiums placed at our disposal.

In conclusion, I wish to add that the society owes its thanks to our Vice-president, E. A. Peirce, for the able manner in which he has handled the local end of the preparations.

A. F. J. BAUR, Secy.

#### Culture of Young Stock.

The young stock being grown along for next season's planting demands considerable time and attention, the increased brighter weather causing them to grow very rapidly now. The early propagated plants that have not been repotted should receive attention at once, by either being shifted into larger pots or planted out on the bench in fresh live soil, to delay this work much longer will cause the plants to become hard and root bound, giving them a severe check. Cuttings taken from the sand the latter part of January and potted into 2½-inch pots are now ready for 3-inch pots. Use a fresh soil, and a little inclined to be light rather than of a stiff clay nature, some of the soil from the carnation pile left over from last season's planting, that has laid out all winter and brought in to dry out and warm up a bit, makes the ideal compost for the potting at this time; it is also the best material to use if the plants are to be planted on a bench. A close application to the young plants' requirements as regards watering is a very important item, and it is a great deal better for the health of the young stock, to run them a little on the dry side. Any soddening of the soil to cause it to sour will quickly ruin the roots of the young plants, and harden and make brittle the growths. Pinching or topping back the shoots requires almost daily attention. Where large numbers for carnation plants are grown, do not put this work off from day to day, but attend to it as quickly as the plants need it. After each potting, for a few days, the plants should have a little higher temperature to help quick root action, but as quickly as the roots take hold of the soil they should not receive more than 45 degrees as a night temperature, with ventilation on every favorable occasion, during the daytime from now on, very little steam heat should be necessary unless the weather becomes very wet and stormy, and then a little steam heat will have to be put on to dry up the atmosphere, but during fine weather give all the ventilation the conditions will permit without causing a cold draught to blow directly on to the plants.

Now is the time to take stock of the young plants on hand, to see if enough have been arranged for to meet the coming season's requirements, if not, another batch of cuttings should be put in. This should be done right away while a steady bottom heat is available to start them off. A week or ten days later will lessen the percentage of successful rooting of the cuttings considerably. If not enough of cuttings from the plants on the place can be obtained buy enough to make up the shortage; it is better to do this now than to put it off for field stock in the fall.

The flowering plants must not be allowed to suffer by letting up in attending to their wants during a rush of other work. Disbudding is considerably more of a big job than it was a few weeks ago, but to neglect this work in any way means a lowering of

the quality of stock, and the increased supply of flowers now coming in every day makes the high quality of the flower a very important factor in their sale. Another item to look out for is to go over the beds occasionally and put the shoots inside the rings, as the stems are very brittle and easily break off in the handling if at all crooked. A mulch of well rotted stable manure and soil should be in order now for all beds that have not been done previously, particularly when it is the intention to carry the plants through to June. A light dressing of bonemeal before putting on the mulch will be very beneficial to the plants, but do not put on the mulch very heavy, enough to cover the bare places and even up the surface is all that is required.

C. W. JOHNSON.

#### Carnation Scarlet Glow in England.

In an interesting article entitled "The best scarlet perpetual carnation," Montagu C. Allwood in the *Gardeners' Magazine* reviews the different varieties of red carnations and writes of the difficulty in obtaining a bright clear color in scarlet seedlings, which often become dull and slaty in midwinter, but, worst of all, as a rule, all red varieties are very prone to fungoid diseases, and it is this which checkmates the grower, often destroying years of hard work.

"Of the old varieties in England, Winter Cheer is the only parent which has produced worthy children, and from this Britannia was obtained, by crossing on to it Mrs. Thomas W. Lawson. One of the best reds that ever came from the United States was America, which was a great red in its day. Portia was bright but small. Vesper never received the attention it deserved. G. H. Crane certainly was good and it is from this variety that some of the best seedlings have come. Flamingo will always live in my mem-

ory. It was, and always will be, my model flower for form. Adonis reached the high water mark for a rich, bright pure color, but the disease! Oh! what a trouble it was in those days. Crusader with its poor color and soft growth could not survive, but Cardinal made a great stride, giving us a glorious rich deep scarlet, a real winter shade, but disease killed Cardinal. Then came the battle royal between Robert Craig and Victory. Robert Craig was not free enough. None of us grow Victory now on account of its being so subject to rust disease. We also have freer flowering varieties. Deiance was an utter failure and the more modern variety, O. P. Bassett, is not adapted to our climate.

"So we have only three scarlet varieties left from which to select the winner—Britannia, Beacon and the new aspirant, Scarlet Glow. Britannia you all know, and undoubtedly have pleasure in its acquaintance. Beacon is certainly more productive than Britannia and pays the commercial grower better. It is not subject to any disease, but, of course, does not make so noble looking a plant, and the flowers are of orange-scarlet shade, and according to the British idea, not so well formed, but Beacon grows much freer than Britannia in midwinter. To my idea, however, the new variety, Scarlet Glow, is head and shoulders the best scarlet perpetual carnation today. The color is the whole thing and is a glorious shade. The flowers have a refined appearance and are of average size. The habit of growth is clean and healthy and its productive power is up to any other variety if, indeed, it could not lead on Beacon, certainly its closest rival."

BEVERLY, N. J.—The carnations were producing such magnificent blooms at the greenhouses of John Cook that he opened the houses during March and invited the public to inspect and admire the plants and flowers.

CARNATION VASSAR.

Front View of Flower.

CARNATION VASSAR.

Rear View of Flower.

**Carnation Vassar.**

The new carnation Vassar, which was shown at the exhibit of the American Carnation Society at Boston, and is herewith illustrated, is a cross of an unnamed seedling and Lady Bountiful. The ground color is white overlaid with pink, the flowers are three and a half inches across and the calyx never bursts. The plant bears no surplus grass, every shoot running quickly to flower, is a constant strong grower, and a prolific producer. The Saltford Flower Shop, Poughkeepsie, N. Y., sponsors.

**Addition to King Construction Co.'s Forces.**

It is announced that E. P. Lovejoy has resigned from the Lord & Burnham Co. and become associated with the King Construction Co. at North Tonawanda, N. Y., becoming vice-president of this concern. Mr. Lovejoy entered the employment of the Lord & Burnham Co. about 14 years ago and worked up through various positions, finally becoming a member of the board of directors, a shareholder in the company and superintendent of the Irvington plant. The King Construction Co. has, in the last year, enlarged its field of operation to include the building of all descriptions of ornamental conservatories and palm houses for private estates, florists' show rooms, parks, etc., many orders for this class of work having already been executed. To satisfactorily handle this department of the business, a new factory building has just been completed on the premises at North Tonawanda and special and most modern equipment is being installed. The acquisition of Mr. Lovejoy, who, in addition to assuming the duties of vice-president, will become superintendent of the plant at North Tonawanda, will be of material benefit to

this new department and to the increasing general business. Mr. Lovejoy during his long residence at Irvington was held in high regard by his many acquaintances and was the recipient of many tokens of esteem by fellow employees on the occasion of his leaving Irvington for North Tonawanda.

**The New Insecticide Law.**

There has been for the past few years a strong crusade against the adulteration of food products, and the impairing of the vital strength of drugs used for medicine, which culminated in the "pure food and drug law;" from this started in various directions laws to regulate and control many other things, among which were insecticides and fungicides. The custom of mislabeling certain lines of goods has been carried on to a blamable extent almost universally, and this abuse hurt and damaged the trade of any manufacturer or merchant who endeavored to sell goods strictly on quality. To stop this was one aim of this law. Now, long experience has taught me that there is no magic in killing "bugs," nor is the crop of insects always the same.

The present law is mainly made up of its penalties. In section seven the last sentence therein, "shall be injurious to such vegetation when used," is a back-acting provision in this wise. No article, either Paris green, lead arsenate, lime-sulphur, kerosene emulsion, sulphur or Bordeaux mixture, but will and does do damage and injury to vegetation, unless used with care, but this section as it reads makes it a penal offense. This was once stricken out, and then again added, when the bill was before congress. A manufacturer is liable for damage no matter how it is brought about. A careless person can do damage, for in killing insects on vegetation one is trying to

destroy a living animal organism upon a living vegetable organism and often on its tenderest parts. With forty years of experience and experimenting in gardening, I have found an over-dose will, and does do, much damage to plants or tender trees. There is widespread fear about handling insecticides engendered by this act, but this is needless, for the law has, as an experienced attorney who paid some attention to it said, "a tail to it," as the insecticide law is framed, to-wit, the "Rules and Regulations" may be onerous or otherwise.

On the whole the intent of the law was to prevent fraud in regard to the formula, but this requirement goes beyond the provision of fraud, because after any person has worked out a good formula, there is no reason, in fairness, why that should be given away, unless it is with the intent of preventing all initiative.

Section nine prescribes for prosecution under the provisions of this act; if any package is sold and the original party complains that "it is no good." I doubt if there ever was a season since potato bugs or cabbage worms first arrived, but what every dealer has had either complaint or packages of standard articles returned because "it was no good," "the bugs grow fat." The fact is seasons vary, and there is no magic in killing bugs. Nevertheless, a merchant in any town may sell shoes by the dozen, and some one gets a pair that was faulty or unsuited, rather than offend the customer he would give him another pair, this is a rule of trade in order to please your customer, but in this act, this is not enough penalty, it is criminal. Long ago in England it was hanging for stealing.

Again, see section eleven. Here we have "if an insecticide or Paris green, or lead arsenate or fungicide offered to be imported into the United States \* \* \* is adulterated or otherwise dangerous to the health of the people \* \* \* it shall be refused admission." Where have insecticides or fungicides ever been offered for sale as health producers? Verily this law is tough on the "Professors" who fathered it. Nevertheless, when a law is once on the statute books, it is not easy to get it off, so as it was gotten up with the best intent, by the entomologists, the chemists and the lawyers of the government, we must be thankful that human beings are not obliged to eat "Bug Medicine"—for all "Bug Medicine" hereafter must be good.

BENJAMIN HAMMOND.

Fishkill on Hudson, N. Y.

**Thomas T. Connor.**

Thomas T. Connor, a well known gardener, died at Holmesdale, Pittsfield, Mass., March 28, after an illness of several weeks from grip with complications of Bright's disease. He was born in Newbridge, County Kildare, Ireland, coming to America in 1866, and entered the employ of William Pollock, Sr., at Greytown, where he remained until 1893, acting as superintendent for many years. He then entered the employ of William Pollock as superintendent of Holmesdale, having at his death been in the employ of the same family 44 years. As a grower of roses he acquired a great reputation. Five sons and a foster daughter survive him. The interment was in St. Joseph's cemetery March 30.

### A Song in April.

By Charles Hanson Towne.

Sun!—and the rush of the rain  
 Swift through the lilac lane;  
 The joy o' the world and the grief o' the  
 world  
 Be at my window-pane.  
 Love!—and the ancient tears;  
 Hope!—and a hundred fears.  
 The light o' the world and the dark o' the  
 world  
 They follow us down the years.

THE date of Easter in 1912 is April 7.

RENEW subscriptions promptly so  
 that no copies of the papers may be  
 missed.

OUT.—The long-promised book on  
 "The Gladiolus," by M. Crawford and  
 Dr. W. Van Fleet.

It is always bad policy to risk ten-  
 der stock outdoors in advance of the  
 usual time, without adequate facilities  
 for protection.

ONE of Boston's newspaper cor-  
 respondents in writing of the National  
 Flower Show quotes a florist as stat-  
 ing, "That he doubts if any of the men  
 who put thousands of dollars into their  
 exhibits will ever get back a cent. Still  
 that doesn't matter to us, because the  
 real florist falls in love with his work."

### Cape Jasmine Shortage.

TEXAS SPEAKS RIGHT OUT

We are advised that spraying, under  
 the Texas laws, will destroy half of the  
 cape jasmine crop in the vicinity of  
 Alvin this season. This, taken with the  
 statement that "on account of the un-  
 usual weather conditions the past  
 winter, warm followed by a severe  
 freezing temperature, about 60 per cent  
 to 70 per cent of the buds were killed,"  
 we should say about wipes out the  
 crop this season, if the written state-  
 ments of two Alvin specialists in cape  
 jasmines are correct. The few flowers  
 produced probably will be more or less  
 deformed by freezing and spraying and  
 even the commission dealers in vege-  
 tables do not care to handle deformed  
 cape jasmines. We are sorry, of course,  
 for the Alvin specialists, but that ill  
 wind continues to blow and growers  
 having good crops in other sections  
 will profit by these unfortunate con-  
 ditions.

### National Sweet Pea Society.

The National Sweet Pea Society of  
 America will hold their annual con-  
 vention and summer exhibition at  
 Philadelphia, Pa., June 23-24, 1911, un-  
 der the auspices of the Pennsylvania  
 Horticultural Society and in connec-  
 tion with their annual sweet pea exhi-  
 bition.

A guarantee fund for a general list  
 of prizes has been headed by President  
 W. Atlee Burpee, The Henry F. Michell  
 Co., Henry A. Dreer, Inc., Arthur T.  
 Boddington and other seed houses con-  
 tributing. A preliminary schedule will  
 be published in a few days, showing  
 list of prizes, cups, etc., and a gen-  
 eral programme for the convention.  
 Contributions for additional prizes in  
 the form of cash or cups, etc., are in-  
 vited from the trade. The prize list  
 will amount to about \$500.00 which  
 should act as a great stimulus to the  
 lovers of sweet peas, and intending ex-  
 hibitors should make due preparations  
 for this, the third annual exhibition  
 given by our society.

HARRY A. BUNYARD, Secy.

### The Boskoop Exhibition.

The committee of the exhibition of  
 forced shrubs and perennials at Bos-  
 koop, Holland, is receiving much good-  
 will and co-operation on all sides. H.  
 R. H. Prince Henry hopes to be present  
 at the opening and has presented two  
 large medals. His Excellency the Min-  
 ister of Agriculture will deliver the  
 opening speech. The steamboat com-  
 pany, "de Volharding" of Leiden will  
 place a large saloon-boat free of ex-  
 pense at the disposal of the jury, the  
 officials of the Pomological Society and  
 the commission of the exhibition to  
 make a trip to Rotterdam on April 6.  
 The famous harbor works will be seen  
 and the Holland-America line will in-  
 vite the international company to lunch  
 on board of one of its great transat-  
 lantic passenger boats. In consequence  
 of this the opening of the exhibition  
 will be a day earlier and has been fixed  
 for April 5.

C. PH. MOERLAND, Sec.

## RECENT BOOKS.

### The Gladiolus.\*

This is the title of a new book of  
 about 100 pages by Matthew Crawford  
 and Dr. W. Van Fleet, the well known  
 gladiolus experts. The volume is most  
 timely in view of the present world-  
 wide interest in this plant. The prin-  
 cipal chapters are by Mr. Crawford  
 and include: "History and Develop-  
 ment," "Habit of Growth," "Soils and  
 Preparation," "Time to Plant," "Culti-  
 vation," "Digging and Curing," "Glean-  
 ing," "Winter Storage," "Growing from  
 Seeds," "Growing from Bulbs," "Peel-  
 ing Bulblets," "Growing for Specific  
 Purposes," "Crossing or Hybridizing,"  
 "Enemies and Diseases," "What Con-  
 stitutes a Good Variety," "How to Ob-  
 tain a Choice Collection," "How to  
 Keep a Collection Vigorous and Well  
 Balanced," and "Commencing in the  
 Business."

Dr. Van Fleet contributes an ap-  
 pendix covering: "Garden History of  
 the Gladiolus," "Hybridizing Gladiolus,"  
 "Special Care of Seedlings," and  
 "Gladiolus Species." The book is sub-  
 stantially bound in cloth, the cover  
 being decorated with spikes of Gladiolus  
 Princess and inside there are many  
 illustrations showing the more  
 popular varieties. We can now sup-  
 ply copies, price \$1.25, postpaid.

### The Practical Flower Garden.\*

A book with the title of The Prac-  
 tical Flower Garden, from the press  
 of the MacMillan Co., and written by  
 Helena Rutherford Ely, is a volume  
 full of interest to the flower grower  
 and replete with beautiful illustrations  
 both of color plates and half tones of  
 gardens, trees and flowers. It de-  
 scribes the preparation and care of the  
 garden, as well as the proper plants  
 with which to bring about the most  
 desirable effects. A chapter upon the  
 color arrangement of flowers describes  
 how beautiful the garden may be made  
 by adhering to a well planned color  
 scheme. Lawns and their treatment  
 with descriptions of the different grasses  
 and the locations to which they are  
 adapted, as well as evergreen trees,  
 are fully explained. The growth of  
 the seed of both plants and trees is  
 fully covered, and a chapter on fertil-  
 izers and plant remedies cannot but  
 be instructive to any one having a gar-  
 den and needing advice to combat the  
 diseases and insects. The wild gar-  
 den is well treated, and its beauties  
 described, as well as the treatment of  
 terraces to make them beautiful. The  
 chapter on shrubs, vines, plants and  
 bulbs contains a list of the best of the  
 many varieties of these plants, with  
 full descriptions and illustrations that  
 the reader may learn the different  
 plants, their culture and adaptability.  
 The book is interestingly written by  
 one with experience, beautifully print-  
 ed, and a worthy addition to the works  
 on home gardening, and is valuable as  
 a book of reference in garden manage-  
 ment. Price \$2.00.

HACKENSACK, N. J.—Harold Mabie  
 has opened a new flower store on Main  
 street, between the Consolidated mar-  
 ket and the Fair store.

#### Chicago.

##### EASTER PREPARATIONS.

Getting ready for the great floral week is occupying the attention of every branch of the business. The weather for the last month has been unfavorable for almost all kinds of stock, and some crops, even with Easter as late as it is, are still backward. The plantmen are busy delivering their orders and some very fine specimens are seen. Lilies are generally very good, but there are a great many short plants, especially among the gigantes, but it looks as if there would be plenty to supply all demands. Hydrangeas are in splendid shape, and some very fine azaleas and rambler roses are to be seen, and there is a large quantity of spiraea, but the plant growers are about cleaned out and there is no stock to call upon when those on hand are sold. In the cut flowers, there is a large quantity of lilies and callas. Roses are in good supply with the exception of American Beauty, which is still being received in limited quantities. The long dark spell seems to have been felt more severely by the growers with this rose than by any other crop in the market. Killarney, White Killarney, Richmond, Bride, Bridesmaid, My Maryland and Mrs. Jardine are received in large quantities and some elegant stock is to be found on the market. Carnations have fluctuated all the week, the prices rising and falling, but generally have held at good figures. Some of the dealers say that the supply of carnations will be short, but the prevailing opinion is that there will be plenty to meet all of the requirements. Orchids are in plentiful enough supply to fill all the orders. Violets are more plentiful than was expected the weather having been very favorable. Lily of the valley is in good supply,

and some of the stock is of excellent quality. Sweet peas in all colors are very plentiful and of several grades, from very short stems to fine stock. Bulbous stock is nearing the end as far as the greenhouse product is concerned, but there is a good stock of frame grown, and there will be enough to supply the Easter trade. Some extra fine antirrhinum is to be had and in many colors. Marguerites both yellow and white, are exceptionally fine, some very large flowers to be seen. Fancies are in good supply, and the large calendulas are very bright and attractive. The wholesale houses started with their long shipments the middle of the week, and the indications were that there would be very large and satisfactory business. With the exception of carnations, prices have advanced but very little. In the greens there is plenty of asparagus of both kinds and a good supply of smilax, but hardy ferns are very short and have touched a record price for this season of the year.

##### NOTES.

Bassett & Washburn are commencing to cut their spring crop of American Beauty roses, which is two months late, the crop is in splendid condition and the supply will soon equal the demand. The carnation cuts are very large and some excellent blooms of high quality can be seen at the store this week. Mr. Washburn says the advance orders for Easter have been very large and satisfactory.

The Geo. M. Garland Co. is experiencing a very busy season and all hands are kept busy turning out material for the many orders that have been booked. Mr. Garland recovered sufficiently from a recent attack of pleurisy to be at work on April 10. B. J. Maynard returned on the same day from a successful eastern trip includ-

ing Detroit, Cleveland, Buffalo, Syracuse and other cities.

Stollery Bros took second prize in the Wilson avenue carnival parade Friday night, April 7, and they also had on Saturday a very handsome window display in yellow and red, the emblematic colors of the occasion, a combination of Von Sion narcissus and Mme. Van der Cruyzen azaleas.

John Canger, of Canger & Gormley, reports trade fair with plenty of funeral work, a good business has already been done in Easter plants, of which a large number have been sold. Mr. Canger has secured the valuable services of Fred Strail, the well-known florist of this city.

Myron H. West has resigned his position as secretary of the Lincoln Park board and superintendent of the system to enter business on his own account. Mr. West has been connected with the park for about five and one-half years.

George Perdikas, 407 South Wabash avenue, inserted a half page advertisement in last week's issue of the Preston Times, published in Jackson County, Ia.

A. L. Vaughan, of Vaughan & Sperry, says that Friday, April 8, was the busiest day they had had for over a month, out of town trade being very lively.

Following custom, there will be no flowers allowed in the council chamber next Monday night, April 17, when Mayor-elect Harrison and other new officials will be inaugurated.

W. C. Johnson, formerly traveling representative for E. H. Hunt, has opened a store in Grand Forks, N. D.

Emil A. Danz, who was confined for several weeks with a severe attack of rheumatism, is able to be about again and was seen in the local market on April 10.

E. C. Amling returned on Friday, April 7, from a most enjoyable visit at Orange, Calif. He was very much interested in what he saw in the several greenhouses that he visited, and was particularly impressed with the splendid condition of the collection of orchids of the El Reah Nursery, Hollywood, which is in charge of our old friend H. R. Richards. Mr. Amling met with a surprise upon his return, as the young ladies of the store had rearranged and decorated the office, giving it a cozy and homelike appearance.

The Batavia Greenhouse Co. is erecting two new greenhouses which will be devoted to the growing of ferns, three additional carnation houses will be built later in the season. This firm is cutting a choice grade of long stemmed American Beauty roses which are being sold at their stand in the Flower Growers' Market.

The Mrs. Jardine roses at Wieter Bros.' store are of as fine quality as is often seen. The stems are exceptionally long, with beautiful foliage carrying extra large flowers of splendid color. A change in the management at the greenhouse is contemplated and the firm is on the lookout for a competent foreman.

Phil Schupp, of J. A. Budlong's, says that business has been exceptionally good since they have occupied their new store at 82-86 East Randolph street. Roses and carnations are arriving in quantity large enough to meet all demands.

The display of Easter plants at Garfield Park is a sight worth seeing, and thousands of the residents of the city are embracing the opportunity of admiring the beautiful collection that adorns the greenhouses.

Harry Manheim visited the Hoerber Bros.' greenhouses at Des Plaines on

## ORCHIDS

April 9, and reports both the roses and carnations in good crop for Easter and says, all that is needed now are the orders. Both local and shipping trade have been very brisk all the week.

A novelty for the season was seen at the store of the J. B. Deamud Co. bunches of laurel (*Kalmia latifolia*) in bloom, which was eagerly taken by the trade. A fine lot of pot lilies was also to be found here.

Tim Matchen, store manager for Peter Reinberg says that they will be able to fill all Easter orders for short

**CHICAGO.**

Zech & Mann prepared for the Easter rush of business by lining their boxes on the evening of April 7. The snapdragons and other stock seen at the store this week is of the first quality.

John Sinner, of Sinner Bros., reports that he will be well able to take care of all Easter orders for Killarney and White Killarney roses and carnations, as he has a good supply of all of these flowers.

George Reinberg is cutting a large quantity of Richmond roses of good quality, a good supply of American Beauties of the long stem grade are daily offerings.

E. H. Hunt's traveling representative, A. F. Longren, returned on April 10, from a two month's trip, and is assisting at the store during the Easter rush.

Chas. W. McKellar is finding a ready sale for the large quantity of narcissus that he is receiving, the variety Emperor is especially in great demand.

Henry Van Gelder, of Percy Jones, is replacing his old tables with new

ones and now has 750 square feet of table service.

The annual meeting of the Horticultural Society was adjourned April 11 subject to the call of the president.

H. A. Fisher, of Kalamazoo, Mich., paid the city a visit on February 8, returning home the same evening.

Kennicott Bros. Co. have installed another telephone, which will be used for incoming calls only.

# VAUGHAN & SPERRY

Long Distance Phone  
Central 2751

**161 N. Wabash Ave., CHICAGO**

J. D. Smedley, of Smedley & Co., Fargo, N. D., was in the city this week getting figures on material for several greenhouses which they intend to erect this season. This firm has been incorporated with a capital stock of \$12,000, the principal stockholders being the leading business men of the city. Mr. Smedley reports trade in all lines good, both at this and their Miles City, Mont., store.

Pechmann Bros. Co.'s lilies are of fine quality and they are filling some very large orders of both out flowers and pot plants. They still have a large quantity of plants on hand which will enable them to fill all orders up to the last minute. The Richmond and other roses that this firm is cutting are of unsurpassed quality.

The Chicago Carnation Co. is in good crop, with a large supply of carnations of exceptionally good quality. Plenty of all other seasonable stock was seen at the store this week.

The Geo. Wittbold Co. reports a very busy season, the demand for Easter stock being exceptionally brisk.

Leopold Koropp was awarded first prize for window decoration in the Wilson avenue carnival last week.

Sam Pearce is bringing in an exceptionally fine grade of double tulips.

MIDDLETOWN, N. Y.—Edwin A. Lorentz is making extensive repairs and additions to his greenhouse plant.

ROCHESTER, N. Y.—Prof. A. C. Beal of Cornell University addressed the Florists' Association at the meeting held April 3.

SOUTH NORWALK, CONN.—Traenldy & Schenck have started the erection of another greenhouse larger than any of the others they now have. The length will be 600 feet.

### Chicago Florists' Club.

The regular meeting of the Chicago Florists' Club was held at the Union Restaurant April 6, President Philpott in the chair. There was a good attendance and new members were elected as follows: Frank J. Kral, Jr., 1907 Halsted street; Wm. Harbittz, 3435 W. Chicago avenue; Gustav L. Klimmick, corner St. Clair and Illinois streets; and Edw. A. Ollinger, 440 South Dearborn street. Vice President Kohlbrand and Alex. Henderson spoke of the visit of the British Horticultural Traders and C. W. Johnson and A. T. Pyfer described some of the more striking features of the National Flower Show at Boston.

John J. Davis, who has been doing some excellent entomological work among the greenhouse men of Chicago and vicinity under the direction of Dr. S. A. Forbes of the Experiment Station at Urbana, made some interesting comments on his work and intimated that bulletins on the injurious insects of this section would shortly appear, including a bulletin on thrips. Mr. Davis leaves Illinois shortly to take up other entomological work at LaFayette, Ind., and introduced D. K. MacMillan as his successor in the local work. Mr. MacMillan has been working on government work at Brownsville, Texas, and should be given the hearty co-operation of all florists in his new field. His address is 4022 Irving Park boulevard.

In the brief discussion following Mr. Davis' remarks, W. J. Keimel, of Elmhurst, recommended paris green and brown sugar for thrips (one part paris green to five parts sugar) to be applied as a spray (one ounce of this mixture to one gallon of water) at night and washed off by spraying with water before the sun strikes the plants. Another speaker recommended the use of

## U S Budlong's E Blue Ribbon Valley.

red pepper on heated bricks while the plants are fully exposed to sunshine, not at night or in dull weather as generally practiced.

Allie Zeck reported that the bowlers were delightfully entertained by the Milwaukee florists on the occasion of their recent trip to and bowling match in that city, and a return match in Chicago is talked of, the date, after Easter, to be announced later. The Wisconsin city has proved so alluring that there is a movement afoot favoring a joint meeting there of the two clubs next month.

The sports committee was instructed to get busy on picnic plans. G. Swenson, of Elmhurst, exhibited some attractive sweet peas.

### Chicago Bowling.

The standing of the teams is as follows, with the number of games won and lost by each team to date:

| Won Lost        |       | Won Lost     |       |
|-----------------|-------|--------------|-------|
| Orchids.....    | 56 19 | Roses.....   | 31 44 |
| Carnations..... | 39 36 | Violets..... | 25 50 |

Individual averages for games played this season:

|               |           |                |           |
|---------------|-----------|----------------|-----------|
| Fisher.....   | 168 44/57 | Winterson..... | 153 37/42 |
| A. Zeck.....  | 168 23/69 | Duggan.....    | 153 16/51 |
| Yarnall.....  | 167 37/51 | Schultz.....   | 152 25/72 |
| J. Zeck.....  | 161 1/63  | Huebner.....   | 151 61/75 |
| Farley.....   | 160 33/66 | Lorman.....    | 147       |
| Friedman..... | 159 29/45 | Byers.....     | 141 24/57 |
| Ayres.....    | 157 70/72 | Goersch.....   | 140 23/57 |
| Wolff.....    | 157 70/72 | Krauss.....    | 139 67/72 |
| Graff.....    | 155 53/72 |                |           |

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

**New No. 30 E. Randolph St., CHICAGO.**

### Albany, N. Y.

There were seven propositions for membership at the April meeting of the Albany Florists' Club and definite action upon them will be taken at the May meeting. The members proposed are: James G. Barrett, Troy; Frank P. Billson, Albany; S. Hanson, Troy; R. W. Billson, Troy; Otto Sucker, Albany; James J. Cairns, Philadelphia, and Rupert E. Hall, New York. Letters were read acknowledging the receipt from the club of floral pieces from the families of George H. Price, James Warner, Charles Huested, Louis and Felix Menand, all of whom had lost members by death within the past few months. An interesting discussion on Mothers' Day, Sunday, May 14, was brought up by President Frederick A. Danker, and the club decided to pursue a course similar to last year, when the members donated to the Albany Mothers' Club white carnations to be sold for the occasion. The Mothers' Club will in return promote the sentiment of the day by judicious advertising and interesting articles in the local press. President Danker had with him a large number of articles printed in local papers last year, through the influence of the Mothers' Club, and the consensus was that the sale of flowers was much stimulated thereby. Frederick Goldring, in behalf of the local contingent that attended the S. A. F. show in Boston, made an interesting and some-

what detailed report. Patrick Hyde, chairman of the entertainment committee, presented his resignation on account of the pressure of numerous duties, and the president appointed Louis Schaefer in his stead. Chairman Schaefer's idea of the duties of the social committee is to provide some form of entertainment at least every other month, which he believes encourages the attendance. The first of these social and business gatherings will be at the May meeting, when a smoker will be provided. A vote of thanks was extended to Mr. Hyde for his very capable management of the March show and meeting, and he in turn was able to report all bills for the affair paid. Fred Goldring, named at the February meeting a representative to co-operate with other florists' clubs in the state to secure an appropriation of \$50,000 from the legislature for experimental greenhouses, reported that the measure will undoubtedly pass. It is proposed to establish the greenhouses in connection with the state agricultural college at Cornell University. R. D.

MIDDLETOWN N. Y.—A man on horseback destroyed 35,000 garden plants in greenhouses of this city recently.

HILLSDALE, MICH.—Thomas Evans, a well known rose grower of Chicago, has taken a position as grower and manager of the Hirsch greenhouses.

### Louisville.

The prospects for Easter are good, but owing to the backwardness of the season there will be a shortage of plants such as azaleas, rhododendrons and bulb stock. Flowers are fairly plentiful and narcissi have been very cheap the whole season.

### NOTES.

Nanz & Neuner have completed a conservatory about 20 by 50 feet at the rear of their new store, which will be a great convenience for the Easter business.

A portion of the establishment of The Kunzman Floral Co. being on leased ground, the land was bought last week for a consideration of \$3,200.

Mrs. Geo. Hodges, for many years a florist, has decided not to rebuild the greenhouses, which were burnt, and will retire from the florist business.

Jacob Schulz has displayed in his window some very beautiful blue forget-me-nots in white fern dishes.

Ed Heitz has a fine lot of lilies, but will be a week too late for Easter. He is generally very successful.

Reynolds & Struck have a fine crop of carnations and lilies which will be just right for Easter.

F. Walker & Co. will add 5,000 feet of glass the coming season.

H. G. W.

**WIETOR BROS., 162 N. Wabash Ave., Chicago**

### Cincinnati.

#### VARIABLE BUSINESS.

The early part of last week's business dragged somewhat, but at the close things moved rapidly. Saturday showed almost a clean up of the very large receipts in the wholesale houses, when the day opened. Some carnations advanced in price. The demand for this flower was exceptionally good, white and Enchantress having the largest call. The supply of roses is large and up till the beginning of this week sold at about the same figure as at last writing. Notwithstanding the increased demand, Killarneys and Richmond are A 1 in quality, while Brides and Bridesmaid are not taking second place by any means. The supply of bulbous stock seems to have been adequate. Very many boxes of out door Jonquils are being shipped in regularly. The amount of Easter lilies during the past fortnight has been adequate, and the blooms have been selling at fair prices. The same also applies to callas. The supply of lily of the valley is enough to fill all orders. Choice sweet peas have no trouble in finding buyers. The green goods market is ample.

#### CLUB MEETING.

The Florists' Society held its regular monthly meeting at the club rooms. Flower show matters were discussed. The guarantee fund for this show is now \$35,025. Those who have not received advance schedules should write to Wm. Murphy, 309 Main street, for one. President C. E. Critchell and R. Witterstaetter told those present what they saw at the Boston show. They both pronounced it the best that was ever staged.

#### NOTES.

The florists in the flower market have their stands heavily laden principally with cut flowers and blooming plants, but unfortunately a hard shower in the afternoon killed business for them and at closing, considerable stock was left over.

The Bowling Club meets next April 17 at Finke and Craig's. Let all the members turn out and show that the Easter rush did not take all of the stamina out of them.

### Pittsburg.

STOCK PLENTIFUL.

From the present outlook the prospects for Easter are good, the last few days of sunshine is bringing out the flowers, and there will be no scarcity of anything. Lilies are overabundant; prices are very low.

### NOTES.

The Florists' and Gardeners' Club held their meeting at the Fort Pitt Hotel, April 4. The subject was Easter plants, with a very fine display, and cultural certificates were awarded to F. Bartsch for azaleas and cinerarias; Phipps Conservatory Schenley Park, fine assortment plants; Phipps, North Side, white and pink spiraea, gemstas and hydrangeas; J. Bader Co., fine assortment of plants. P. S. Randolph gave a talk on Easter plants and the flower show at Boston. W. A. Clark spoke on bulbs.

A. T. Lorch and F. H. Hoffmeister have opened a flower store at 402 Smithfield street. Mr. Lorch is a large carnation grower, shipping his product to this market.

J. N. Thomas, Greensburg, intends to open a new store in Scottsdale. DeForest Ludwig is home from college for a few days.

Chas. Dougherty, McKeesport, was very unfortunate last week, having all his Easter plants destroyed by fire.

B. F. Engle, Rochester, is building a new storeroom adjoining his greenhouses.

Thos. Fitzgerald, Beaver, is putting in concrete benches throughout his plant. J.

CANTON, MASS.—John Fletcher of Newton has purchased a farm of 13 acres on Mountain street and will erect greenhouses and engage in the florist business.

MADISON, N. J.—Minnie B. Lyons is suing Edgar H. Behre for rental due on her greenhouse, and Mr. Behre is endeavoring to secure reimbursement for damages, on account of the poor condition of the houses, and the installing of a new boiler too late to save the crop.

### St. Louis.

BUSINESS DULL.

The week before Easter was very dull but at the end of the week trade brightened up a little. White roses and carnations are a little short of the demand. A large quantity of Narcissus Poeticus has been received from the south. With pleasant weather the outlook for Easter is good with no shortage except American Beauty roses. The plantsmen have done a good business and report everything sold. Fancy ferns are very short in this market.

### NOTES.

Julius Schaffer formerly with W. J. Smyth, Chicago, is with the Mullanphy Flower Co. This firm is very busy with church decorations and have a good Easter supply.

It is reported Robert J. Windler will soon become a benedict, his many friends extend their best wishes.

The Paris Floral Co. will open their new addition April 10.

## New York.

## STOCK INCREASING.

Cut flower stock is on the increase in almost all lines. Easter is nearly here and it is quite evident that there will be no scarcities. Roses are quite a little more numerous than for some time back, and, while prices perhaps are not very firm, there is enough doing all the time to clear out fairly satisfactorily, the long-stemmed grades, however, do not go as quickly as do the lower grades, nor do the prices obtained seem to be proportionate to their value when compared with the short-stemmed flower. The trouble is, there is too large a proportion of high grade stock for the present every-day demands. For the first time in some weeks, American Beauties are being cut considerable in price, which fact, considering that we are so near a holiday, is rather unfortunate from the growers' standpoint. Carnations have been moving a little better, white and light pink sorts being the favorites and commanding the best figures; the reds and dark pink sorts have been the slowest to move. Lilies have got to be extremely plentiful, there are a lot of very short-stemmed flowers coming in, which can only be moved when offered at very low figures, consequently the market price of lilies just now covers a very wide range. The street peddlers seem to have all the violet trade to themselves and prices are very low indeed. It is expected, however, that there will be a sudden boom in violet circles when Easter arrives. Cattleyas are chiefly represented by C. Mossie, not over plentiful and prices fairly steady. Gardenias are numerous, with fancy grades in the minority. Tulips and narcissus are selling fairly well, some southern narcissi arrive regularly, but so far the home product has held its own very well. Sweet peas, when good, are ruling satisfactorily. Marguerites of super-fine quality, both yellow and white, are available in quantity. Lupines and antirrhinum of excellent grade are quite plentiful with some houses, and are moving easily. Callas are in fair demand, with a not over-plentiful supply. Liliun candidum is coming in in limited quantities. Asparagus plumosus continues to sell well. A sprengeri is seen in larger quantities than has been the rule all winter; this variety does not seem to enjoy the esteem of the retailer it had in some former years and moves slower than does the plumosus.

## NOTES.

Myer, Fifty-eighth street and Madison avenue, has leased an adjoining store, taken down part of the inner wall and continued the two stores in one, which gives him very much additional room. He has also taken, temporarily, another store on Fifty-eighth street, which is being used as an annex during the Easter rush. The contract for a prominent society wedding, to take place April 18, has been given Myer, both for the reception at the home and for the ceremony, which is to be in Grace Church. Lilies are to be a principal feature of the decorations.

James McHutchison of the importing firm at 17 Murray street, arrived home on the night of April 5 from his protracted trip around the Horn and up the western coast as far as Valparaiso. The journey covered a period of eight or nine weeks and was a most enjoyable one from start to finish. Mr. McHutchison comes back from the vacation much refreshed and full of energy.

John F. Sharkey, well known in the trade, and for several years a sufferer with locomotor ataxia, died April 4 at the age of 32 years. He leaves a widow and a daughter but a few

months old. The interment was in Calvary Cemetery, April 8. Mr. Sharkey's last place of business was at Forty-sixth street and Sixth avenue, where he conducted a retail store.

F. Lautenschlager, on his way home from Boston, where he had been exhibiting and selling Kroeschell hollers, stayed long enough here to sell to A. Cockcroft, of Northport, L. I., a boiler similar to the large one shown in Boston. Quite an order! Mr. Cockcroft is to build a house, 55x400 feet, close to the range of his brother, the well known carnation grower, J. D. Cockcroft.

Chas. Millang, whose wholesale florist store is on the ground floor at 55 West Twenty-sixth street, has just leased space on the first floor of the same building, where he will install ice box and office and will operate a regular cut flower business in addition to the one at the old stand, which will be continued as heretofore.

Commissioner of Parks Stover is making efforts to remove from office Samuel Parsons, Jr., the landscape architect. Mr. Parsons seems to have many friends, however, and just what the outcome will be is an unknown quantity.

The death of E. Michel, a florist at Douglass, N. Y., occurred April 3, the funeral being at the Bayside Catholic Cemetery, April 5. The deceased was about 50 years of age and leaves a widow and two children.

Retail stores are gay and plant arrangements are again a special feature. Stump, at Fifty-eighth street and Fifth avenue, is showing many splendid examples of that class of work.

The Horticultural Society of New York held an exhibition of flowers and plants April 12 in the Museum of Natural History. Admission was free to the public.

The New York Bowling Club failed to get a quorum on April 7 at the new alley. Thirty-second street and Fourth avenue, consequently there was no bowling.

The steamer Bermudian reached this port from Bermuda, April 10, with 1,500 crates of cut Easter lilies on board.

Visitors: T. W. Moll, Cleveland, Ohio; E. Buettner and E. Wienhoeber, Chicago, Ill.; F. Stuppy, St. Joseph, Mo.; S. Murray, Kansas City, Mo.; H. S. Will, Minneapolis, Minn.

## New York Florists' Club.

On the evening of April 10, the New York Florists' Club met in their rooms, Grand Opera House block, President J. B. Nugent, Jr., in the chair, the attendance being smaller than usual owing, perhaps to it being so near Easter. Chas. B. Weathered, on behalf of the dinner committee, reported a deficit of \$30, which was ordered to be paid out of the club's funds, and the committee were discharged with the thanks of the club. The secretary was instructed to convey the thanks of the club to Alex. McConnell, who arranged the decorations at the recent banquet. A vote of thanks was also tendered to all those who donated flowers for that occasion.

Secretary John Young drew attention to the fact that through death, Kessler Bros. had lost their father, and F. R. Piorkovsky had lost his father, also that our only associate member, Geo. Lorenz, had died since our last meeting, and moved that committees be appointed; the president announced after the motion that he would appoint such committees later. The outing committee reported progress and L. W. C. Tut-hill was elected to membership.

Arthur Cowee, the gladioli specialist of Berlin, N. Y., gave a most interesting talk on the commercial phase of gladioli culture. Mr. Cowee has the

natural gifts of a platform speaker; the views thrown on the screen were not only beautiful in themselves, but gave also a pictorial review of gladioli culture at Meadowvale Farm, all of which made the illustrated talk one of the pleasantest in the club's history.

F. R. Pierson in his usual pithy style gave some interesting data and reminiscences of the recent National Flower Show held in Boston. He said that success had come through hard work, organization, and a small executive committee everybody helped, good fellowship prevailed and they had had a good show manager. Mr. Pierson mentioned incidentally that they had spent \$1,500 in advertising, \$1,000 in music, given almost \$8,000 in premiums and took in almost \$19,000 at the ticket office and the guarantors will get their money back. He thought the next National Show should be held in the west, then the one following that should be here in New York, so as to alternate these big affairs between the east and the west. A vote of thanks was tendered to the Bostonians who so nobly entertained the New Yorkers in room 14 of the Mechanics Building, and at the smoker in Hotel Somerset; also to the Boston Gardeners' and Florists' Club for similar courtesies shown to our members during their stay in Boston.

Several floral exhibits graced the tables. John Lewis Childs received the thanks of the club for Richardia Elliottiana, Chas. H. Totty and F. Whiting were similarly rewarded for carnation Wodeneth, this carnation having already received the club's certificate. Wm. Sim, Cliftondale, Mass., was awarded a cultural certificate for display of sweet peas, 22 vases in all. The Lord Frost Proof Plant Box Co., Minneapolis, Minn., showed samples of plant boxes of waterproof paper.

DETROIT, MICH.

### Indianapolis.

#### EASTER PROSPECTS

All indications point to a big business for Easter. Flowers are plentiful and the demand is brisk. Carnations, however, seem to be a little off crop with most growers in this locality, and it is doubtful whether there will be enough to supply the demand. The market will be overcrowded with bulb stock.

#### NOTES.

A brainy Indianapolis florist has been talking commission house so long and so persistently that finally he has succeeded in getting together a number of the different growers throughout the state with the idea of starting up a commission house in Indianapolis. There is but little doubt but that there will be at least one commission house in Indianapolis next fall, it is just a question as to who will make the first move. The establishing of a commission or wholesale house in this city will be a risky thing, because it is uncertain how the retail men will look upon it. Peter Weiland of Newcastle declares, that inasmuch as he made a success of the commission business in Cincinnati, he can do it in Indianapolis, simply by treating his customers "right." He says that inasmuch as he is investing a large sum of money in erecting ten houses, 25x300, he is determined to have his own outlet for his flowers, either here or in Cincinnati. He favors Indianapolis because it will be more convenient and accessible.

Two new novelties are being offered to the florist trade. One is a mission hanging basket manufactured by the Hoosier Novelty Co., made of stained oak slats so fastened at the corners in pig-pen fashion that the baskets can be knocked down for shipping and storing purposes. The prices are reasonable and the baskets ought to prove a great seller. The other is a new style of mission jardiniere stand and hanging-basket-tripods for out-door use. These are made by the American Novelty Co., and the manufacturers have so much confidence in their wares that they allow the florist to display them for a time to sell upon demand, and take back what are unsold.

E. A. Nelson will use for the first time on Easter day the new delivery wagon which he recently bought from Guedelhoefer. The wagon is a new style for Indianapolis florists. The bed is raised at least four feet from the ground and appears to be very high. Besides this Mr. Nelson has also put into his barn a new wagon for bedding-work purposes. He has a fine lot of hydrangeas for Easter.

The Indiana State Florists' Association held its quarterly big Meeting at the Elks' Club on April 5. The chief attraction was a lecture on foreign

floriculture by E. G. Hill, illustrated by stereoscopic views. About fifty were present, and all stayed for the bubbling refreshment.

Smith & Young will soon have some adiantum for cutting. This is a new line for them, which they will have no trouble in selling locally for there is a scarcity of good adiantum. They expect to pick a large crop of sweet-peas for Easter.

One of the large plate glass windows in A. W. Brandt's store was completely shattered by the wind last Friday. The loss was covered by insurance. Not a plant nor a single cut flower was damaged by the smash-up.

Carl Sonnenschmidt has just bought the best type of the Victrola talking machine, which helps him to while away the weary hours in the Cumberland country.

Lester A. Benson is sowing envy in the hearts of all his brother florists with his new Buick automobile delivery outfit. He has a colored chauffeur.

Pahud has a new Indian motorcycle for delivery purposes. This firm has found the motorcycle to be practical in their business.

Reinholdt Schilling will probably leave on Tuesday after Easter to join the forces of J. A. Valentine's store in Denver, Colo.

John Bertermann and wife have returned from French Lick where they spent the past ten days in pre-Easter recreation.

Fred Huckriede expects to cut over 5,000 daffodils for Easter.

Frank Hasselman was on a hunting trip last week.

A. W. B.

### Yonkers Horticultural Society.

A well attended meeting of the society was held April 7 and several matters of interest were discussed. The executive committee reported that the June show will be held on June 14 and all seems favorable to a most successful exhibition. Three associate members and one active member were elected and two active and one associate were proposed.

Some fine melons, Sutton's Scarlet, were exhibited by S. Untermyer, M. Grey, supt., and received a cultural commendation. Louis Melliott exhibited the new rose, Veilchenblau, but the variety did not impress members as being suitable for forcing. As one wit remarked, "Looks like a Rambler with the blues."

Hamilton Scott was elected president and Messrs. Rennison and Melliott were nominated members of the executive committee. H. Nichols read an interesting and instructive paper, taking as his subject, "Hardy Roses." The meeting closed after according the essayist a standing vote of thanks for his services.

Galdwell the Woodsman Co., Evergreen, Ala.

Tarrytown, N. Y.

The Tarrytown Horticultural Society held its regular monthly meeting, March 31. President Brunger in the chair, and a large number of members present.

The monthly prize for twelve best roses, offered by J. W. Smith, was awarded to W. MacBean Garrison for a fine vase of Killarney and White Killarney. James Stuart, Mamaronck, second, for a vase of the same varieties. A hearty vote of thanks was accorded to W. G. Gomersall, Nyack, for an able and instructive essay on "Herbaceous Plants and Hardy Shrubs: How to Harmonize Them for Effect in Landscape Gardening." For the April meeting E. W. Newbrandt offers a prize for the best flowering plant.

GEO. MCINTOSH, Cor. Sec.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rock-mere, Marblehead, Mass., June 20-22, 1911.

The date of Easter in 1912 is April 7.

ONIONS selling at \$3 per sack make a new high record.

AND now the English seedsmen are afflicted with domestic seed bill troubles.

The acreage planted to onions this spring is estimated at 50 per cent in excess of 1910.

MAIL trade in seed slumped badly since March 25, while counter trade has been none too good.

KINSMAN, OHIO.—Wilbur O. Christy, the well-known gladiolus grower, is now located at Warren, Ohio.

POTATOES are very scarce in states west of Chicago. Michigan, New York, and Maine have the supply.

VISITED CHICAGO: Carlos Jensen, representing L. Daehnfeldt, Odense, Denmark, enroute to the Pacific coast.

THE new book, "The Gladiolus," by M. Crawford and Dr. W. Van Fleet, contains a list of gladiolus species which breeders will find very useful.

The Hotel Rock-mere has been selected as headquarters for the annual convention of the American Seed Trade Association at Marblehead, Mass., June 20-22.

NEW YORK.—It is the general opinion among seedsmen that business during March has fallen a little below the usual volume, caused, it is believed, by the almost continuous cold weather during that month.—Arthur T. Bodington and wife sailed for Bermuda April 5.—Henry Nungesser sailed for Europe on the S. S. Mauretania April 5.

ST. PAUL, MINN.—The seed bill passed by the legislature appropriating \$25,000 for reseeding the burned districts in Northern Minnesota was amended by the senate committee on finances so that seeds will be distributed only to actual settlers, and no person could apply for seed to sow more than 25 acres. Requests were to be made before April 1, 1911.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

SAN JOSE, CALIF.

J. E. NORTHROP and daughter Isabel of Minneapolis, Minn., are at Old Point Comfort, Va., for the Easter vacation.

THE French bulb Syndicat de defense des Interets Agricoles de Toulon at its session of April 9, fixed the prices of Narcissus Paper White Grandiflora at 20 francs, white Roman hyacinths, 11 to 12 centimeters, at 60 francs and the size 12 to 15 centimeters and up at 80 francs. The crop is reported as an average one.

DES MOINES, IA.—The state assembly has passed a law allowing the sale of insecticides and fungicides, which was heretofore prohibited to others than registered pharmacists, providing the article is labeled with its true name, and if poisonous, marked "Poison," and the poisonous contents conspicuously and correctly stated in conformity with the national insecticide act.

CHICAGO.—Prices on the board of trade April 12 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.—Seedmen as well as Greeks are prevented from making sidewalk displays by the recent order of the police department.—Vaughan's Seed Store reports good sale of all spring bulbs, with steady demand for storage stock.

### Spencer Sweet Peas.

G. Taylor has a very interesting article in the current issue of the Gardeners' Chronicle, on the pollination of sweet peas, which gives the results of a very close study of the subject, and numerous observations upon the various insects which visit the flowers. From these it would appear that while the old form was entirely self-fertilizing, and consequently bred true without any precaution or assistance, the Spencer forms are not fully adapted to self-fertilization. The result of this is, that as is well known to all practical growers, the Spencer class are most indifferent seeders, and it appears that when they are assisted by bees and other insects, the gain in crop is more than balanced by the introduction of a serious proportion of rogues through cross-fertilization. It seems to us that the practical outcome of this is that growers will in future be obliged to secure purity of stock by growing considerable breadths of a variety isolated from other sweet peas sufficiently to prevent insects carrying the pollen from one to the other, at least to any appreciable extent. Probably such complete isolation as is needed by the Brassica and other plants liable to wind fertilization would not

be necessary in this case, but only sufficient distance to induce insect visitors to confine their attentions to one particular plot.—Horticultural Adviser.

### The New York Seed Bill.

EDITOR AMERICAN FLORIST:—

I herewith enclose copy of Assembly Bill, Int. No. S34, which was introduced by Assemblyman Gregg on March 3, 1911, in the New York state legislature. The bill has been read once, and was then referred to the committee on agriculture. The writer is arranging to have a hearing on the bill, which will take place some time after April 17, as the legislature has adjourned until that date, owing to the recent fire in the state capitol building at Albany. As soon as I am advised as to the exact date of the hearing, will communicate further with you.

You will note after reading this bill that it is of the utmost importance, not only to the seedsmen of the state of New York, but to the seedsmen in other parts of the country as well. Unfortunately, the matter has come up at a very inopportune time of the year, but I hope as many New York seedsmen as possible will be present when the hearing on the bill comes up.

MARSHALL H. DURYEA.

[The full text of the bill is reproduced on the opposite page. Some severe and unfair features are:

Omission of the words "willfully and knowingly," making a warehouse error a crime.

Prison penalty on merchandising not connected with human life and applied unnecessarily to this business, which, because of its confidential nature, would be seriously crippled if not destroyed by even a trial, surely by a conviction.

Requiring the seedsman to guarantee what percentage of the seed will germinate when he has no knowledge of the conditions under which the seed will be planted; this condition can only prove a dead letter.

Releasing the grower of seeds mixed with weed seeds from all responsibility for disposing of such seed, though personally knowing the same to be noxious.

Publishing the findings of inspectors without provision for a previous hearing of the charges.—Ed.]

### Florists and Seedsmen, Scratch or Poultry Food

Sell Your Own  
We will make it for you, under your own brand, for \$28.00 per ton. Seed today for sample 100 lb. bag \$1.50. Mr. C. E. Jensen, of Atlantic City, N.J., on Oct. 27th, 1910, writes as follows: "I want to state that your three grades of Poultry Food—Chick Starter, Developing Food and Square Deal"—Scratch or Poultry Food—stands without an equal today. They are perfect mixtures and sound in grain and a pleasure to handle."

**L. DAHNFELDT, Odense, Denmark**

Text of the New York Seed Bill Introduced in the Assembly and Referred to the Committee on Agriculture, March 3, 1911.

### PAGE 1.

*The People of the State of New York, represented in Senate and Assembly, do enact as follows:*

1 Section 1. Article fifteen and sections three hundred and forty  
2 and three hundred and forty-one of chapter nine of the laws of  
3 nineteen hundred and nine, entitled "An act in relation to agri-  
4 culture, constituting chapter one of the consolidated laws," are  
5 hereby renumbered to be article sixteen and sections three hundred  
6 and sixty and three hundred and sixty-one, respectively.  
7 § 2. Such chapter is hereby amended by adding thereto a new  
8 article fifteen thereof, to read as follows:

### ARTICLE XV.

#### SEEDS.

11 Section 340. Inspection and sale of seeds.  
12 § 341. Samples, publication of results of examination.

EXPLANATION—Matter in *italics* is new; matter in brackets  
[ ] is old law to be omitted.

### PAGE 2.

1 § 340. Inspection and sale of seeds. Within the meaning of  
2 this article "agricultural seeds" are defined as the seeds of al-  
3 falfa, barley, Canadian blue grass, Kentucky blue grass, buck-  
4 wheat, alsike clover, crimson clover, red clover, white clover, mon-  
5 mouth clover, field corn, meadow fescue, millet, oats, orchard grass,  
6 rape, red top, rye, sorghum, timothy, wheat, peas, beans, vetch,  
7 cabbage, turnips, cauliflower, celery and onions, which are to be  
8 used for sowing or seeding purposes. No person, firm or corpora-  
9 tion shall sell, offer, exchange or have in his possession for sale for  
10 the purpose of seeding any cereals or seeds as hereinafter men-  
11 tioned, in quantities exceeding ten pounds, except cabbage, turnips,  
12 cauliflower, celery and onions, which shall be not to exceed one  
13 pound, unless every receptacle, package, sack or bag containing  
14 such seeds, or a label attached thereto, is marked in a plain inde-  
15 lible manner as herein provided. Said marks shall be on the  
16 receptacle, package, sack or bag itself if there is more than three  
17 per centum of injurious foreign seed. Marks shall include the  
18 following:

19 a. The full name and address of the seller.  
20 b. The name and the kind of the variety thereof of seeds except  
21 in the case of mixtures prepared for special purposes, when they  
22 shall be labeled as mixtures, giving the per centum of each kind  
23 and variety.  
24 c. The name of any foreign injurious seeds present of three per  
25 centum or over by count and both the name and per centum of the

26 following adulterants present: Yellow trefoil in any variety of  
27 clover; yellow trefoil, burr clover, sweet clover or dodder in al-

### PAGE 3.

1 falfa, Canadian blue grass, in Kentucky blue grass; meadow  
2 fescue or rye grass in orchard grass, or orchard grass in meadow  
3 fescue.  
4 d. A guaranty, stating the per centum of purity of the contents  
5 of the package by count, which shall upon official examination in  
6 no case fail to exceed three below the guaranteed per centum.  
7 All persons offering agricultural seeds for sale for sowing or  
8 planting purposes in the state of New York shall make or cause  
9 to be made a test of their germinating powers and shall state on  
10 such package or receptacle the maximum percentage of the seed  
11 contained therein which are guaranteed to germinate.  
12 The provisions of this article shall not apply to any person grow-  
13 ing and selling agricultural seeds to seed merchants, or shipping to  
14 a general market to be cleaned or graded before being offered or  
15 exposed for sale for seeding purposes.

16 § 341. Samples, publication of results of examination. Samples  
17 of seed shall be taken in duplicate. Both samples shall be sealed  
18 promptly and one shall be tendered and, if accepted, shall be de-  
19 livered at the time of taking to the person apparently in charge  
20 and a receipt taken therefor, unless refused. The commissioner  
21 of agriculture is hereby authorized to publish in bulletin form, not  
22 later than February first of each year, the findings of the seed  
23 examiners, together with the names and addresses of the person or  
24 persons from whom the samples examined were taken. Examina-  
25 tions and tests shall be made at the New York experiment station  
26 at Geneva, by the agents of the department of agriculture who are  
27 or may be appointed to take samples of commercial fertilizers and

### PAGE 4.

1 feeding stuffs, with the date of the test. If upon testing by the  
2 New York agricultural experiment station at Geneva, said sam-  
3 ples of seed shall fall more than ten per centum below the guar-  
4 anty, the dealer shall be liable therefor as for a violation of this  
5 article. Any person who shall violate any of the provisions of this  
6 or of the preceding section of this article shall be guilty of a mis-  
7 demeanor, and for each offense shall, on conviction thereof, be  
8 fined not to exceed one hundred dollars for the first offense, and  
9 upon conviction for each subsequent offense not exceeding two hun-  
10 dred dollars, or imprisonment not exceeding one year, or both, at  
11 the discretion of the court.  
12 § 3. This act shall take effect August first, nineteen hundred  
13 and eleven.

# The Two New Carnations for 1911

## WHITE WONDER.

The largest and most productive white carnation. Has all the white varieties outclassed.

## GLORIOSA.

Pure glistening bright pink. A decided improvement over all the pink varieties in color and every other respect.

The two carnations that will prove to please all growers and the most critical buyers. Commercially they will head the list of varieties grown in the future. Do not fail to grow these varieties that have been inspected and have met the approval of many of our best carnation growers. If you have not already ordered, **Do So Now.** Next delivery—White Wonder March 27, and Gloriosa April 4. Our March 15 delivery of White Wonder and March 15 and 27 delivery of Gloriosa were all sold in 5 days after our advt. appeared.
